The sign that means universal Hupmobile service throughout the United States and Canada—service that costs the owner nothing.

A Universal Service for a Universal Car

FOR much the same reasons that you bought this almanac you should place the Hupmobile above all other cars when you invest in an automobile.

In the book you get accurate, useful information that is universal in its application.

With the Hupmobile you get free service wherever you live or wherever you go—a universal service that costs you not a penny.

You know that the Hupmobile is a universal car.

And you probably know, also, that its world-wide reputation is based on its economy, its reliability and its splendid performance.

All other considerations aside—taking no account of Hupmobile quality and value—you would still be perfectly safe in buying a Hupmobile on the strength of its good name alone.

But we go still farther in order to assure your satisfaction—farther than any other manufacturer goes—and provide a free service that takes care of your car, no matter where you live or tour.

This Sign, This Book, Make the Service Free to You

WHEN you buy a Hupmobile you receive a book of service coupons.

The coupons cost you nothing.

They are the same as cash at any Hupmobile service station.

You exchange them for the time and labor required to make the inspections and adjustments that must be made to keep any car at its highest efficiency.

We believe the Hupmobile to be the best car of its class in the world.

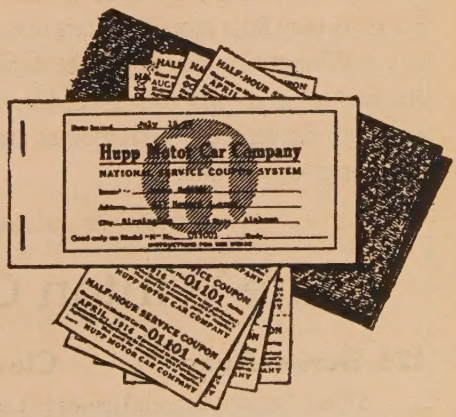
And we believe Hupmobile service to be the most complete and comprehensive yet devised—as the car deserves.

You should know all about this free service before you buy any car.

We shall be glad to send the details if you write; or any Hupmobile dealer will explain them to you.

Hupp Motor Car Company, Detroit, Mich.

This leather bound coupon book is given you when you purchase a 1916 Hupmobile. The coupons are exchangeable for labor on your Hupmobile at any Hupmobile service station in the United States or Canada.



QUALITY *NOT* LIMITED

Every maker who advertises his wonderful low price acknowledges that his car is in the class where price counts more than anything else—that he is in competition on a price basis.

You know what that means. In all such cars, every dollar's worth of value that can be put into them is figured out in advance, and is *limited* by that low selling price. Hence, low price means low quality.

How hopeless it is, then, to expect in a low-priced car that thoro and continuing satisfaction that the owner of the high-grade Winton Six enjoys! For the Winton Six is designed and built—not to meet a low price, but to satisfy high expectations, to possess every merit that contributes to an owner's delight. Its quality is not limited by price restrictions, nor by other makers' standards. Yet the Winton Six costs very little more than cars of ordinary worth. And when you buy a Winton Six you enjoy the additional advantage of having it finished to meet your own taste, thereby giving your personal car a touch of distinction. Winton Sixes are never mistaken on the street for commonplace cars.

Write for catalog to-day

The Winton Company

124 Berea Road **Cleveland, Ohio, U. S. A.**

Direct Factory Branch Houses in Leading Automobile Centers.

WE ENJOY OUR BUSINESS

Frankly, we don't want to sell too many Winton Six cars. If we were to make 7,000 or 10,000 cars every year, we would be forced to do what every other quantity maker does—rush 'em out, paint 'em all alike—and hope the buyers would keep their troubles to themselves.

As it is, by manufacturing less than ten cars a day, we can give every single Winton Six the most painstaking workmanship, the most thoro testing, and special colors to please the individual buyer's personal preferences. And—what is even more important—because we limit the number of cars we make, and because we put into them the best of everything, we are fully able to render to owners a character of service that is without equal in the American automobile industry. If a Winton Six owner wants attention, if his car isn't up to the very top notch of perfection, we make it our business to render service promptly and cheerfully, and we're never satisfied until he is.

Then, too, what a wonderful satisfaction there is in making cars for men and women who appreciate high quality! We enjoy manufacturing Winton Sixes, for it is a genuine delight to have the patronage of the fine type of men and women who buy and use them.

BURPEE'S SEEDS GROW

Confidence is the one thing that makes possible the commerce of the world. It is the greatest factor that enters into a purchase of seeds, because you are not buying a finished product, but only the means by which your garden may be either a success or a failure. Seeds—good or bad—may look the same, but their resulting crops—how different! You cannot afford to risk a season's effort with seeds of unknown quality. When you buy BURPEE'S SEEDS the element of doubt is absent. The confidence of many thousands of pleased and permanent customers has been secured by the Burpee Idea of Quality First—"to give rather than to get all that is possible." Confidence of our customers—combined with the efficient Burpee Service—has built the World's Greatest Mail-Order Seed Business.

The HOUSE OF BURPEE

has introduced more distinct new varieties of vegetables and flower seeds that are now in general cultivation than have any three other American firms, but never have we catalogued any one of these new varieties until it had passed all the exacting requirements of the Burpee Standard. This Burpee Standard is maintained by rigid tests at Fordhook Farms, America's Largest and Most Complete Trial Grounds. These tests are made each year for the purpose of strengthening this Bond of Confidence between our customers and ourselves.

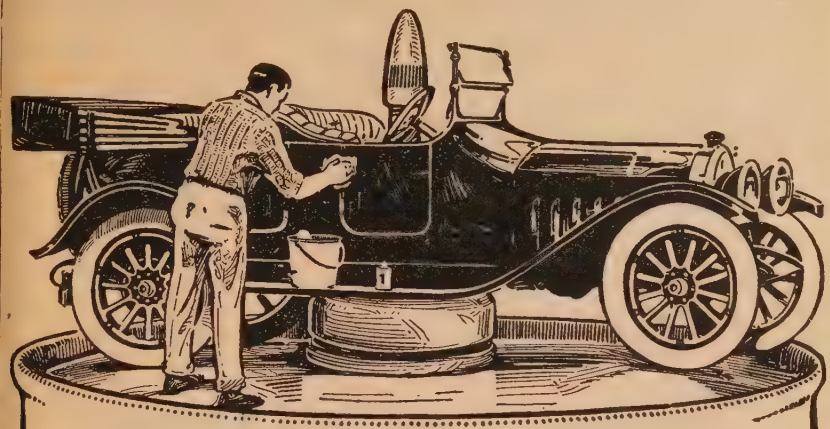
Burpee's Fortieth Anniversary

Leading American Seed Catalog for 1916

This "Silent Salesman" is a bright, new book of 182 pages, with hundreds of illustrations and carefully written descriptions of vegetables and flowers. It is a safe guide to success in the garden—of real value to every one who plants seeds either for pleasure or profit. Write for it today, and kindly mention World Almanac.

W. Atlee Burpee & Co.

Burpee Buildings, Philadelphia



3-in-One Oil Is the Thing

—to keep the car body looking right

—to keep the nickel and brass always bright

—for oiling commutators, self-starters and magnetos.

Try this new way of polishing your car—the best way.

Simply wipe off the dust. Put a few drops of 3-in-One Oil on a rag that has been wrung out in clean water. Rub the painted parts briskly with this rag. And then shine up with a dry cloth. Do this and the body of your car will not only be well polished, but in addition all painted and varnished surfaces will be hardened so that no peeling, cracking or chipping can occur.

Besides this, just a little 3-in-One rubbed on your wind-shield will prevent obscurity of vision. And for lubricating your commutator, self-starter or magneto there's nothing like it, because 3-in-One works out all particles of dirt from the bearings; won't let other dirt get in, and never heats up even at 5,000 revolutions per minute.

In your tool box there should always be a "Handy Oil Can" filled with 3-in-One Oil—for economy and efficiency. And in your home too, 3-in-One is just as important, it has a hundred household uses.

3-in-One lubricates sewing machines, locks and clocks. Cleans and polishes fine furniture and hardwood floors. Also prevents rust from forming on all metal surfaces; razors, guns, stoves, tools, nickel fixtures, etc.

3-in-One is sold in hardware, drug, grocery, housefurnishing and general stores. The "Handy Oil Can," filled with 3½ ozs. of 3-in-One Oil costs only 25c. The can alone is worth 10c. 3-in-One also comes in 10c, 25c and 50c bottles.

FREE To Automobilists and Housewives. A generous sample of 3-in-One Oil and "Dictionary of Uses" sent free. Write for them today—NOW.

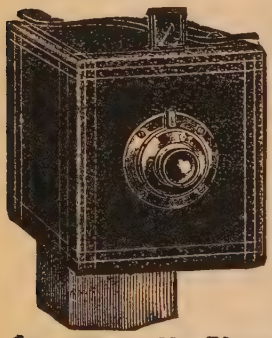
No Money In Advance

This Marvelous CAMERA ON FREE TRIAL!



Only 10,000 of these marvelous, instantaneous picture-taking and making cameras to be sent out absolutely on approval without a penny in advance just to prove that it is the most wonderful invention—the camera sensation of the age. So **you** must send for it **quick!** Just think of it—the new Mandel-ette

Takes and Makes Finished Pictures

INSTANTLY!

You press the button, drop card in developer and in **one minute** take out a **perfect, finished** post card photo 2½x3½ inches in size. Camera, itself, is about 4½x5x7 inches. Loads in daylight 16 to 50 post cards at one time.

No Films—No Plates —No Dark Room

Not a bit of the muss and bother of the ordinary kodak or camera. It is instantaneous photography! Universal focus lens produces sharp pictures at all distances. Pictures develop and print automatically. Can't overdevelop. Results positively amazing.

We Trust You

No difference who you are or where you live we will send you the complete Mandel-ette outfit absolutely on approval and give you 10 days to test it. If not satisfactory return it. If you wish to keep it, simply pay $1.00 when you get the camera and $1.00 per month until our special price of only $5.00 is paid. When you see what elegant pictures it takes—so quick, so easy, with no trouble at all—you'll be surprised.

Easy Payments—No Reference

No red tape of any kind. Monthly payments so small you'll not notice them. Simply fill out and mail coupon to-day. Send no money. No references required. Lots of fun and big profits.

No Experience Required

Chicago Ferrotype Co.
Desk 164, Ferrotype Bldg.
Chicago, Illinois

Desk 164
Ferrotype Building,
Chicago, Illinois

XIV

More Than Pleased

Your camera reached me O. K. and I was surprised at the work it does. I have taken several photos and some as good as I have ever seen taken with any camera. Everybody that sees the work of the "Mandel-ette" says it is fine and I am more than pleased with it.

Vernie Boyle, Northome, Minn.

Beats All Things Yet

The "Mandel-ette" received and opened up and in 20 minutes I had a splendid picture of my wife, fully developed and ready to look at. My, this beats all things yet.

T. J. Houts, Pastor,
Methodist Episcopal Church, South, Welch, W. Va.

Takes Pictures on Dark Day

I am perfectly delighted with the "Mandel-ette." I have had very good success—never before to have handled a camera at all. I can say it will do all you claim. I have taken a picture which shows a Mt. more than 4,000 feet away and on a very dark day.

Jas. H. Hubbard, Penhook, Va.

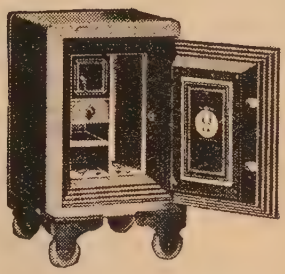
Anyone Can Use Them

Received the "Mandel-ette" and supplies Saturday evening. Sunday morning we began to take pictures and had very good luck. It is sure simple enough. Anyone can use them. We couldn't get along without ours.

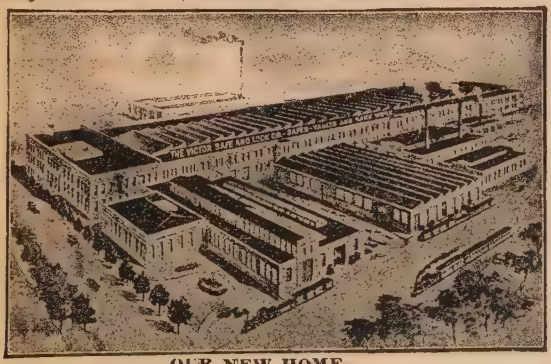
Mrs. R. U. Iddings, Mapleton, Ia.

Why Not Make $200.00 a Month—

That's $50.00 a Week, Almost $10.00 a Day



selling Victor safes and fireproof boxes to merchants, doctors, lawyers, dentists and well-to-do farmers, all of whom realize the need of a safe, but do not know how easy it is to own one. Salesmen declare our proposition one of the best clean-cut money-making opportunities ever received. Without previous experience YOU can duplicate the success of others. Our handsomely illustrated 200-page catalogue will enable you to present the subject to customers in as interesting a manner as though you were piloting them through our factory. Men appointed as salesmen receive advice and instructions for selling safes, giving convincing talking points which it is impossible for a prospective customer to deny. Why don't YOU be the first to apply from your vicinity before some one else gets the territory? We can favor only one salesman out of each locality.



OUR NEW HOME.

Wide-awake men are prompt to take advantage of our special inducement, and notwithstanding that the completion of our new factory will enable us to double our output, indications point to an ever-increasing demand which will continue to tax our facilities. We are spending many thousands of dollars enlarging our sales organization, but to learn all particulars it will cost you only the price of a postal-card. Just ask for "New Offer 58."

THERE'S A HINMAN MILKER NEAR YOU

The Hinman equipment on the farm of Mr. I. S. Merrell of the Merrell-Soule Co., Manufacturers of the celebrated None-Such-Mince-Meat, Milk Powder. etc., Syracuse, N. Y. The operator is only 10 years old.

Why the Hinman Milker Excels

The Hinman is the only milker with all the following features:

One cow milked at a time with each unit; no vacuum in pail; rapid pail changing system; no piping—just a simple drive rod; only two moving parts; visible milk flow; simple method of keeping record of each cow.

The Hinman is noiseless. The cows stand in perfect contentment and don't move a muscle.

The Hinman pump gives a hand-like squeeze and produces vacuum gradually, applying it to the teats with a gentle hand-like action. Complete vacuum break 45 times a minute. No possible danger of cows getting too strong suction. Easily adjusted to hard or easy milkers.

In five seconds the Hinman cups are on and the milk is flowing swiftly, silently into the pail.

In the Hinman the vacuum is confined to the chamber—and not to the pail—otherwise it would require a heavy, cumbersome pail with a heavy, complicated, pulsating device. A less amount of vacuum and hence less power is required. The inside of the chamber is smooth—no working parts.

When the pail is full, you simply change the cover and don't stop the machines milking. You may then weigh and record each cow's milk.

A one-minute change and the Hinman Milker is at work again.

There are Hinman Milkers in every dairy vicinity. You will find many of them operated by young boys, who milk at a rate of 20 to 25 cows an hour—do it better and get more milk and milk more sanitary.

The Hinman, "the milking machine of quality," was awarded the gold medal at the Panama-Pacific Exposition and it has received many other gold medals and diplomas at dairy cattle congresses and great fairs.

The Hinman saves time and men, morning and night. The average equipment costs about the same as a binder, and the Hinman works twice a day the year around, year after year. It is made by specialists—only this one product for eight years and

"A Success for Eight Years"

When this ALMANAC goes to press (September) 300,000 cows are milked daily by the Hinman Milker.

Just drop a postal card for one of our latest catalogs and the names of your nearest Hinman Milker owners.

EVERY STUMP HOLDS A DOLLAR

The ground covered by an average stump and its roots will grow 25c. to 50c. worth of food crops per year. A hundred-stump acre will produce $50 worth of food per year after clearing. Why leave these dollars buried under stumps and pay taxes on stump land when the whole world offers big prices for American farm products?

DU PONT

Red Cross Stumping Powder

Will get them out in cold and wet weather, when you have plenty of time. Clear land now and crop it next Spring. This explosive is low freezing, hence works well up to Winter weather. It takes less Stumping Powder in wet weather than in dry. Turn the cold wet days of Fall into cash. Write for Free Handbook of Explosives No. 385, which explains in picture and story the many uses for Du Pont Red Cross Farm Powders.

How Many Dollars Are Buried In Your Farm?

Canada is Calling You to her Rich Wheat Lands

She extends to Americans a hearty invitation to settle on her FREE Homestead lands of 160 acres each or secure some of the low priced lands in Manitoba, Saskatchewan and Alberta.

This year wheat is higher, but Canadian land just as cheap, so the opportunity is more attractive than ever. Canada wants you to help to feed the world by tilling some of her soil—land similar to that which during many years has averaged 20 to 45 bushels of wheat to the acre. Think what you can make with wheat around $1 a bushel and land so easy to get. Wonderful yields also of Oats, Barley and Flax. Mixed farming is fully as profitable an industry as grain growing.

The Government this year is asking farmers to put increased acreage into grain. Military service is not compulsory in Canada, but there is a great demand for farm labor to replace the many young men who have volunteered for service.

The climate is healthful and agreeable, railway facilities excellent, good schools and churches convenient. Write for literature and particulars as to reduced railway rates to Superintendent Immigration, Ottawa, Canada, or to

Edwards Metal Shingles

Save Time, Money, Trouble

And they look better. A big list of users throughout the country write that they wouldn't use any other kind. Edwards "Tightcote" Galvanized Metal Shingles stay on—and stay long. Fire can't hurt them. They lock together by the wonderful Interlocking Device, and are weather-proofed and water-proofed by the Edwards "Tightcote" galvanizing process. Thus your roof covering becomes virtually one-piece the Edwards way.

Edwards "Reo" Tightcote Galvanized Cluster Shingles can be bent, twisted or struck by lightning, but galvanizing will not crack or flake. Edges as well as sides rustproof. One man can lay—hammer and nails only tools needed. Interlock—can't come off—nail holes protected. Last as long as building. Cost less than good wood shingle or any other good roof. Sheets 5 to 12 feet long, covering width 24 inches.

Free Lightning Insurance

A $10,000 bond is your protection against lightning loss. This insurance costs you nothing.

So you save EVERY way, and have a better roof covering when you use Edwards Galvanized Shingles.

Write for Free Books

Tell us what kind of a building you want to cover—from a small shed to a handsome residence. We will then send the particular illustrated Roofing Booklet showing the very Edwards Roofing for the purpose. These books also show all styles of Edwards Siding and Building Material, with lowest prices. Freight paid by us. Samples mailed free.

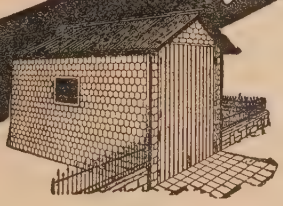
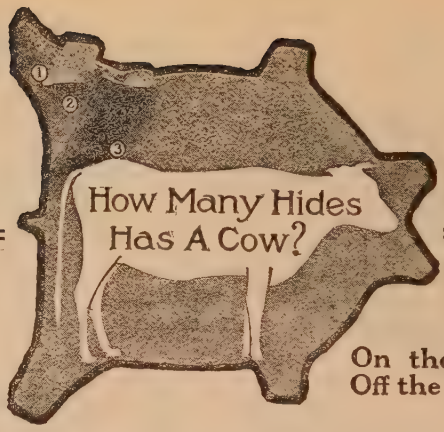
Edwards Steel Garages



All Sizes, All Prices

Ready to put up. Anybody can do it in a jiffy. Just the style and size for your car. Strong, handsome, durable. Will save many a dollar. Insures car against theft and joy-riding. Send for complete 64-page catalog, fully illustrated. Free for the asking.



On the Cow—One
Off the Cow—Three

Perhaps You Know

—that practically 90% of all cowhide is split into sheets because it is too thick for upholstery. Maybe you *know* that each hide can give only one top-side layer of real grain leather and that all the other layers are merely "spongy splits" coated and embossed to look like the real stuff.

But Do You Realize

—that these splits which are *sold* as genuine leather are not *real* grain leather? That's the vital point. Now let's consider

The Ideal Upholstery Material

DU PONT FABRIKOID

Guaranteed Superior to Coated Splits

Fabrikoid is a substitute for leather and honestly sold as such. It has all the beauty and luxurious feel and appearance of the finest grain or Spanish leather with twice the strength of coated splits. It is water, dust and grease proof—soft and pliable. Furthermore, it is guaranteed for one year. And back of this guarantee stands the century-old Du Pont reputation for integrity of purpose, superiority of products and financial responsibility.

Motor Quality Fabrikoid for automobile, carriage and fine buggy upholstery is being used on thousands of this year's leading cars.

Craftsman Quality Fabrikoid for furniture upholstery and home decorations has been adopted by some of the most exclusive upholsterers and furniture manufacturers in the country. Leading department stores everywhere sell it.

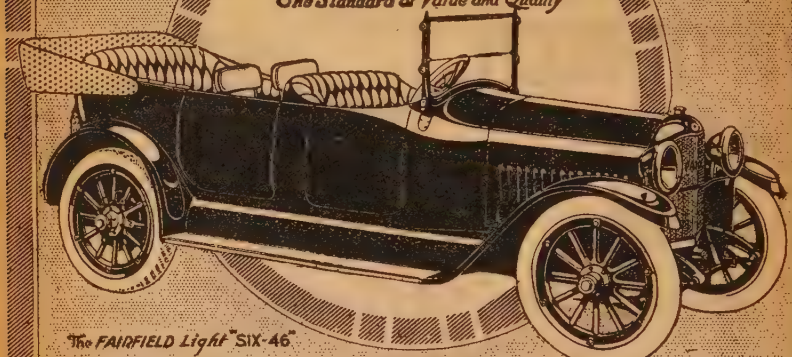
"The Name Tells a True Story"

PAIGE

The Standard of Value and Quality



The FAIRFIELD Light "SIX-46"

WE ASK YOU TO JUDGE THIS CAR BY ITS QUALITY ALONE

The Paige "Six-46" sells for the astonishingly low figure of $1295. That, in itself, is impressive.

But, quite irrespective of price, we want you to see this six cylinder car—examine it—ride in it—and *judge* it from a standpoint of Quality alone.

It is by no means difficult to manufacture a car for a *price*.

It is, however, quite a different thing to produce a motor car of *one hundred point excellence* and still maintain a selling price to the consumer which is not prohibitive.

In building the Paige "Six-46"—as in building all Paige cars past and present—we have been governed only by the unfaltering Paige standards of Value and Quality.

So, we urge you to see this car because it is a *good car*.

We urge you to buy it with absolute confidence because it bears the Paige name plate—an enduring guarantee of fair dealing and honest manufacturing.

7-passenger "Six-46" **$1295** 5-passenger "Six-36" **$1095**

GOODRICH Safety Tread Tires

When the last word has been said about tire construction the test the motorist demands is **mileage facts**—not claims.

In 1915 Goodrich Safety Treads gave more miles for every dollar of cost than any other tire on the market.

Enormous production and "Customer First" policy have instituted Goodrich Fair-List prices—Goodrich Safeties cost less than any other standard Non-Skid. Cost less—and give more!

Cost per mile figures must convince you that Goodrich Safety Treads are your **one** best buy.

The B. F. Goodrich Company

Factories: Akron, Ohio

Here's a Better
Than Father Ever

YES—and there's no doubt about it, as much as we like to fool ourselves once in a while that this or that article is not as good as it used to be.

Let us tell you a little something about the rubber boots that Father wore.

In almost every particular they were just the same sort of boot that you were compelled to buy, up to about two years ago.

This is the reason why: For forty years or more practically no improvements were made in building rubber boots and shoes.

The original method of sticking a boot together by hand still prevailed. If the man that did the sticking work was mighty careful, you had a fairly good job, but in the majority of instances the boot or shoe wore out before its time—that is, it began to peel, crack or split apart because it was not solid piece construction.

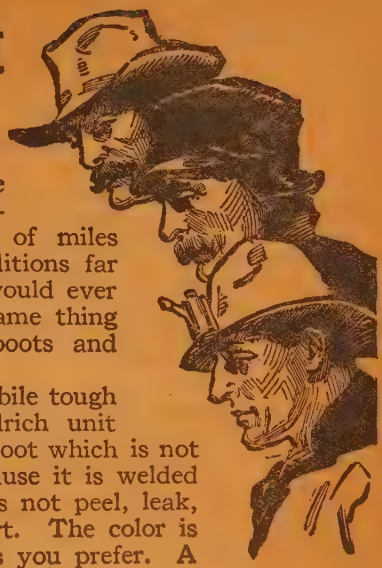
Now, here is where the largest rubber factory in the world, makers of the justly famed Goodrich Safety Tread Tire, took a hand and originated what is termed the "Hipress" process ("Hipress" is in reality short for high pressure) for making rubber boots and shoes.

We figured that if we could make unit molded tires—and "unit molded" means driving the different layers of fabric together under tremendous pressure

GOODRICH

"HIPRESS" Rubber Footwear

Rubber Boot Owned!



so that they form one inseparable whole—and have those tires deliver thousands upon thousands of miles of satisfactory service under conditions far more severe than a rubber boot would ever go up against, we could do the same thing in the manufacture of rubber boots and rubber shoes.

So we took this same automobile tough tire tread stock, and with Goodrich unit molded construction, produced a boot which is not only shaped to the foot, but because it is welded together like a Goodrich tire, does not peel, leak, crack or split apart. The color is brown or white, as you prefer. A better product than Father ever wore or than any of us could buy until the Goodrich Company brought out "Hipress"—the brown or white boot "with the red line 'round the top."

And once more, don't forget about this

"red line 'round the top"

It points out the genuine—always identifies the "Hipress" rubber boot and shoe.

The B. F. GOODRICH COMPANY

are the originators of the "Hipress" Process and the first to make Rubber Boots and Shoes in Brown or White colors; all others are inferior imitations.

WHITE TRUCKS

Awarded the GRAND PRIZE

BY THE PANAMA-PACIFIC INTERNATIONAL EXPOSITION AT SAN FRANCISCO

THE ONLY GRAND PRIZE—THE HIGHEST AWARD FOR MOTOR TRUCKS

Was conferred upon White Trucks by the Superior Jury of Award, as officially announced by the Secretary of the Jury under date of August Second.

This is the ONLY GRAND PRIZE received by any motor truck at the Panama-Pacific International Exposition.

This decision of the Superior Jury of Award reflects the opinion of the largest users of motor trucks throughout the world—and is in accordance with the actual service results of motor truck experience. The points of merit upon which the Grand Prize is awarded are identical with those that have determined the selection of White Trucks by America's foremost firms in every line of business.

White supremacy in the motor truck industry is thus recognized by the highest award that can be bestowed by the greatest exposition the world has ever known—just as this supremacy has been recognized by motor truck users for many years.

Free—Six Big Issues of Investing for Profit

If you will simply send me your name. Special Introductory FREE Offer. Six fine Monthly Issues—each worth $10 to $100 to you.

How much do *you* know about the Science of Investment? Do you know the *Real* Earning Power of your money? What is the difference between the *Rental* Power and *Earning* Power of money? Do you know how $100 grows into $2,200?

Why you should get **Investing for Profit:** Only one man in a thousand knows the difference between the *rental* power and the *earning* power of his money. Few men know the underlying principles of incorporation. Not one wage earner in 10,000 knows how to invest his savings for profit, so he accepts a paltry 2% or 3% from his savings bank, while this same bank earns from 20% to 30% on *his money*—or he does not know the science of investing and loses his all.

Russell Sage said: "There is a common fallacy that, while for legal advice we go to lawyers, and for medical advice we go to physicians, and for the construction of a great work, to engineers—financing is everybody's business. As a matter of fact, *it is the most profound and complicated of them all.*"

So let me give you just a glimpse of the valuable investment information you will et in my six big issues, "The Little Schoolmaster of the Science of Investment," a guide to money-making:

The Science of Investment.
The Root and Branch of the Investment Tree.
How to Judge a Business Enterprise.
Where New Capital Put Into a Corporation Really Goes.
"Watering"—Its Significance.
Idle Money vs. Active Money.
Capital Is Looking for a Job.
The REAL Earning Power of Your Money.
Investment Securities Are Not Investment Opportunities.
The Actual Possibilities of Intelligent Investment.
The Capitalization of Genius and of Opportunity.

Wait till you see a good thing—but don't wait till everyone sees it. You will then be too late. Never was a time more auspicious for a public campaign of education on the logic of true investment. A revolution in the financial world is now going on—to the profit of the small investor.

You are now face to face with your opportunity—if you have the courage to enter the open gate to the road of fortune.

I believe you will find much interest in reading my six issues of **Investing for Profit.** From cover to cover it contains the fundamental principles of investment it has taken a lifetime to gather—from my own experience and from every available authoritative original source of information.

If You Can Save $5 a Month or More

Don't invest a dollar in anything anywhere until you have read my wonderful magazine. **Investing for Profit** is for the man who intends to invest any money, however small, or who can save $5 or more per month, but who has not as yet learned the art of investing for profit. Learn how $100 grows into $2,200.

Use This Coupon for the Six Issues and Financial Advice FREE.

If you know how to invest your savings—if you know all about the proposition in which you are about to invest your hard-earned savings—you need no advice. But if you don't, if there is a single doubt or misgiving in your mind—I shall be pleased to answer any inquiries you may make, or furnish any information I can regarding the art of saving and making money through wise investment.

So sign and mail this coupon now. Get **Investing for Profit FREE** for six months. Ask me to put you on my mailing list for Free Financial Advice. Don't put this off. It means too much to you now and in the future. Sign and mail this coupon at once.

ANHEUSER-BUSCH

ST. LOUIS, U.S.A.

WHAT IS BEER?

In starting to tell what beer really is, it would perhaps be better to tell what beer is not. Beer is no more a dangerous intoxicant than coffee, with its small per cent. of caffeine, is a dangerous drug.

Beer is a beverage which has been in common use for thousands of years. Formerly it was brewed in the home. The experience of centuries proved that it was such a promoter of health and strength that the demand for it became so great that, with the development of co-operative manufacturing, it was found that it could be produced better and cheaper in the large brewery.

There is no mystery about beer. All beers are made from a watery extract of cereals such as malt, barley, rice and corn. The starch of the cereals is converted during the Brewing Process into sugar. Sometimes other sugar is used in addition. This sugary liquid is boiled and hops are added to impart their agreeable bitter taste and flavor. When cooked the liquor is fermented with yeast. There are beers that contain all of the ingredients above mentioned, but there is no beer brewed that does not contain at least one cereal, hops, water and yeast. There is nothing else used or needed for the brewing of beer in the modern brewery.

If there is anything harmful in any of these materials it is yet to be discovered. The same materials, with the exception of the hops, are used in the manufacture of many of the food products of to-day, and the hop has never been suspected of being anything but a desirable tonic herb or plant.

The fermenting process, which completes the beer and gives it its life and stimulating power, is the same process that goes on in cider making, but whereas the farmer making cider leaves much to chance, the brewer absolutely controls the ultimate result of his brewing. For by boiling his extract before fermenting it his liquor is sterilized, and the yeast used for fermentation is a pure culture especially made for beer brewing.

As far as the small percentage of alcohol that is present in beer is concerned, this results naturally from the process of fermentation—just as in cider—but cider usually has more alcohol than beer. Some cider makers increase the amount of alcohol by adding sugar to the must. They want alcohol to keep cider from spoiling. The brewer brews his beer so as to have only 3 to 4% of alcohol, and he relies on an expensive system of refrigeration to keep his beer from spoiling.

The healthfulness of beer is readily demonstrated by a study of those who use it and those who do not use it in their daily diet. The drinkers of beer are almost always found to possess solid, healthy bodies, blessed with a stamina that is too often absent in the non-drinkers of beer. The millions of beer drinkers who consume the sixty millions of barrels of beer in the United States annually are, as a rule, the healthiest portion of the population. In order to promote sobriety in Switzerland beer is tax free. Beer, with a low percentage of alcohol in Denmark and Norway, is likewise tax free. The French Government classes beer with wine and cider as "boisson hygienique," which means hygienic beverage.

There are, of course, cases of over-drinking, as there are cases of over-eating, but the result is just the same. Excessive eating, like excessive drinking, will cause stoutness or obesity, but this is simply a case of too much of a good thing that can easily be remedied by a return to a sane and temperate use of either the food or the drink.

Beer is the cleanest and most wholesome of beverages. Cleanliness is absolutely necessary in its manufacture, the slightest carelessness in this regard being fatal to the success of the brew. Can this be said of all other foods or beverages?

Physicians have said that it is advisable to have a little food in the system at all times. This discovery is the natural result of a study of the casual beer drinker. The drinking of a glass of beer puts into the stomach a modicum of easily digested fluid, with the result that the entire system is stimulated and invigorated.

To the exhausted workman, the overworked housewife, the tired business man, the man or woman of impoverished blood, and to all those who are compelled to call on their bodies for unusual effort, beer is a mild stimulant and tonic that helps without causing any harmful reaction. The experience of centuries has proved this. Shall this boon to mankind be taken from the human race because of the theories and protestations of a handful of professional agitators who delight in disseminating misleading information regarding it? We leave the answer to the intelligence of our people.

Try These 3 Tests with

US THE BLACK SHELLS

Smokeless and Black Powder

Winners of the 1915 Grand American Handicap

Send us your name and address, and the name and address of your ammunition dealer. We will send you an order on your dealer for three free Black Shells, and instructions for making three practical Shell Tests.

Test the Primer. Prove that the strong, voluminous primer of the Black Shells gives *quicker* action.

Test Penetration and Velocity. Penetration is range and killing power. Velocity is speed. The more velocity the less "lead."

Test the Waterproofing. The Black Shells *are* waterproof. A wetting won't affect their firing or the smoothness with which they work in pump or automatic.

Send for the Shells and Test Book

30 DAYS' FREE TRIAL

and your choice of ninety-four (94) styles, colors and sizes in the fomous line of "RANGER" Bicycles, all illustrated in the new 1916 catalogue. There are eighty-three (83) others also, at prices ranging from $11.75, $13.75, $15.75, up. There is a MEAD Bicycle for EVERY rider, at prices made possible only by our FACTORY-DIRECT-TO-RIDER sales plan.

SEND NO MONEY but write TO-DAY for the new 1916 Catalogue of "Ranger" Bicycles, Tires and Sundries at prices so low they will astonish you. Also full particulars of our great new offer to deliver to you, all charges prepaid, your choice of any of the 94 kinds of "RANGER" Bicycles you may select, for ONE MONTH'S FREE TRIAL. This wonderful offer is absolutely genuine.

TIRES, LAMPS, Built-Up-Wheels, with Coaster-Brakes, Inner Tubes, Electric Lighting Outfits, all the newest ideas in Bicycle equipment and Sundries, as well as the Repair Parts and Combination Offers for refitting your old Bicycle—all shown fully illustrated, at HALF USUAL PRICES. Our new Catalogue is the largest ever issued by any Bicycle concern. Even if you do not need a new Bicycle now, or Repair Parts, Tires, etc., for your old Bicycle, you need this Catalogue to tell you the prices you should pay when you do buy.

RIDER AGENTS WANTED We want a Rider Agent in every neighborhood to ride and exhibit the new "RANGER." You can select the particular style suited to your needs. Boys and young men in all parts of the country are riding "Rangers" and taking orders from their friends.

MOTORCYCLE AND AUTOMOBILE SUPPLIES. Our big, new 1916 Catalogue also gives large space to these lines at lowest prices. Thousands of our "Bicycle" customers of a generation ago are now buying their "Auto" Sundries of us because they know "Mead" quality and prices are always right.

WRITE US TO-DAY. Do not delay. A postal request at a cost of one cent will bring you the big catalogue. DO NOT BUY until you get it and our WONDERFUL new 1916 offers and prices.

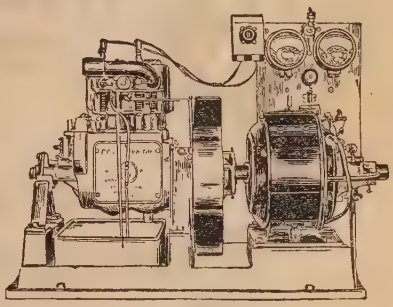
The Brush

Electric Lighting Set



Made in sizes from 4 to 20 horse-power, engine direct-connected to dynamo; requires small floor space, and is suitable for use with gasoline, kerosene or gas.

The Brush Electric Lighting Set is a very compact unit, simple in design and construction, and can be readily handled and cared for by those who are not experts. The quality of electric light produced by this outfit is superior to that usually furnished by electric lighting stations, and the cost is from one-half to one-quarter the price charged by these stations.

There are very many uses to which the electric current may be put besides that of lighting, such as cooking, washing and ironing and the use of dozens of other household conveniences.

Our 125-page catalogue is the most complete work on isolated electric generating plants ever published, and will be sent post-paid to any address upon application.

PHILADELPHIA NEW YORK BALTIMORE
CLEVELAND CHICAGO KANSAS CITY
Works: PHILADELPHIA, WHEELING AND CHICAGO

"I'll tell you what's holding you down, Jim"—

"You say you've been working for ten years and you're getting only $50 a month. You *ought* to be earning more, I agree, but you can't get any more for the kind of work you are doing.

"You've never learned to do anything that requires very much headwork—you've always been doing work that thousands of others could do—that's what is holding you down. However, you don't have to *stay* down—you can work yourself up to a *good* job if you go about it in the right way.

"What you need to do is to train yourself to take a job as chief accountant, correspondent, salesman or advertising man. We *never* have enough trained men. I've got openings now for a correspondent and three first-class salesmen.

Probably you, too—like the man in this story—are ambitious to make more money—and you can do it, if you will train yourself to do something that requires greater skill and more headwork—something for which employers *must* pay big money.

You won't have to leave home or give up your present job to get this training. The International Correspondence Schools have trained thousands of men—right in their *own homes* during their *spare time*—for the kind of work that commands big salaries. They can do the same for *you*.

BUST DEVELOPED ONE OUNCE A DAY

A New, Simple, Easy Home Method That Gives Quick, Permanent Success.

Judge from my picture as to the truth of what I say to you—that the crowning glory of womanhood is a figure of beautiful proportions and exquisite development. Then ask yourself how much you would like to have such a photograph of yourself, showing the feminine lines of infinite charm and grace. It would be worth more to you than a 2c stamp, so let me tell you of what I have learned—let me show you recent pictures of myself to prove what I say—for if you will write me today

I Will Tell You How—FREE

I will tell you gladly and willingly. Why should any woman neglect an opportunity to escape the pain and heartache of being skinny, scrawny, angular and unattractive in body? Misery is not our heritage. Nature planned that you—a woman—should have the rich, pulsing lines of warm, living flesh. Why should there be that pitiful aspect—the face of a woman and the form of a man?

Write To Me Today

I don't care how thin, or fallen, or flaccid your bust is now—I want to tell you of a new, simple, easy home method that gives quick and permanent success—I want to tell you how you can gain perfect development—one ounce a day. No physical culture—no massage, foolish baths or paste—no plasters, masks or injurious injections—I want to tell you of an absolutely new method, never before offered or told about—insuring immediate success and permanent beauty—without disappointment.

Send No Money

Just write me a letter—address it to me personally, that's all. I will answer it by return mail—and you can have a perfect bust and figure—one ounce daily—you can be just what you want to be. You may believe me when I say that you will bless me through years of happiness for pointing the way to you, and telling you what I know. Please send your letter today to the following address:

Stock that is healthy, sturdy and of perfect grade when you buy from us. 36 years of successful nursery culture is back of every Kelly Tree. Each member of the firm gives one department his undivided attention, so we know the history of every tree we sell.

That's Why We Guarantee Every Tree to Make Good.

Our 1916 Wholesale Catalog tells all about our stock and quotes our low prices. You can order from the catalog just as if you came in person to our office in Dansville, N. Y., (the nursery centre). Kelly service is personal service. You will be glad to do business with us, no matter whether you buy 10 or 1,000.

Write for your Catalog to-day. Your order will receive accurate attention.

KELLY BROS., Wholesale Nurseries, 80 Main Street, Dansville, N. Y.

You'll Never Regret Planting Kelly Trees.

LOOSE TEETH—SORE GUMS

I am a Dentist of 25 Years' Experieinee. I Have Perfected a Most Successful Home Treatment of Pyorrhea, the Terrible Tooth and Gum Disease, and All Its Symptoms.

I have found a very successful home treatment for that terrible disease called Pyorrhea or Riggs Disease of the gums. Most dentists tell their patients there is no cure for it, that there is no cure for loose teeth, bleeding, spongy, shrinking gums and dropping out of teeth; but many who have used my home treatment say there is, AND PROVE IT.

Don't have those teeth pulled. You may save every one of them—make them good, firm, healthy, sound teeth again.

Hundreds of patients say Dr. Willard's home treatment stops the teeth from being loose or wobbly and that it has done so in cases where the patient could almost pull the teeth out with his fingers, where the gums were soft and spongy, bleeding and shrinkink away from the teeth. You may make these conditions positively and absolutely disappear and end your Pyorrhea. There is no pain, no fussing, no waste of time.

The letters I will send you from people in all parts of the country will tell you that the torture and expense of dentist's work—all its grinding, whirring, jamming and nerve-touching agony—are gone forever. No more plates and bridges. They enjoy good teeth, good chewing and a good stomach once more. If you have any of the symptoms mentioned, then Pyorrhea, sometimes called Riggs Disease, is on the way—you are bound to lose your teeth and have to wear those awful false teeth, if you don't find a cure for it now. Simply send your name and address on coupon below and I will tell you all about this dreadful disease and why my simple home treatment may save your teeth without pain or expense of the dental chair.

My Illustrated Book and Full Information FREE
DR. F. W. WILLARD,
8825 Powers Bldg., Chicago, Ill.
Please send me your illustrated free book on tooth and gum diseases, with information about your successful home treatment for Pyorrhea.

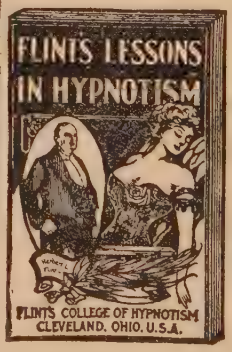
Mysteries of Hypnotism and Personal Magnetism Revealed

Herbert L. Flint, one of the best known hypnotists in the world, has just published a remarkable book on hypnotism, personal magnetism and magnetic healing. It is by far the most wonderful and comprehensive treatise of the kind ever printed. Mr. Flint has decided to give, for a limited time, a free copy to every person sincerely interested in these wonderful sciences. This book is based upon years of practical experience by a man who has hypnotized more people than any other one person.

You can now learn about the secrets of hypnotism and personal magnetism at your own home free.

Hypnotism strengthens your memory and develops your will. It overcomes bashfulness, revives hope, stimulates ambition and determination to succeed. It gives you that self-confidence which enables you to convince people of your real worth. It gives you the key to the inner secrets of mind control. It enables you to control the thoughts and actions of others. When you understand this grand and wonderful science you can plant suggestions in human minds which will be carried out in a day or even a year hence, in some cases. You can cure bad habits and diseases in yourself and others. You can cure yourself of insomnia, nervousness and business or domestic worry. You can instantaneously hypnotize subjects with a mere glance of the eye without their knowledge and powerfully influence them to do as you desire. You can develop to a marvellous degree any musical or dramatic talent you may have. You can increase your telepathic or clairvoyant powers. You can give thrilling and funny hypnotic entertainments. You can win the esteem and everlasting friendship of those you desire. You can protect yourself against the influence of others. You can become a financial success and be recognized as a power in your community.

FREE



This book of Flint's will tell you how to learn the secret of attaining these things. Flint is the most successful and best known hypnotist in the world. He has appeared before thousands of audiences. He will carry out every promise faithfully. If you want a copy of this free book send your name and address on a postal card—no money—to The Flint College Co., Dept. WB1, Cleveland, Ohio, and you will receive the book by return mail, postpaid.

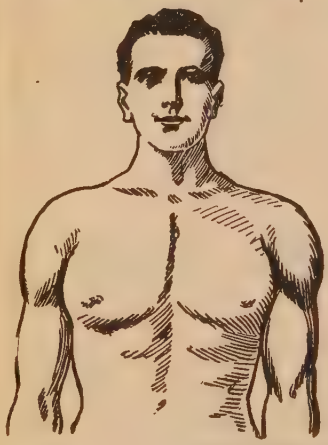
GOOD LUNGS MEAN HEALTH



Are They Weak or Painful?

Do your lungs ever bleed?
Do you have night sweats?
Have you pains in chest and sides?
Do you spit yellow and black matter?
Are you continually hawking and coughing?
Do you have pains under your shoulder blades?

These Are Regarded Symptoms of

Lung Trouble

You should take immediate steps to check the progress of these symptoms. The longer you allow them to advance and develop, the more deep seated and serious your condition becomes.

We Stand Ready to Prove to You

absolutely that Lung Germine, the German treatment, has cured completely and permanently case after case of Tuberculosis, Chronic Bronchitis, Catarrh of the Lungs, Catarrh of the Bronchial Tubes and other lung troubles. Many sufferers who had lost all hope and who had been given up by physicians have been permanently cured by Lung Germine. If your lungs are merely weak and the disease has not yet manifested itself, you can prevent its development, you can build up your lungs and system to their normal strength and capacity. Lung Germine has cured advanced Tuberculosis, in many cases over five years ago, and the patients remain strong and in splendid health to-day.

Let Us Send You the Proof---Proof That Will Convince Any Judge or Jury on Earth

We will gladly send you the proof of many remarkable cures, also a FREE TRIAL of Lung Germine together with our new 40-page book (in colors) on the treatment and care of Tuberculosis and lung trouble.

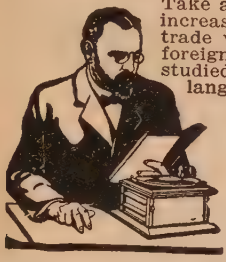
369 Butler Bldg., Cincinnati, Ohio.

Another Language Makes Another Man!

This is the age of specialization—But the man who supplements his special training and education with a foreign language doubles his commercial value and opens up new possibilities and new fields of opportunity.



Take advantage of the war situation! Better your position and increase your salary. Extend your business. Establish export trade with South American countries. Equip yourself to read foreign books and papers. Brush up on the language you studied at college and make it of practical use. Acquire a new language, at home, for business and social purposes.

SPANISH—FRENCH—GERMAN—ITALIAN

Is Easily and Quickly Mastered by the

LANGUAGE-PHONE METHOD

and Rosenthal's Practical Linguistry

(Highest Award Panama-Pacific Exposition, 1915)

This is the natural way to learn a foreign language. The voice of a native professor pronounces each word and phrase, slowly or quickly, for minutes or for hours. Any one can learn a foreign language who hears it spoken often enough; and by this method you can hear it as often as you like.

Is is a pleasant, fascinating study. All members of the family can use it. You practice during spare moments,or at convenient times,and in a surprisingly short time you speak, read and understand a new language.

Send For This Free Book

¶ Simply send us your name and address and we will mail you free "A Treatise on Language Study" and full particulars of trial offer. We will also tell you how you can use your own talking machine (our records fit all) to acquire a foreign language

Elegant All-Wool Suit MADE TO ORDER ONLY $9.85

We can make you up a handsome three-piece suit of beautiful cloth **guaranteed pure wool**, cut and fitted to your own individual measurements in the latest New York style, beautifully trimmed and tailored throughout, with fine Venetian linings, for only $9.85. We will go further. We will send it to you on approval, and when it reaches you we want you to try it on, show it to your friends, and in every way compare it with any $15.00 suit you ever owned or ever saw, and if it is not its equal in every respect, send it right back to us at our expense. That is how we do business. We do not want any man to keep a single garment of ours if he isn't entirely pleased with it.

This is strong talk, but we are right here to make good. Try us just once, and if we fail to please you the loss will be ours. You are absolutely safe. You won't lose a penny.

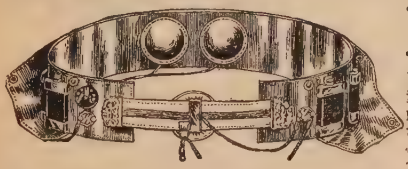
Let Us Send You Our Style Book FREE

Write your name and address on a post card and send it to us, and you will receive, by return mail, free, postpaid, our full line of samples of the season's choicest fabrics, of different patterns and different cloths, at different prices, all equally good value. We will also send you Fashion Plates, Tape Measure and Measurement Blanks, so that you can take your measurements accurately and with the full confidence that your suit will be made exactly according to the measurements you give.

Sit right down now and write to us, because we want to please you so well on this first suit that you will never order your clothes from anyone else in future. Send postal to-day.

ECONOMY TAILORING CO. (Dept. W), Broadway & 31st St., New York

STRENGTH and VIGOR



ELECTRICITY — The Fountain of Youth, the perpetual energy which sustains all animal life. It is the source from which springs the bubbling spirit of joy in young manhood. It is the vital element which keeps up the nerve force to a grand old age. When the body is charged with it the vital powers are strong, confidence flashes from the eye, the step is firm, the spirits buoyant. Without it we are weak, gloomy and despondent, lacking in physical and mental force, full of aches, pains and stiffness.

How is it with you? Are you satisfied with your physical condition? If not, you should at once send for

"ELECTRO-LIFE" THE DRY CELL VITALIZER

This grand appliance, now sold and used throughout the world, gives a perfect home self-application of the Galvanic Current. It generates a large volume of electricity and pours it into your body in a smooth, harmless, gentle stream at night while you sleep, enriching and improving the circulation of the blood, making every organ more active and supplanting weakness with strength. No charging, no acid, no trouble.

If you lack nerve force, energy and strength, or if you are suffering from Nervous Debility, General Weakness, Poor Circulation, Rheumatism, Lumbago, Dyspepsia, etc., try the application of the pure galvanic current and you will be surprised at the results.

LITERATURE FREE

Let me send you illustration and literature giving all particulars and containing lots of interesting reading for those who want to become well and strong. Sent free, in plain envelope.

101 FULTON STREET
NEW YORK

"GAINED 32 POUNDS

And Kept It Four Years"

Mrs. Abbott of Boston, whose photo appears above, writes us: "My photo speaks for itself in regard to your wonderful treatment. Was painfully thin when I commenced your treatment, but have gained 32 pounds since then, and am looking the picture of health, with rosy cheeks just as when I was a girl. Better than all, it is 4 years ago since I finished the treatment and I still keep the same weight."

Dr. Whitney's Nerve and Flesh Builder was the first flesh-builder offered to the public. It has been giving thousands of men and women attractive figures for nearly twenty years. Probably many of the figures you have greatly admired have been obtained by the use of this treatment—and with improved figures come better color and better health. When you build up with good, healthy flesh your whole physical condition must be benefited.

This treatment makes more and better blood, which in turn increases flesh, improves the color and complexion and makes you strong, sturdy and virile, with buoyant step and sparkling eye. Do not say it cannot be done until you take our generous trial treatment, just as thousands of others have who were also doubtful.

We offer a generous trial treatment to prove what it will do for you—that you can have just as handsome a figure as this host of others—that your nutrition will be perfected, that all hollow places will be filled out and you will have plump, perfect arms and limbs, a charming neck and shoulders, or by the special treatment your bust will be enlarged from 4 to 8 inches.

Just send in the coupon below now, while this generous offer lasts, and let us prove to your satisfaction just what it will do for you.

Treatment No. 1 increases flesh all over the body for both men and women. Treatment No. 8 develops the bust alone. Please say which you prefer. Only one can be sent.

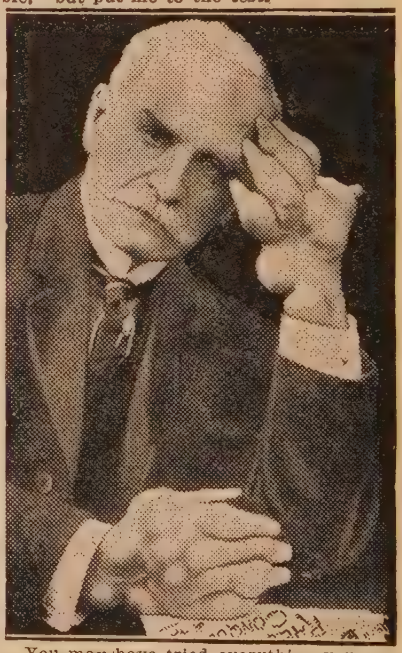
FREE TRIAL COUPON

Cut this out now. This coupon and 10 cents to help pay packing and mailing charges entitle the sender to one full 50-cent treatment of Dr. Whitney's Nerve and Flesh Builder, provided it is the first trial sender has received. **C. L. Jones Co., 50 Friend Bldg., Elmira, N. Y.**

RHEUMATISM CONQUERED

I say that I can conquer rheumatism with a simple home treatment, without electrical treatment, stringent diet, weakening baths, or in fact any other of the usual treatments recommended for the cure of rheumatism.

Don't shut your eyes and say "impossible," but put me to the test.



You may have tried everything you ever heard of and have spent your money right and left. I say "well and good," let me prove my claims without expense to you.

Let me send you without charge a trial treatment of DELANO'S RHEUMATIC CONQUEROR. I am willing to take the chance and surely the test will tell.

So send me your name and the test treatment will be sent you at once. When I send you this, I will write you more fully, and will show you that my treatment is not only for banishing rheumatism, but should also cleanse the system of Uric Acid and give great benefit in kidney trouble and help the general health.

This special offer will not be held open indefinitely. It will be necessary for you to make your application quickly. As soon as this discovery becomes better known I shall cease sending free treatments and shall then charge a price for this discovery which will be in proportion to its great value. So take advantage of this offer before it is too late. Remember, the test costs you absolutely nothing. F. H. DELANO, 403-C Delano Bldg., Syracuse, N. Y.

SUDS Will Wash for You

No Rubbing! No Scrubbing! No Boiling!

Become An EXPERT ACCOUNTANT!

$3,000 to $10,000 Yearly

If you remain a clerk or bookkeeper, salary increases are improbable, an independent future impossible. You can't demand a raise—there are thousands awaiting your job. There is one sure way to overcome your handicap: become an **EXPERT ACCOUNTANT,** by our modern home-training method—**be sought**—don't seek.

There are 500,000 big firms to-day requiring annual or semi-annual audits and **there are only 1,500 certified public accountants in the U. S.** This proves the tremendous, unlimited opportunities for you—the independence—the assured future—the big salary. These firms are willing to pay **Expert Accountants** $3,000 to $10,000 yearly. But they pay clerical workers and bookkeepers only $12 to $20 weekly. Become an **Expert Accountant** and your rise in the business world will be practically unlimited.

WE TRAIN YOU BY MAIL

in your own home, during your spare time, no matter where you live. You don't give up your present position and income. Devote a little spare time evenings preparing for independence and a big income and you will soon master this lucrative profession.

You can readily master our modern method and complete it in less time than any other.

The La Salle Extension University course in Higher Accountancy was prepared by some of the world's most noted accounting experts. It is under the direct supervision of William Arthur Chase, a nationally recognized leader, who is the ex-President of the National Association of C. P. A. Examiners, and ex-Secretary of Illinois State Board of Examiners in Accountancy.

Our course is thorough—advanced—covering the Theory of Accounts, Practical Accounting, Cost Accounting, Auditing, Business, Law, etc., and prepares you for C. P. A. Examination in any State.

SPECIAL REDUCED RATE.

SCHOLARSHIP—Limited Special Offer. Write quick and learn how, for a limited time, we are able to offer a special reduced rate scholarship.

Valuable Book FREE

"What Every Bookkeeper Should Know"—a valuable special book which gives exactly the information you require to become an Expert Accountant. Mail postal to-day.

Sent anywhere in the United States for $6.00 prepaid; absolute satisfaction guaranteed, or your money back. Order now.

ELBE FILE & BINDER CO. 148 Duane St. New York, U. S. A.

The President's Official Reporter

The picture shows him reporting the President on the observation platform of a train.

Copyright by Underwood & Underwood

Mr. Charles Lee Swem first attracted the President's attention by his accuracy in reporting a public address by him.

Mr. Swem studied Gregg Shorthand in a night school. At twenty years of age he became personal stenographer and official reporter to the President of the United States—the most important stenographic position in the world.

Mr. Swem is one of the fastest shorthand writers in the world. He holds a speed certificate from the National Shorthand Reporters' Association for 268 words a minute, which he won when but nineteen years of age, defeating three world's champions. He won second place in the Fifth International Shorthand Speed Contest when but seventeen years of age.

Naturally Mr. Swem writes the best shorthand system in use—Gregg Shorthand.

INSIST on Getting GREGG SHORTHAND

Whatever school you attend, **insist** on being taught Gregg Shorthand—the system that is taught in more schools than all other systems combined. It is the "safety first" shorthand. Anybody can learn to write Gregg Shorthand because of its wonderful simplicity and legibility.

Gregg Shorthand is
—used widely in the courts and government service,
—taught in the high schools of more than 1 300 American cities—more than 60% of the cities whose high schools teach shorthand, including such cities as New York, Boston, Rochester, Buffalo, Syracuse, Minneapolis, St. Paul, Los Angeles, Omaha, Seattle, Kansas City, Memphis,
—taught in the two largest universities in America—Columbia University and the University of California.

Gregg writers and Gregg teachers are in demand everywhere.

Send to-day for "A Little Journey to the Home of Gregg Shorthand," by Elbert Hubbard—and Sample Lesson, free.

THE GREGG PUBLISHING CO., 1121 Broadway, New York City

Awarded Gold Medal of Honor at the Panama-Pacific International Exposition, 1915—the highest and only award to any shorthand system.

Money in Patents

MANUFACTURERS ARE ALWAYS LOOKING FOR INVENTIONS

All Patentable Ideas Should be Protected by a Patent

(By a Registered United States Patent Attorney.)

The great majority of money making inventions are thought of by persons I will term amateur inventors, and nearly always are some very small or simple thing, for the reason that a large invention takes too much time and money for the average person to produce.

I have inquiries from all over the country, in which manufacturers and business houses are looking for patents in every line of industry. Owing to these inquiries I am about to put inventors in direct touch with manufacturers who want patents, and thereby find a ready sale for their inventions, which, for results, is far more practicable than any other mode of assistance to inventors.

A book "How to get your patent and make your profits thereon," which contains general patent information, is free and I would be very glad to have you write me for a copy of it.

Beer Recognized by Governments as the Real Temperance Beverage in Peace and War

The value of beer as a temperance drink has at no time been more forcefully recognized by various governments than during the great world war. At a time when all of the governments concerned have taken measures to promote efficiency by either heavily taxing, restricting or prohibiting heavy alcoholic drinks, they have, as a main step in this direction, encouraged the use of light beers.

OFFICIAL INDORSEMENTS OF BEER

The British Government has placed severe restrictions upon the sale of heavy alcoholics, but has placed none upon the sale of beer, the use of which in place of strong drink it is avowedly encouraging. Such rum as is being distributed among the soldiers in the trenches is served chiefly for its medicinal value.

The French Government has prohibited the sale of absinthe, cocktails, bitters and such drinks, but in its official order it expressly allows beer and other light beverages, which it designates as hygienic drinks, in industrial establishments. A Commission on Alcohol, appointed by the French Government, has declared against the use of heavy alcoholics in the army, and in favor of allowing wine, beer and cider to the soldiers.

The German soldier is allowed a certain quantity of beer daily. The German brewers have been encouraged in various ways to send beer to the front. The German Government has reserved for its troops 20 per cent. of the beer made in the German Empire.

Recently various high officials of the Russian Government have declared in favor of permitting the sale of beer and wine throughout Russia. Their chief reason, as expressed in their pronouncements, is that the total prohibition experiment has led to grave abuses, and that light beverages, such as beer, will better promote genuine temperance than a prohibitory law which fosters illicit distilling and illicit selling of hard liquors.

The Commission on Alcohol appointed by the Norwegian Government has reported adversely to the introduction of prohibition, and favors encouraging the sale and use of light beers as a temperance move to lessen the consumption of hard liquors.

These are impressive examples of the practical conclusions, based upon experience, of the governments of many countries.

BEER A LIQUID REFRESHMENT

The making of beer bears a striking resemblance to the making of bread. Bread is baked. Beer is boiled. One is a solid food, the other a liquid refreshment. Beer carries the process of digestion a little further than bread, which is also partly digested starch, made so by alcoholic fermentation, like beer. In beer, as in bread, the consumer gets the essence of golden grain, prepared and extracted by natural processes.

As a diet beer possesses a three-fold property—it quenches thirst, stimulates digestion and nourishes. Beefsteak as a foundation and beer as a support furnishes the most nutritious food, approved by the most eminent physicians.

A UNIVERSAL TONIC AND FOOD

"Beer," says Prof. Chas. Frederick Chandler of Columbia University, "is a beverage prepared from barley, water, hops and yeast. Beer is a food. American beer contains 6 per cent. solid food, only 3 to 4 per cent. alcohol, and also lecithin, which is real brain food. Beer and bread are both made from cereals; bread with water, and is solid; beer with more water, and is liquid. Yeast converts both into palatable and readily digested food. Both contain alcohol. Beer is not intoxicating in ordinary quantities, and beer is one of the foods that is free from bacteria. It is appetizing and aids digestion.

"If the prohibitionists drive beer from the household they will deprive a large part of the population of a wholesome article of food."—Advertisement.

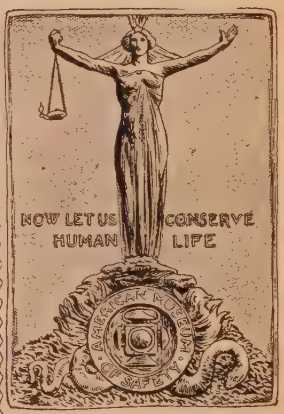
Foreword

To be normal—that is the birthright of every man. If you have lost yourself—that self that came into the world alert with possibilities—here is a chance to find yourself, and, finding, hold yourself a man.

Let Us Help You

Free Yourself from These Nerve Racking and Body Destroying Habits



Grand prize 1914, Exposition of the American Museum of Safety, "in recognition of the devotion of time, money and personal service in humanitarian achievement."

with the **Normyl Remedy,** which is now prescribed in England by over 2,000 physicians. Indorsed by the clergy and business men everywhere. Our **safe and sure**

HOME TREATMENT

consists of 24 tiny bottles of medicine (guaranteed harmless), one for each day; it does not make the patient sick and can be taken without any inconvenience or interruption to his or her usual routine, specially relieves the craving, builds up and restores the energies and will power.

OUR INSTITUTE TREATMENT

is only for extreme cases, where a person's condition is such that he needs careful supervision during every stage in the use of the remedy, which can be administered under the personal direction of his own physician. For further information call or send for our

FREE BOOKLET

which describes our remedy and treatment, contains letters of indorsement from physicians, clergymen and testimonial letters from cured patients.

IMPROVEMENTS WANTED

Manufacturers write us constantly that they want inventions protected through us brought to their attention. They want to enlarge—take on more profitable lines, and are willing to pay well for improvements. Men who see the faults in existing tools or devices, and improve on them, or who devise new tools or machines for doing work with less labor or expense, are the inventors who net BIG MONEY INCOMES.

You men who work up improvements, get an income from them. Consult us—it costs you nothing to get our advice and opinion—we will help you turn your ideas into money. Often the slightest improvement means thousands of dollars saved. Get your share of these profits. It may mean more than your present income.

We are REGISTERED PATENT ATTORNEYS.
FREE OPINION AND ADVICE. PERSONAL ATTENTION GIVEN ALL MATTERS.

Complete Electrical Tuition, $2

This work has been prepared for those who have not had the time or means to take an Electrical Course in a Technical School. It is intended for self-instruction. It is the most understandable book on Electricity ever put in type, and is of a real service in the acquirement of trustworthy knowledge of all phases of Electricity.

Lessons in Practical ELECTRICITY

Principles, Experiments and Arithmetical Problems

By C. WALTON SWOOPE

Asso. Mem. A. I. E. E.

Late Instructor of Applied Electricity at the Spring Garden Institute, Philadelphia.

The work consists of over 500 pages. There are 404 illustrations; 438 review questions; 154 worked-out problems; 119 problems, with answers, for the student to work out, and 102 experiments.

The Plan of Instruction

The book is the most comprehensive ever published. It is the closest approach to "in person" tuition possible; it anticipates everything the student needs in rules and data and reasons why; the student is never left in doubt; he is made to prove his work as he goes along. Every proposition is proven by worked-out problems, showing just how results are obtained, and other similar problems, with answers, are given for the student to work out, so that he may fully understand. There are also 438 review questions.

The Sale of 32,000 Copies

is evidence of value of this book. 32,000 men have been helped to better positions and salaries by reading and studying it. "Go thou and do likewise."

No Risk to You

We send you this book on receipt of $2.00. Keep it ten days and look it over carefully; if it doesn't match up with your notion of what such a book should be, send it back and we'll return the two.

We Want to Prove at Our Own Expense That It Is No Longer Necessary to Be Thin, Scrawny and Undeveloped.

"Gee! Look at that pair of skinny scarecrows! Why don't they try Sargol?"

This is a generous offer to every thin man or woman. We positively guarantee to increase your weight to your own satisfaction or no pay. Think this over—think what it means. At our own risk, we offer to put 10, 15, yes, 30 pounds of good, solid "stay there" flesh on your bones, to fill out hollows in cheeks, neck, or bust, to get rid of that "peaked" look, to do this without drastic diet, "tonics," severe physical culture "stunts," detention from business or any irksome requirements—if we fail it costs you nothing.

We particularly wish to hear from the excessively thin, those who know the humiliation and embarrassment which only skinny people have to suffer in silence. We want to send a free 50-cent package to the people who are called "slats" and "bean poles," to bony women, whose clothes never look "anyhow," no matter how expensively dressed, to the skinny men who fail to gain social or business recognition on account of their starved appearance. We care not whether you have been thin from birth, whether you have lost flesh through sickness, how many flesh builders you have experimented with. We take the risk and assume it cheerfully. If we cannot put pounds and pounds of healthy flesh on your frame we don't want your money.

The new treatment is used to increase the red corpuscles in the blood, strengthen the nerves and put the digestive tract into such shape that your food is assimilated and turned into good, solid, healthy flesh instead of passing through the system undigested and unassimilated. It is a thoroughly scientific principle, this Sargol, for building up the thin, weak and debilitated without any nauseous dosing. In many conditions it is better than cod liver oil and certainly is much pleasanter to take.

Send for the 50-cent box to-day. Convince us by your prompt acceptance of this offer that you are writing in good faith and really desire to gain in weight. The 50-cent package which we will send you free should be an eye-opener to you. We send it that you may see its simple, harmless nature, how easy it is to take, how you may gain flesh privately without knowledge of friends or family.

We could not publish this offer if we were not prepared to live up to it. It is only the astounding results of our new method of treatment that make such an offer and such a guarantee possible on our part. So cut off the coupon today and mail it at once to The Sargol Company, 302-N Herald Bldg., Binghamton, N. Y., and please enclose ten cents with your letter to help pay distribution expenses. Take our word, you'll never regret it.

FREE SARGOL COUPON

This certificate with ten cents to help pay postage and distribution expenses, entitles the holder to one 50 cent package of Sargol, the Flesh builder. The Sargol Co., 302-N Herald Building, Binghamton, N. Y.

The Magnetic Girl

How She Compels Others to Obey Her Will

100,000 Copies of Remarkable Book describing peculiar Psychic Powers to be distributed Post Free to readers of The World Almanac.

"The wonderful power of Personal Influence, Magnetism, Fascination, Mind Control, call it what you will, can surely be acquired by every one, no matter how unattractive or unsuccessful," says Mr. Elmer Ellsworth Knowles, author of the new book entitled "The Key to the Development of the Inner Forces." The book lays bare many astounding facts concerning the practices of the Eastern Yogis, and describes a simple though effective system of controlling the thoughts and acts of others; how one may gain the love and friendship of those who might otherwise remain indifferent; how to quickly and accurately judge the character and disposition of an individual; how to cure the most obstinate diseases and habits without drugs or medicines; even the complex subject of projecting thoughts (telepathy) is explained. Miss Josephine Davis, the popular stage favorite, whose portrait appears above, declares that Prof. Knowles' book opens the door to success, health and happiness to every mortal, no matter what his or her position in life. She believes that Prof. Knowles has discovered principles which, if universally adopted, will revolutionize the mental status of the human race.

The book, which is being distributed broadcast free of charge, is full of photographic reproductions showing how these unseen forces are being used all over the world, and how thousands upon thousands have developed powers which they little dreamed they possessed. The free distribution of the 100,000 copies is being conducted by a large London institution, and a copy will be sent post free to any one interested. No money need be sent, but those who wish to do so may inclose 5 cents (stamps of your own country) to cover postage, etc. All requests for the free book should be addressed to National Institute of Sciences, Free Distribution Dept. 962-A, No. 258 Westminster Bridge Road, London, S. E., England. Simply say you would like a copy of "The Key to the Development of the Inner Forces," and mention The World Almanac.

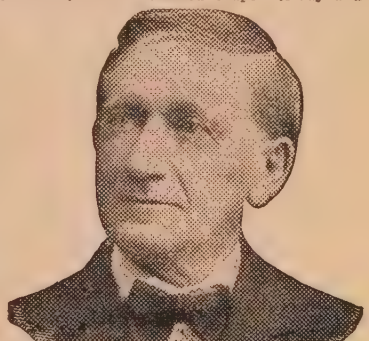
Do not inclose coins in your letter. Postage to England two cents.

Don't Wear A Truss!

After Thirty Years' Experience I Have Produced an Appliance for Men, Women or Children That Cures Rupture

I SEND IT ON TRIAL

If you have tried most everything else, come to me. Where others fail is where I have my greatest success. Send attached coupon to-day and I will send you free my illustrated book on Rupture and its cure, showing my Appliance and giving you prices and names of many people who have tried it and were cured. It gives instant relief when all others fail. Remember, I use no salves, no harness, no lies.



The above is C. E. Brooks, Inventor of the Appliance, who cured himself and who is now giving others the benefit of his experience. If ruptured, write him to-day, at Marshall, Mich.

I send on trial to prove what I say is true. You are the judge, and once having seen my illustrated book and read it you will be as enthusiastic as my hundreds of patients whose letters you can also read. Fill out free coupon below and mail to-day. It's well worth your time whether you try my Appliance or not.

FREE INFORMATION COUPON

ANTI-KAMNIA TABLETS FOR ALL PAIN

"The efficiency of any drug," says Dr. C. P. Robbins, "is known to us by the results we obtain from its use. If we are able to control pain and disease by means of any preparation, we certainly are warranted in its use. One of the principal symptoms of all disease is pain, and this is what the patient most often applies to us for, i. e., something to relieve his pain. If we can arrest this promptly, the patient is most liable to trust in us for the other remedies which will effect a permanent cure. One remedy which I have used largely in my practice is Anti-Kamnia Tablets. Many and varied are their uses. I have put them to the test on many occasions, and have never been disappointed. I found them especially valuable for headaches of malarial origin, where quinine was being taken. They appear to prevent the bad after-effects of the quinine. Anti-Kamnia Tablets are also excellent for the headaches from improper digestion; also for headaches of a neuralgic origin, and especially for women subject to pains at certain times. Two Anti-Kamnia Tablets give prompt relief, and in a short time the patient is able to be about as usual." The tablets may be obtained at all druggists. Ask for A-K Tablets. They are also unexcelled for headaches, neuralgia and all pains.

Every Blemish Removed

IN TEN DAYS

Get the Beauty Methods of This Beautiful Woman

I Will Tell Every Reader of This Almanac How— FREE

I only ask that you write me first. Send no money. All confidential. No one else will know. Then to you, and any reader of this Almanac, I'll give full details of my wonderful and astonishing treatment. No obligations. No risk. You be the sole judge. I offer this fairly and truthfully—FREE to you.

My great complexion beauty marvel has instantly produced a sensation. You can try it without risk and prove all I say—all that thousands of others say who know the results. Stubborn cases have been cured that baffled the physicians and beauty specialists for years. You have never in your life used or heard of anything like it. Will make muddy complexions, red spots, pimples, blackheads, eruptions vanish almost like magic.

No cream, lotion, enamel, salve, plaster, bandage, mask, massage, diet or apparatus, nothing to swallow. It doesn't matter whether or not your complexion is a "fright," whether your face is full of muddy spots; peppery blackheads, embarrassing pimples and eruptions, or whether your skin is rough and "porey," and you've tried almost everything under the sun to get rid of the blemishes. This wonderful treatment, in just ten days, positively removes every blemish and beautifies your skin in a marvellous way. You look years younger. It gives the bloom and tint of purity of a freshly blown rose. In ten days you can be the subject of the wild admiration of all your friends, no matter what your age or condition of health.

So, this minute, send me your name and address on the free coupon, or postal or letter, and by return mail I will write you full details in plain sealed envelope free. Decide **now** and **do it** for your own greater happiness.

All Methods Now Known are Cast Aside by Pearl La Sage

former actress who now offers to tell women of the most remarkable complexion treatment ever known — Nothing to Wear. Nothing to Take Internally—Absolutely Harmless and Pleasant to Use. **Your Complexion Can Look Like Hers If You Will Send Me Your Name.**

I Will Not Accept a Case, Regardless of Fee, Unless I Can Conscientiously Promise a Cure or Relief.

IF I agree to accept you as my patient, you may know that it is because, having studied your case carefully, I am confident that I can help you—if not with a permanent cure, at least with a permanent improvement. Of this my patients are always sure. I will treat them until they are satisfied.

A WORD ABOUT MY METHOD OF TREATING

I want to lay stress on the fact that I treat all patients personally. All letters are opened by me personally and what my patients say to me in their letters is absolutely sacred. I reply individually to each patient. *My course is not in any sense of the word a simple course in Physical Culture. It is infinitely more. It is a scientific application of Natural Curative Methods of Treatment to the individual needs and requirements of every patient placing himself or herself in my care for professional treatment and attention.*

DO NOT BE SATISFIED

with a method or with a course of treatment that can only give relief from your suffering or that can only temporarily benefit you. I do not consider any cure a real cure unless it is of a permanent character. Determine to seek out a course of treatment that gives a reasonable assurance of a **PERMANENT CURE.** Seek the personal attention of a physician in whom you can have implicit confidence.

INVESTIGATE

thoroughly the course of treatment I am giving—the attention my patients receive and the results I am accomplishing before coming to any definite decision. If, after a thorough investigation, you are not convinced of the merits of my treatment and the sincerity of my claims, then I would not advise you to take my course and in fact I would prefer not to have your case. In so far as possible, **I want an unbroken record of PERMANENT CURES and satisfied patients.**

Don't Suffer With Painful Varicose Veins

They can be reduced and the pain relieved by applying Absorbine, Jr., It has effected remarkable results for others and should do the same for you.

Absorbine Jr.
THE ANTISEPTIC LINIMENT
TRADE MARK REG. U.S. PAT. OFF.

is an antiseptic liniment that is healing, cooling and soothing—it stimulates the natural processes so that a freer circulation through the veins results. It is made of herbs and is non-poisonous.

Mr. R. C. Kellogg, Becket, Mass., before using Absorbine, Jr., suffered intensely with painful and inflamed veins—they were swollen and knotted. He writes: "After using one and one-half bottles of Absorbine, Jr., the veins were reduced, inflammation and pain gone, and I have had no recurrence of the trouble during the past six years."

Send for Varicose Vein Circular
Absorbine, Jr., $1.00 a bottle at most druggists or postpaid.

A LIBERAL TRIAL BOTTLE will be mailed to your address on receipt of 10c. in stamps.

W. F. YOUNG, P. D. F.,
137 Temple St., Springfield, Mass.

FRECKLES

Don't Hide Them With a Veil; Remove Them With The Othine Prescription

This prescription for the removal of freckles was written by a prominent physician and is usually so successful in removing freckles and giving a clear, beautiful complexion that it is sold by druggists under an absolute guarantee to refund the money if it fails.

Don't hide your freckles under a veil; get an ounce of othine and remove them. Even the first few applications should show a wonderful improvement, some of the lighter freckles vanishing entirely.

Be sure to ask the druggist for the double strength othine; it is this that is sold on the money-back guarantee.

Othine can be bought by the ounce from any druggist.

Thomas E. Sheerin Trees

MADE DANSVILLE FAMOUS

For years we have been selling direct from our Nursery to the planter at 50% to 100% less than prices charged by "Tree Agents." We have built up a wonderful business and saved our Patrons thousands of dollars. Our success is due to the fact that **we give every order our personal attention and make this our motto.**

"EVERY PATRON A SATISFIED CUSTOMER"

This means everything to us. We never allow a man to feel dissatisfied if we know it. We treat all alike, the little orders receiving the same careful attention as the big ones.

Lehighton, Carbon Co., Pa., Nov. 13, 1914.

Dear Sir—I have received my first box of trees from you. They are the finest I have ever planted and I have planted some. I have 4200 trees growing. Will need about 1400 more in the Spring. Yours truly, H. A. Graver.

Seattle, Washington, 9766 Waters Ave., May 12, 1915.

Dear Sir—Received apple trees the 10th inst. in fine condition. Accept my thanks and well wishes for your liberal and pleasing manner of doing business. Should I need anything in the future in your line I will remember you. Yours respectfully, Wm. M. Morris.

These are samples of hundreds of unsolicited letters that we receive every year. You cannot afford to take chances with agents and dealers.

OUR BROAD GUARANTEE PROTECTS YOU

and covers every shipment we make. Place your name on our mailing list to-day by sending us a postal card. We will immediately send you our handsome book with full information, and describing our fruit trees, small fruits, roses, shrubs and ornamentals.

LAW

Course on Approval

There is only one way for you to realize how the La Salle Extension University home-study law course has revolutionized the study of law—that is to let us send you EXPRESS PREPAID all the books, introductory lectures, regular lesson assignments, instructor's lesson talks, including the FULL SET OF 14 VOLUMES OF "AMERICAN LAW AND PROCEDURE" for free examination. You are not asked to risk a penny or obligate yourself in any way. We want you to see how easy it is for you to

STUDY LAW AT HOME UNDER EXPERT GUIDANCE

and receive a training in law like that given by the leading resident Universities, without loss of time from your present occupation.

We guarantee to coach free, until successful, any student failing to pass a bar examination. We have not on record a single instance of a La Salle graduate who took a bar examination and failed. We are authorized under the laws of the State of Illinois to confer on our graduates the degree of Bachelor of Laws —LL.B.

TEXT PREPARED BY LEGAL EXPERTS

Such men as James Parker Hall, Dean of the University of Chicago Law School; James De Witt Andrews, former member of Faculty, Northwestern University, author of "Andrews' American Law"; other noted authorities and professors in such colleges as Harvard, Leland Stanford, University of California, University of Michigan, University of Wisconsin, Tulane University. America's foremost legal talent—Hon. John F. Dillon, Jurist; Hon. R. A. Pryor, former Justice N. Y. Supreme Court; Hon. Theo. F. Burton, U. S. Senator from Ohio, and others equally prominent.

NO EXTRA CHARGE FOR LAW LIBRARY

The fourteen full legal-size volumes, bound in ¾-sheep, are furnished students without extra cost. Our library has been adopted in whole or in part for class rooms or libraries of more than twenty law schools.

SPECIAL COURSE for BUSINESS MEN FREE—COMPLETE COURSE IN PUBLIC SPEAKING

Prepared by Dr. Frederick B. Robinson, A. M., A. B. Ph. D., Professor of Public Speaking at College of City of New York. You may for a short time secure this course without extra cost in connection with law course.

YOU RUN NO RISK

If you enroll, your entire tuition fee will be refunded if you are not satisfied upon completion of the course. Mail postal NOW, for full particulars.

FISHERMEN!

This is the wonderful new bait that has taken the country by storm. The wobbling, wiggling, laboring motion of "Jim Dandy" hypnotizes fish and captivates fishermen. No other bait like it. America's best fishermen swear by it. It gets the fish. Because it labors through the water like a crippled minnow, fish grab it—that's the secret.

Money back absolutely if you don't think it is worth more than you paid for it.

Write for "Jim Dandy" to-day. Mailed anywhere 75c.

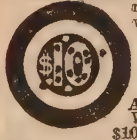
15 QUICK Shots



It's a Dandy Target Pistol

Ask your dealer to show you a Warner INFALLIBLE, or send us $10.00 and we will send you the Pistol by Parcel Post prepaid. If not satisfactory and does not shoot equal to any $15.00 or $25.00 pistol return it and we will refund your money. Could anything be more fair? Booklet **FREE.**

Warner Arms Corporation, Norwich, Conn.

Successful Egg Farming

200 Eggs a Year Per Hen

HOW TO GET THEM

THE eighth edition of the book, "200 Eggs a Year Per Hen," is now ready. Revised, enlarged, and in part rewritten, 96 pages. Contains among other things the method of feeding by which Mr. S. D. Fox, of Wolfboro, N. H., won the prize of $100 in gold offered by the manufacturers of a well-known poultry food for the best egg record during the winter months. Simple as a, b, c—and yet it will start hens to laying earlier and to induce them to lay more eggs than any other method under the sun. The book also contains a recipe for egg making food used by Mr. Fox, which brought him in one winter day 68 eggs from 72 hens; and for five days in succession from the same flock 64 eggs a day. Mr. E. F. Chamberlain, of Wolfboro, N. H., says: "By following the methods outlined in your book I obtained 1,496 eggs from 91 R. I. Reds in the month of January, 1902." From 14 pullets picked at random out of a farmer's flock the author got 2,999 eggs in one year—an average of over 214 eggs apiece. It has been my ambition in writing "200 Eggs a Year Per Hen" to make it the standard book on egg production and profits in poultry. Tells all there is to know, and tells it in a plain common-sense way.

You can get this book with a year's subscription to the AMERICAN POULTRY ADVOCATE, both for 75 cents; two years' subscription and book for $1.00, or given free as a premium for two yearly subscriptions at 50 cents each. Book alone for 50 cents.

Our paper is handsomely illustrated, 44 to 124 pages, 50 cents per year. 3 months' trial, 10c. **Sample Free.** CATALOGUE of poultry books free.

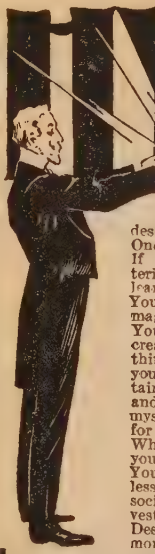
HYPNOTISM



Would you like to exert a strange and powerful influence over others? Do you desire to possess an accomplishment by which you can make both fun and money? One that would virtually open to you the gate to health, prosperity and happiness? If so, you should learn Hypnotism. You may now master this wonderful, mysterious and fascinating science at your own home. By a few hours' study you may learn all about the secrets, methods, uses and wonders of the hypnotic trance. You can surprise and mystify your friends by placing others under this weird and magic spell, and compel them to see, think, feel and act precisely as you wish. You may sway the minds of others, perform wonderful and astounding feats, and create fun and amusement for hours at a time. You may do a hundred amazing things that other people cannot do, and make yourself the most popular person in your community. If you want to **make money** you may do so by giving entertainments, treating diseases or teaching the art to others. These are three practical and easy ways to make money. In spite of these noble uses and in spite of its mysterious powers, Hypnotism is an easy and most simple art to learn. It calls for no special training or education. It imposes no long or perplexing study. Whoever knows enough to read may learn it. You may master all these powers yourself and wield the subtle forces of mind as well as any operator in the land. You may treat the sick, relieve pain, overcome bad habits, give sleep to the restless and comfort to the sorrowing. And for yourself, you may win promotion, social and business standing, and the influence or friendship you most desire. Investigate **now!** It costs nothing to find out about it. Simply write for my Free Descriptive Literature, Genuine Testimonials and full particulars. Don't send any money, not even a stamp, but send your name and address **To-Day** and learn how you may gain health, prosperity and happiness. Address:

Music Lessons in Your Own Home

New Way Easy for Anyone. Special Free Tuition Offer. All You Pay for Is the Music, Averaging 12½c Weekly.

A wonderful offer to every lover of music, whether a beginner or an advanced player.

Ninety-six lessons (or a less nu nber if you desire) for either Piano, Organ, Violin, Guitar, Banjo, Cornet, Sight Singing, Mandolin or 'Cello will be given free to make our home study courses for these instruments known in your locality. You will get one lesson weekly, and your only expense during the time you take the lessons will be the cost of postage and the music you use. Write at once. It will mean much to you to get our free booklet. It will place you under no obligation whatever to us if you never write again. You and your friends should know of this work. Hundreds of our pupils write: "Wish I had known of your school before." "Have learned more in one term in my home with your weekly lessons than in three terms with private teachers and at a great deal less expense." "Everything is so thorough and complete." "The lessons are marvels of simplicity, and my 11-year old boy has not had the least trouble to learn." One minister writes: "As each succeeding lesson comes I am more and more fully persuaded I made no mistake in becoming your pupil."

Established 1898—have thousands of pupils from seven years of age to seventy.

Don't say you cannot learn music, but send for our free booklet and tuition offer. Mail this coupon or write a letter. It will be sent by return mail free. Address U. S. School of Music, 227 Fifth Avenue, New York City.

WHAT PUPILS SAY:

"Since I've been taking your lessons I've made over $60.00 with my violin. Your lessons surely are fine."—Melvin Vreeland, Macopin, N. J.

"I finished your course of forty-eight lessons on Cornet. Some time ago I intended writing to let you know how I got along. When I started them I knew nothing about the Cornet or Music, but now I can play almost any piece of music."—Kasson Swan, Denmark, Col. Co., Nova Scotia.

"I want to extend the heartiest approval of your Piano Course. It has done more for me than years of other lessons. So complete in every way. I certainly can recommend it to others and will do so."—Mozie N. Lewis, 319 Jefferson, Neosha, Mo.

"I just got home from my vacation, and the folks at home are delighted to hear me play the Organ so well. They say you have a wonderful system of teaching music."—M. F. Allard, Caraquet, N. B.

Tear Along This Line and Mail To-day.

U. S. School of Music, 227 Fifth Avenue, New York City.

Gentlemen: Send me your Free Booklet and Tuition offer. I am interested in learning to play the instrument I have checked.

☐ Piano ☐ Organ ☐ Violin ☐ Guitar ☐ Banjo

☐ Cornet ☐ Sight Singing ☐ Mandolin ☐ 'Cello

Put an X in the square before the instrument you want to play.

SAVE $50 A YEAR ON WASHING EXPENSE

AND THE LABOR OF IT AS WELL

Reduce the washing time two hours a week, 104 hours a year. Save the clothes you are now rubbing to pieces on the board and the time you now lose mending the clothes destroyed by the board. Rubbing means wear, and wear means waste—waste of time, fabric, and priceless human energy.

"EASY" WASHER

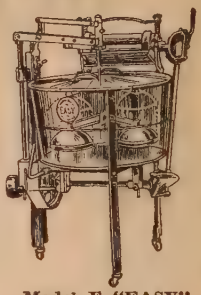
Saves the waste and keeps right on doing it for the rest of life. Does such service mean anything to you and your family? Can you afford to do without a machine that will do such work? The "EASY" comes in three models—hand, gasoline and water power.

Model B "EASY" Vacuum Hand Power Washer.

Why not have a washer that meets all requirements; made of rust-proof metal; indestructible, clean and sanitary; no wooden parts to soak up and retain impurities from dirty suds?

Torrents of soapy water are forced through the fabric, removing every impurity by the harmless air pressure and vacuum principle.

Ask for more information about hand, belt power and water power washers and special offer to 1916 World Almanac readers.



Model F "EASY" Vacuum Belt Power Washer. To be operated from gasoline engine or line shaft.

DODGE & ZUILL

5086 E. Water Street

Syracuse New York

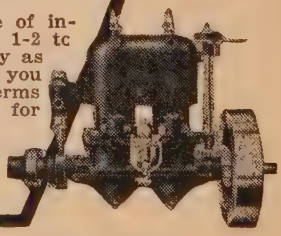
L-A Rowboat Motor

$45.00

Battery Equipped. Flywheel Magneto at slight extra cost.

Make any boat a power boat with the L-A Rowboat Motor. Here is a true, high quality outboard engine, light in weight, detachable, reversible. Speeds up to 8 miles an hour or slows down sufficiently to troll. Has silent muffler or underwater exhaust. (extra). Rudder steered. Bronze underwater parts suitable for either salt or fresh water. Ample power to drive an ordinary rowboat as fast as you will want to go.

6 H.-P. Inboard Motor **$78.77**



We also manufacture a full line of inboard type engines in sizes from 1 1-2 to 12 h.-p., priced just as attractively as the models here shown. It will pay you to investigate the quality, prices and terms of our line before you buy an engine for your motor boat.

LOCKWOOD-ASH MOTOR CO.

THE MAN WHO KNOWS TRAFFIC

Easily Earns $50 to $100 Weekly

The Traffic Field Is Calling for Trained Men. The Demand Is Increasing Each Year.

The railroads are the arteries of commerce. Modern commerce is absolutely dependent on Transportation—TRAFFIC. It makes or breaks. Ignorance of classifications and correct routings permits profits to slip away. Shippers are realizing this more each day. They are eager for trained traffic men who can prevent such losses. Right now many thousands of high-salaried, efficient traffic men are needed. And there is no fixed salary limit. YOU will be paid what you are worth. Thousands of Traffic Managers receive $50 to $100 weekly. Many a great deal more. It is no longer difficult to gain Traffic Knowledge. You can have the active cooperation of many of America's noted Traffic Experts. They will help you, guide you—TEACH YOU.

American Commerce Association

This is an organization of Traffic Men by Traffic Men for Traffic Men to promote American Commerce, Export and Import Trade. Our methods are thorough and practical. The work is fascinating. It is really easy to learn—easy to become an efficient traffic man. AND YOU CAN STUDY DURING YOUR SPARE HOURS IN THE EVENINGS. In a short time you can acquire the same valuable knowledge gained by numerous traffic experts only after a lifetime of hard work and tedious study. Traffic Knowledge, so easily gained in so short a time, will become your permanent asset—YOU can always "cash" it. It is Your Big Opportunity. Investigate! Let us tell you all the facts.

Endorsed By Traffic Authorities

Mr. A. T. Waterfall, Traffic Commissioner, Detroit, Mich.: "You are to be congratulated on this splendid and important work." Mr. C. C. McCain, Chairman of the Trunk Line Committee, representing fourteen Eastern railroads, says: "The American Commerce Association has provided a training service which appears to be the broadest, most complete tariff rate and traffic training yet devised." Mr. H. G. Wilson, President of The National Industrial Traffic League, writes: "Your Association is better equipped to advance the efficiency of traffic men than any other."

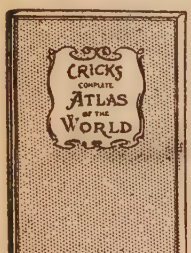
Christensen School of Popular Music, Dept. W. A., Christensen Bldg., Chicago.

NEW ATLAS FOR EVERYBODY



A collection of Maps does not make an Atlas. Geography information must be so organized that the reader is enabled to VISUALIZE the data with the least time and energy.

CRICKS' COMPLETE ATLAS OF THE WORLD is a handy, compact volume, containing 193 pages of up-to-date maps. Each map is printed in five and six colors, showing county lines accurately defined, and all railroads, latest geographical changes and additions are incorporated in these plates. The Maps are 8½x10½ inches (each map two pages), plates divided to make a convenient sized book 7x10 inches.

Besides a map of each State in the United States and its possessions, all Provinces of Canada and of every other country of the world, it contains a helpful Alphabetical Index for locating places.

An invaluable aid for the library. A handsome gift to your friends, with their individual names stamped in gold (without extra charge); carriage paid to any point in the World. $1.50 in Cloth; $2.00 in Leather.

Get into this big, new, well-paid profession, where the job seeks the man. Work is pleasant, interesting and profitable. Your work is directing others. Your position is sure and safe.

Trained Traffic Men Needed Everywhere

There are 500,000 shippers in the United States. 100,000 of them are big enough to employ Traffic Managers. There are 8,000 to 5,000 Traffic Managers in the country. That leaves 95,000 shippers without Traffic Managers. A man they need; a trained man who can save them money.

UNLIMITED DEMAND. Thousands of shippers are coming to realize their need of an expert, trained Traffic Manager. But the supply of trained men doesn't begin to meet the demand. Ask any shipper you know if the trained Traffic Manager isn't one of the most important and best paid men in the shipper's service. To become a successful, highly paid Traffic Manager, three things are essential: A common school education, intelligence and training.

SPECIAL TALENT UNNECESSARY. Thousands upon thousands of men in America are in the wrong job. Few men can be contented in a job that doesn't pay well or offer a good chance for steady and sure advancement. This is the day when far sighted, ambitious men climb out of ruts and seek opportunities where the going is good.

SALARIES, $1,800 to $4,000 and Up.

When you have mastered tariff and freight rates, you can land in a job paying at least $1,800. If you get with a big firm, your services will save them lots of money, then you can earn as high as $10,000 a year.

Send for new book—It's FREE.

There's no technical knowledge to learn. No hard study—just learn to get traffic facts from the Interstate Commerce Reports and published transportation rates. Our Free Book on Traffic tells all about it, explains clearly and concisely. Don't waste this opportunity to enter this new profession. Use the coupon right NOW—you'll never regret it.

THE MAN OR WOMAN OF
STRONG PERSONALITY

WINS SUCCESS TO-DAY

MONEY—POSITION—LOVE—HONOR—and everything else worth while. There are big opportunities for ambitious men and women with

Personal Magnetism

Be one of the men who dominate and control the business world. Any man or woman can influence the judgment and consent of another if they possess Personal Magnetism. By its aid humblest individuals have risen to heights of power and success. In the brute age the stronger were victors. In the present era there is but one infallible weapon of advancement—Personal Magnetism. It is capable of accomplishing anything that is possible—the best friend of man and woman, and their best defense. You can easily develop a

Strong Magnetic Personality

Prof. Dumont has discovered a new method of the development of Personal Magnetism. The results are instantaneous and the power increases constantly. Magnetism is not hynoptism. The latter deadens the faculties, the former gives them life and energy. Magnetism doubles your power—inspires, thrills, enthuses.

Each individual is endowed with Personal Magnetism but few know it. Men and women that have been failures, are soon changed after studying this course into a **firm determination to win.** It will give you better control over yourself. Better control over others. Show you how to unmask the unscrupulous, and learn their real traits. Personal Magnetism is the subtle, irresistible, fascinating power that attracts one mind to another. It rules the world and gives you great advantage over others.

Free Life Readings to All Who Write at Once

The well-known European Astrologer, Prof. Roxroy, has once more decided to favor the people of this country with Free Test Readings of their lives from his office in Holland.

Prof. Roxroy's fame is so well known in this country that he hardly needs an introduction from us. His power to read the lives of people, no matter at what distance they may be, is described as simply marvellous.

In August, 1913, he clearly predicted the Great War, and informed all his clients that "a bereavement in Royal circles will affect most of the crowned heads of Europe". Even Astrologers of various nationalities and reputation all over the world acknowledge him to be their master, and follow in his footsteps. He tells you what you are capable of, and how you can be successful. He mentions your friends and enemies, and describes the good and bad periods in your life. His description as to past, present and future events will astonish and help you.

Baroness Blanquet, one of the most talented ladies of Paris, says:

"I thank you for my Complete Life Reading, which is really of extraordinary accuracy. I had already consulted several Astrologers, but never before have I been answered with so much truth or received such complete satisfaction. With sincere pleasure I will recommend you and make your marvellous science known to my friends and acquaintances."

If you want to take advantage of this special offer and obtain a review of your life, mention the name of this Almanac and get a Trial Reading free. Money not necessary. Simply send your full name and address (written by yourself), the date, month, year and place of your birth, and state whether Mr., Mrs. or Miss.

If you wish you may enclose 10 cents (in stamps of your own country) to pay postage and clerical work. Do not enclose coins in your letter. Send your letter to ROXROY, Dept. 2764, No. 24, Groote Markt, The Hague, Holland. Postage to Holland, 5 cents.

EARN A GOOD SALARY
IN THE AUTOMOBILE BUSINESS

TO THE AMBITIOUS MAN:—You perhaps are not properly paid for the work you are doing and there is no possibility, unless you prepare for a better position. There is plenty of room in the Automobile business for YOU. The business is young; growing by leaps and bounds. And there never was a greater demand for trained men than NOW.

DO NOT DELAY. Good intentions will not help you. Good intentions which remain inert and never result in action lead to nothing. YOUR ACTIONS, not your good intentions, DETERMINE YOUR REWARD. Prepare for opportunity in order to grasp it when occasion arises. NOW IS THE TIME TO START! Write for Booklet W.

WE GUARANTEE

to qualify you for a position as chauffeur, repairman, demonstrator, tester or salesman.

NO MORE SUPERFLUOUS HAIR

HOW TO KILL AND PERMANENTLY DISSOLVE OUT ROOTS AND ALL.

Reader offers to send free everything required to prepare and use at home the simple new absorption process by which she avoided danger and pain of the cruel electric needle. Why prescriptions, appliances, acids, lotions and similar remedies should be avoided.

To the readers of The World Almanac:

At a medical conference held in Paris just prior to the war numerous eminent physicians cited cases which prove beyond doubt that since the discovery of a new and simple absorption process superfluous hair has become as unnecessary as it is repulsive. It was also explained how electrical processes always stimulate hair growth, how pulling with tweezers, and how acids, caustic pastes and other worthless remedies only affect surface hair, which soon grows again.

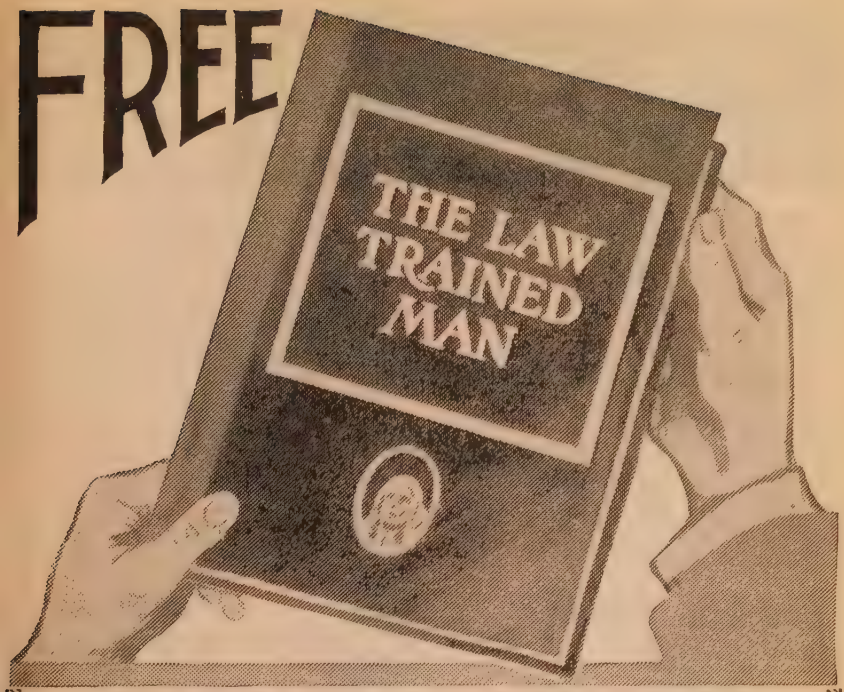
Then the distinguished physicians told how anyone can now prepare and use at home a simple liquid which immediately creeps down through hair shaft (just as oil creeps up a lamp wick), dissolving hair as the liquid is absorbed. Thus the entire hair structure from socket to root and papillae may be dissolved out of existence so there is nothing to grow again, *simple home absorption process, after the* The liquid *electric needle, acids, pastes, etc., had all* acts only *failed.* upon the hair and is harmless to the most delicate skin and tissues, as a test will quickly prove; but the liquid must not be allowed to touch desirable hair, as I know of no way to restore life to roots thus destroyed.

A reader kindly tells in this article how she killed the roots of her superfluous hair by a

When I see daily so many women with perfect features who would be radiantly beautiful were it not for hideous growths of ugly hair upon lips and chin, I always wish I could tell them how easily they could recover their natural heritage of delicate feminine charm and attractiveness.

I shall, therefore, be only too happy to send literature in regard to the preparation and use of the marvelous liquid explained at the conference which it was my privilege to attend. If any woman reader of the World Almanac cares to try this liquid, she need merely send her name and address, plainly written (postage to England is only 2 cents), together with 4 cents for return postage, I shall be pleased to send in plain, sealed wrapping, and without charge of any kind, a liberal supply of the ingredients of the liquid referred to above, together with full directions for use. Women readers can then use the new process in the strict privacy of their own boudoirs. Have correspondence as brief as possible, and do not write to thank me after hair is destroyed, as my time is greatly limited. I can agree to answer but one person in each family, and correspondence will be considered confidential. Alma Randall (Suite 101), 197 Regent Street, London, W., England. (There is, of course, no interruption to regular mail service between this country and England.)

FREE



THIS INSPIRING BOOK FREE

This intensely interesting and instructive 165-page book tells you of the great and increasing demand for lawyers and how you can become one. It tells you why law trained men are now selected for most positions of responsibility in business, public life and social work—and how you can grasp these opportunities.

It shows you how you can become law trained in **spare time at home** by a method which is endorsed by distinguished men, throughout the country, in whose opinion you have the **utmost confidence.**

MODERN AMERICAN LAW COURSE AND SERVICE OF BLACKSTONE INSTITUTE

Blackstone Institute, including The Sprague Correspondence School of Law, has successfully trained more than thirty thousand men and women in law. Among our graduates are the Governor of a State, United States Senators and Congressmen, State, County and City Officials, many Judges and **thousands of successful Lawyers and business men everywhere.** This notable record extending over more than twenty-five years is the most convincing evidence that we **produce results**—and it is results that count.

Chief Justice Ladd of the Supreme Court of Iowa says:

> "Every person interested in the law will receive from Blackstone Institute an unusually excellent—in fact, the *best*, non-resident system of instruction."

The Course has been prepared **especially for home study** by eighty eminent judges and other authorities. It is clearly written in simple, non-technical language, easy to read and understand. Preliminary education is not necessary. You will benefit from the day you start.

Special Offer, Investigate FREE

Our Course and Service will prepare you for the bar examination and for the practice of law, or to become a leader in business or public life. Special offer now being made to ambitious men. Investigate at once by sending postcard or letter, or clipping the coupon for our 165-page free book and full particulars. No cost or obligation.

Make your Motor Clear itself of Carbon

When there is carbon in your motor you don't need any argument as to the advisability or the necessity of getting rid of it. The only question is how best to accomplish the desired end.

Cleans by Live Steam

Carbon cannot be dissolved, only loosened. Live steam, which acts the same as an oil solvent, is the best agency for loosening carbon—which, when loosened and the motor started, is blown out through the exhaust pipe. The Hart-Bell Carbon Remover is the simplest device ever conceived for introducing live steam into the firing chamber of a motor.

How It Works

The Hart-Bell Carbon Remover is a device permanently installed between the outlet water pipe and the intake manifold. When the water heats up with the motor running a turn of the valve admits a fine spray of water vapor, which is sucked down through the copper tube into the intake, where it is mixed with the inrushing gas. The water vapor is instantly converted into superheated steam by the ignition in the cylinder. This steam loosens the carbon while the motor is running so that in five or ten minutes the carbon is blown out through the exhaust pipe. You can remove the carbon as often as you like. The operation is extremely simple and is absolutely without any harm to the motor.

You Can Install It Yourself

HART-BELL CARBON REMOVER

There is nothing complicated about installing this device on your car. When you order, if you will tell us the name of car which you are going to put it on and the type of carbureter with which the car is equipped, we will give you explicit directions for installing.

Representatives Wanted

Good territory and big profits for live men.

Guarantee

The Hart-Bell Carbon Remover Company, of New York, hereby guarantees that the Hart-Bell Carbon Remover will do all that is claimed for it, and if found unsatisfactory the full purchase price will be refunded upon return of same to agent from whom purchased.

Thousands In Use

Thousands already in use and every user a booster. The cost of the device represents what it now costs you to have the carbon removed once in a garage, and the Hart-Bell on your car means the end of your carbon troubles forever.

NO MORE BUSTLESS WOMEN

How to create 8 oz. to 1 lb. of firm, healthy flesh upon bust, neck, arms, or shoulders in four weeks.

To introduce latest scientific triumph in this country, complete instructions will be sent to 1,000 readers of the World Almanac.

Dr. Colonnay, the distinguished physician of the Faculty of Medicine, Paris, has at last made public the secret of his latest discovery. All readers of the French medical publications and journals devoted to feminine interests are now familiar with the astonishing results of his unique experiment upon 200 ladies, ranging from 16 to 60 years of age, some of them in the most weakly and anaemic state of health, and all absolutely lacking in bust development. Within five days the rapid growth of new flesh was noticeable in all cases. In three to six weeks busts that were flabby, sagging and almost non-existent had developed from five to eight inches by actual measurement. Convincing statistical evidence shows that in 46 per cent. of the cases patients were compelled to stop treatment within four weeks on account of threatened over-development.

Dr. Colonnay was the first to discover that various medicines, nostrums, prescriptions, dieting, apparatus, appliances, greasy creams, massage and other expensive advertised methods always fail because they overlook the basic fact that the mammary glands of the bust are the only organs which lie idle the greater part of a woman's lifetime, hence, they can never be developed like muscles.

A full description of just how this triumph of modern science causes new, firm and healthy tissue to be created at will, and just why its stimulating action is exerted only upon the bust, neck, shoulders or arms, but never upon abdomen, hips, or other parts of the body would require more space than is available for this special article, but arrangements have just been made whereby readers of the World Almanac are enabled to obtain all necessary particulars by promptly using coupon below. There is no charge for this, but if convenient, two 2-cent stamps may be enclosed for return postage.

IMPORTANT NOTE—Readers are particularly cautioned not to use this new method where more flesh is not desired, as the enlargement when once produced is absolutely permanent, and cannot be reduced afterward. It is usually advisable to stop treatment about three days before bust attains the exact size and firmness desired, as the stimulating effect may continue for two or three days, but never longer.

DON'T STAY FAT

Let Us Show You FREE How to Be Reduced to Normal Weight

50c. BOX FREE

This Shows the Effect of Adipo Treatment

To prove that **ADIPO**, a pleasant, harmless Obesity Treatment, will take fat off any part of the body, we will send a **50c. BOX FREE** to any one who is too fat. Adipo requires no exercising or dieting, nor does it interfere with your usual habits. Rheumatism, Asthma, Kidney and Heart troubles, that so often come with Obesity, improve as you reduce.

ADIPO REDUCED THESE

Prove at Our Expense—ADIPO Should Do the Same for You

Miss Laura A. Fouch, McConnellsville, Ohio, says: "Since taking your ADIPO treatment my health has been fine, better than it has been in years. Three years ago I was fat and miserable and could hardly get around; your treatment took off 84 pounds, and the reduction has been permanent."

Mrs. Susan Minton, Lake Park, Ga., says: "Your ADIPO treatment reduced me from 225 to 120 pounds and my general health is now better than ever. Before taking it I could hardly walk any distance, but now I can run and get around as when a child. It has been several years since I took the treatment, and the reduction has been permanent."

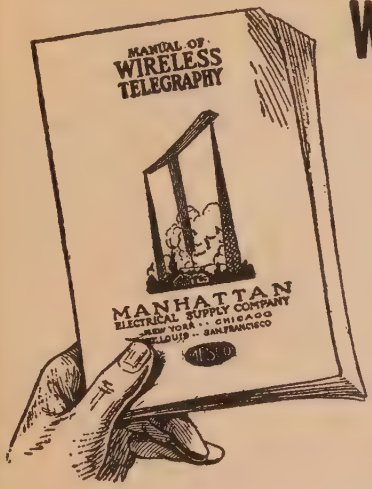
Mr. John McGowan, Memramcook, N. B., Canada, says: "I believe I would be in my grave to-day but for ADIPO treatment. It took off 105 pounds of fat for me and I am feeling fine."

Mrs. E. E. Dunkle, Stockton, Iowa, says: "Your treatment reduced me most satisfactorily, and since taking it I have been entirely free from Rheumatism that used to trouble me so."

Let us prove it at our expense. Write to-day for the **FREE 50c BOX** and illustrated book. And enclose 10c to help pay distribution expenses. Address ADIPO CO., 2384 Ashland Bld'g, New York City.

Send for Our Manual 15 of

Wireless Telegraphy



You should have it even if only superficially interested. Around about you every day you read of some marvelous occurrence in which wireless played a distinguished part. It may not be entirely clear to you. The Manual will explain it. To the student of Wireless Telegraphy, the Manual contains much that is indispensable to a proper understanding of the art. A good portion of this is now published for the first time—and consists of formulas, tables, diagrams, Federal regulations, codes, diagrammatic instruction for installing, maintaining and operating wireless stations, together with a complete list of up-to-date wireless instruments and accessories.

The Manual contains 120 pages, fully illustrated on high-grade paper stock with a two-color cover. **We ask ten cents ($.10) for it—give you a coupon receipt which can be applied on any order amounting to One Dollar ($1.00) or more.**

Do not wait until some other time, but sit down now and send your name and address and get one of the most complete, comprehensive and reliable wireless pamphlets published.

Send for Our New Catalog E28

It is pocket size, 8x4½ inches, contains 248 pages, with over 1,100 illustrations, and describes in plain, clear language all about Bells, Push Buttons, Batteries, Telephone and Telegraph Material, Electric Toys, Burglar and Fire Alarm Contrivances, Electric Call Bells, Electric Alarm Clocks, Medical Batteries, Motor Boat Horns, Electrically Heated Apparatus, Battery Connectors, Switches, Battery Gauges, Wireless Telegraph Instruments, Ignition Supplies, etc.

There exist a thousand and one ways where electrical devices may be used, and to know what is best for your purpose you need this catalog. We make no charge for this catalog.

The Secret of Fast Typewriting

New Method enables any one to write 80 to 100 words a minute without mistakes. It's all in the FINGERS.

Doubles and Trebles Salaries

Now, for the first time, has an idea been discovered which puts speed—great speed and accuracy—within the reach of every typewriter user. Almost overnight it has revolutionized the whole typewriting situation.

Stenographers who formerly never exceeded 30 to 40 words a minute are writing 80 to 100 words with less effort and with infinitely greater accuracy than ever before. And their salaries have jumped from a meagre $8 to $15 per week to $30, $40 and even $50.

Trained Fingers—The New Way

European music teachers, when training their pupils for the piano, invariably give special gymnastic finger exercises. This is because untrained fingers are not skilful fingers. The best results cannot be obtained—the fingers simply cannot be used correctly—unless the student develops and strengthens the proper finger muscles.

This training is even more essential to expert typewriting. The reason that so few people can write more than 30 to 40 words a minute is because their fingers are not flexible or nimble enough. This new, easy method overcomes this at once—develops finger strength and flexibility by exercises away from the machine—trains the fingers beforehand for their work on the machine—and the results border on the miraculous.

Valuable Book Free

We have prepared a book which tells all about the wonderful gymnastic finger exercises and explains the course in complete detail, which is free to those interested.

No instruction book ever written, no matter what its cost, ever told so plainly the real WHY and HOW of expert typewriting. If you are ambitious to get ahead—if you want to make your work easier—if you want to put more money in your pay envelope—get this book at once. It will be a revelation to you as to the speed and salary that are possible to typists. Tear off the coupon now before you turn the page.

CXLIX

100 WORDS A MINUTE

Formerly I never exceeded 50 words a minute, but since taking up the Tulloss Method have written as high as 100.

R. S. MARTIN, Noval Bros., Law Office, Seward, Neb.

DOUBLED SALARY

Am now Chief Clerk to the Dept. of Parks. Salary is exactly double what it was when I took up the study of the Tulloss Method.

ANNA S. CUBBISON, 109 Hoerner St., Harrisburg, Pa.

SALARY INCREASED 40% —THEN 20%

Since writing the letter you saw, telling of a 40% increase, I have had another increase of 20%.

C. E. VERRALL care Martin & Hall, Architects, Providence, R. I.

$70 MONTHLY TO $150

From $70 a month when I took up the study, I was soon drawing $150—salary more than doubled.

A. H. GARDINER, 429 Hawthorne Place, Madison, Wis.

Gentlemen:—Please send me your free book about the New Way in Typewriting. This incurs no obligation on my part.

FACTORY, OFFICE AND STORE

Demand the Use of a Disinfectant

CORO-NOLEUM

Not only disinfects but it cleanses at the same time. It removes the surface dirt more quickly and more efficiently than soap and soap powders, and at the same time penetrates the cracks and crevices where germs exist. Soap has no effect upon these invisible carriers of disease, while, on the other hand, **Coro-Noleum** destroys them. **Coro-Noleum** is *economical, effective* and *safe to use.*

WEST DISINFECTING CO. - - - New York

DO YOU REALIZE

The Dangers Attendant Upon the Use of Cake Soap? The Contraction of a Skin Disease Is the Most Evident of These.

Beau Brummel Liquid Soap

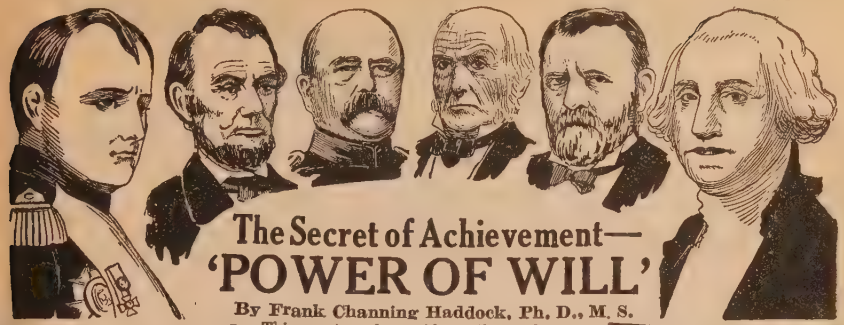
CL



The Secret of Achievement— 'POWER OF WILL'

By Frank Channing Haddock, Ph. D., M. S.

Partial List of Contents

- The Law of Great Thinking.
- The Four Factors on which it depends.
- How to develop analytical power.
- How to think "all around" any subject.
- How to throw the mind into deliberate, controlled, productive thinking.
- Detailed directions for Perfect Mind Concentration.
- How to acquire the power of Consecutive Thinking, Reasoning, Analysis.
- How to acquire the skill of Creative Writing.
- How to guard against errors in Thought.
- How to drive from the mind all unwelcome thoughts.
- How to follow any line of thought with keen, concentrated Power.
- How to develop Reasoning Power.
- How to handle the mind in Creative Thinking.
- The secret of Building Mind Power.
- How the Will is made to act.
- How to test your Will.
- How a Strong Will is Master of Body.
- What creates Human Power.
- The Six Principles of Will Training.
- Definite Methods for developing Will.
- The NINETY-NINE METHODS of using Will Power in the Conduct of Life.
- Seven Principles of drill in Mental, Physical, Personal Power.
- FIFTY-ONE MAXIMS for Applied Power of Perception, Memory, Imagination, Self Analysis, Control.
- How to concentrate the eye on what is before you—object, person, printed page, work.

Etc., Etc., Etc.

This great work provides a thorough course in Will Training, consisting of 28 lessons. It reveals the secrets as to how great men train their wills into wonderful power.

All scientists will testify that great men are not born with more gifts than others. They simply make something of their gifts, and others do not. They learn how to use their wills. We, on the contrary, allow the great powers we possess to LIE DORMANT.

How to Develop Inflexible Will

It has long been known that the Will can be trained into wonderful power—like memory, or like any one of the senses—by intelligent exercise and use. The trouble with almost every one is that they do not use their wills. They carry out other people's wills, or drift along with circumstances.

If you held your arm in a sling for two years the muscles would become powerless to lift a feather. That is exactly what happens, in most people, to the faculty we call "will power." Because we never use the Will, we finally become unable to use it. We degenerate into beings little more than slaves—unhappy, discontented, envious, hoping blindly that "some day"—without any effort— we will attain what we most want in life.

Helps Everybody

"Power of Will" provides the shake-up that ninety-nine out of every hundred people need. Men like Judge Ben B. Lindsey, Supreme Court Justice Parker, Wu Ting Fang, Ex-U. S. Chinese Ambassador, Lieutenant-Governor McKelvie of Nebraska, General Manager Christeson of Wells-Fargo Express Co., Assistant Postmaster General Britt, E. St. Elmo Lewis, Vice-Pres. Art Metals Cons. Co.—and literally thousands of other men of action and ambition like them—read, use and praise "Power of Will."

Send No Money Examine Book First

The price of this book—although it is really a complete course in Will Training—is only $3.00. The publishers will gladly send a copy free, for five days' inspection. Send no money now. Merely write on your letterhead, (or enclose your business card or give a reference) saying "Send me Power of Will on approval. I agree to remit $3.00 or remail the book in five days." Then, if you decide to keep the book, send the money. If not, mail the book back.

PELTON PUB. CO.
8 Lewis Bldg., Meriden, Conn.

What Readers Say

"I hand you $3 in payment; from what I have already seen I believe I can get $300 to $30,000 worth of good out of it. Better sttill, I believe it worth more than money in any amount."—C. D. Van Vechten, General Agent No. West Life Ins. Co., Cedar Rapids, Iowa.

"Will power is a compilation of mighty force. My first week's benefit in dollars is $900.00—cost $3.00; profit $807.00."—J. W. Heistand, 916 Tribune Bldg., Chicago.

"In my judgment 'Power of Will' is wonderful."—Owen J. McCaughey, Sec'y of Corp. Securities Co., St. Louis, Mo.

"The first thing I happened upon when I opened this book was 'Some Diseases of the Imagination,' and I tell you that chaapter alone is worth ten times the price of the book. I wish such a volume had come into my possession 25 years ago."—Thos. O'Connor, 270 Precita Ave., San Francisco, Cal.

"You could not buy it for one hundred times the amount I paid for it, if I knew I could not get another copy."—R. E. Seay, Pascagoula, Miss.

"He who reads it and puts forth effort will soon find himself out of the common herd."—F. A. Good, President of Nebraska Lumber Dealers' Assn., Co les, Neb.

"Here is $3 for you. 'Power of Will' received. It is the book I have wished for for years."—J. L. Seawall, Clerk of Supreme Court, State of North Carolina, Raleigh, N. C.

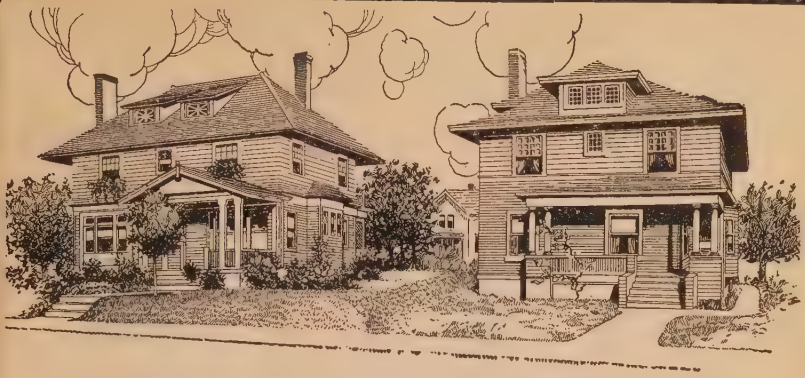
BRANCHES EVERYWHERE IN THE UNITED STATES



Your Home and Your Neighbors

A good neighborhood is largely a matter of paint. Start the home improvement habit in your neighborhood by beautifying your home outside and inside. Set the example in improvement work which your neighbors will follow. Be the first to clean-up and paint-up—then watch the idea grow.

When you buy paint look for this signature on the can with the Little Blue Flag trademark:

Lowe H.S. Brothers

It is your assurance of getting the utmost in paint value—full weight, full measure, honesty in manufacture, superior qualities in use and wear.

See the "High Standard" dealer in your locality or write for further information to

THE LOWE BROTHERS COMPANY

1 Madison Street, Dayton, Ohio

New York Jersey City Boston Chicago Kansas City Minneapolis Toronto

MAXIM GUN SILENCER

You are not getting the fullest possible enjoyment from your rifle unless it is equipped with a Maxim Gun Silencer.

The Silencer is an aid to marksmanship. It stops flinching by reducing the recoil over 75%, and counteracts the tendency of the gun to jump upward at each shot.

ENJOY NOISELESS SHOOTING

By silencing the report noise, the Silencer enables you to shoot without scaring the game. It enables you to hold target practice any time, anywhere, without disturbing anybody.

ATTACHES TO ANY RIFLE

Write for Free Book filled with interesting experiences of sportsmen with the Maxim Silencer—stories of actual records that will surprise you. Well worth reading—write now for copy.

Ask your hardware or sporting goods dealer to show you the Silencer. If he hasn't it, write to us the make, model and calibre of your rifle, and please tell us dealer's name.

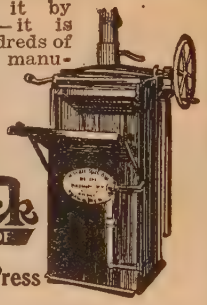
For Ford Cars

we make a special Maxim Silencer. Applied to exhaust, it also saves gasoline.

The Maxim Silencer Co.
95 Homestead Ave.
Hartford, Conn.

Bale Your Scrap Paper

Do not waste it by burning it up—it is valuable, as hundreds of merchants and manufacturers in all parts of the world have found who are using a



ALL-STEEL **Schick** FIREPROOF

Paper Baling Press

This Davenport Press eliminates the unsightly, smelly, fire-catching waste paper heap. It bales the paper in neat bundles, ready for sale. It is very substantial, operates very easily by hand. Absolutely fire-proof, used and approved by the United States Government. Prices and description mailed free. Salesmen and jobbers wanted. Write for Catalogue No. 64.

Davenport, Iowa, U. S. A.

SOME THERMOMETER!

Jumbo Thermometer and Barometer and Eight Day Clock.

This is the biggest thing in advertising. It's not only big in feet and inches, but in dollars and cents. Scores of men are making big successes by selling advertising space on the "JUMBO."

$180.00

For a Day and a Half Work!

Display space in public places and on prominent corners is easily secured for the big "JUMBO" Thermometer. The fourteen advertising spaces go like hot cakes—some of our men sell out the board in a day and a half or less.

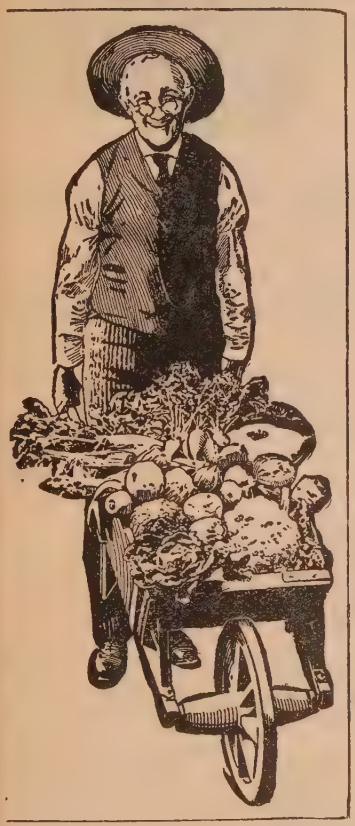
Write Us Today and Let Us Send You Full Details

L. F. CHANEY COMPANY, Box-L, Springfield, Ohio

A REMARKABLE OFFER OF HENDERSON'S SPECIALTIES

Henderson's Invincible Asters
Mammoth Butterfly Pansies
Spencer & Eckford Mixed Sweet Peas
Ponderosa Tomato
Big Boston Lettuce
Scarlet Globe Radish

To demonstrate the superiority of Henderson's Tested Seeds, we have made up six of the best we have into a Henderson Collection, consisting of one packet each of these great specialties.



To obtain for our annual catalogue, **"Everything for the Garden,"** described below, the largest possible distribution, we make the following unusual offer: To every one who will mail us ten cents, mentioning this publication, we will mail the catalogue and also send our Henderson Specialty Collection as above.

Every Empty Envelope Counts as Cash

This collection is enclosed in a coupon envelope, which, when emptied and returned, will be accepted as 25c. cash payment on any order of one dollar or over, and we send full cultural directions, together with our new "Garden Plans."

"Everything for the Garden," our 1916 catalogue, is without exception the best we have ever issued; 206 pages, 14 colored plates, over 1,000 photo engravings, showing actual results without exaggeration, make it the most complete as well as beautiful horticultural publication of the year.

PETER HENDERSON & CO 35 & 37 CORTLANDT ST. NEW YORK CITY

Learn Electricity

Earn $100.00 to $250.00 a Month

Thousands of trained men are needed in this great unlimited field of **Electricity.** We can train **you** for one of these big jobs that are **now open,** paying $100.00 a month and up. Experts in their particular field by personal instruction teach you in a surprisingly short time. Not by correspondence or books, but under actual working conditions in our big shops. Tools and material furnished **FREE.**

COYNE NATIONAL TRADE SCHOOLS

MEN WANTED FOR THESE TRADES

Electricity, Plumbing, Bricklaying, Motion Picture Operating, Mechanical Drawing

We teach all these big paying trades by thorough practical methods and they are demanding more and more trained men **everywhere** to fill the big paying positions. As soon as you finish your course you can go right out and get a job paying $6.00 to $8.00 a day or go into business for yourself and make from $3,000.00 to $7,500.00 a year. Our School is open all the year. You can enter at any time. Day and evening sessions. The ages of our students range from 15 to 50 years. Many earn a part or all of their expenses while learning. We assist you in doing this. Drawing, Estimating and Plan Reading included in all courses. We assist our graduates to positions.

THOUSANDS OF SUCCESSFUL GRADUATES

LEARN IN SHORT TIME AT SMALL EXPENSE EASY PAYMENTS

In order to supply these trades with trained men we are charging a small tuition fee and this can be made by easy payments if desired. Remember we furnish all equipment and tools **FREE.** All instruction is individual under the personal guidance of expert instructors of long experience in their particular fields. This enables a man to master his trade thoroughly and quickly.

Send Postal for Big Free Book

Let us tell you how you can master one of these big trades in a short time—make a bigger success than you ever dreamed of making. Mail the postal—now.

B. W. COOKE, Manager, Coyne National Trade Schools,
46 E. Illinois Street, Chicago, Ill.

If you live in or near Chicago come over and go through our schools and see our students at work and how thoroughly they are taught.

CLVI

FREE TOOLS

We will furnish all the material and tools you use in taking our course — ABSOLUTELY FREE. All we charge is a very small amount for tuition. Many of our students earn their expenses while taking the course.

LEARN to BE a Draftsman

Send a Postal and See What It Means

Are you ambitious for big things, for big earnings, for independence? Then write to me and I will show you what Draftsmanship holds out to you. Yes, I will prove, entirely at my expense, that I can qualify you right in your own home, in your spare time, for all the things that are at the command of the Draftsman.

MY SPECIAL TUITION OFFER!
Don't let the lack of ready money stand between you and this opportunity. I offer you my personal instruction on such small easy payments that you will scarcely miss the money. For prompt enrollment I am making an EXTRA SPECIAL OFFER of a FREE $25.00 tuition credit. I am the only expert Draftsman giving his personal instructions on such small payments.

A Big Salary—A Real Future

Look at the want ads of our metropolitan newspapers. See what a great number of Draftsmen are needed in comparison with any other profession. The marvellous growth of modern industries and the market building activity all over the country have created a bigger demand than ever before for the Draftsman. Big positions paying $2,400 a year and more—positions that will put you in line for the place of Chief Draftsman, Chief Engineer or Superintendent constantly opening. Give me a few minutes regularly of your spare time for a few months and I will put you into a field of real opportunity. Keep your present position and earn while you learn.

$17.50 Draftsman's Outfit FREE

This magnificent set of Draftsman's Drawing Instruments, valued at $17.50—the same as I used goes to you absolutely free if you act at once. This in addition to the free $25.00 tuition credit. But you must act promptly. A postcard brings you particulars—also copy of the most valuable book ever published on Draftsmanship. Act now. Strike while the iron is hot.

A NEW and WONDERFUL Disinfecting-Germ-Killing White Paint

NOTHING TO EQUAL IT For

Lofts **Factories**
Cellars **Tenements**
Chicken Coops
Dairy Buildings
Stables, Barns, Pens, Etc.

CARBOLA is a most powerful safe Disinfectant, Deodorizer and Germicide. It is a pure white mineral paint—not a Kalsomine, not a Whitewash. It contains powerful, germ-killing disinfectant elements many times stronger than carbolic acid, yet absolutely non-poisonous and safe. It is prepared under the rigid regulations of State Boards of Health and U. S. Department of Agriculture. It is clean-smelling, fairly breathes health—you cannot fail to recognize these facts.

CARBOLA not only paints but disinfects everything it paints—exterminates vermin and parasites, prevents epidemics of contagious diseases, and makes property wholesome and sanitary.

FOR THE SAKE OF YOUR POULTRY and LIVESTOCK

keep your coops, roosts, stables, barns, cellars, pens, etc., clean and sanitary. Drive away lice, mites, ticks, bugs and other parasites and vermin that pester your stock to death. Keep away germs of roup, white diarrhoea, cholera, mange, foot-and-mouth disease and other fatal epidemics. Give your stock a fair chance and they will bring "good returns."

CARBOLA is highly endorsed—We want you to know about it—Write for FREE SAMPLE and literature.

YOU are interested in everything that makes for the health of man, fowl and beast and here is your opportunity to obtain a supply of CARBOLA which insures this. We GUARANTEE it. 10 pounds, $1.00—20 pounds, $2.00—50 pounds, $4.00. Special price on larger quantities. *Every pound makes ONE GALLON of fine white paint.* We DELIVER and prepay carriage charges on all orders for 20 pounds or over. Here is where you get efficient health insurance and a good white paint combined, at 10 cents a gallon.

Address:

TMCO MFG. CO., INC., Dept. 33, 7 East 42d St., New York City

"Yes, It's a Steinway"

ISN'T there supreme satisfaction in being able to say that of the piano in your home? Would you have the same feeling about any other piano? "It's a Steinway." Nothing more need be said. Everybody knows you have chosen wisely; you have given to your home the very best that money can buy. You will never even think of changing this piano for any other. As the years go by the words "It's a Steinway" will mean more and more to you, and thousands of times, as you continue to enjoy through life the companionship of that noble instrument, absolutely without a peer, you will say to yourself: "How glad I am I paid the few extra dollars and got a Steinway!"

STEINWAY & SONS

Subway Express Station at the Door

Men & Women Are Boosted By Pompeian

The hand of business or society is not gladly extended to people who have sallow, cloudy complexions. We all prefer to deal and mingle with people of fine, pleasing looks. Consider

POMPEIAN

Massage Cream

It gives a clean, wholesome personality that has increased the earning power of men and the social attractiveness of women the world over. Just look at yourself squarely in the mirror. See how dust, worry and the ills of modern life have left their unpleasant marks. Make the use of Pompeian Massage Cream a habit—2 or 3 times weekly—and have a clear, fresh, youthful complexion. Begin to-day. At the stores, 50c, 75c and $1.00.

Trial Jar and Art Panel

sent for 10c. Beautiful 1916 Art Panel executed in rich colors (size 28 in. by 7¼ in.). Cut coupon now.

The Great Newspaper of the Mississippi Valley

ST. LOUIS POST-DISPATCH

Average Daily Circulation Always More Than 200,000

Average Sunday Circulation Always More Than 850,000

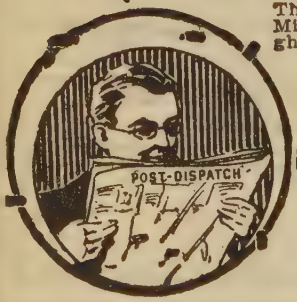
The POST-DISPATCH carries more display advertising than any other metropolitan newspaper in the seven biggest cities of the United States. Why?

First in Quality & Quantity of Circulation.
First in Rotogravures and Features.
First in Advertising.
First in News.

FIRST IN EVERYTHING

The Post-Dispatch bestrides the Mississippi Valley from the Alleghanies to the Rockies. It is the

"COLOSSUS OF THE WEST"



Never mind how STRONG You are

What d'ye KNOW?

——That's the point—"What d'ye KNOW?" Today it's a battle of wits—and *brains win.* Muscle and brawn don't count so much as they used to.

The great question nowadays is "What d'ye KNOW?"—it draws the line between defeat and victory—between "wages" and "salary"—between *you* and the *Boss.*

What do *YOU* know? Are *YOU* so expert that you can "make good" as a foreman, superintendent, or manager? If not, the International Correspondence Schools can show you how you *CAN.*

For more than 21 years the I.C.S. have been showing men how to do better work and earn bigger salaries. They can do the same for *YOU.* No matter where you live, what hours you work, or how limited your education—if you can read and write—the I.C.S. can train you for a more important and better-paying position.

Mark and mail the attached coupon—it won't obligate you in the least—and the I.C.S. will show you how you can acquire this salary-raising ability in your *own home,* during your *spare time,* by their simple and easy methods.

It will cost you *nothing* to investigate—it *may* cost a lifetime of remorse if you don't.

Mark the Coupon NOW

International Correspondence Schools
Box 801-O, SCRANTON, PA.

Please explain, without further obligation on my part, how I can qualify for a larger salary and advancement to the position, trade, or profession before which I have marked X.

National Wholesale Liquor Dealers' Association of America

President—Samuel J. Wolner, Jr., Peoria, Ill.
First Vice-President—Geo. C. Dempsey, Boston, Mass.
Second Vice-President—Charles H. Hermann, Chicago, Ill.
Treasurer—Edwin V. Dougherty, Philadelphia, Pa.
Secretary—Joseph Debar, Cincinnati, Ohio.
General Counsel—Levi Cooke, Washington, D. C.
Manager Publicity Department—Clinton Wunder, Cincinnati, Ohio.
Executive Committee—Geo. F. Dieterle, Chairman, A. J Sunstein, Morris F. Westheimer, W E. Hull, Jos. A. Strasser, E. M. Babbitt, Thos. C. Dennehy.

The National Headquarters of the Association are at No. 301 United Bank Building, Cincinnati, Ohio.

The United States Statistical Abstracts for 1913 classifies revenue to the Government from wine and distilled spirits (*i. e.* whiskey, etc.) as follows:

The total internal revenue and custom receipts from alcoholic beverages amounted to.....$248,980,000
This amount is over one-third of the normal income of the U. S. Government.

Customs Revenue from wine for 1913..... ..	*$6,284,000*
Customs Revenue from distilled spirits for 1913. ..	*10,470,000*
Total.....	*$16,754,000*
Internal Revenue other than license duties from distilled spirits	*$158,069,000*

The following increase in the consumption of distilled spirits and wines is shown by statistics from the Report of the Commissioner of Internal Revenue:

Year	Distilled Spirits Consumption (total proof gallons)	Wine Consumption (total gallons)
1850.....	51,833,473.....	6,316,371
1913.....	147,745,628.....	55,327,461

Despite the fact that 18 States are now listed in the "dry" column, this condition when analyzed does not contain the significance which the Anti-Saloon League would attribute to it.

The total population, as represented by the 18 "dry" States, is 25,828,613. The total population of the remaining States that are licensed is 66,163,653.

From 1850 to 1890, 16 States adopted Prohibition laws, and after unsuccessful trials, repudiated those laws.

In the early part of 1915, a number of States, through their Legislatures, refused to adopt State-wide Prohibition. Among these were Wyoming, New Hampshire, Minnesota, Florida and Michigan. Also, in the Fall of 1914, Ohio, Texas and California by large majorities rejected an amendment providing for State-wide Prohibition.

Those States which have tried and repudiated Prohibition and those States which have rejected Prohibition proposals represent the commonwealths which have passed the fledgling stage and which stand among the majority of the States of greatest progressiveness and wisdom. These States doubtless will continue to repudiate the statutory prohibition as a means of temperance. Those States which stand for Prohibition are either in the chrysalis stage, or are moribund; however, after they have passed the formative period of their civic growth or after they have been aroused from the torpor into which they have lapsed, they will doubtless join the other States which are really making the country and repudiate Prohibition.

Note: Requests for literature and information will receive prompt attention, if addressed to the PUBLICITY DEPARTMENT of this Association.

Short Talk
on
American Wines

WHY OUR PEOPLE SHOULD DRINK GOOD, WHOLESOME WINES, THE SAME AS PEOPLE DO IN EUROPE, DAILY WITH THEIR MEALS.

By J. RANDOLPH WILSON, M. D.

My advice on the use of wine is not new. It is over 1900 years old. It is the same advice that the Apostle Paul gave to Timothy:

"Use a little wine for thy stomach's sake and thine often infirmities."

Here is the whole lesson in a nutshell. Use wine first for your stomach's sake —that is, use wine to aid and promote good digestion. Then use wine for your infirmities—that is, use wine as a tonic.

WHAT IS WINE? After all, it is mostly water sweetened with sugar, which may or may not have been wholly fermented, contains fruit acids, and certain substances which give what are called the flavor and bouquet.

Take a bottle of wine, say claret, have it analyzed, and what do you find? You will find that 88 to 90 per cent. is water; 9 or 10 per cent of alcohol. which came from the sugar in the grapes; the rest are fruit acids and valuable mineral elements called by the chemist 'salts.' The vegetable acid makes wine taste sour, unless the wine is a sweet wine containing sugar. The principal acid is tartaric, and it is interesting to note that all our cream of tartar comes from the deposit of this acid in the casks during the maturing of the wine.

WINE—AS A FOOD—The different elements of wine have a food value. The water is a food element, and so is the sugar and alcohol, the latter by its oxidation. As Dr. W. Hale White of London has said in his "Materia Medica", a liter (about a quart) of wine of average strength produces by its oxidation about as much heat as five or six tablespoonfuls of olive oil. The acids or salts are most necessary and valuable because they go to nourish the blood and tissues of the body.

WINE—AS AN AID TO DIGESTION—The natural combination of acids, sugar, mineral salts and water that is found in wine aids digestion, because it stimulates the appetite and furnishes the food elements in a dilute and most pleasing and palatable form.

WINE—AS A TONIC—As a natural tonic wine can not be surpassed. It is better than any artificial combination or any patent medicine.

"From earliest childhood," says Dr. Starke, a German authority, "to the most advanced years there is hardly a period of life in which wine is not ordered, with the best results. Only there is this difference: that in childhood alcohol is given purely as a medicine, while in adult life it is used partly as such and partly as a dietetic agent."

Those who feel "tired out" will find a glass of wine, taken with a biscuit, a splendid invigorator. The best way to keep strong is by taking a little wine every day with your meals. Good red wines, owing to their moderate proportion of tannin, and relative richness in iron, phosphates, and phosphoric acid, act as a tonic and are not too stimulating unless taken in excess. Those who are "run down" and debilitated will find strength in a wine glass of sherry beaten with an egg.

If you would like to know more about our good American wines, write for the following booklets: "The Food Value of Wines," by Prof. E. H. Twight; "The One Best Drink-Wine," by Rev. R. D. Sawyer; "How to Use Wines," by L. J. Vance. They will be sent free by addressing the **AMERICAN WINE GROWERS' ASSOCIATION, 304 Broadway, New York.**

NERVOUS DEBILITY

Every reader of this almanac who is under a nervous strain lacks NERVE FORCE, POWER and ENERGY, and particularly those who are subject to WEAKNESS and EXCESSIVE DRAINS on the NERVOUS SYSTEM, should not fail to send to **Winchester & Co.,** the Pioneer Manufacturers of Hypophosphite Preparations (Est. 58 years), 994 Beekman Building, New York, for their free literature on NERVOUSNESS.

"I know of no remedy in whole Materia Medica equal to your Specific Pill in Nervous Debility."—Adolph Behre, M. D., Professor of Organic Chemistry, N. Y.

"For Neurasthenia the Hypophosphites are our mainstays." —Dr. J. G. Roberts, Philadelphia, Pa.

"I do not think that there is a more honest remedy for Nervous Debility than your Specific Pills."—B. R., Princeton, Ill.

(No C. O. D. or Treatment Scheme)

Price $1.00 per Box or Bottle (Sent prepaid in the U. S.)

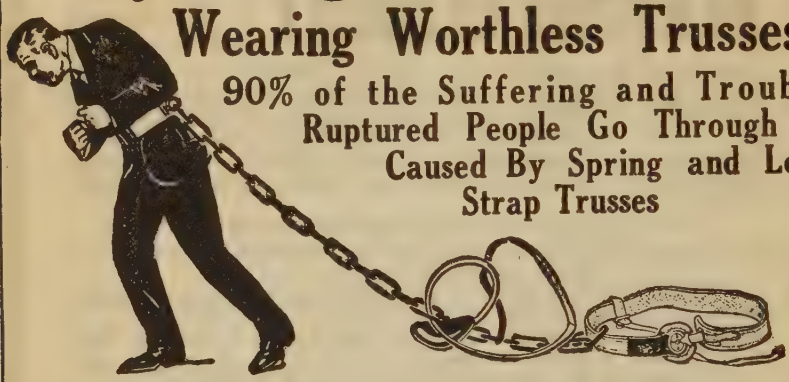
1784 E. 68th St., Cleveland, O.

Why Drag Through Life Wearing Worthless Trusses?



90% of the Suffering and Trouble Ruptured People Go Through Is Caused By Spring and Leg-Strap Trusses

Aren't you sick and tired of wearing trusses you can't make hold, which you can't feel safe in, or which hurt so they scarcely give you a minute's peace?

Don't you know that such contraptions will sooner or later let your rupture get the best of you?

Don't you know they are almost sure to cripple you up, so you won't be able to keep at work, won't be able to make a living?

Aren't you afraid they'll gradually let you get so bad that sooner or later you'll have to face a dangerous operation?

Aren't you willing to make a sixty-day test—without having to risk a cent—and see for yourself what a relief it is to get rid of such misery-causing makeshifts?

No More Belts, Leg-Straps or Springs

We have found a way to hold any man's rupture without harmful pressure, without any belts or spring around your waist without having to wear leg-straps.

It is our **guaranteed rupture holder.**

It is as big an improvement over elastic and spring trusses and so-called "appliances" as the modern locomotive is over the first steam engine ever built.

60 Days' Trial to Prove It

We have so much faith in it—have seen what it has done for so many others—that we are willing to make one especially for your case and send it to you for sixty days' trial. Willing to give you plenty of time to see for yourself just how good it is.

If it can't be made to keep your rupture from coming out you can send it back and it won't cost you a single penny.

It is the only thing we know of for rupture that you can get on long enough trial to make sure; because the only thing **good** enough to stand a long and thorough test.

All About It in Free Book

Don't send any money. Just write for our free book—cloth bound, 20 separate articles, 104 pages—and find out everything you want to know. It is full of facts never before put in print.

It shows just why operation is nearly always a gamble and why those who manage to live through it often have to keep on wearing a truss.

It exposes the fakes and humbugs—puts you on guard against being fooled and against throwing money away.

And it tells all about our guaranteed rupture holder—the famous Cluthe. Shows how simple it is. Why it needs no belt or leg-straps. How it instantly and automatically protects you against every strain, so your rupture can't be forced out. How it provides the only way ever discovered for overcoming the weakness which is the real **cause** of rupture. How it has brought complete cure in thousands of cases that seemed almost hopeless. How it is water-proof and will hold in the bath. How you can get it on 60 days' trial and how little it costs if you keep it.

Explains the care and attention we give you and why, because of our long experience and thorough knowledge of rupture, we are successful in cases that would utterly baffle your local truss fitters.

Write for the book to-day. That will take only a minute. But it may free you from trouble and worry for the rest of your life.

This Brings It

Some months are occupied in printing a volume so bulky as The World Almanac, and it is necessarily put to press in parts or "forms." Changes are in the mean time occurring. Advantage is taken of the going to press of the last form of the First Edition to insert information of the latest possible date, which is done below. The readers of the Almanac are requested to observe these additions, corrections and changes, and it would be well to make note of them on the pages indicated.

75. Facts About the Earth—China again became a monarchy.
169. Philippine Government—General Clinton L. Riggs resigned.
344. Cycling—New York, 6-day race, Dec. 6-11, 1915: Alfred Grenda, Australia, and Fred. Hill, Boston, won; 39 points; distance, 2,770 miles and 8 laps; a new record: second, R. McNamara and R. Spears; third, Magin and Lawrence tied with Thomas and Ryan. Lawn Tennis—Official ranking for season 1915, compiled by U. S. National Lawn Tennis Association, first ten: 1, W. W. Johnston, San Francisco; 2, R. N. Williams, 2d, Philadelphia; 3, M. E. McLoughlin, San Francisco; 4, Karl H. Behr, New York; 5, Theo. R. Pell, New York; 6, N. W. Niles, Boston; 7, C. J. Griffin, San Francisco; 8, W. M. Washburn, New York; 9, G. M. Church, New York; 10, W. M. Hall, New York. Boxing, Professional—Oct. 19, Boston, Charlie White defeated Johnny Harvey, 12 rounds, R. D.; N. Y. City, Frank Moran K. O. Jim Coffey, 3 rounds; Oct. 20, Denver, Col., Sam Langford defeated Jim Johnson, 15 rounds, R. D.; Oct. 23, Sydney, N. S. W., Les Darcy, Australia, defeated Jimmy Clabby, U. S., 20 rounds, R. D.; Oct. 26, New York City, Willie Ritchie and Johnny Dundee drew, 10 rounds, P. V.; Nov. 29, New York City, Jim Coffey knocked out Gunboat Smith, 4 rounds. Billiards—Oct. 22, New York City, Alfredo De Oro defeated George Slosson at three-cushion in a five nights' match by 250 to 206; Oct. 22, Boston, Mass., 14.1 balk line, Willie Hoppe defeated Koji Yamada in a three nights' match by 1,500 to 1,231; Dec. 4, Chicago, Ill., Alfredo De Oro defeated August Kieckhefer at three-cushion in a three nights' match by 150 to 93. Wrestling, Professional—Oct. 25, New York City, Alexander Aberg defeated Wladeck Zbyszko in Graeco-Roman match in 1 hour 4 minutes.
405. Add to Relative Rank, under Majors—Munroe, John E., Oct. 29, ord. dept.; Morse, Harry L., Oct. 29, ord. dept.
440. Russian Navy—The pay of Russian Admirals is $8,300 to $10,145; Vice-Admirals, $7,865 to $9,590.
441. Naval Advisory Board—Henry A. W. Wood resigned.
[illegible]0. China—Yuan Shi Kai became Emperor.
[illegible]8. Rulers of Nations—Yuan Shi Kai became Emperor of China.
459. Spanish Government—Count Alvaro de Romanones chosen by King Alfonso to form a new government.
472. U. S. Ambassadors Abroad—Henry P. Fletcher appointed to Mexico.
475. Ambassadors to U. S.—Eliseo Arrendondo appointed Mexican Ambassador.
532. European War Chronology—Edith Cavell, an English nurse, was shot in Brussels by German Military Authorities.
591. Major Robert R. Moton has been selected as Principal of the Tuskegee Institute, to succeed the late Booker T. Washington.
605. Benefactions of 1915—About $800,000 was subscribed on December 21 for the relief of suffering Jews in the war zone. Of this amount sums of $100,000 were given by Jacob H. Schiff, Nathan Straus, Julius Rosenwald and the Guggenheim brothers; $10,000 was given by Jacob Wertheim, Samuel Untermyer, Louis Marshall, and $20,000 by an anonymous giver. The Crane Company of Chicago announced Christmas gifts to its thousand employees of $700,000, divided in 10 per cent. of the annual salary of each person employed for more than six months. St. Luke's Hospital announced legacies amounting to $680,832. Of this sum $325,000 came from George B. Sloan, $100,000 from H. C. Fahnestock, $50,000 from Mary B. Lane and $10,000 from Mrs. Augustus C. Chapin. A gift of $50,000 was made by Julius Rosenwald to the Chicago Women's Club, on condition that they raise $500,000; Charles E. Rhinelander of New York left $25,000 each to the New York Society for the Relief of the Ruptured and Crippled and the Seamen's Church Institute of New York; $41,000 was raised by the Congressional Union for Woman Suffrage; for church maintenance and all gifts of all kinds the Episcopal Church collected about $21,000,000. The Boy Scouts collected to December 17 $100,522 of the $200,000 fund. The University of Cincinnati received $508,840, of which $250,000 was given by Mrs. Mary M. Emery; $50,000 by Mr. and Mrs. Charles P. Taft, Mrs. Charles Fleischman, William Cooper Proctor, Harry M. Levy, Henry C. Frick, $169,000 to reimburse 41,000 school children whose savings were lost by failure of Pittsburgh Bank for Savings, Mrs. Laura S. Rockefeller, deceased wife of John D. Rockefeller, left $950,026 to charity.
649. Death Roll of 1915—Harry L. Horton, Francis Marion Cockrell, Lord David B. Glasgow, Earl de la Warr, Charles H. Dickerman, Edouard Vaillant, Right Rev. Narcisse Z. Lorrain, Viscount Alverstone, Auguste Germain, Dr. Alexander T. Ormond, Daniel Worcester, Brig.-Gen. Jeptha Garrard and Dr. George P. Shears.
655. Events—President Wilson and Mrs. Galt married, Dec. 18. Haig became leader of the British forces in France, Dec. 21, British withdrew from the Dardanelles.
661. Expositions—The opening of the Panama National Exposition, commemorative of the discovery of the Pacific Ocean by the Adelantado (Governor), Vasco Nunez de Balboa, has been set for January 21, 1916.
663. Largest Cities of the Earth—Population of Japanese cities by 1913 census: Osaka, 1,387,366; Kyoto, 508,068; Nagoya, 447,951; Kobe, 440,766.
667. Population of States by 1915 Census—New York, 9,692,254; New Jersey, 2,844,342; Massachusetts, 3,647,822; Rhode Island, 595,986; Florida, 921,569; Wyoming, 141,705.
685. } New York Public Service Commission—G.
834. } V. S. Williams resigned.
755. Vote for New York State Senators—In 1915, in 29th District, Wellington (Rep.) received 14,536 votes; Poame, 12,740.
795. Government of the City of New York—Commissioner of Jurors Thomas Allison resigned. Successor not appointed when Almanac went to press. Dept. of Correction—Commissioner Katherine B. Davis succeeded by Burdette G. Lewis. Sheriff New York County—John F. Gilchrist appointed Under Sheriff in place of F. K. Bowers.
796. Appellate Division of Supreme Court, New York City—Presiding Justice George L. Ingraham resigned. Neither his successor nor the Judge to succeed Edward Swann in General Sessions had been appointed when Almanac went to press.
799. Rialto Theatre (formerly Hammerstein's) under construction at Seventh Avenue and 42d Street.
842. J. J. Frawley, Democratic district leader of 26th Assembly District in New York City has been succeeded by Nathan Burkan.
844. Fatalities in Manhattan, Elevator Accidents—1909, 46; 1910, 40; 1911, 55; 1912, 81; 1913, 65; 1914, 47.

MALES AND FEMALES OF VOTING AGE IN CONTINENTAL UNITED STATES.

(Report of Census Bureau, based on 1910 Census.)

NATIVE white males, 17,710,697; colored (persons of negro descent, Chinese, Japanese, and Indians), 2,641,637. For foreign-born white males of voting age, see separate table below.

Females in United States 21 years of age and over, 24,555,754, consisting of white, 22,059,236, native and foreign-born; negro, 2,427,742; Indian, 60,169; Chinese, Japanese and all other, 8,607.

FOREIGN-BORN WHITE MALES OF VOTING AGE.

According to the last census, taken as of April 15, 1910, the number of foreign-born white males of voting age, that is, 21 and over, in the United States (not including Alaska, Hawaii, Porto Rico, or other outlying territory) was 6,646,817. Of this number, 3,034,117, or 45.6 per cent., were naturalized.

The following summary table shows the distribution of these foreign-born white males by divisions, with the number and percentage naturalized for each division:

DIVISION.	FOREIGN-BORN WHITE MALES, 21 YEARS OF AGE AND OVER.			
	Total.	Per Cent. in Each Division.	Naturalized.	Per Cent. Naturalized.
United States*	6,646,817	100.0	3,034,117	45.6
The North	5,511,869	82.9	2,526,749	45.8
New England	796,847	12.0	323,994	40.7
Middle Atlantic	2,272,271	34.2	879,348	38.7
East North Central	1,573,343	23.7	812,489	51.6
West North Central	869,408	13.1	510,918	58.8
The South	368,913	5.6	157,854	42.8
South Atlantic	150,665	2.3	61,134	40.6
East South Central	46,308	0.7	25,955	56.0
West South Central	171,940	2.6	70,765	41.2
The West	766,035	11.5	349,514	45.6
Mountain	257,537	3.9	113,670	44.1
Pacific	508,498	7.7	235,844	46.4

* Exclusive of Alaska, Hawaii, Porto Rico, and all other outlying territory.

Approximately nine-tenths (89.4 per cent.) of the foreign-born white males of voting age were of European origin, 9.8 per cent. were natives of American countries other than the United States, and 0.8 per cent. were natives of other countries. Very nearly one-half (3,310,930) were natives of the countries grouped in the accompanying table under the heading "Northwest Europe," and of these approximately two-thirds (2,151,421, or 65 per cent.) were naturalized. Of the 2,631,458 natives of the countries comprising the southern and eastern divisions of Europe, taken together, 581,306, or 22.1 per cent., were naturalized. The countries of low percentages in the table are generally countries from which recent immigration has largely come, the lowness of the percentages being partially due to the fact that naturalization implies a minimum residence within the country of five years.

PLACE OF BIRTH.	FOREIGN-BORN WHITE MALES, 21 YEARS OF AGE AND OVER.			PLACE OF BIRTH.	FOREIGN-BORN WHITE MALES, 21 YEARS OF AGE AND OVER.

Certificates of Naturalization issued by the Division of Naturalization for the United States, Alaska, and Hawaii, for fiscal years ended June 30, 1910, 39,206; 1911, 55,329; 1912, 69,965; 1913, 82,017; 1914, 102,558.

The World.

JOSEPH PULITZER.

April 10, 1847 ✠ October 29, 1911.

DEVOTED to that great purpose, the cause of the people of the United States, to which Joseph Pulitzer dedicated it on May 10, 1883, THE WORLD found the year 1915 one of grave responsibility and made it one of memorable achievement. Probably never before has any newspaper been so well justified at the close of the year in congratulating itself—and there have been few years so troubled and so strenuous as was 1915, in which the National safety and National honor were many times in peril. It was largely through the efforts of THE WORLD that the public was enlightened as to those who were behind the widespread conspiracies on American soil in behalf of foreign belligerent Governments, endangering the peace and prosperity of the Nation.

In following its inspiring aim, THE WORLD in 1915 had to step far beyond the usual range of National politics. In defence of the safety and honor of the people it made its influence felt far beyond the borders of our own land. More than once during the year the press of the world admitted that the work done by this newspaper exceeded the greatest journalistic feats ever accomplished. More than once disclosures of National gravity, and international importance, made by THE WORLD astounded the peoples of all countries and dazed the persons concerned— for the matters exposed threatened our people with war. For weeks on end the press of the world was reprinting from this paper its exclusive revelations and watching for more as sensation succeeded sensation.

Probably the most vital disclosures made by THE WORLD in 1915 were those which revealed the extent and nature of the plots fostered in this country by agents of the German Government for the purpose of involving the United States in the great war. But still more immediately far-reaching in their consequences were those which speedily brought about the departure of the Austro-Hungarian Ambassador, Konstantin Theodor Dumba.

WORLD EXPOSURES CAUSE RECALL OF AMBASSADOR DUMBA.

THE WORLD'S disclosures as to the activities of Dr. Dumba were begun on September 5 in a special cable from London. They at once created a world-wide sensation. They showed that the Ambassador had sent to his chief in the Foreign Office at Vienna a studied detailed plan for the crippling of American factories engaged in the production of war munitions.

After a long campaign here against traffic in munitions, Austria-Hungary had made to the United States a formal protest against the sale of war supplies to the allies. Secretary Lansing replied that such purchases here were open to all the belligerents alike, so far as America was concerned, and that such traffic in munitions was not only legal under international law but was sanctioned by the general practice of nations, and, moreover, was vitally necessary to the National safety of peoples who did not maintain great defence establishments. Eight days after receiving Secretary Lansing's reply Dr. Dumba used James F. J. Archibald, an American war correspondent, travelling with a United States passport, as his secret messenger to Vienna with plans to cripple munition making here.

Archibald was temporarily detained by the British when his liner, the Rotterdam, put in at Falmouth, England. The whole of his papers were seized—unless there was truth in a story told at the time that some escaped by being thrown overboard by Archibald, who had them concealed in a gold-headed cane, presented to him as he sailed, by Count von Bernstorff, the German Ambassador, who, however, denied making any such gift. Copies of the seized papers were obtained by THE WORLD, which published a fac-simile of a grave letter in Dr. Dumba's own handwriting to Foreign Minister Burian in Vienna, asking him to reply by wireless authorizing the expenditure of a sum of money here to put munition plants out of commission. The letter contained a memorandum setting forth how the task was to be carried out, and said:

"I take this rare and safe opportunity of warmly recommending the proposals to Your Excellency's favorable consideration. We can disorganize and hold up for months, if not entirely prevent, the manufacture of munitions in Bethlehem and the Middle West, which in the opinion of the German Military Attaché is of great importance and amply outweighs the comparatively small expenditure of money involved."

Dr. Dumba made no attempt to deny writing and sending this astounding proposal, which was dated August 20, the day after the torpedoing of the White Star liner Arabic had brought this country near to a war crisis. Instead, he frankly admitted it to a WORLD correspondent at Lenox, Mass., the day of the publication of the disclosure of the letter. In an interview Dr. Dumba said:

"Yes, that was so. Count von Bernstorff and I dined with Archibald before he sailed and he was intrusted with secret and valuable papers. I fail to understand how he could have been so careless as to allow these despatches to fall into the hands of our enemies."

He further admitted that he had subsidized many foreign-language newspapers here in efforts to prevent men of races from Austro-Hungary from working in the munition factories, and defended his action, saying the money asked for was to be used only in calling out the men and providing them with other work. Four days later President Wilson demanded Ambassador Dumba's recall.

LIFTS VEIL THAT COVERED WIDE AND GRAVE CONSPIRACY.

The amazement caused everywhere by THE WORLD'S revelations as to Dr. Dumba's vicious enterprise —the full meaning of which everybody grasped at once and later saw borne out by startling circumstances and further disclosures—was the greater because up to this time the Ambassador had carried on his activities so inconspicuously that no one had even suspected him, though many other diplomats and other high officials were under strong suspicion. Many still believe that the plan, for which Dr. Dumba assumed full responsibility and which caused his fall, was worked out in detail, if indeed not actually originated, by Captain von Papen, the German Military Attaché.

In the interesting assortment of documents taken from Archibald by the British officials and published by THE WORLD other high German personages were involved. Among them were Count von Bernstorff, Captain von Papen, Dr. Heinrich F. Albert, German secret fiscal agent in New York, and Alexander Nuber von Pereked, the Austro-Hungarian Consul-General in New York. Curiously enough, some of these papers had a most important bearing upon other exposures which had only just been made by THE WORLD

and by the irony of fate brought confirmation of them in the most dramatic manner, though such confirmation was quite unnecessary.

For more than a year there had been deep suspicion throughout the country that German officials and gold were the sources from which the dangerous anti-American propaganda threatening the peace of the Nation, and also the inspiration of the many plots, rumors of which filled the air, to cut off the shipment of war supplies from the United States to the allies. But no proof was had until on August 15. THE WORLD began a series of disclosures which for the first time lifted the veil. There could be no disputing THE WORLD'S revelations. They were based upon the actual correspondence of the representatives of the German Government and their agents, copies of which were printed by this newspaper in fac-simile. This correspondence revealed that the leading officials of the German Government had had a hand in the promotion of ventures directed, not alone at its belligerent enemies, but in some instances at the laws and peace of the United States as well; that the German propaganda had for its purpose the involving of the United States in the complications of the European war, and that the plans designed to accomplish that result were carefully and deliberately projected, efficiently organized, superbly executed and adequately financed.

One of the most surprising facts disclosed was that no less a personage than Herr von Bethmann-Hollweg, Chancellor of the German Empire, was himself participating from Berlin in some of the secret undertakings in this country.

HIGH GERMAN OFFICIALS INVOLVED IN PLOTS HERE.

The chief men higher up in the anti-American schemes revealed were:

THEOBALD T. F. A. VON BETHMANN-HOLLWEG, Chancellor of the German Empire and Minister of State for Foreign Affairs.

COUNT JOHANN VON BERNSTORFF, German Ambassador at Washington.

CAPTAIN FRANZ VON PAPEN, Military Attaché at the German Embassy.

DR. HEINRICH F. ALBERT, chief financial agent of the German Government in this country.

HUGO SCHMIDT, Western representative of the Deutsches Bank of Berlin.

HUGO SCHWEITZER, a German-American chemist.

S. SULZBERGER, banker, of Frankfort, Germany.

HERR WAETZOLDT, trade representative of the German Government here.

The correspondence in possession of THE WORLD proved that the German agents here had formed elaborate schemes for the following purposes:

To control and influence the press of the United States by establishing newspapers and news services. One letter spoke of a secret option to obtain control of the American Press Association for $900,000; but Courtland Smith, President of that concern, while admitting that he printed the German daily news bulletins sent out to influence the press, denied the option. Another spoke of attempts to purchase the New York *Evening Mail* before it was acquired by its present owners, who are headed by S. S. McClure. Others, by showing it received a monthly bonus from the German Government, solved the mystery of the support of the German propagandist organ, the *Fatherland*, edited by George Sylvester Viereck, who denied that his letter, inclosing an account calling for $1,750 for June, meant what it said. In another Von Bethmann-Hollweg offered again to pay the expenses of a trip to Germany of an American writer, Edward Lyell Fox, because "his good despatches were of great benefit to us." The sole object in view in this campaign to nobble the press was to foment internal discord among the American people for the advantage of the German Empire.

To publish books, to invade the Chautauqua Circuit, pay professional lecturers and finance moving picture exhibitions—all in order to Germanize public opinion here.

To organize strikes in munition plants—$50,000 being mentioned as the sum for which one could be produced in factories at Detroit, Cleveland and Cincinnati.

To corner the supply here of liquid chlorine, used for poisonous gas, to prevent its getting to the allies.

To acquire the Wright Aeroplane Company and its patents and work them under German control.

To organize a movement to cut off the supply of cotton to England and make it appear that the movement was a genuine one on the part of the growers in the South.

To organize a movement to bring about an embargo on shipments of munitions. Among the names of Americans used in the letters, perhaps without consent, were those of Senator Albert J. Beveridge, Senator Gilbert M. Hitchcock, Congressmen Gardner of Massachusetts and Hobson of Alabama, ex-Congressman Bartholdt of Missouri, Editor S. S. McClure, Artist Reuterdahl, Actor Burr MacIntosh, the Rev. Dr. Charles F. Aked of San Francisco and William Bayard Hale. An "Inner Organization" was, the letters said, to have the aid of Democratic Boss Roger C. Sullivan of Chicago, described as "a deadly enemy of Wilson."

The published correspondence also showed the following astonishing facts:

That while protesting against the shipment of arms to the allies, the Germans had secretly acquired a vast and costly munitions plant being built at Bridgeport, Ct., and were not only making munitions here, to get them to Germany if they could or send them to any part of the world where they might foment trouble for their enemies, but were making, under the American name of their company, contracts with the British and Russian Governments for munitions with no intention of delivering but to discredit legitimate American business and to hamper the allies.

That Hugo Schweitzer, German-American chemist, had secured for the German Government the transfer to himself of a contract, under which Thomas A. Edison was to furnish the American Oil and Supply Company of Newark, N. J., with 1,212,000 pounds of phenol valued at $1,400,000—to shut off the supply going to the allies.

That Captain von Papen was in communication with certain labor leaders who offered to bring about strikes in munition and motor-car plants.

That Marcus Braun, editor of *Fair Play*, received a check for $5,000 from Ambassador Bernstorff, with a letter of commendation, which he was asked not to publish.

That while encouraging protests to Washington by American dye and chemical users against the British blockade, Berlin was purposely holding up cargoes of dyes in order to accentuate indignation in this country against England.

That William Travers Jerome had written to Arthur von Briesen saying that in so 'grave" a matter he would require a retaining fee of $10,000 and a further $10,000 for expenses, but the letter did not show what the "grave" matter was.

And though throughout the correspondence there was evidence of an extreme care in the outlay of money, showing that full value was wanted for every German mark spent on conspiracy in this country, it was estimated that the cost to Ambassador Bernstorff of the activities exposed could not have been less than $2,000,000 a week.

"OTHER PAPERS PRAISE WORLD FOR GREATEST JOURNALISTIC 'SCOOP.'"

The press of the entire United States was unanimous in its praise of THE WORLD for its exclusive revelations. The *Star* of London, England, said the disclosures "undoubtedly formed the greatest 'scoop' in the history of journalism." Colonel Roosevelt said of them:

"THE WORLD has rendered a great public service by its exposure of the German-American intrigue. It is the most incisive arraignment that could be imagined."

It was while the Nation was ringing with surprise over the facts unveiled in this remarkable exposure

that Archibald's seizure made him the laughing stock of the country and furnished THE WORLD with new and still more startling sensations. For among the papers he carried, in addition to that which caused the recall of Ambassador Dumba, were several that referred to the disclosures in THE WORLD. One of these was a copy of a 3,000-word statement that Ambassador Bernstorff had sent to Secretary Lansing calling THE WORLD'S exposures "inspired and romantic tales." Another was a letter from Captain von Papen to his wife with clippings from THE WORLD and saying:

"Our good friend Albert has been robbed of a thick portfolio of papers on the elevated road. English secret service men, of course, did it. Unfortunately some very important matters from my report are among the papers, such as the purchase of the liquid chlorine, the correspondence with the Bridgeport Projectile Company, as well as documents relating to the purchase of phenol, from which explosives are manufactured, and the acquisition of the Wright aeroplane patents. I send you also the reply of Albert in order that you may see how we protect ourselves. This was compounded last night in collaboration."

In this "compounded" reply, which was published in THE WORLD when given out during the run of the exposures, Dr. Albert explained his activities as "only to overcome the powerful propaganda carried on here by the allies," said his Government would willingly buy, if it could, all the munition plants in the country to keep the product here, and as to the letters about strikes they were merely from cranks and were never answered.

Another communication in Archibald's care was a letter from Captain von Papen fated to become famous and to prove unpleasant for him. It contained a sentence with the expression "bloedsinnige Yankees." The official British translation, as published in THE WORLD, gave the sentence as, "I always say to these idiotic Yankees that they had better hold their tongues." Germans held that the word "bloedsinnige" more properly might be translated "absurd or nonsensical," but the dictionary gave it as "idiotic or imbecile."

In Archibald's budget also were three letters in a code which neither the British nor the State Department at Washington were able to decipher. Too, there was a report from Dr. Albert and Captain von Papen to the German War Office. This explained how it was THE WORLD exposures "happened." Eventually, but not until December, the three code letters led President Wilson to demand Captain von Papen's recall, together with that of Captain Karl Boy-Ed, the German Naval Attaché, who became involved in other plots and breaches of the law.

GERMANS OFFER $1,000,000 FOR STRIKE AT DOCKS.

The Archibald and Albert sensations were still hot in the public mind when THE WORLD came out with another exposure, based on letters, telegrams, records of conversations and incidents occurring between May 7 and July 10. This showed that an offer of $1,035,000 had been made by the German agents for a five weeks' strike of 23,000 longshore workers at Atlantic Coast ports. The plot, which was first mooted to the labor men by Matthew F. Cummings, a prosperous groceryman of Boston, who bore letters of indorsement from Professor von Mach of Harvard University, was only frustrated by the sterling uprightness and patriotism of T. V. O'Connor, President of the International Longshoremen's Union, who was splendidly assisted by Paul Kelly, reformed gang leader, become leader of Longshoremen's Union No. 738, and Richard (Dick) Butler, Secretary of another local union, who headed off the strike until O'Connor could reach here from Vancouver.

One of the men consulted by Cummings was George Sylvester Viereck, editor of the *Fatherland*.

The remarkable details given by THE WORLD, showing how the German and German-American conspirators had been trailed and listened to throughout the whole period of their plotting must have made many of them quake.

A few days later THE WORLD printed still another exposure. It announced this time that it had possession of documents which revealed a widespread campaign by the American Truth Society, of which Dr. Heinrich F. Albert and Hugo Schmidt were members, to prevent American bankers loaning money to the allies by arranging runs upon their banks and that the organization would enter the 1916 National campaign to defeat Wilson and all legislators who would not vote for an embargo on shipments of munitions. The exposure in THE WORLD killed the first part of this programme. The other part is up to the American people.

WORLD DENOUNCES BRITISH CONTROL OF AMERICAN TRADE.

Within a week of the strike exposure THE WORLD, which had consistently denounced the British control of American trade, began the presentation of facts, again illuminated by documentary evidence, which revealed the far-reaching efforts on the part of the British Government to regulate and control trade between the United States and the rest of the world. It was shown that the "boycott" and "blacklist" had been resorted to and that every American manufacturer needing raw materials from a British possession before getting them had to sign guarantees that he would not ship any of the resulting goods to any foreign country, even South America, without the consent of London and assurance that none would be resold there to the enemies of Britain.

By these stringent regulations importers who refused to submit were put practically out of business and Americans with German affiliations were not permitted to obtain their necessary raw materials at all. The Department of Justice took up THE WORLD'S charges with a view to ascertaining whether the American manufacturers who had consented to be controlled by Great Britain to the limitation of American trade had disregarded the restraint of trade clause in the anti-trust laws.

BIG WORLD EXCLUSIVES IN NEWS OF THE WAR.

In its news of the war THE WORLD can record many notable achievements during 1915.

The Emperor William sent to THE WORLD his first public utterance after the outbreak of hostilities. The statement was obtained through Albert Ballin by Gustave C. Roeder, staff correspondent of this newspaper for twenty-seven years and a veteran of the United States Army. The Kaiser on March 26 said:

"I did not want to have this awful war. My greatest desire has always been that I might be permitted to end my life without having to face a war on the part of Germany. I certainly have shown that in every act of mine in the twenty-six years of my reign; I have proved that I did not wish to bring on this or any other war.

"I feel that this war was brought on, not by Germany, but by those other nations that are fighting against us. But now that the war has come upon us, I feel it my duty to carry it through. And I am quite certain the war will end with Germany victorious. It will end well for Germany. I am in the field with my brave soldiers. Victory will be ours."

Albert, King of the Belgians, sent through THE WORLD on February 3 the following message to the American people:

"It is my pleasure and my duty to seize this opportunity to express my gratitude to the United States of America. With a generosity and a delicacy that have gone to my heart, American citizens have come to the assistance of my country, which the German invasion has plunged into untold misery by exorbitant levies out of all proportion to the means of the inhabitants.

"But for the brotherly help of the United States, famine would have spread like a plague through our devastated provinces. The people of Belgium, inured to suffering, will ever be grateful to the United States. To your eminent diplomats, who have served us with so great devotion amid circumstances of the utmost difficulty, and to all those who have so splendidly organized the feeding of our people, I wish to bear heartfelt tribute and to render public thanks. Once again the great American people, faithful to their century-old traditions, have undertaken a work of humanity and brotherly love and have reasserted before the whole world their ideals of justice and of liberty. ALBERT, King of the Belgians."

Later THE WORLD obtained an exclusive interview with King Albert through its staff correspondent, Henry N. Hall, who wrote a description of conditions in conquered Belgium. The King told of Belgium's fight for honor and said, "To conquer Belgium entirely they must first pass over my dead body."

Throughout the year since he joined THE WORLD staff Karl H. von Wiegand has obtained a remarkable series of interviews. The most striking and important was that with Pope Benedict XV. It led to a heated European controversy. There were many denials that His Holiness had given the interview. Then it was said words had been inserted. But the Vatican ended the dispute by indorsing every word in the von Wiegand despatch.

In the interview the Pope sent a message and his blessings to the American people and expressed his urgent wish that all should work unceasingly for peace. The words which caused the heated controversy were in the suggestion that America should "avoid everything" that tended to prevent an early peace. German papers at once seized upon this as meaning that the United States should at once stop selling munitions to the allies.

THE WORLD made special efforts to have all the belligerents equally and adequately represented in its news and particularly to get the German side on every occasion because of the allegation by the Germans that news from Germany was not given. Von Wiegand made a record not only with news but with his special interviews from Germany. He enabled THE WORLD to give statements from the German Crown Prince, Admiral von Tirpitz, Count Zeppelin, General Friedrich von Bernhardi, Field Marshal von der Goltz, Lieutenant-Commander Mathy, Zeppelin pilot who raided London; Lieutenant Hansen, commander of the famous U-boat 16, and other notables in the war. He was the only correspondent who visited the German fleet and the only one permitted to go to the Austrian lines defending Goeritz.

Gustave C. Roeder, staff correspondent, was sent by THE WORLD to make a tour of Germany, and the situation of Germans at home was faithfully and sympathetically described. Mr. Roeder visited Krupps', interviewed Albert Ballin, the merchant marine prince, who is the Kaiser's closest friend, and also T. St. John Gaffney, United States Consul at Munich, whose remark about his "keen sense of humiliation as an American" started him on the way to the recall by President Wilson which followed complaints made later by Americans.

Ewan Justice was sent to England to learn at first hand for readers of THE WORLD how the British were meeting the war pressure. Lincoln Eyre wrote a series of articles to answer the question, "How about France?" Earl Harding described under the title "Canada at War" the splendid manner in which the Dominion rose to her duty and bore her sacrifices.

John E. Redmond, the Irish Nationalist leader, wrote for THE WORLD a special article to show that Ireland was proving her loyalty to the Empire.

Among the many other exclusive articles of note, General von Bernhardi summed up the first year of the war for THE WORLD, Count Ernst von Reventlow reviewed the year's activities of the German navy, and Arthur J. Balfour, First Lord of the British Admiralty, wrote an article in reply. Before he was head of the British navy Mr. Balfour in a letter told THE WORLD how Great Britain justified her blockade of Germany. Sir George Paish, the famous economist, wrote on "Finances and the War."

Count von Reventlow sent many despatches exclusively to THE WORLD, so also did General W. A. Soukhomlinoff, Adjutant to the Czar, and General Alexei Andreievitch Polivanoff, his successor as Russian Minister of War.

The exclusive special descriptive articles on the war published by THE WORLD in 1915 were too numerous to be recounted. Only a few can be singled out. At the head of them, both for interest of the subject matter and for the brilliant descriptive power with which it was set forth, was the series written by Ralph Pulitzer of his visit to the French, British, and Belgian lines. Mr. Pulitzer made a sensational trip over the trenches in an aeroplane, took lessons in hand grenade throwing and had several narrow escapes when under fire. Another series of unsual interest was formed by extracts from the diary of Captain Norman G. Thwaites, a former member of THE WORLD staff, who went through the battle of the Marne, and was wounded on the Aisne and was decorated by King George after his force had been annihilated while on scouting duty.

THE WORLD also obtained the first interview with George Gordon Moore of Detroit, Mich., the particular friend of General Sir John French, who declared that young Canadian officers had been crucified by the Germans.

Finally, through its war correspondent, E. Alexander Powell, THE WORLD obtained from the French Government the loan of official motion pictures of the fighting in France, taken by order of the great General Staff of the French Army for preservation in the National archives as part of the official record of the war, and exhibited them to the public throughout the country, enabling the people to see with their own eyes for the first time exactly what modern war is like. Part of the proceeds from the exhibition went to the funds of the French Red Cross Society.

SANTA CLAUS SHIP GAINS GRATEFUL THANKS.

Although the majority of the presents reached their recipients well in time for Christmas, the new year was nearly a month old before all the gifts sent on the Santa Claus ship by the children of the United States to the children of war stricken Europe had been distributed. Some of the gifts for children in Belgium also were late on account of the frontier regulations which compelled the opening of every package for the removal of all letters and Christmas messages they might contain. The year was old before touching letters, votes, and other expressions of thanks ceased to reach THE WORLD office.

VISIT OF FLEET DUE TO WORLD SUGGESTION.

Early in the year THE WORLD suggested that the efficiency of the United States Navy for the protection of the Nation's eastern seaboard be put to a practical test in a scheme of manœuvres planned on a larger scale than had ever been attempted. The result was that on May 8 the largest aggregation of warships ever seen in the Hudson steamed into the river and after a ten days' stay was reviewed by President Wilson and sent out to hold a great war game, the outcome of which was taken as proof that an enemy could land a force on these shores and that the country needed a larger fleet with more scout ships and an equipment of seaplanes.

For bringing the fleet to the city THE WORLD was warmly praised by Mayor Mitchel, Acting-Mayor McAneny, Comptroller Prendergast, Corporation Counsel Frank L. Polk, and others. In a wireless despatch after the review, Secretary Daniels said, "THE WORLD's suggestion of this review, which has been a success beyond parallel, was gladly acted upon, and I am sure the entire country was pleased with the conception and its brilliant execution by the fleet under Admiral Fletcher."

Having been responsible for the idea of bringing the fleet to New York, THE WORLD did its best to make the visit a happy one for the sailors and useful to the rising generation, to whom the Navy will look for strength. All the men of the fleet were invited to a big smoker at Madison Square Garden, at which the best talent in vaudeville and pugilism entertained them, and plenty of the necessary was supplied for making smoke. THE WORLD also chartered the big steel excursion steamer Mandalay, and in five trips took 15,500 high school students from all parts of the city on a tour round the fleet and afterward presented six prizes for the best papers on "The lesson of the Fleet." On the day of the review a position was obtained for the Mandalay nearly opposite the President's yacht, the Mayflower, and 2,500 wives, mothers, sweethearts, and friends of officers and men were invited to see the ships pass by and to follow them and the loved ones out to the Narrows.

WORLD INFLUENCE FELT AND PRAISED AT WASHINGTON.

The Senate Lobby Committee investigated and sustained the charges made by THE WORLD that Colonel Martin M. Mulhall and the National Association of Manufacturers had for years maintained an insidious lobby in Washington. After making their report on the floor of the Senate, Senators Reed, Walsh, and Overman gave THE WORLD credit for starting the inquiry which had proved the existence of a vast organization, reaching to every part of the country and enjoying practically unlimited resources, for the purpose of influencing legislation in Congress.

THE WORLD'S charges that the appointment of James Mark Sullivan, one of Bryan's "Deserving Democrats," as United States Minister to Santo Domingo was promoted by the Banco Nacional crowd of financiers so that they might traffic in contracts and concessions were supported in the report of Senator James D. Phelan, who investigated the scandal, and Mr. Sullivan retired.

Exposure by THE WORLD of Wall Street men's interest and the certainty that the money would go to them instead of to the tax-burdened people of Nicaragua prevented the ratification by the Senate of Bryan's agreement to pay that country $3,000,000 for a route for a canal.

NEW HAVEN DIRECTORS ON TRIAL FOR CONSPIRACY.

The climax to THE WORLD'S long and strenuous campaign to free New York and New England from the grip of the business methods of the New York, New Haven and Hartford Railroad Company came on February 26, 1915, when twelve present and former directors of the company were indicted on charges of conspiracy to monopolize the commerce of New England. The charges dated back to July 2, 1890, covering the entire life of the Sherman Anti-Trust law.

The directors indicted were William Rockefeller, Charles F. Brooker, Robert W. Taft, Lewis Cass Ledyard, Charles M. Pratt, D. Newton Barney, Frederick F. Brewster, Henry K. McHarg, James S. Hemingway, A. Heaton Robertson, Edward D. Robbins, and George MacCulloch Miller. They were placed on trial on October 13 last before Judge Hunt in the Criminal Branch of the United States District Court in New York City. All the defendants appeared except Mr. Miller, who was in his eighty-fourth year, and his poor health made it impossible for him to leave his home.

After the jury had been selected the defence filed a motion to dismiss the indictment on the ground that the acts cited did not constitute an illegal conspiracy or any other crime and on other technical points.

Charles S. Mellen, erstwhile President of the road, was the principal witness for the Government. Mr. Mellen told of the "cut-throat" competition that used to exist between the New York and New England road and the New Haven, and said that the latter hired him at a large salary to get him away from the former company and stop his "being a nuisance." No one dozed while Mr. Mellen disclosed how one by one sixty-five railroad and steamship lines were brought into a single system by the New Haven—and that system one exclusively their own.

Bit by bit the prosecution proceeded to lay bare the secret acts of the New Haven in establishing its alleged monopoly.

WORLD FIGHT DEFEATS REACTIONARY NEW CONSTITUTION.

Declaring the new Constitution for the State of New York "a miserable makeshift of compromises in which every principle was sacrificed in whole or part to special or selfish interests" and that "it overrides the fundamental principles of free government and shackles republican institutions," THE WORLD led the fight which resulted in the defeat of the proposed Constitution at the polls by a majority of more than 400,000.

Until THE WORLD began the fight against this Constitution the belief was general that it would be ratified at the polls. THE WORLD demonstrated that it was a rotten borough charter which deprived New York City of its equal rights in the State Government; that the short ballot was a makeshift; that the budget was hardly half a budget; that the Constitution was partisan; that none of the reforms promised had been carried out, and that the Constitution as a whole was a mass of technical legislation which would occupy the courts for twenty years. No other one thing contributed more to its overwhelming defeat than the attempt to make the Public Service Commissions constitutional officers and deprive the Legislature of the power to reorganize them. It was THE WORLD'S campaign against the new Constitution which aroused public sentiment and brought about the unprecedented repudiation.

THE WORLD also headed a demand for home rule for New York City as the only solution for its financial and other difficulties.

NO TRIFLING WITH PUBLIC SAFETY, SAYS WORLD.

The accident in the New York subway at Broadway and Fifty-third Street on January 7, in which hundreds of passengers missed death only by a second, led THE WORLD to demand a "panic proof" subway with all-steel cars, independent lighting system for tube and trains and telephones for the guards, and the immediate dismissal of the existing Public Service Commission with the creation of a new one that could be trusted to deal with the traction situation. THE WORLD won out to the extent that the all-steel cars were ordered to be installed by December 1: but when that date came round there was, of course, a further delay—as there always has been in any transportation question handled by the Public Service Commission.

REFORMING THE PUBLIC SERVICE COMMISSION.

Investigating committees twice urged the dismissal of Chairman McCall of the Public Service Commission, who had successfully represented the corporations against the public welfare. Finally THE EVENING WORLD took up the fight in earnest and made such revelations before the Thompson Committee that, on December 6, Governor Whitman removed McCall from his position on the commission. The immediate cause was that the Chairman held 387 shares of stock of the Kings County Electric Light and Power Company. His defence was that he had transferred this stock to his wife just before he was appointed to the commission. In his opinion Governor Whitman said there was no evidence before him of the transfer except the Commissioner's unsupported statement, and that while he had no desire to question the truth of Mr. McCall's statement he "did not believe that a transfer within the meaning of the law ever was made." Nineteen other reasons for the dismissal of McCall were set out, but the Governor did not go into them.

COMMITTEE CHAIRMAN PRAISES EVENING WORLD.

Senator Thompson, Chairman of the Legislative Committee that investigated Chairman McCall and made the charges that brought about his dismissal, said:

"Credit should be given in full to the press of the city of New York for furnishing the committee with knowledge of the facts, and particularly to THE NEW YORK EVENING WORLD, which, through the greatest investigating writer in its staff, Sophie Irene Loeb, furnished the committee with all the facts concerning the stock transaction which concentrated public attention and really brought about the first step toward a better realization of the benefits of a satisfactory public service regulation for this community.

"I wish also to acknowledge that whatever of success has been achieved by the committee in its investigation of these transactions has been wholly due to the indefatigable assistance which Miss Loeb, in her wealth of public spirit, has contributed by attending daily the meetings of the committee and generously giving advice and counsel, which have been readily accepted, from the wonderful store of scientific information which she has accumulated in months of study into the gas and other public utility corporations of this city."

On December 8 Governor Whitman appointed Oscar S. Straus to succeed McCall. Other members of the commission were then under investigation.

MAKES SIX-CENT BREAD TOO HOT TO HAND OUT.

As a result of figures produced by THE WORLD six-cent bread was made too hot to be handed out to the people of New York City. By analyzing statistics *this newspaper* showed that the increased exportation of wheat could continue without endangering the home supply and that the soaring market was predicated on a speculative apprehension of a shortage that would not materialize. Wheat at $2 and bread at ten cents were threatened. An extra cent on the loaf would have cost the people of the city $16,500,000 in a year. Ten-cent bread would have meant an extra annual burden of $82,500,000.

Inspired by THE WORLD, Attorney-General Egburt E. Woodbury announced that he would prosecute to the full extent of the law any combination designed improperly to advance the price of flour. No more was heard of six-cent bread.

THE WORLD then looked up the weight of loaves being sold and exposed light-weight bakers, some of whose loaves weighed as little as nine ounces. Investigation of the bread itself followed with the startling discovery that plaster of paris figured as a rival of flour.

OBTAINS CITY WORK FOR THE UNEMPLOYED.

During the Winter, in the midst of a severe and serious situation in which the number of the unemployed in New York City was estimated at 150,000, the largest in the history of the city, a dispute arose in the Board of Estimate as to the responsibility of the municipality. While well-to-do citizens were aiding by collecting food from door to door for the starving poor and bread lines were forming at big hotels a cry was raised that the city should help. City Chamberlain Bruere held that the city could not afford the necessary money and Comptroller Prendergast that the city was not responsible.

THE WORLD demanded that the city do something at once to relieve the situation, whether it cost $5,000,000 or $500,000. "The unemployment problem in its present acute form," said THE WORLD, "cannot be considered only from a bookkeeper's point of view."

Mayor Mitchel appointed a committee of distinguished citizens under the chairmanship of Judge Elbert H. Gary, and workshops were opened which provided jobs at 15 cents an hour.

OTHER PUBLIC SERVICES BY THE WORLD.

THE WORLD led the opposition which killed the proposed amendment to the Labor Law which would have permitted women and children to work more than sixty hours a week in cannery factories. The canners wanted to work them twelve hours a day during the rush season.

For the first Summer in many years the Criminal Courts rose for vacation without leaving an increase in the number of prisoners in the Tombs awaiting trial. As a result of THE WORLD's long crusade, the Judges in General Sessions sat longer hours and took shorter vacations.

"THE WORLD is doing a great service to all the people in its fight for the collection of the personalty tax and for extension along that line of taxation," said Allan Robinson, President of the Allied Real Estate Interests.

The city educational authorities were stirred up by THE WORLD's discovery that many non-resident children were yearly grafting $80 to $100 worth of tuition while children of residents were on half-time.

THE WORLD organized into an association the 40,000 tennis lovers who play in the public parks, gave trophies for a tournament and was congratulated by Mayor Mitchel.

"I want to commend THE WORLD for its article revealing the ease with which thugs and crooks may purchase dangerous weapons, especially knives," said Justice Freschi in Brooklyn Court of Special Sessions.

POULTRY TRUST MEN JAILED AT LAST.

After fighting for four years to escape prison, twelve wealthy members of the Poultry Trust, who were convicted in 1911 of conspiracy to control the live poultry market in New York City, were sent to jail in May last year. The thirteenth, convicted with the others, died about three months before the Court of Appeals sustained the convictions. The methods by which these men had obtained control of 90 per cent. of the live poultry trade were exposed in THE WORLD in 1910, and this newspaper furnished the District Attorney's office with the information used in the prosecution and extinction of the trust, which had had no little share in helping to boost the cost of living in the city.

The statute under which these men were tried had been on the books for fifty years, but this was the first prison sentence under it. The trial was one of the longest in the history of the New York courts. Eighty persons were named in the original indictment. Eighteen were brought to trial. William Travers Jerome, who acted as counsel for the defendants, tried to have all readers of THE WORLD kept off the jury.

THE WORLD'S CARTOONS.

Again many of the daily cartoons in THE WORLD won international fame. One that is still remembered in many a home throughout the world, and long will be, bore the title, "But why did you kill US?" The drawing showed the question being addressed to Emperor William by the shades of the little children drowned on the Lusitania. Another notable one was entitled, "I'm a patient man, William, but"—— It was Uncle Sam speaking. John Bull also came in for his share of attention.

WORLD'S BUREAU OF ACCURACY AND FAIR PLAY.

THE WORLD's Bureau of Accuracy and Fair Play, which was founded by Ralph Pulitzer in 1912, issued its first biennial report. This showed that the work of the bureau had achieved the object of its founder, in that it had stamped out carelessness, fakes and fakers and that its aim had been adopted by other newspapers and by news agencies.

During the first two years of its existence the bureau dealt with 787 cases involving charges against accuracy or fair play in the news and editorial columns. The complaints sustained numbered 498, the corrections published 291. There were in addition 68 publications in the interest of fair play where THE WORLD had not been at fault. Every complaint received was carefully inquired into.

The records of its investigations during the two years prove that the men attached to the home office of THE WORLD are careful and accurate. They further show that a large percentage of the errors corrected are not due so much to the carelessness of reporters or editors as to the misinformation supplied by persons upon whom they must rely for the news.

"So far as the writer knows," says the report, "only three men in the home office have been dropped because of this bureau's reports, and they certainly deserved to be. On the other hand, we have been careful in our reports to fully vindicate all whose accuracy or fair play was unjustly questioned and to pass as 'excusable errors' those which could not have been averted by a proper standard of care and attention to duty."

SOME MINOR ACHIEVEMENTS BY THE WORLD.

On August 8 THE WORLD gave the first hint of the romance of President Wilson and Mrs. Norman Galt, now his bride.

The telephone across the continent was first used by THE WORLD when on February 20 it rang up the office of President Charles C. Moore at San Francisco and got from him the story of the opening of the Panama-Pacific Exposition.

It was at the suggestion of THE WORLD that the flags on the city and other public buildings were hung at half-mast on the fiftieth anniversary of the death of President Lincoln.

As he sailed from the Island of South Georgia for the South Pole Sir Ernest Shackleton sent THE WORLD his parting message, told of his plans and said he might be heard from some time this Spring.

THE WORLD offered $1,000 reward for the apprehension of the murderer of five-year-old Leonore Anne

Cohn in the hallway of her home at 353 Third Avenue, and another $1,000 for the discovery of the murderer of four-year-old Charles Murray in the hallway of his home at 270 First Avenue.

On the allegations of race prejudice in the case of Leo M. Frank, who was convicted of the murder of Mary Phagan, THE WORLD sent a trained investigator to Atlanta, Ga., to present both sides.

When Villa declared he could pacify Mexico THE WORLD secured an interview with him in which he told of his plans and said that after establishing peace he would seek no office for himself but would retire to his ranch.

Chief Gunner's Mate Frank Crilley, U. S. N., described for THE WORLD his record dive of 288 feet to the sunken submarine F-4 in the crystal waters of Honolulu Harbor.

Harry Kemp, the "box car poet," spent a night for THE WORLD in the Hotel de Gink and wrote the "Lay of the Hobo."

"Dopey Benny" Fein gave THE WORLD his amazing tale of crime for hire in New York City. The overlord of gangs told how his thugs gouged out eyes, cut off ears, broke limbs, blew up workshops or committed murder at fixed prices and declared that his income from east side unions amounted to $12,000 a year.

Publicity in THE WORLD proved fatal to a curious organization for "war relief work by sweet young girls" carried on at 13 West Fifty-first Street as the "White Cross of the American Club."

THE WORLD again prosecuted several men who carried on "Want Ad" swindles. Among them Frederick C. Taylor, who ran a school for moving picture actors and did not live up to the promises on which he had collected money, was sent to the Island for nine months.

PHONE RATE CUT AN EVENING WORLD VICTORY.

THE EVENING WORLD was able to rejoice with its readers over its victory in its long and brilliantly fought battle for five-cent phones throughout Greater New York. The city gave widespread expression to its satisfaction when the cut in the rate was ordered. Distinguished citizens, including Mayor Mitchel and all the department heads of the City Government, poured in upon THE EVENING WORLD their commendations. Many district civic societies also sent in their congratulations. The cut cost the telephone company $2,636,000 from its yearly income, officials said.

Another great victory won by THE EVENING WORLD was the new Taxicab ordinance signed by Mayor Mitchel the first week of the year. This ended a long struggle to regain for the city its full rights in its own streets at least so far as one grievous form of trespass was concerned. Private persons were selling rights in the city streets for private profit. A single hotel netted in this form of graft no less than $30,000 a year for the privilege of driving a cab up to its doors to pick up a fare who wanted a cab.

INAUGURATES PENNY SCHOOL LUNCHES.

It was found during the Winter that many starving children were attending the public schools. The number was estimated at no fewer than 37,776. After an investigation by Miss Sophie Irene Loeb THE EVENING WORLD began to collect funds to provide the underfed little ones with a square meal at school every day for the price of one penny—and the penny was to be provided too for those who could not afford even that small sum. In July the Board of Estimate paid this newspaper the compliment of unanimously voting $26,500 revenue bonds for the equipment and maintenance of penny lunchrooms in a hundred schools. Such was the success—and also the need—of the movement.

A fund is being maintained by THE EVENING WORLD to pay the pennies for the children who cannot afford to buy the lunches. If one child in every twenty—that was the proportion—was to be allowed to go underfed a great army would grow up lacking the physical and mental vigor the community requires in them. The Penny School Lunch Fund is one of the most practical means yet devised to help needy families through a hard Winter.

PENSIONS FOR WIDOWED MOTHERS ANOTHER VICTORY.

For two years THE EVENING WORLD conducted its campaign to win the passing of the Widowed Mothers' Pension law which Governor Whitman signed on April 7 last year. One of the pens used by the Governor in signing the act was handed by him to Miss Loeb, of THE EVENING WORLD staff, as a memento of her articles in this newspaper. Now instead of having to part from her children and send them to an institution if she cannot afford to provide for them, the widowed mother is paid the same sum as would be paid the institution for the maintenance of the children.

END TAX DODGING, SAYS THE EVENING WORLD.

Mustering facts and figures with its usual brilliant clarity, THE EVENING WORLD in November and December dealt telling blows on the system of municipal management which in New York City has increased the taxes by 82 per cent. while the population grew only 31 per cent. New York was shown to be over-engineered, over-superintended, over-surveyed. Millions went in jobs and nothing came in the way of results, THE EVENING WORLD declared. It was shown that in an expensive system of overlapping bureaus and their practice of "passing the buck" the same work was done two or three times over, milking the city of millions.

THE EVENING WORLD urged that as a first practical step toward solving the city tax problem an end should be put to the tax dodging which robs the city of millions, and that some of the burden borne by real estate, more than 82 per cent. of the whole, should be placed upon public utilities. And it asked why the lawmakers were so shy of the corporations.

Throughout the year THE EVENING WORLD kept at its efforts to extend to Brooklyn the boon of 80-cent gas which its fight obtained for Manhattan.

SUNDAY WORLD WINS HIGH COMPLIMENTS.

THE SUNDAY WORLD made immense strides during 1915. It was acclaimed by many distinguished writers and the editors of the leading periodicals of the country as representing the greatest advance in Sunday journalism. The enconiums paid to THE SUNDAY WORLD by noted authors were perhaps the highest ever given to any such publication.

Striking improvement was made in the color work in THE SUNDAY WORLD during the year. It is now as good as that in the most expensive monthly magazines.

The diversity of interest in the subjects dealt with and the humor and humanity which were so delicately entwined in their treatment were widely and highly appreciated. Perhaps the most conspicuous feature of the year in the Magazine Section of THE SUNDAY WORLD was the astounding story of his life told in "The Revelations of a Foreign Spy," by Ignatius T. T. Lincoln, who, though practically penniless when he left Canada for England, and spoke English with a strong German accent, changed his name, got himself elected a member of the House of Commons and then of the inner circle of the British secret service—all in order that he might serve the Kaiser.

SUNDAY WORLD AIDS SCHOOL CHILDREN.

THE SUNDAY WORLD also continued its work in behalf of the school children in athletics, play, gardening, and other directions. More than 4,000 medals and pins were awarded to the young gardeners. More than 65,000 boys competed for SUNDAY WORLD medals in the athletic games. The walking clubs also had a successful year. The Sunday World Baseball League broke all its records.

In June the seven prettiest girls among the readers of THE EVENING WORLD were given free trips for themselves and an escort to the Panama Exposition by the Universal Film Manufacturing Company. Among the chaperons of the party was Mrs. Champ Clark, wife of the Speaker of the House of Representatives.

As in all other years its readers sent aid to many families in distress and THE WORLD was the means of restoring many lost relatives and much lost property.

GAME LAWS OF THE
CLOSE SEASON FOR GAME

THE following table shows the close season for all game in the United States, with the exception of mountain sheep and goat and a few unimportant species. Where no dates are given kind of game does not exist, or close season at all times. Local laws, where operative, should be consulted.

The first date of the close season and the first date of the open season are given.

1 Elk only. 4 Prairie chicken, closed season all year. 5 Rail excepted. 6 Female protected all the year. 7 Snipe only. 8 Rail—Connecticut, Dec. 1–Sept. 16. 9 Deer raised in private preserves may be killed at any time. 10 Certain species. 12 Local exceptions. 13 Gobblers, June 1–Apr. 15. 19 Sundays and Mondays are also closed seasons for ducks and other waterfowl. 21 Rail, coot, mud hen, Dec. 1–Sept. 1. 22 Except June 15–Sept. 15. 27 Between Nov. 24 and Jan. 1, hunting with dog and ferret only. 28 Cock pheasant may be killed Oct. 6–Oct. 1, under permit. 29 Residents of the State may kill rabbits on their own land at any time. 31 Season varies according to latitude. 32 Open season for few days only late in November. 33 Prairie chicken, Nov. 1–Oct. 15. 34 Open season about 4 days in late fall. Law not applicable to possession of imported deer properly tagged. Prohibitory laws against hunting doves and robins exist in nearly all States. Sale of game during close season is prohibited in most States. License fees from non-residents required in some States.

(a) Female deer and elk and deer without horns protected at all times. (b) Except deer without horns. Non-resident not permitted to kill. (d) Game animals or birds may be killed at any time for food or clothing by native Indians or Esquimaux, or by miners or explorers in need of food, but game so killed cannot be shipped or sold.

*NEW YORK. Dates for deer hunting apply to Adirondack region only; rest of State no open season. Exceptions: Ulster, Orange and Sullivan Counties, Nov. 16–Nov. 1. Fawns at all times. Hunting with dogs, traps or devices of any kind prohibited.

WILD BIRDS Catching, killing, or the possession of live or dead, and robbing of nests prohibited at all times—except English sparrow, hawk, crow, owl, and blackbird.

Hunting and shooting on Sunday prohibited.

Export of game or birds taken in the State is prohibited.

FISH LAWS, NEW YORK STATE, OPEN SEASON.

Trout—First Saturday in April to August 31. Minimum length, six inches. Not more than ten pounds of trout may be taken or transported by one person in one day. Trout must not be taken by any other method than angling.

SEVERAL STATES, 1916.

IN THE UNITED STATES.

Open season may be found by reversing dates. The difficulty of securing absolute accuracy in a table of this kind is very great, and absence in laws of many States of express legislation as to inclusion or exclusion of date upon which seasons open and close makes exactness almost an impossibility.

Compiled and corrected to December 1, 1915.

Lake Trout and Whitefish.—Lake trout not less than fifteen inches in length, and whitefish not less than 1¾ pounds in the round, may be taken and possessed from April 1 to September 30, both inclusive. Otsego whitefish, commonly called Otsego bass, not less than nine inches in length, may be taken and possessed from January 1 to October 31, both inclusive. A person may take by angling not to exceed ten lake trout in one day, but whenever two or more persons are angling from the same boat they may take not to exceed fifteen in one day. Whitefish may be taken in any number or quantity. Lake trout and whitefish may be taken in Lakes Erie and Ontario in any number or quantity at any time, and when so taken may be possessed.

Black Bass.—June 16 to November 30, inclusive. Minimum length, ten inches. Limit per day to one person, fifteen; to a boat, two or more persons, twenty-five; bass must not be taken by any other method than angling.

Pickerel and Pike.—May 1 to March 1, inclusive. Pike, minimum length, ten inches. Pickerel, minimum length (St. Lawrence River), twenty inches.

Pike Perch.—Not less than twelve inches in length may be taken and possessed in any number or quantity from May 1 to March 1, both inclusive.

Frogs.—Bullfrogs, green frogs and spring frogs may be taken in any manner, possessed, bought and sold from June 1 to March 1, both inclusive. They shall not be taken, possessed, bought or sold at any other time.

(Long Island, Open Season.)

Trout.—April 1 to August 31, inclusive.

Rainbow Trout.—April 16 to September 30, inclusive.

Note.—The State Fish and Game Laws apply where not in conflict with the Long Island provisions.

MEN'S DRESS CHART FOR 1916.

THE following is a specification of the proper attire for men on various occasions in the Spring and Summer of 1916, prepared and copyrighted by *The Haberdasher*, New York.

THE WORLD ALMANAC FOR 1916.

THE astronomical calculations in this work were expressly made for it by Dr. J. Morrison and are given in *local Mean Time.*

Chronological Eras.

The year 1916, which is bissextile or "leap year," corresponds to the year 7424-25 of the Byzantine era; 5677-78 of the Jewish era, the year 5677 commencing at sunset September 27; 2669 since the foundation of Rome according to Varro, 2692 of the Olympiads or the fourth year of the 673d Olympiad commencing on July 1; 2576 of the Japanese era, and to the fourth-fifth year of the period entitled Taisho; 1334-35 of the Mohammedan era, the year 1335 commencing on October 28, 1916. The 141st year of the Independence of the United States of America commences July 4, 1916.

CHURCH FASTS.

THE Roman Catholic Days of fasting are the forty days of Lent, the Ember Days, the Fridays of the four weeks in Advent, and certain vigils or evenings prior to the greater feasts, while all Fridays of the year are days of abstinence from flesh meat. In the American Episcopal Church the days of fasting or abstinence to be observed, according to the Book of Common Prayer, are the forty days of Lent, the Ember Days, the three Rogation Days, and all the Fridays of the year except Christmas Day. In the Greek Church the four principal fasts are those in Lent, the week succeeding Whitsuntide, the fortnight before the Assumption, and forty days before Christmas.

EMBER AND ROGATION DAYS.

EMBER and Rogation Days are certain periods of the year devoted to prayer and fasting. Ember Days (twelve annually) about the beginning of the four seasons, and are the Wednesday, Friday, and Saturday after the first Sunday in Lent, in Spring; after the feast of Pentecost (Whit Sunday), Summer; after the festival of the Holy Cross, Autumn; and after the festival of St. Lucia, Winter. Ember Weeks are the weeks in which the Ember Days appear.

Rogation Days occur on the Feast of St. Mark, April 25, and on the three days immediately preceding Ascension Day.

DIVISIONS OF TIME.

THE interval between two consecutive transits of a fixed star over any meridian or the interval during which the earth makes one absolute revolution on its axis is called a *Sidereal* Day, and is invariable, while the interval between two consecutive transits of the Sun over any meridian is called an *Apparent* Solar Day, and its length varies from day to day by reason of the variable motion of the earth in its orbit and the inclination of this orbit to the equator on which time is measured.

A *Mean* Solar Day is the average or mean of all the apparent solar days in a year. *Mean Solar Time* is that shown by a well-regulated clock or watch, while *Apparent Solar Time* is that shown by a well-constructed sun-dial; the difference between the two at any time is the *Equation of Time*, and may amount to 16 minutes and 21 seconds. The Astronomical Day begins at noon and the Civil Day at the preceding midnight. The Sidereal and Mean Solar Days are both invariable, but one day of the latter is equal to 1 day, 3 minutes, and 56.555 seconds of the former.

The interval during which the earth makes one absolute revolution round the Sun is called a *Sidereal Year*, and consists of 365 days, 6 hours, 9 minutes, and 9.6 seconds, which is invariable.

The Tropical Year is the interval between two consecutive returns of the Sun to the Vernal Equinox. If this were a fixed point, the Sidereal and Tropical Years would be identical; but in consequence of the disturbing influence of the Moon and planets on the spheroidal figure of the earth, the Equinox has a slow, retrograde mean motion of 50″.26 annually, so that the Sun returns to the Equinox sooner every year than he otherwise would by 20 minutes 23.6 seconds; the Tropical Year, therefore, consists of 365 days, 5 hours, 48 minutes, and 46 seconds. The Tropical Year is not of uniform length; it is now slowly decreasing at the rate of .595 second per century, but this variation will not always continue.

Julius Cæsar, in B.C 45, was the first to reform the calendar by ordering that every year whose date number is exactly divisible by 4 contain 366 days, and all other years 365 days. The intercalary day was introduced by counting the *sixth* day before the Kalends of March *twice;* hence the name bissextile, from bis, twice, and sex, six. He also changed the beginning of the year from 1st of March to the 1st of January and also changed the name of the fifth month (Quintilis) to July, after himself. The average length of the Julian year is therefore 365¼ days, which, however, is too long by 11 minutes and 14 seconds, and this would accumulate in 400 years to about three days. The Julian Calendar continued in use until A.D. 1582, when the date of the beginning of the seasons occurred 10 days later than in B.C. 45, when this mode of reckoning time was introduced.

The Gregorian Calendar was introduced by Pope Gregory XIII. with the view of keeping the Equinox to the same day of the month. It consists of 365 days, but every year exactly divisible by 4 and the centurial years which are exactly divisible by 400 contain 366 days; and if in addition to this arbitrary arrangement the centurial years exactly divisible by 4,000 contain 366 days, the error in the Gregorian system will amount to only one day in about 200 centuries. If, however, 31 leap years were intercalated in 128 years, instead of 32 as at present, the calendar would be practically exact, and the error would not amount to more than a day in 100,000 years. The length of the mean Gregorian Year may therefore be set down at 365 days, 5 hours, 49 minutes, 12 seconds. The Gregorian Calendar was introduced into England and her colonies in 1752, at which time the Equinox had retrograded 11 days since the Council of Nice in A.D. 325, when the festival of Easter was established, and the Equinox occurred on March 21; hence September 3, 1752, was called September 14, and at the same time the commencement of the legal year was changed from March 25 to January 1, so that the year 1751 lost the months of January and February and the first 24 days of March. The difference between the Julian and Gregorian Calendars is now 13 days. Russia and the Greek Church still employ the Julian Calendar for civil and ecclesiastical purposes.

STANDARD TIME.

(From a statement prepared by the United States Naval Observatory, Washington, D. C.)

THE United States adopted standard time in 1883, on the initiative of the American Railway Association, and at noon of November 18, 1883, the telegraphic time signals sent out daily from the Naval Observatory at Washington were changed to the new system, according to which the meridians of 75°, 90°, 105° and 120° west from Greenwich became the time meridians of Eastern, Central, Mountain, and Pacific standard time respectively.

Theoretically, the divisions should be half way between the above meridians, but for general convenience the railroads change their time at the ends of railroad divisions, so that Eastern standard time is used from the Atlantic Coast to an irregular line through Buffalo, Salamanca, Pittsburgh, Wheeling, W. Va.; Holloway, Ohio; Huntington, W. Va.; Bristol, Tenn.; Norton, Va.; Asheville, N. C., Atlanta, Augusta, Ga.; Columbia, S. C.; Central Junction, Ga. Some of these cities use Eastern and some Central time, while the railroads use one time in one direction and the other time in the other direction.

The same applies to the cities on the dividing lines between the Central and Mountain divisions; the line running through Bismarck, N. D., South Dakota, Nebraska, Colorado, Kansas, New Mexico and Texas to El Paso; also to the cities on the dividing line between the Mountain and Pacific divisions the line running through Montana, Idaho, Oregon, Utah, Nevada, and Arizona.

For Time Difference table see Index.

Almost all countries throughout the world use standard time based on the meridians 15° apart from Greenwich, while some use standard time based on the longitude of their national observatories.

JANUARY 1. NEW YEAR'S DAY: In all States (including District of Columbia, Porto Rico, Hawaii and Alaska), except Massachusetts. (In Maine a bank holiday only legally.)

JANUARY 8. ANNIVERSARY OF THE BATTLE OF NEW ORLEANS: In Louisiana.

JANUARY 19. LEE'S BIRTHDAY: In Florida, Georgia, North Carolina, South Carolina, Virginia, Alabama, Mississippi and Arkansas.

FEBRUARY. MARDI-GRAS: In the parish of Orleans, Louisiana.

FEBRUARY 12. GEORGIA DAY: In Georgia.

FEBRUARY 12. LINCOLN'S BIRTHDAY: In California, Colorado, Connecticut, Delaware, Illinois, Iowa, Indiana, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, Nevada, New Jersey, New York, North Dakota, Oregon, Pennsylvania, South Dakota, Utah, Washington, West Virginia and Wyoming.

FEBRUARY 14. ADMISSION DAY: In Arizona.

FEBRUARY 22. WASHINGTON'S BIRTHDAY: In all the States, District of Columbia, Porto Rico, Hawaii and Alaska.

FEBRUARY ——— MARDI-GRAS DAY, SHROVE TUESDAY: In Alabama and Florida (in counties having a carnival). In Louisiana, observed in Orleans Parish.

MARCH. First Wednesday prior to Spring election at which Circuit Judges are elected and in counties and cities where offices are filled at Spring election in Michigan.

MARCH (Third Tuesday). PRIMARY ELECTION DAY (every Presidential year): In North Dakota.

MARCH 2. ANNIVERSARY OF TEXAN INDEPENDENCE: In Texas.

MARCH 4. INAUGURATION DAY: In District of Columbia in years when a President of the U. S. is inaugurated.

MARCH 22. EMANCIPATION DAY: In Porto Rico.

APRIL (First Monday in 1916 and every four years thereafter). PRESIDENTIAL PRIMARY: In Michigan.

APRIL 21, 1916. GOOD FRIDAY: In Alabama, Connecticut, Delaware, Florida, Louisiana, Maryland, Minnesota, New Jersey, Pennsylvania, Porto Rico, Tennessee.

APRIL 12. HALIFAX INDEPENDENCE RESOLUTIONS: In North Carolina.

APRIL 13. THOMAS JEFFERSON'S BIRTHDAY: In Alabama.

APRIL 19. PATRIOTS' DAY: In Maine and Massachusetts.

APRIL 21. ANNIVERSARY OF THE BATTLE OF SAN JACINTO: In Texas.

APRIL 26. CONFEDERATE MEMORIAL DAY: In Alabama, Florida, Georgia, Mississippi and Virginia.

MAY 10. CONFEDERATE MEMORIAL DAY: In North Carolina and South Carolina.

MAY (Second Friday). CONFEDERATE DAY: In Tennessee.

MAY 20. ANNIVERSARY OF THE SIGNING OF THE MECKLENBURG DECLARATION OF INDEPENDENCE: In North Carolina and Kentucky.

MAY 30. DECORATION DAY: In all the States (and District of Columbia, Porto Rico, Hawaii), except Arkansas, Alaska, Florida, Louisiana, Mississippi, North Carolina, South Carolina, and Texas.

JUNE 3. JEFFERSON DAVIS'S BIRTHDAY: In Arkansas, Florida, Georgia, Alabama, Mississippi, Texas, Arkansas, South Carolina and Virginia. In Louisiana, known as "Confederate Memorial Day."

JUNE 11. KAMEHAMEHA DAY: In Hawaii.

JUNE 15. PIONEER DAY: In Idaho.

JUNE (Last Wednesday). PRIMARY ELECTION DAY: In North Dakota.

JULY 4. INDEPENDENCE DAY: In all the States, and District of Columbia, Porto Rico, Hawaii, and Alaska.

JULY 10. ADMISSION DAY: In Wyoming.

JULY 24. PIONEERS' DAY: In Utah.

JULY 25. LANDING OF AMERICAN TROOPS: Porto Rico.

JULY (Fourth Saturday). PRIMARY ELECTION DAY: In Texas.

AUGUST. PRIMARY ELECTION DAY: In Missouri. In Michigan (last Tuesday in August preceding every general November election).

AUGUST 1. COLORADO DAY: In Colorado.

AUGUST 16. BENNINGTON BATTLE DAY: In Vermont.

SEPTEMBER 4, 1916. LABOR DAY: In all the States (and District of Columbia, Porto Rico, Hawaii and Alaska).

SEPTEMBER. PRIMARY ELECTION DAY: In Nevada and Wisconsin, First Tuesday.

SEPTEMBER (Third Saturday). REGATTA DAY: In Territory of Hawaii.

SEPTEMBER 9. ADMISSION DAY: In California.

SEPTEMBER 12. "OLD DEFENDERS' DAY": In Baltimore, Md.

OCTOBER (First Monday). MISSOURI DAY (commemorative of Missouri history): In Missouri.

OCTOBER (Second Friday). FARMER'S DAY: In Florida.

OCTOBER 12. COLUMBUS DAY: In Alabama, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Idaho, Illinois, Indiana, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Pennsylvania, Porto Rico, Rhode Island, Texas, Vermont, Washington, West Virginia.

OCTOBER 18. ALASKA DAY: In Alaska.

OCTOBER 31. ADMISSION DAY: In Nevada.

NOVEMBER 1. ALL SAINTS' DAY: In Louisiana.

NOVEMBER (First Friday). PIONEER DAY: In Montana, observed in public schools.

NOVEMBER 7. GENERAL ELECTION DAY: In Alabama, Alaska, Arizona, California, Colorado, Delaware, Florida, Idaho, Illinois, Indiana, Iowa, Louisiana, Maine, Maryland, Michigan, Minnesota, Missouri, Montana, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio (from 12 M. to 5.30 P. M. only), Oklahoma, Oregon, Pennsylvania, Porto Kico, Rhode Island (biennially in even years), South Carolina, South Dakota, Tennessee, Texas, Virginia, West Virginia, Washington, Wisconsin and Wyoming, in the years when elections are held therein. In 1916 in States holding such elections the date is November 7.

NOVEMBER 23 or 30, 1916. THANKSGIVING DAY (usually the last Thursday in November): Is observed in all the States, and in the District of Columbia, Porto Rico, Hawaii and Alaska, though in some States it is not a statutory holiday.

DECEMBER 25. CHRISTMAS DAY: In all the States and District of Columbia, Porto Rico, Hawaii and Alaska.

Sundays and Fast Days are legal holidays in all the States which designate them as such.

There are no statutory holidays in Mississippi, but by common consent the Fourth of July, Thanksgiving and Christmas are observed. In New Mexico, Washington's Birthday, Decoration Day, Labor Day, Flag Day (June 14) and Arbor Day are holidays when so designated by the Governor. In South Carolina, Thursday of Fair Week is a legal holiday.

ARBOR DAY is a legal holiday in many States, although in some it is observed as designated by the Governor.

Every Saturday after 12 o'clock noon is declared in some States and cities by the local authorities a legal holiday.

There is no national holiday, not even the Fourth of July. Congress has at various times appointed special holidays. In the second session of the Fifty-third Congress it passed an act making Labor Day a public holiday in the District of Columbia, and it has recognized the existence of certain days as holidays for commercial purposes, but, with the exception named, there is no general statute on the subject. The proclamation of the President designating a day of Thanksgiving only makes it a legal holiday in the District of Columbia and the Territories.

MEMORABLE DATES.—(See also "Anniversaries.")

B. C.
1183 Fall of Troy.
1082 Era of the Great Pyramid.
878 Carthage founded.
776 Olympic Era began.
753 Foundation of Rome.
588 Jerusalem taken by Nebuchadnezzar
536 Restoration of the Jews under Cyrus
509 Expulsion of Tarquins from Rome.
480 Xerxes defeated Greeks at Thermopylæ.
55 Cæsar conquered Britain.
4 Birth of Jesus Christ.

A. D.
29 The Crucifixion.
70 Jerusalem was destroyed by Titus.
313 Constantine converted to Christianity
410 The Romans abandoned Britain.
827 Egbert, first king of England, Oct. 14.
1066 Battle of Hastings, Norman Conquest
1096 The Crusades began.
1172 Ireland was conquered by Henry II.
1215 King John granted Magna Charta, June 15.
1265 First Representative Parliament in England.
1415 Battle of Agincourt, Oct. 25.
1431 Joan of Arc was burnt, May 30.
1453 Constantinople taken by the Turks.
1455 The Wars of the Roses began.
1462 The Bible was first printed at Mentz.
1471 Caxton set up his printing press.
1492 Columbus discovered America, Oct. 12
1517 The Reformation began in Germany.
1519 Cortez began the conquest of Mexico.
1535 The first English Bible printed.
1539 Monasteries were closed in England.
1558 Accession of Queen Elizabeth, Nov. 17
1565 Revolt of the Netherlands began.
1565 St. Augustine, Fla., settled.
1572 The St. Bartholomew Massacre, Aug. 24
1588 The Spanish Armada defeated, July.
1603 Union of England and Scotland.
1607 Jamestown, Va., was settled May 13.
1609 Hudson River first explored.
1616 Shakespeare died, April 23.
1618 Thirty Years' War in Germany began.
1620 Pilgrims by the Mayflower landed.
1623 Manhattan Island settled.
1634 Maryland settled by Roman Catholics
1636 Rhode Island settled by Roger Williams.
1640 Cromwell's Long Parliament assembled.
1649 Charles I. was beheaded, Jan. 30.
1653 Cromwell became Lord Protector.
1660 Restoration of the Stuarts.
1664 New York conquered from the Dutch.
1664 The great plague of London.
1666 The great fire of London began Sept. 2.
1679 Habeas Corpus Act passed in England.
1682 Pennsylvania settled by Wm. Penn.
1685 Revocation of the Edict of Nantes.
1688 James II. abdicated, Dec. 11.
1690 Battle of the Boyne, July 1.
1690 First newspaper in America; at Boston.
1704 Gibraltar was taken by the English.
1713 Peace of Utrecht, April 11.
1714 Accession of House of Hanover, Aug. 1
1715 First Jacobite Rebellion in Great Britain; the second in 1745.
1720 South Sea Bubble.
1745 Battle of Fontenoy, April 30.
1756 Black Hole Suffocation in Calcutta.
1757 Clive won Battle of Plassey in India.
1759 Canada was taken from the French.
1765 Stamp Act enacted.
1773 Steam engine perfected by Watt.
1773 Tea destroyed in Boston Harbor, Dec. 16.
1775 Battle of Lexington, April 19.
1775 Battle of Bunker Hill, June 17.
1776 Battle of Fort Moultrie, Charleston, S. C., June 28.
1776 Declaration of Independence, July 4.
1776 Battle of Trenton, N. J., Dec. 25-26.
1777 Battle of Bennington, Vt., Aug. 16.
1777 Burgoyne's surrender, Oct. 17.
1779 Capt. Cook was killed, Feb. 14.
1781 Cornwallis's surrender at Yorktown, Oct. 19.

A. D.
1788 First settlement in Australia, Jan. 26.
1789 The French Revolution began July 14.
1789 Washington first inaug'ted President, April 30.
1793 Cotton-gin invented by Whitney.
1793 Louis XVI. of France executed, Jan. 21
1796 Vaccination discovered by Jenner.
1798 The Irish Rebellion.
1799 Bonaparte declared First Consul.
1801 Union of Great Britain and Ireland, Jan. 1.
1803 Louisiana purchased from the French
1804 Bonaparte became Emperor of France
1805 Battle of Trafalgar; death of Nelson.
1805 Battle of Austerlitz, Dec. 2.
1807 Fulton's first steamboat voyage.
1812 Second war with Great Britain.
1812 The French expedition to Moscow.
1813 Perry's victory on Lake Erie, Sept. 10.
1814 The printing machine invented.
1814 Scott's "Waverley" published.
1814 Battle of Lake Champlain, McDonough's Victory, Sept. 11.
1815 Battle of New Orleans, Jan. 8.
1815 Battle of Waterloo, June 18.
1819 First steamship crossed the Atlantic.
1823 Monroe Doctrine declared, Dec. 2.
1828 First passenger railroad in U. S.
1830 Revolution in France, Orleanist succession.
1835 Morse invented the telegraph.
1835 Seminole War in Florida began.
1835 Great Fire in New York City, Dec. 16-17.
1837 Accession of Queen Victoria, June 20
1845 Texas annexed.
1846 Sewing machine completed by Howe.
1846 The Irish Potato Famine.
1846 British Corn Laws repealed, June 26.
1846 War with Mexico began.
1847 Battle of Chapultepec, Sept. 13.
1848 French Revolution. Republic succeeded.
1848 Gold discovered in California, Sept.
1851 Gold discovered in Australia, Feb. 12
1851 First International Exhibit'n, London.
1852 Louis Napoleon became Emperor.
1853 Crimean War began.
1854 Japan opened by Commodore Perry.
1857 The Great Mutiny in India.
1857 The Dred Scott decision.
1857 First Atlantic cable message, Aug. 4.
1859 John Brown's raid into Virginia.
1860 South Carolina seceded, Dec. 20.
1861 Emancipation of the Russian serfs.
1861 Battle of Bull Run, July 21.
1862 Battle of Antietam, Sept. 17.
1863 Lincoln's Emancipation Proclamation, Jan. 1.
1863 Battle of Gettysburg, July 1-3.
1863 Battle of Chickamauga, Sept. 19 20.
1865 Lee surrendered at Appomattox, April 9.
1865 Pres. Lincoln assassinated, April 14.
1867 Maximilian of Mexico executed.
1867 The Dominion of Canada established
1869 Financial "Black Friday" in N. Y., Sept. 24.
1870 Franco-German War began, July 19.
1870 French capitulated at Sedan, Sept. 1.
1870 Rome became the capital of Italy.
1871 The German Empire re-established.
1871 The Irish Church was disestablished.
1871 The great fire in Chicago, Oct. 8 11.
1872 The great fire in Boston, Nov. 9.
1876 Prof. Bell perfected the telephone.
1876 Centennial Exposit'n at Philadelphia
1878 Paris Exposition.
1881 President Garfield shot, July 2.
1882 Tuberculosis germ discovered by Dr. Koch.
1886 Charleston, S.C., earthquake, Aug. 31.
1888 Great Blizzard in Eastern part of U. S., March 11-14.
1889 Brazil became a Republic.
1889 Johnstown, Pa., flood, May 31.
1893 World's Fair at Chicago.
1893 Queen Liliuokalani of Hawaii deposed, Jan. 16.
1894 Chinese-Japanese War began.
1894 Hawaii made a Republic, July 4.
1894 Battle of Yalu, Sept. 17.

A. D.
1894 Capt. Dreyfus degraded, Dec. 23; restored to rank, July 12, 1906.
1895 Roentgen Ray discovered by W. K. Roentgen, a German physicist
1895 Cuban Revolution began, Feb 20.
1896 "Greater New York" bill signed May 11.
1897 The Turkish-Greek War.
1898 The Spanish-American War.
1898 Battles of San Juan and El Caney, July 1-3.
1898 Battle of Santiago de Cuba, July 3.
1898 Battle of Omdurman, Sept. 2.
1899 Universal Peace Conference.
1899 The South African War began.
1899 Philippine-American War began, Feb. 4.
1899 Windsor Hotel fire (N. Y.) Mar. 17.
1900 Paris Exposition.
1900 Boxer Insurrection in China.
1900 Hoboken docks' fire, June 30.
1900 The Galveston tornado, Sept. 8.
1901 Death of Queen Victoria.
1901 Aguinaldo captured by General Funston, Mar. 23.
1901 Pan-American Exposition, May 1-Nov. 2.
1901 Assassination of President McKinley Sept. 6.
1901 Marconi signalled letter "S" across Atlantic from England to Newfoundland, Dec. 12. First message sent in Dec., 1902.
1902 Martinique destroyed by volcano.
1902 Pennsylvania coal strike.
1902 Cuban Republic inaugurated, May 20.
1902 Edward VII. crowned King of Great Britain, Aug. 9.
1903 Kishinev massacre.
1903 Republic of Panama established.
1904 The Great Fire in Baltimore, Feb. 7.
1904 The Russo-Japanese War began.
1904 St. Louis Exposition opened. April 30.
1904 Steamboat General Slocum burned June 15.
1905 Battle of Mukden, Feb. 20-Mar. 15
1905 Battle of Sea of Japan, May 27-28.
1905 Norway dissolved union with Sweden.
1906 Eruption of Vesuvius, April 5-12.
1906 San Francisco earthquake and conflagration, April 18-19.
1908 American Battleship fleet nearly circumnavigated the Globe.
1908 Great earthquake in Southern Italy.
1908 Chelsea (Mass.) fire, April 12.
1910 The North Pole discovered, April 6.
1910 Republic of Portugal established.
1910 Union of South Africa, May 31.
1911 The Italian-Turkish War began.
1911 Postal Banks established in United States, Jan. 3.
1911 President Diaz of Mexico resigned.
1911 The South Pole discovered, Dec. 14.
1911 China proclaimed a Republic.
1912 Balkan War began.
1912 Steamship Titanic wrecked, April 14.
1913 Parcel Post System in U. S., Jan. 1.
1913 Ohio and Indiana floods, March 25-27.
1913 Rebellion in Mexico.
1913 Peace Palace at Hague dedicated.
1913 Steamer Volturno disaster, Oct. 9.
1914 General European war.
1914 S.S. Empress of Ireland sunk, May 29.
1914 Great fire in Salem, June 25.
1914 Panama Canal opened Aug. 15.
1914 City of Mexico invested by the Constitutionalists, Aug. 20.
1914 Cape Cod Canal opened
1914 Japan dec'd war on Germany, Aug 23.
1914 Austria dec'd war on Japan, Aug. 25.
1915 Panama-Pacific International Exposition opened, Feb. 20.
1915 Steamship Lusitania sunk, May 7.
1915 Great flood in Southern China, 80,000 drowned, July 14.
1915 Excursion steamer Eastland disaster, July 24.
1915 Wireless communication between Japan and United States established, July 27.
1915 Steamship Arabic sunk, Aug. 19.
1915 Italian liner Ancona sunk, Nov. 9.
1915 China restored as a Monarchy.

TIME DIFFERENCE.

TWELVE O'CLOCK NOON STANDARD (EASTERN†) TIME IN THE UNITED STATES AS COMPARED WITH THE CLOCKS IN THE FOLLOWING CITIES:

Aden	8.00 P.M.	Copenhagen	6.00 P.M.	Manila	1.00 A.M.*
Alexandria	7.00 P.M.	Dublin	4.35 P.M.	Melbourne	3.00 A.M.*
Amsterdam	5.20 P.M.	Hamburg	6.00 P.M.	Natal	7.00 P.M.
Athens	6.35 P.M.	Havre	5.00 P.M.	Paris	5.00 P.M.
Berlin	6.00 P.M.	Hongkong	1.00 A.M.*	Petrograd	7.01 P.M.
Berne	6.00 P.M.	Honolulu	6.30 A.M.	Rio de Janiero	2.00 P.M.
Bogota	12.03 P.M.	Lima	12.00 NOON	Rome	6.00 P.M.
Bombay	10.30 P.M.	Lisbon	5.00 P.M.	Santiago (Chile)	12.00 NOON
Bremen	6.00 P.M.	Liverpool	5.00 P.M.	Stockholm	6.00 P.M.
Brussels	5.00 P.M.	London	5.00 P.M.	Vienna	6.00 P.M.
Constantinople	7.00 P.M.	Madrid	5.00 P.M.	Yokohama	2.00 A.M.*

* At places marked * the time noted is in the morning of the FOLLOWING day.

† "EASTERN" time includes: New York, Boston, Philadelphia, Baltimore, Washington, Richmond, Norfolk, Charleston, Buffalo, Pittsburgh, Montreal, Quebec, Ottawa, Toronto, etc.

"CENTRAL," which is one hour slower than Eastern time, includes: Cleveland‡, Chicago, St. Louis, Minneapolis, St. Paul, Milwaukee, Kansas City, Omaha, Indianapolis, Cincinnati, Detroit, New Orleans, Memphis, Savannah, Pensacola, Winnipeg, etc.

"MOUNTAIN," which is two hours slower than Eastern time, includes: Denver, Leadville, Colorado Springs, Helena, Regina (N. W. T.), etc.

"PACIFIC," which is three hours slower than Eastern time, includes: San Francisco, Portland (Oregon), Victoria, Vancouver, Tacoma, Seattle, etc.

‡ By the law of the State of Ohio, which the Legislature recently refused to change, Central time is the legal time in all of that State. The trunk line railways at Cleveland, with the exception of the Erie, use Central time. There is a city ordinance which names Eastern time as the city time, but as above stated, it is at variance with the State law. Some of the people, therefore, use one time and some another.

OLD ENGLISH HOLIDAYS.

THESE holidays, with their names, had their origin in mediæval England when the State religion was that of the Church of Rome, and they are still observed generally or in some parts of Britain.

JANUARY 6. TWELFTH DAY, or Twelfth-tide, sometimes called Old Christmas Day, the same as Epiphany. The previous evening is Twelfth Night, with which many social rites have long been connected.

*FEBRUARY 2. CANDLEMAS: Festival of the Purification of the Virgin. Consecration of the lighted candles to be used in the church during the year.

FEBRUARY 14. OLD CANDLEMAS: St. Valentine's Day.

MARCH 25. LADY DAY: Annunciation of the Virgin. April 6 is old Lady Day.

JUNE 24. MIDSUMMER DAY: Feast of the Nativity of John the Baptist. July 7 is old Midsummer Day.

JULY 15. ST. SWITHIN'S DAY There was an old superstition that if rain fell on this day it would continue forty days.

AUGUST 1. LAMMAS DAY: Originally in England the festival of the wheat harvest. In the Church the festival of St. Peter's miraculous deliverance from prison. Old Lammas Day is August 13.

* Also known as "Groundhog Day."

SEPTEMBER 29. MICHAELMAS: Feast of St. Michael, the Archangel. Old Michaelmas is October 11.

NOVEMBER 1. ALL-HALLOWMAS: All-hallows, or All Saints' Day. The previous evening is All-hallow-e'en, observed by home gatherings and old-time festive rites.

NOVEMBER 2. ALL SOULS' DAY: Day of prayer for the souls of the dead.

NOVEMBER 11. MARTINMAS: Feast of St. Martin. Old Martinmas is November 23.

DECEMBER 28. CHILDERMAS. Holy Innocents' Day.

Lady Day, Midsummer Day, Michaelmas, and Christmas are quarter (rent) days in England, and Whitsunday, Martinmas, Candlemas, and Lammas Day in Scotland.

Shrove Tuesday, the day before Ash Wednesday, and Maundy Thursday, the day before Good Friday, are observed by the Church. Mothering Sunday is Mid-Lent Sunday, in which the old rural custom obtains of visiting one's parents and making them presents.

THE UNITED STATES GOVERNMENT PRINTING OFFICE.

IN this establishment practically all the printing for the United States Government is done except the manufacture of paper money and postage stamps. The Public Printer is the executive head of the Government Printing Office. Directly or through his principal officers he purchases all materials and machinery subject to the provisions of law, disburses all money, appoints all officers and employés, and exercises general supervision over the affairs of the office. The Superintendent of Documents has general supervision over the distribution of all public documents, excepting those printed for the use of the two Houses of Congress and for the Executive Departments. He is required to prepare a comprehensive index of public documents and consolidated index of Congressional documents, and is authorized to sell at cost any public document in his charge, the distribution of which is not specifically directed.

The principal officers are as follows: Public Printer, Cornelius Ford; Deputy Public Printer, Henry T. Brian; Chief Clerk, John L. Alverson; Private Secretary, Joseph P. O'Lone; Purchasing Agent, Edward S. Moores; Superintendent of Work, Daniel V. Chisholm; Foreman of Printing, T. Frank Morgan; Congressional Record Clerk, William A. Smith; Superintendent of Documents, Josiah H. Brinker.

FARMERS' NATIONAL CONGRESS.

President—W. L. Ames, Oregon, Wis. *Secretary*—O. D. Hill, Kendalia, W. Va. *Treasurer*—D. K. Unsicker, Wright, Iowa.

A delegate body representing more than 3,000,000 farmers. Urges: General parcel post; liberal Federal aid for good roads and inland waterways; teaching of agriculture in the public schools; a Federal pure seed law; head tax and illiteracy test on immigration; a rural credit system not controlled by the banking power; also law to prevent imitation of butter; legislation to curb water-power monopolies; National and State control of land fraud agencies; protection of co-operative enterprises. Opposes: Ship subsidies; interstate liquor traffic into known dry territory; free distribution of seeds.

31	396	...	455	..	516	.	577	608	..	669	. .	730

The above table applies to ordinary years only. For leap year, one day must be added to each number of days after February 28.

EXAMPLE.—To find the number of days between June 3, 1900, and February 16, 1901: The figures opposite the third day in the first June column are 154; those opposite the sixteenth day in the second February column are 412 Subtract the first from the second product—*i. e.*, 154 from 412, and the result is 258, the number of days between the two dates

EASTER SUNDAY.

ANNIVERSARIES

DATES OF HISTORICAL EVENTS CUSTOMARILY OR OCCASIONALLY OBSERVED.

See also table of "Memorable Dates."

Jan. 17. Franklin born, 1706.
Jan. 19. Robert E. Lee born, 1807.
Jan. 27 German Emperor born, 1859.
Jan 29. William McKinley born, 1843.
Feb. 12 Abraham Lincoln born, 1809.
Feb. 15 Battleship Maine blown up, 1898.
Feb. 22 George Washington born. 1732.
Mar. 5. Boston Massacre. 1770.
Mar 15. Andrew Jackson born. 1767.
Mar. 18. Grover Cleveland born, 1837.
April 12. Henry Clay born. 1777.
April 12 Fort Sumter fired on, 1861.
April 13. Thomas Jefferson born, 1743.
April 19. Primrose Day in England; Lord Beaconsfield died, 1881
April 23. Shakespeare born, 1564.
April 27. Gen. U. S Grant born, 1822.
May 1 Dewey destroyed the Spanish fleet at Manila, 1898
May 13. Society of The Cincinnati organized by officers of Revolutionary Army, 1783.
May 18. The Czar of Russia born, 1868.
May 24. Queen Victoria born, 1819.
June 3. King George V. born. 1865.
June 14. Flag Day in the United States.
July 1. Dominion Day in Canada.
July 3. Cervera's fleet destroyed off Santiago, 1898.
July 12. Orangemen's Day.
July 14. The Bastile was destroyed, 1789.
July 16. Santiago surrendered, 1898.
Aug. 3. Invasion of Belgium by Germany, 1914.
Aug. 7. Gen. Nathanael Greene born, 1742.
Aug. 13. Manila surrendered to Americans, 1898.
Aug. 28. Montenegro became a kingdom, 1910.
Sept. 1. Capitulation of Sedan, 1870.
Sept. 14. City of Mexico taken by U. S. troops, 1847.
Sept. 15. William H. Taft born, 1857.
Oct. 27. Theodore Roosevelt born, 1858.
Nov. 5. Guy Fawkes Day in England. The Gunpowder Plot discovered, 1605.
Nov. 10. Martin Luther born. 1483.
Nov. 25. British evacuated New York, 1783.
Dec. 14. Washington died, 1799.
Dec. 28. Woodrow Wilson born, 1856.

THE FRENCH REVOLUTIONARY ERA.

In September, 1793, the convention decreed that the common era should be abolished in all civil affairs, and that the new French era should begin on September 22, 1792, the day of the true autumnal equinox, and that each succeeding year should begin at the midnight of the day on which the true autumnal equinox falls. The year was divided into twelve months of thirty days each. In ordinary years there were five extra days, from the 17th to the 21st of our September, and at the end of every fourth year was a sixth complimentary day. This reckoning was first used on November 22, 1793, and was continued until December 31, 1805, when it was discontinued, and the Gregorian calendar, used throughout the rest of Europe, was resumed. The following were the dates for the year 1804, the last complete year of this style of reckoning:

Vendemaire	(Vintage),	September 23 to October 22.
Brumaire	(Foggy),	October 23 to November 22.
Frimaire	(Sleety),	November 22 to December 21.
Nivose	(Snowy),	December 22 to January 21.
Pluviose	(Rainy),	January 21 to February 20.
Ventose	(Windy),	February 20 to March 19.
Germinal	(Budding),	March 22 to April 21.
Floreal	(Flowery),	April 21 to May 20.
Prairiel	(Pasture),	May 21 to June 20.
Messidor	(Harvest),	June 20 to July 19.
Thermidor	(Hot),	July 20 to August 19.
Fructidor	(Fruit),	August 19 to September 18.

The months were divided into three decades of ten days each, but to make up the 365 five were added at the end of September: Primidi, dedicated to Virtue; Duodi, to Genius; Tridi, to Labor; Quartidi, to Opinion, and Quintidi, to Rewards. To Leap Year, called Olympic, a sixth day, September 22 or 23, Sextidi, "the day of the Revolution," was added.

To each tenth day, thirty-six in all, were assigned thirty-six "Fetes Decadaires," decreed by the National Convention on the eighteenth Prairial, in honor of the Supreme Being and Nature, the Human Race, the French People, Benefactors of Humanity, Martyrs for Liberty, Liberty and Equality, the Republic, Liberty of the World, Love of Country, Hatred of Tyrants and Traitors, Truth, Justice, Modesty, Glory and Immortality, Friendship, Frugality, Courage, Good Faith, Heroism, Disinterestedness, Stoicism, Love, Conjugal Fidelity, Paternal Love, Maternal Tenderness, Filial Piety, Infancy, Childhood, Manhood, Old Age, Sickness, Agriculture, Industry, Our Ancestors, Our Posterity, Goodness.

READY-REFERENCE CALENDAR.

NOTE.—To ascertain any day of the week, first look in the table for the year required, and under the months are figures which refer to the corresponding figures at the head of the columns of days below. *For Example:*—To know on what day of the week July 4, 1916, will fall, look in the table of leap years for 1916, and in a parallel line under July is figure 6, which directs to column 6 in which it will be seen that July 4 falls on Tuesday.

* 1752 same as 1772 from January 1 to September 2. From September 14 to December 31 same as 1780 (September 3–13 were omitted).

Ritualistic Calendar.

COLORS FOR THE ALTAR IN USE IN RITUALISTIC EPISCOPAL CHURCHES IN THE UNITED STATES.

White—From the First Service (First Vespers) of Christmas Day to the Octave of Epiphany inclusive (except on the Feasts of Martyrs); on Maundy Thursday (for the celebration); from the First Service of Easter Day to the Vigil of Pentecost (except on Feasts of Martyrs and Rogation Days); on Trinity Sunday, Conversion of St. Paul, Purification, Annunciation, St. John Baptist, St. Michael, St. Luke, All Saints, Saints who are not Martyrs, and Patron Saints (Transfiguration and Dedication of Church).

Red—From First Vespers of Pentecost to the First Vespers of Trinity Sunday (which includes Ember Days), Holy Innocents (if on a Sunday), and Feasts of all Martyrs.

Violet—From Septuagesima to Maundy Thursday (Easter Eve); Advent Sunday to Christmas Eve; Vigils, Ember Days (except in Whitsun Week), and Rogation Days; Holy Innocents (unless on Sunday).

Black—Good Friday and at funerals. *Green*—All other days.

These regulations as to colors are general. A more minute code changing with each year is published in the church almanacs.

White beans	May to June	Sandy loam	8 tons	1½ bush	13-14
Potatoes	Mar. to May	Loam	10 to 18 tons	8 to 15 bush	14-22
Sweet potatoes	May to June	Sandy loam		10 to 12 bush	10-15
Cabbage	Mar. to July	Clay or sandy loam	300 to 600 lbs. fer.	4 to 8 oz	8 15
Turnips	July	Loam		2 to 5 lbs	10-12
Mangels	May	Loam	10 to 20 tons	10 to 15 bush	15-18
Flax	May	Limestone loam		20 qts	8-10
Tobacco	Seed bed Mar	Sandy loam	Commercial fer		15-20
Hay, timothy	Aug to Oct	Clay loam		6 to 8 qts	
Hay, clover	Feb. to Apr	Clay loam		6 qts	
CENTRAL AND WESTERN STATES.					
Corn	Apr. 1 to June 1	Black or sandy loam	5 to 10 tons	6 qts	16-20
Wheat	Fall or Spring	Strong loam	8 tons	2 bush	40-42
Oats	Apr. 1 to May 1	Clay loam	8 tons	2 to 3 bush	12-14
Barley	Fall or Spring (1)	Clay loam	8 tons	2 bush	11-13
Rye	Sept. 1 to 30	Light loam	8 tons	1 to 2 bush	35-40
Buckwheat	June	Clay loam	5 tons	1 to 2 bush	10-12
White beans	May 10 to June 10	Clay loam	8 tons	1½ bush	12
Potatoes	Mar 15 to June 1	Sandy loam	5 to 10 tons	5 to 10 bush	10-20
Turnips	July 15 to Aug. 30	Loam or muck	8 to 10 tons	1 to 6 lbs	10-16
Mangels	Apr. 1 to May 15	Sandy loam	8 to 12 tons	6 to 8 lbs	22-24
Flax	Mar. 15 to May 15	Loam	10 to 15 tons	2 to 3 pecks	15-20
Tobacco	Seed bed, Mar	Sandy loam	8 to 10 tons	Oz to 6 sq. rd.	15-18
Hay	Apr. to May	Clay loam	10 tons	8 to 15 lbs	
SOUTHERN STATES					
Cotton	Feb. to May 15	Sandy loam (2)		1 to 3 bush	20-30
Corn	Feb. to June	Rich loam	10 bush. cot. seed	8 qts	18-20
Wheat	Sept. to Nov	Clay loam (2)	8 tons	2 bush	43
Oats	Feb., May, Sept.	Clay loam (2)	8 to 10 tons	2½ bush	17
Barley	Apr. to May	Clay loam (2)	8 to 10 tons	2½ bush	17
Rye	Sept. to Oct	Clay loam (2)	10 tons	1½ bush	43
White beans	Mar. to May	Light loam	8 tons	1 to 2 bush	7-8
Cabbage	Oct., Mar. to May	Light loam	6 to 10 tons	¼ to ½ lbs	14
Watermelons	Mar. 1 to May 10	Rich, light loam	5 tons; 300 lbs. fer	2 to 7 lbs	16-20
Onions	Feb. 1 to Apr. 10	Loam or muck			16-24
Potatoes	Jan., Feb. to Apr.	Light loose loam	8 to 12 tons	8 to 10 bush	11-15
Sweet potatoes	May to June	Sandy loam		10 to 12 bush	12-15
Pumpkins	Apr. 1 to May 1	Rich, light loam		4 to 7 lbs	17-20
Tomatoes	Jan. 1 to Feb. 19	Rich, sandy loam		4 to 9 oz	14-20
Turnips	Feb., Aug., Apr.	Rich, light loam		2 to 6 lbs	8-12
Tobacco	Seed bed, Mar	Sandy loam	8 to 15 tons	oz to 6 sq. rd.	18-20
Cow peas	May 1 to July 15	Sandy loam	200 to 300 lbs. phos.	2 to 5 pecks	6-8

(1) The standard varieties of seed planted in the several sections of the United States are as follows: Corn—New England, leaming, sanford, flint; Middle States, leaming, white dent, yellow dent; Central and Western States, leaming, sanford, flint, white dent; Southern States, hickory king, goard-seed, Cox prolific. Wheat—Middle States, fultz; Central and Western States, fultz, poole, fife; Southern States, fulcaster. Oats—New England, white; Middle States, white, black; Central and Western States, gray Norway, silver mine, Russian, Southern States, Texas rustproof. Barley—Middle States, mansbury; Southern States, Tennessee Winter. Rye—New England, white; Middle States, white, Winter; Central and Western States, Winter; Southern States, excelsior Winter, Buckwheat—Middle States, silver hull; Central and Western States, silver hull. Potatoes—New England, green mountain, carmen 3, rose; Middle States, rose, carmen 3, rural 2; Central and Western States, hebron, rural, early rose, early Ohio. Tobacco—Central and Western States, yellow prior, Spanish, white burley. Hay, clover—Middle States, medium red. Sweet Potatoes—Middle States, yellow Jersey; Southern States, yellow Jersey. Cotton—Southern States, Texas stormproof. Spring wheat is to some extent grown in Ohio, Indiana, Illinois and many other States. It matures in eighteen to twenty weeks.

(2) In Texas the black loam is a good soil for cotton, corn, wheat and most other field crops.

THE MOON.

Of all the secondary planets the earth's satellite is by far the most interesting and important. The moon completes her circuit around the earth in a period whose mean or average length is 27 days 7 hours 43.2 minutes; but in consequence of her motion in common with the earth around the sun, the mean duration of the lunar month, that is, the time from new moon to new moon, is 29 days 12 hours 44.05 minutes, which is called the moon's synodical period. If the earth were motionless in space the moon's orbit would be nearly an ellipse, having the earth in one of the foci; hence her distance from the earth varies during the course of a lunar month. Her mean distance from the earth is 238,850 miles. Her maximum distance, however, may reach 252,830 miles, and the least distance to which she can approach the earth is 221,520 miles. Her diameter is 2,162 miles, and if we deduct from her distance from the earth the sum of the two radii of the earth and moon, viz., 3,962 and 1,081 miles, respectively, we shall have for the nearest approach of the surfaces of the two bodies 216,477 miles. Her orbit is a very intricate one, because the earth in moving around the sun carries the moon along with it; hence the latter is sometimes within and sometimes without the earth's orbit. Its form is that of a serpentine curve, always *concave* toward the sun, and inclined to the plane of the earth's orbit at an angle of 5° 9′, in consequence of which our satellite appears sometimes above and sometimes below the plane of the earth's orbit, through which she passes twice in a revolution. These points or positions are called nodes, and no two consecutive nodes occupy positions diametrically opposite on the lunar orbit. The nodes have a retrograde motion, which causes them to make an entire revolution in 18 years, 218 days, 21 hours, 22 minutes and 46 seconds. This motion was well known to the ancients, who called it the Saros, and was made use of by them in roughly predicting eclipses.

The moon always presents the same face to us, as is evident from the permanency of the various markings on its surface. This circumstance proves that with respect to the earth she revolves on an axis, and the time of rotation is exactly equal to the time of revolution around the earth, viz., 27.32166 days. The moon's axis is not perpendicular to the plane of her orbit, but deviates therefrom by an angle of about 6° 41′. In consequence of this fact, and of the inclination of the lunar orbit to that of the ecliptic, the poles of the moon lean alternately to and from the earth. When the north pole leans toward the earth we see somewhat more of the region surrounding it, and somewhat less when it leans the contrary way. This displacement is known by the name of libration in latitude

The moon's motion on her axis is uniform, but her angular velocity in her orbit is subject to slight variations by reason of the form of her orbit; hence it happens that we sometimes see a little more of the eastern or western edge at one time than at another. This phenomenon is known as libration in longitude.

The moon's surface contains about 14,685,000 square miles, or nearly four times the area of Europe. Her volume is 1-49 and her mass 1-81 that of the earth, and hence her density is about 3-5 that of the earth, or about 3 2-5 that of water. At the lunar surface gravity is only 3-20 of what it is at the earth, and therefore a body which weighs 20 pounds here would weigh only 3 pounds there.

The centre of gravity of the earth and moon, or the point about which they both actually revolve in their course around the sun, lies *within* the earth; it is 1,063 miles below the surface.

The attractive force of the moon acting on the water of our oceans is mainly instrumental in raising them into protuberances or tides in such a manner as to give the total mass a spheroidal figure whose principal axis would continually coincide with the line joining the centres of the earth and moon, but in consequence of the resistance which this movement of the water encounters from continents and islands, as well as from the liquid molecules themselves, the tidal wave can never arrive at any place until about one hour after the moon has crossed the meridian of the place.

The moon has no atmosphere and no water The suddenness with which stars are occulted by the moon is regarded as a conclusive proof that a lunar atmosphere does not exist, and the spectroscope furnishes negative evidence of the same character.

In remote ages the lunar surface was the theatre of violent volcanic action, being elevated into cones and ridges exceeding 20,000 feet high, and at other places rent into furrows or depressions of corresponding depth. The lunar volcanoes are now extinct. A profound silence reigns over the desolate and rugged surface. It is a dead world, utterly unfit to support animal or vegetable life.

THE EARTH'S ATMOSPHERE.

The earth's sensible atmosphere is generally supposed to extend some forty miles in height, probably further, but becoming at only a few miles from the surface of too great a tenuity to support life. The condition and motions of this aerial ocean play a most important part in the determination of climate, modifying, by absorbing, the otherwise intense heat of the sun, and, when laden with clouds, hindering the earth from radiating its acquired heat into space.

HALLEY'S COMET.

Of the great number of comets which have temporarily visited our solar system or have become permanent members of it none has surpassed Halley's in historical associations. It has a record dating back to B. C. 240; its visitations spread alarm and consternation throughout Europe during the Middle Ages; was the first whose return was predicted by an Astronomer Royal of England, and will therefore, for these reasons, be an object of great scientific interest for all time. For the information of those who appreciate such matters the following are the elements of its orbit as deduced from the last visitation:

Perihelion Passage 1910, April 19.67. Greenwich Mean Time.

Eccentricity = 0.967281.	Longitude of the ascending node = 57° 16′ 12″.
Semi-axis major = 17.9468.	Distance from perihelion to node = 111° 42′ 16″.
Perihelion distance = 0.58720.	Daily motion (mean) = 46″.669.
Inclination to the plane of the earth's orbit = 17° 47′ 18″.	Period = 74.424 years.*
	Motion, retrograde.

The semi-axis major and the perihelion distance are expressed in terms of the earth's mean distance from the sun, taken as unity. See also article on Halley's Comet and on Comets in Almanacs of 1910 and 1911.

* The periodic time varies considerably by reason of the attraction of the planets. Its average duration is about 76.5 years.—J. M.

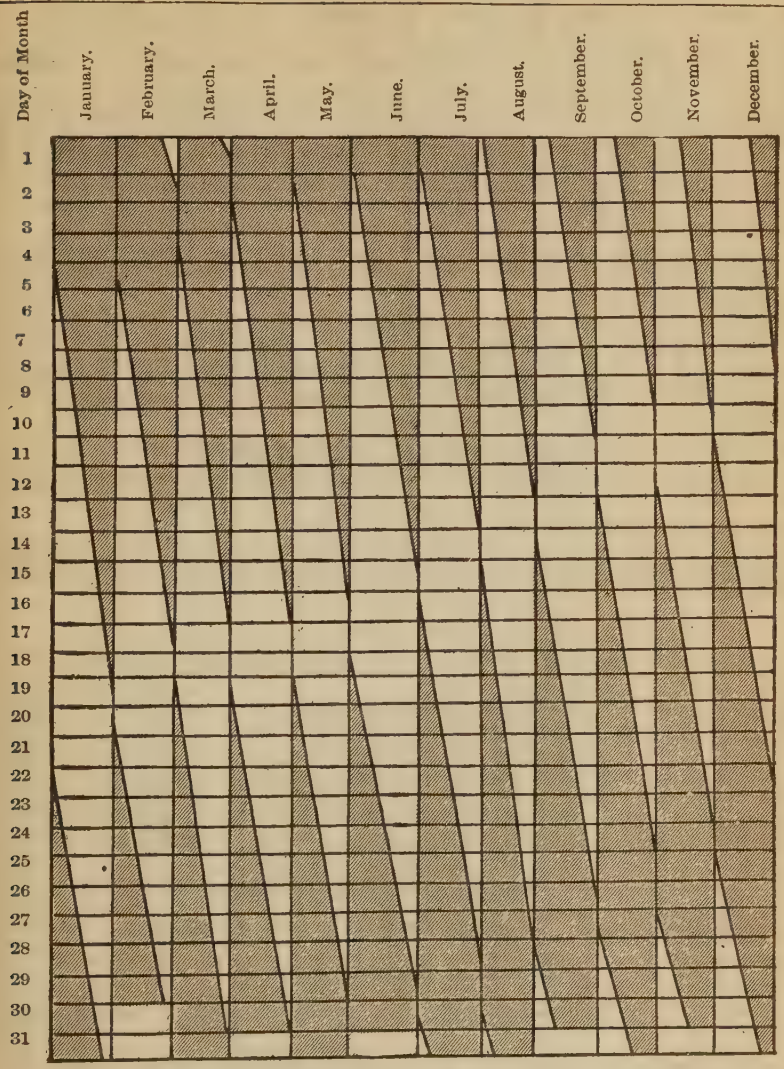
MOONLIGHT CHART, 1916.



EXPLANATION—The white spaces show the amount of moonlight each night. January 4, February 2, etc., the time of the new moon, when there is no moonlight for two or three nights. January 12, February 11, etc., the moon sets at or near midnight, when the first half of the night has moonlight; January 20, February 18, etc., full moon, when moonlight lasts the whole night; January 28, February 26, etc., the moon rises at or near midnight, when the latter half of the night has moonlight.

From June 16 to August 1 both the upper and lower transits take place during daylight. The azimuth at the time of greatest Eastern or Western elongation can be easily computed from the formula:

$$\sin A = \frac{\sin p}{\cos l}$$

where A denotes the azimuth, p the polar distance, and l the latitude of the place.

DATE OF GREATEST ELONGATION.

To find the time of greatest Eastern or Western elongation, let H denote the hour angle, and l and p as before, then we shall have

$$\cos H = \tan p \tan l.$$

And the hour angle in *mean time* is

$$H_m = H^\circ \times 0.0664846.$$

This quantity, H_m, added to or subtracted from the time of transit given above, according to the elongation required, will give the *mean time* of the *greatest* elongation at any place whose north latitude is l.

STAR TABLE.

FOR IDENTIFYING THE PRINCIPAL FIXED STARS.

Name of Star.	Declination	On Meridian. Upper.	On Meridian. Lower.	Name of Star.	Declination	On Meridian. Upper.	On Meridian. Lower.
	° ′	H. M.	H. M.		° ′	H. M.	H. M.

α Cassiopeiæ (Schedir)	+ 56 3	− 0 42.2	+11 15.8	α Bootis (Arcturus)	+ 19 38	+12 47.5	+ 0 45.5
α Arietis	+ 23 3	+ 0 40.0	+12 38.0	β Ursæ Minoris	+ 74 31	+13 27.5	+ 1 25.5
β Persei (Algol)	+ 40 37	+ 1 39.9	+13 37.9	α Coronæ Borealis	+ 27 1	+13 49.7	+ 1 47.7
α Tauri (Aldebaran)	+ 16 20	+ 3 8.2	+15 6.2	α Scorpii (Antares)	− 26 14	+14 59.3	+ 2 57.3
α Aurigæ (Capella)	+ 45 54	+ 3 47.6	+15 45.1	α Lyræ (Vega)	+ 38 42	+17 9.3	+ 5 7.3
α Orionis (Betelguese)	+ 7 23	+ 4 27.6	+16 25.6	α Aquilæ (Altair)	+ 8 38	+18 21.4	+ 6 19.4
α Canis Majoris (Sirius)	− 16 36	+ 5 18.4	+17 16.4	α Cygni (Deneb)	+ 44 58	+19 13.5	+ 7 11.5
α Geminorum (Castor)	+ 32 5	+ 6 5.7	+18 3.7	α Cephei	+ 62 13	+19 51.5	+ 7 49.5
β Geminorum (Pollux)	+ 28 14	+ 6 16.6	+18 14.6	α Aquarii	− 0 45	+20 35.8	+ 8 33.8
α Canis Minor (Procyon)	+ 5 27	+ 6 11.6	+18 9.6	α Piscis Australis	− 30 5	+21 27.1	+ 9 25.1
				α Pegasi (Markab)	+ 14 44	+21 34.7	+ 9 32.7

To find the time of the star's transit add or subtract, according to the sign, the numbers in the second column of figures to the date of the transit of the pole star given above. Thus, for α Andromedæ February 11. Lower Transit of Pole Star is 4 h. 8 m. 41 s. A. M., to which add 10 h. 40 m. and we have 2 h. 48 m. 41s. P. M.; for December 1, we find 7 h. 30 m. 35 s. P. M., etc.

APPROXIMATE PARALLAX AND DISTANCE IN LIGHT-YEARS OF SOME OF THE PRINCIPAL FIXED STARS.

By light-years is to be understood the number of years light requires to travel from the star to us.

	Parallax.	Light-Years.		Parallax.	Light-Years.
	″			″	
Polaris (Pole Star)	0.073	45	α Lyræ (Vega)	0.140	23
α Aurigæ (Capella)	0.046	71	61 Cygni	0.348—0.564	6—8
α Canis Majoris (Sirius)	0.233	15	β Cassiopeiæ	0.187	17
α Canis Minoris (Procyon)	0.123	27	γ Draconis	0.127	26
α Bootis (Arcturus)	0.127	28	85 Pegasi	0.054	60
α Centauri	0.916	3.6			

The determination of stellar parallax is one of the most difficult and refined problems in practical or observational astronomy. It is to find the angle which the semi-diameter of the earth's orbit subtends at the star—an angle always very small, as seen from the above table, and which cannot be measured directly but by various processes too complicated to be explained here.

ASTRONOMICAL PHENOMENA FOR THE YEAR 1916.

ASTRONOMICAL SIGNS AND SYMBOLS.

☉	The Sun.	♂	Mars.	☌	Conjunction.
☾	The Moon.	♃	Jupiter.	□	Quadrature.
☿	Mercury.	♄	Saturn.	☍	Opposition.
♀	Venus.	♅	Uranus.	☊	Ascending Node.
⊕	The Earth.	♆	Neptune.	☋	Descending Node.

Two heavenly bodies are in "conjunction" (☌) when they have the same *Right Ascension*, or are on the *same meridian, i. e.*, when one is due *north* or *south* of the other; if the bodies are near each other as seen from the earth, they will rise and set at the same time; they are in "opposition" (☍) when in opposite quarters of the heavens, or when one rises just as the other is setting. "Quadrature" (□) is half way between conjunction and opposition. By "greatest elongation" is meant the greatest apparent *angular* distance from the sun; the planet is then generally most favorably situated for observation. Mercury can only be seen with the naked eye at this time. When a planet is in its "ascending" (☊) or "descending" (☋) node it is crossing the plane of the earth's orbit. The term "Perihelion" means nearest, and "Aphelion" furthest, from the sun. An "occultation" of a planet or star is an eclipse of it by some other body, usually the moon.

ASTRONOMICAL PHENOMENA FOR THE YEAR 1916—*Continued.*

I.—ECLIPSES.

In the year 1916 there will be five eclipses, three of the sun and two of the moon, as follows:

1. A partial eclipse of the moon January 20, visible at New York and generally in North and South America.

Places.	Moon Enters Shadow.				Middle of Eclipse.				Moon Leaves Shadow.			
	D.	H.	M		D.	H	M.		D	H.	M.	
Portland, Me.	Jan. 20	3	14	A.M.	Jan 20	3	58.5	A.M.	Jan. 20	4	43	A.M.
Boston	Jan. 20	3	10.7	A.M.	Jan 20	3	55.2	A.M.	Jan. 20	4	39.7	A.M.
New York	Jan. 20	3	0	A.M.	Jan. 20	3	43.5	A.M.	Jan. 20	4	28.0	A.M.
Washington	Jan. 20	2	46.8	A.M.	Jan. 20	3	31.3	A.M.	Jan. 20	4	15.8	A.M.
Charleston	Jan. 20	2	35.5	A.M.	Jan. 20	3	20.0	A.M.	Jan. 20	4	4.5	A.M.
Cincinnati	Jan. 20	2	17.0	A.M.	Jan. 20	3	1.5	A.M.	Jan. 20	3	46.0	A.M.
Chicago	Jan. 20	2	4.6	A.M.	Jan. 20	2	49.1	A.M.	Jan. 20	3	33.6	A.M.
New Orleans	Jan. 20	1	55.0	A.M.	Jan. 20	2	39.5	A.M.	Jan. 20	3	24.0	A.M.
Houston	Jan. 20	1	33.6	A.M.	Jan. 20	2	18.1	A.M.	Jan. 20	3	2.6	A.M.
Denver	Jan. 20	12	55.2	A.M.	Jan. 20	1	39.7	A.M.	Jan. 20	2	24.2	A.M.
San Francisco	Jan. 19	11	45.3	P.M.	Jan. 20	12	29.8	A.M.	Jan. 20	1	14.3	A.M.

Magnitude 0.137 (the moon's diameter 1.) on the southern limb. The first apparent contact of the moon's limb with the shadow is 175 from the north point of the moon toward east.

2. A total eclipse of the sun February 3, visible as a partial eclipse in the United States, Mexico, Central America and the northwestern portion of South America. It is not visible in Alaska and the adjacent portion of Canada The path of the central or total eclipse begins in the Pacific Ocean, moves eastward, crosses the north portion of Colombia, north of Caracas, over the island of Guadaloupe, passes northwest of the Azores and ends at sunset in the Atlantic Ocean south of Ireland.

The most favorable places for observing the total eclipse are in the islands of Guadaloupe and Desirade, where the duration of totality is very nearly two and a half minutes.

Places.	Eclipse Begins.				Eclipse Ends.				Position Angle. Beg.		End.	
		H.	M.			H.	M.					
Boston	Feb. 3	10	42.1	A.M.	Feb. 3	12	52.6	P.M.	201	41′	94	41′

San Francisco	Before moon rises.				July 14	8	36.2	P.M.	July 14	10	2.8	P.M.

Magnitude 0.8 (moon's diameter 1) on the northern limb.

4. An annular eclipse of the sun July 29, invisible in America. Visible as a partial eclipse in the Malay Peninsula, Sumatra, Java, Borneo, New Guinea, the northern and eastern portion of Australia and in Tasmania and New Zealand. The path of the central or annular eclipse begins in the Indian Ocean, passes over the southwestern and southern portion of Australia near Adelaide, Melbourne and Hobart.

5. A partial eclipse of the sun December 24, invisible in America; visible only in the Antarctic Ocean.

THE MAGNETIC POLES.

THE geographical poles of the earth are the extremities of the imaginary line passing through its centre of gravity and about which it revolves, and are therefore symmetrically located with regard to the equator.

The magnetic poles, however, are not coincident with the geographical poles, nor are they diametrically opposite to each other. Prior to the recent attempt of Amundsen to determine the north magnetic pole, the only other was by Capt. James Ross in June, 1831, who found the dip of the magnetic needle to be 89° 59′ .5, in latitude 70° 5′ .2 N. and longitude 96° 45′ .8 W., which is in King William Land, Canada. The result of Amundsen's observations has not yet been published by the Norwegian authorities.

For the south magnetic pole, from a consideration of all the results available, according to the United States Coast and Geodetic Survey, the position latitude 72° .7 S. and longitude 156° E. has been tentatively adopted. These values are only roughly approximate, and for that reason are given only in degrees and tenths.

By reason of the annual variation of the magnetic needle, it is believed that the magnetic poles are not stationary, but have a slow motion around the geographical poles. The subject is shrouded in mystery and constitutes one of the many as yet unsolved problems in terrestrial physics.

ASTRONOMICAL CONSTANTS.

MEAN solar parallax, 8″.80. Nutation constant, 9″.21.
Aberration constant, 20″.47. Annual precession, 50″.2564.
Obliquity of the ecliptic, 23° 27′ 8″.26—0″.4684 (t—1900).
Annual diminution of obliquity, 0″.4684.
Moon's equatorial horizontal parallax, 57′ 2″.68.
Moon's mean distance from the earth (centre to centre), 238,850 miles.
Sun's mean distance from the earth (astronomical unit), 92,894,800 miles.
Velocity of light, 186,320 miles per second.
Light travels unit of distance—viz. 92,894,800 miles in 498.566 seconds.
Length of the Year—Tropical (equinox to equinox), 365.2421988 days.
Sidereal or absolute revolution, 365.2563604 days.
Anomalistic (from perihelion to perihelion), 365.2596413 days.

Length of the Day—Sidereal, 23 hours 56 minutes 4.091 seconds (mean solar time). Mean solar, 24 hours 3 minutes 56.555 seconds (sidereal time).

Length of the Month—Synodical (from new moon to new moon), 29 days 12 hours 44 minutes 2.8 seconds. Tropical, 27 days 7 hours 43 minutes 4.7 seconds. Sidereal (absolute revolution), 27 days 7 hours 43 minutes 11.5 seconds. Anomalistic (from perigee to perigee), 27 days 13 hours 18 minutes 33.1 seconds.

Dimensions of the Earth—Equatorial radius, 3963.23 miles. Polar radius, 3949.79 miles. Eccentricity of the oblate spheroid, 0.0822718.

EARTHQUAKE AREAS OF THE EARTH.

FROM Major de Montessus de Balore's catalogue of 130,000 shocks, indicating with some scientific accuracy how the symptoms of seismic activity are manifested over the earth's surface. The period of observation includes generally the last fifty years; but there is no reason to suppose that a longer time would materially affect the proportionate numbers.

Area.	Earthquakes.	Area.	Earthquakes.	Area.	Earthquakes.
Scandinavia	646	Greece	10,306	United States, Atlantic coast	937
British Isles	1,139	Russia	258	Mexico	5,586
France	2,793	Asia Minor	4,451	Central America	2,739
Spain and Portugal	2,656	India	813	West Indies	2,561
Switzerland	3,895	Japan	27,562	South America	8,081
Italy	27,672	Africa	179	Java	2,155
Holland and North Germany	2,326	Atlantic Islands	1,704	Australia and Tasmania	83
Sicily	4,331	United States, Pacific coast	4,467	New Zealand	1,925

The most shaken countries of the world are Italy, Japan, Greece, South America (the Pacific coast), Java, Sicily, and Asia Minor The lands most free from these convulsions are Africa, Australia, Russia, Siberia, Scandinavia, and Canada. As a rule, where earthquakes are most frequent they are most severe. But to this general statement there are exceptions—Indian shocks, though less numerous, being often very disastrous. Loss of life in many cases depends, however, on density of population rather than on the intensity of the earth movement. Numerically, also, France has registered more seismic tremors than Spain and Portugal, but France in historic times has experienced no earthquake disaster approaching the havoc wrought by the one calamity at Lisbon.

HUMIDITY.

MEAN RELATIVE HUMIDITY, IN PERCENTAGES.

From a table prepared by the United States Weather Bureau, showing the monthly and annual values of relative humidity at regular Weather Bureau stations in the United States, based upon observations made at 8 A.M. and 8 P.M. respectively, 75th meridian time and covering a period of about 14 years of record.

THE GEOLOGICAL STRATA.

THE strata composing the earth's crust is divided by most geologists into two great classes: 1. Those generally attributed to the agency of water. 2. To the action of fire; which may be subdivided as follows: (*a*) Aqueous formations, stratified, rarely crystalline (sedimentary or fossiliferous rocks; metamorphic or unfossiliferous) (*b*) Igneous formations, unstratified, crystalline (volcanic, as basalt; plutonic, as granite).

The geological record is classified into five main divisions or periods: 1. The Archæan, lifeless and dawn of life. 2. The Palæozoic (ancient life). 3. The Mesozoic (middle life). 4. The Cenozoic (recent life). 5. Quaternary, the age in which man's first appearance is indicated.

Periods.		Eras.		Series.	Subdivisions.
Quaternary Period.	Age of Primeval Man.	Quaternary or Post Tertiary.		3 Recent. 2. Champlain. 1. Glacial.	Pleistocene.
Cenozoic Period.	Age of Mammals.	Tertiary Era.		4. Pliocene. 3 Miocene. 2. Oligocene. 1. Eocene.	English Crag. Upper Molasse Rupelian and Tongrian of Belgium.
Mesozoic Period.	Age of Reptiles.	Cretaceous Era.		4. Laramie. 3. Colorado. 2. Dakota. 1 Lower	Upper Chalk. Lower Chalk. Chalk Marl. Gault. Neocomian. Lower Greensand.
		Jura-Trias.	Jurassic	3 Purbeck. 2. Oölite. 1. Lias.	Wealden. Purbeck, Portland, Kimmeridge. Oxford Oölites. Lower or Bath Oölite. 1. Lower Lias. 2. Marlstone. 3. Upper Lias.
			Triassic.	4. Rhætic. 3. Upper. 2. Middle. 1 Lower.	Kössen beds, Dachstein beds; Alpine Keuper. [Trias, in part. Muschelkalk Bunter-Sandstein.
Palæozoic Period.	Age of Coal Plants.	Carboniferous Era.		3. Permian. 2. Carboniferous. 1. Subcarboniferous.	2. Magnesian Limestone. 1. Lower Red Sandstone, or Rothliegendes. 3. Upper Coal-Measures. 2 Lower Coal-Measures. 1 Millstone Grit. Lower Carboniferous. Mountain Limestone.
	Age of Fishes.	Devonian Era.		5. Catskill and Chemung. 4. Portage. 3. Hamilton. 2. Coniferous. 1. Oriskany.	Catskill Red Sandstone. Chemung. Portage. Genesee Slate. Hamilton beds. Marcellus Shale. Upper Helderberg, Schoharie, Grit. Oriskany Sandstone. } Old Red Sandstone.
	Age of Invertebrates.	Upper Silurian.		3. Lower Helderberg. 2. Onondaga. 1. Niagara.	Lower Helderberg. Onondaga Salt Group. Salina beds. Water Lime. 3. Niagara Group. Wenlock Group. 2. Clinton Group. } Upper 1. Medina Sandstone. } Llandovery.
		Lower Silurian.		3. Trenton. 2. Chazy. 1. Calciferous.	3. Hudson River beds. Cincinnati Group. Lower Llandovery. 2. Utica Shales. 1. Trenton Limestone. Caradoc and Bala Limestone. Black River Limestone. Chazy Limestone. { Calciferous Sandrock. Magnesian stone.
		Cambrian.			Lower, Middle, and Upper Cambrian.
Archæan Period.				Eozoic (dawn of life). Azoic (lifeless).	1. Laurentian. Huronian.

MAGNETIC DECLINATIONS.

OR VARIATION OF COMPASS FOR JANUARY, 1916—WITH THE ANNUAL CHANGE BETWEEN 1910 AND 1915 FOR THE PRINCIPAL PLACES IN THE UNITED STATES.

A plus (+) sign to the annual change denotes that the declination is increasing, and a minus (—) sign the reverse.

(Specially prepared for THE WORLD ALMANAC in the Office of the United States Coast and Geodetic Survey.)

RULES FOR FORETELLING THE WEATHER.

ADAPTED FOR USE WITH ANEROID BAROMETERS.

A RISING BAROMETER.

A RAPID rise indicates unsettled weather.

A gradual rise indicates settled weather.

A rise with dry air and cold increasing in Summer indicates wind from the northward; and if rain has fallen, better weather may be expected.

A rise with moist air and a low temperature indicates wind and rain from the northward.

A rise with southerly winds indicates fine weather.

A STEADY BAROMETER.

With dry air and seasonable temperature indicates a continuance of very fine weather.

A FALLING BAROMETER.

A rapid fall indicates stormy weather.

A rapid fall with westerly wind indicates stormy weather from the northward.

A fall with a northerly wind indicates storm, with rain and hail in Summer, and snow in Winter.

A fall with increased moisture in the air, and heat increasing, indicates wind and rain from the southward.

A fall with dry air and cold increasing in Winter indicates snow.

A fall after very calm and warm weather indicates rain with squally weather.

The barometer rises for northerly winds, including from northwest by north to the eastward for dry, or less wet weather, for less wind, or for more than one of these changes, except on a few occasions, when rain, hail, or snow comes from the northward with strong wind.

The barometer falls for southerly wind, including from southeast by south to the westward, for wet weather, for stronger wind or for more than one of these changes, except on a few occasions, when moderate wind, with rain or snow, comes from the northward.

The above printed rules are in use by the Seawanhaka Corinthian Yacht Club of New York.

DURATION OF DIFFERENT KINDS OF WEATHER IN THE SEVERAL STORMS—VICINITY OF NEW YORK.

CRITICAL WINDS	Clear Hours	Cloudy Hours.	Rain Hours.	Clearing Hours
South to Southwest	9	8	8.3	14
South to Southeast	14	13 4	15.6	15.4
East to Northeast	20	17.6	31	20 6

WEATHER WISDOM.

SUNSET COLORS.—A gray, lowering sunset, or one where the sky is green or yellowish-green, indicates rain. A red sunrise, with clouds lowering later in the morning, also indicates rain.

HALO (SUN DOGS).—By halo we mean the large circles, or parts of circles, about the sun or moon. A halo occurring after fine weather indicates a storm.

CORONA.—By this term we mean the small colored circles frequently seen around the sun or moon. A corona growing smaller indicates rain; growing larger, fair weather.

RAINBOWS.—A morning rainbow is regarded as a sign of rain; an evening rainbow of fair weather.

SKY COLOR.—A deep-blue color of the sky, even when seen through clouds, indicates fair weather; a growing whiteness, an approaching storm.

FOGS.—Fogs indicate settled weather. A morning fog usually breaks away before noon.

VISIBILITY.—Unusual clearness of the atmosphere, unusual brightness or twinkling of the stars, indicate rain.

FROST.—The first frost and last frost are usually preceded by a temperature very much above the mean.

OBJECTS VISIBLE AT SEA-LEVEL IN CLEAR WEATHER.

The following table shows the distance at sea-level at which objects are visible at certain elevations.

ELEVATION—FEET.	Miles.	ELEVATION—FEET.	Miles.	ELEVATION—FEET.	Miles.
1	1.31	30	7.25	90	12.25
5	2.96	35	7.83	100	13.23

The lowest point of dry land in United States is in Death Valley, Cal., 276 feet below sea level.

NOTE.—The above table was prepared for THE WORLD ALMANAC by the Topographic branch of the United States Geological Survey. It should be stated in connection with this table that it presents only points whose heights are matters of record, and that in several cases in the high mountain region of the far West and the Pacific Slope it is thought there may be higher points within the State or Territory whose heights are not yet known with accuracy, and consequently cannot be given.

This table was revised by the United States Geological Survey to October 1, 1915.

WEATHER FLAGS

OF THE WEATHER BUREAU, U. S. DEPARTMENT OF AGRICULTURE.

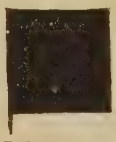
THE Weather Bureau furnishes when practicable, for the benefit of all interests dependent upon weather conditions, the "Forecasts" which are prepared daily at the Central Office in Washington, D. C., and certain designated stations. These forecasts are telegraphed to stations of the Weather Bureau, railway officials, postmasters, and many others, to be communicated to the public by telegraph, telephone and mail or by means of flags or steam whistles. The flags adopted for this purpose are five in number, and of the forms and colors indicated below:

EXPLANATION OF WEATHER FLAGS.

No. 1. White Flag.

Fair weather.

No. 2. Blue Flag.



Rain or snow.

No. 3. White and Blue Flag.

Local rain or snow.

No. 4. Black Triangular Flag.

Temperature.

No. 5. White Flag with black square in centre.

Cold wave.

When number 4 is placed above number 1, 2 or 3, it indicates warmer; when below, colder; when not displayed, the temperature is expected to remain about stationary. During the late Spring and early Fall the cold-wave flag is also used to indicate anticipated frosts.

WHISTLE SIGNALS.

A warning blast of from fifteen to twenty seconds' duration is sounded to attract attention. After this warning the longer blasts (of from four to six seconds' duration) refer to weather, and shorter blasts (of from one to three seconds' duration) refer to temperature; those for weather are sounded first.

Blasts.	Indicate.	Blasts.	Indicate.
One long	Fair weather.	One short	Lower temperature.
Two long	Rain or snow.	Two short	Higher temperature.
Three long	Local rain or snow.	Three short	Cold wave.

By repeating each combination a few times, with intervals of ten seconds, liability to error in reading the signals may be avoided.

As far as practicable, the forecast messages are telegraphed at the expense of the Weather Bureau; but if this is impracticable, they are furnished at the regular commercial rates and sent "collect." In no case are the forecasts sent to a second address in any place, except at the expense of the applicant.

Persons desiring to display the flags or sound the whistle signals for the benefit of the public should communicate with the Weather Bureau officials in charge of the central stations of their respective States, which are as follows:

Alabama, Montgomery.
Arizona, Phœnix.
Arkansas, Little Rock.
California, San Francisco.
Colorado, Denver.
Florida, Jacksonville.
Georgia, Atlanta.
Idaho, Boisé.
Illinois, Springfield.
Indiana, Indianapolis.
Iowa, Des Moines.
Kansas, Topeka.
Kentucky, Louisville.
Louisiana, New Orleans.
Maryland, Baltimore (for Delaware and Maryland).
Massachusetts, Boston (for New England).
Michigan, Grand Rapids.
Minnesota, Minneapolis.
Mississippi, Vicksburg.
Missouri, Columbia.
Montana, Helena.
Nebraska, Lincoln.
Nevada, Reno.
New Jersey, Trenton.
New Mexico, Santa Fé.
New York, Ithaca.
North Carolina, Raleigh.
North Dakota, Bismarck.
Ohio, Columbus.
Oklahoma, Oklahoma.
Oregon, Portland
Pennsylvania, Philadelphia.
South Carolina, Columbia.
South Dakota, Huron.
Tennessee, Nashville.
Texas, Houston.
Utah, Salt Lake City.
Virginia, Richmond.
Washington, Seattle.
West Virginia, Parkersburg.
Wisconsin, Milwaukee.
Wyoming, Cheyenne.

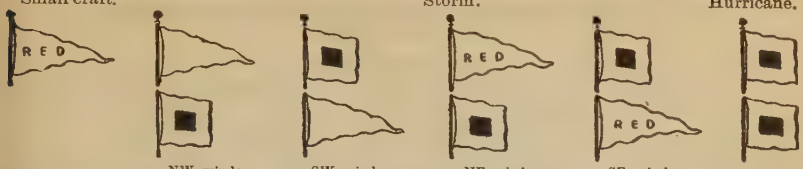
THE ANCIENT AND MODERN YEAR.

THE Athenians began the year in June, the Macedonians in September, the Romans first in March and afterward in January, the Persians on August 11, the ancient Mexicans on February 23, the Mohammedans in July. The Chinese year, which begins early in February, is similar to the Mohammedan in having 12 months of 29 and 30 days alternately; but in every nineteen years there are seven years which have 13 months. This is not quite correct, and the Chinese have therefore formed a cycle of 60 years, in which period 22 intercalary months occur.

SMALL CRAFT, STORM AND HURRICANE WARNINGS

OF THE WEATHER BUREAU, U. S. DEPARTMENT OF AGRICULTURE.

All square flags shown here are red with black centre when displayed as warnings.



Small Craft Warning—A red pennant indicates that moderately strong winds are expected.

Storm Warning—A red flag with a black centre indicates that a storm of marked violence is expected.

The pennants displayed with the flags indicate the direction of the wind: white, westerly; red, easterly. The pennant above the flag indicates that the wind is expected to blow from the northerly quadrants; below, from the southerly quadrants.

By night a red light indicates easterly winds, and a white light below a red light westerly winds.

Hurricane Warning—Two red flags with black centres, displayed one above the other, indicate the expected approach of a tropical hurricane, and also one of those extremely severe and dangerous storms which occasionally move across the Lakes and Northern Atlantic coast.

Neither small craft nor hurricane warnings are displayed at night.

VELOCITY OF WINDS IN THE UNITED STATES.

AVERAGE hourly velocity of the wind at selected stations of the United States Weather Bureau, also the highest velocity ever reported for a period of five minutes. (Prepared by Chief of the U. S. Weather Bureau, and revised to January 1, 1915, for THE WORLD ALMANAC.)

LOSS BY LIGHTNING IN THE UNITED STATES.

THE Weather Bureau of the United States Department of Agriculture in October, 1900, issued a bulletin giving these facts: In 1899 the total number of strokes of lightning which caused damage was 5,527; number of buildings injured, 6,256; value of property lost, $3,016,520; number of deaths by lightning during the year, 563; number of persons injured, 820; number of live stock killed in the fields, 4,251; value, $129,955. These are the latest available statistics.

The Chronicle Fire Tables record 3,012 fires caused by lightning in the United States in 1902, the property loss occasioned thereby being $3,396,810. These are the latest reported statistics on the subject.

HIGH-TIDE TABLES—*Continued.*

TIME OF HIGH WATER AT POINTS ON THE ATLANTIC COAST.

The local time of high water at the following places may be found approximately for each day by adding to or subtracting from the time of high water at Governor's Island, N. Y., the hours and minutes annexed.

		H.	M.			H.	M.
Albany, N. Y.	add	9	31	New Haven, Ct.	add	3	1
Annapolis, Md.	add	8	57	New London, Ct.	add	1	22
Atlantic City, N. J.	sub.		20	Newport, R. I.	sub.		22
Baltimore, Md.	add	10	52	Norfolk, Va.	add		58
Bar Harbor, Me.	add	2	46	Norwich, Ct.	add	2	0
Beaufort, S. C.	sub.		8	Old Point Comfort, Va.	add		39
Block Island, R. I.	sub.		34	Philadelphia, Pa.	add	5	41
Boston, Mass.	add	3	22	Plymouth, Mass.	add	3	12
Bridgeport, Ct.	add	3	2	Point Lookout, Md.	add	4	49
Bristol, R. I.	sub.		14	Portland, Me.	add	3	10
Cape May, N. J.	add		10	Portsmouth, N. H.	add	3	16
Charleston, S. C.	sub.		42	Poughkeepsie, N. Y.	add	3	51
Eastport, Me.	add	3	0	Providence, R. I.	add		7
Fernandina, Fla.	sub.		18	Richmond, Va.	add	8	48
Gloucester, Mass.	add	2	55	Rockaway Inlet, N. Y.	sub.		25
Hell Gate Ferry, East River, N. Y.	add	1	53	Rockland, Me.	add	3	1
Isles of Shoals, N. H.	add	3	11	Rockport, Mass.	add	2	50
Jacksonville, Fla.	add		37	Salem, Mass.	add	3	9
Key West, Fla.	add	1	24	Sandy Hook, N. J.	sub.		32
League Island, Pa.	add	5	23	Savannah, Ga.	add		7
Marblehead, Mass.	add	3	2	Southport (Smithville), N. C.	sub.		43
Nahant, Mass.	add	3	2	Vineyard Haven, Mass.	add	3	36
Nantucket, Mass.	add	4	21	Washington, D. C.	add	12	1
Newark, N. J.	add		54	Watch Hill, R. I.	add		42
New Bedford, Mass.	sub.		10	West Point, N. Y.	add	2	47
Newburyport, Mass.	add	3	16	Wilmington, N. C.	add	1	0

EXAMPLE.—To find the approximate time of high tide at Atlantic City, N. J., on any day, find first the time of high water at New York under the desired date, and then subtract 20 minutes, as in the above table; the result is the time of high water required.

AVERAGE RISE AND FALL OF TIDE.

PLACES.	Feet.	Inches.	PLACES.	Feet.	Inches.	PLACES.	Feet.	Inches.
Baltimore, Md.	1	3	New London, Ct.	3	9	San Diego, Cal.	3	7
Boston, Mass.	9	8	New Orleans, La.	None	None	Sandy Hook, N. J.	4	7
Charleston, S. C.	5	1	Newport, R. I.	9	8	San Francisco, Cal.	4	9
Eastport, Me.	18	2	New York, N. Y.	4	4	Savannah, Ga.	6	5
Galveston, Tex.	1	1	Old Point Comf't, Va.	2	5	Seattle, Wash.	12	2
Key West, Fla.	1	2	Philadelphia, Pa.	6	0	Tampa, Fla.	2	2
Mobile, Ala.	1	2	Portland, Me.	9	1	Washington, D. C.	2	9

Highest tide at Eastport, Me., 218 inches. Lowest tide at Galveston, Tex., 13 inches.

CANALS IN CANADA.

Chambly	$728,999	12	6½	This canal overcomes the rapids between Chambly and St. Johns.
Cornwall	7,242,804	11	14	Cornwall to Dickinson's Landing.
Lachine	13,404,970	8½	14-18	Montreal to Lachine.
Rideau	5,531,332	133¼	5	Connects River Ottawa with Lake Ontario.
Sault Ste Marie (ship canal)	5,000,000	1⅓	18¼	Connects Lake Superior and Huron at St. Mary's River.
Soulanges	8,000,000	14	15	Cascade Point to Coteau Landing.
‖Trent	13,611,000	236	6-8⅓	Connects Lake Ontario and Lake Huron via Trent River.
Welland (ship canal)	§29,250,951	26¾	14-25	Connects Lake Ontario and Lake Erie.
††Williamsburg	10,490,184	12¼	9-14	Along St. Lawrence River.

* And improvements. †Navigable depth. ‖ Under construction. § Not including cost of improvements and changes in locks, etc., now under way and involving an additional cost of about $20,000,000. †† Consisting of the Farrans Point, Rapide Plat and Galops Canals. (a) Original cost of canal extending from Cleveland to Portsmouth, 317 miles, but now abandoned between Portsmouth and Dresden.

‡ The Erie Canal, Oswego Canal and Champlain Canal have been enlarged by the State of New York to a depth of 12 feet, and with locks of a capacity to pass barges having a net tonnage capacity of 2,000 tons each. The enlarged Champlain Canal between Northumberland and Whitehall, a distance of thirty-five miles, was completed and placed in commission in May, 1914. The Oswego (Barge) Canal is now open between the Erie Canal at Syracuse and Lake Ontario at Oswego for boats of six-foot draft. Several large sections of the Erie Barge Canal already have been completed and are in commission. At the time the ALMANAC went to press the report of the State Superintendent of Public Works indicated that the entire canal from the Hudson River to Lake Ontario will be ready for operation in the season of 1917. The original estimated cost of enlarging the Erie, Champlain and Oswego Canals was $101,000,000, but has since been increased by $19,000,000 for terminals and $8,000,000 for branches. The plan of improvement covers 440 miles of construction and 350 miles of canalized rivers and lakes, or 790 miles altogether.

** The cost of enlarging the Cayuga and Seneca Canal to the same capacity as the improved Erie Canal is estimated at $7,000,000.

Some Foreign Canals.	Length, Miles.	Depth, Feet.	Bottom Width, Feet.	Estimated Cost.
Suez—Mediterranean and Red Seas	103	35	108	$127,000,000
Cronstadt—Petrograd	16	20½	...	10,000,000
Manchester—Manchester and Liverpool	35½	28	120	85,000,000
Kaiser Wilhelm (Kiel Canal)—Baltic and North Seas	61	36	72	40,000,000
Elbe and Trave	41	10	72	6,000,000
Berlin-Stettin (Hohenzollern Canal)	136	9.8	32-39	12,500,000

TONNAGE ON CANALS.

Canals.	Year.	Tonnage.	Canals.	Year.	Tonnage.
Suez	1914	19,409,495	Sault Ste Marie	1914	55,369 934
Manchester	1913	5 780,161	All New York Canals*	1914	2,080,850
Kaiser Wilhelm (Kiel)	1913	10,292,153			

* This was divided among the several canals as follows: Erie, 1,361,764 tons; Champlain, 492,014 tons; Oswego, 55,705 tons; Cayuga and Seneca, 128,698 tons; Black River, 42,669 tons. The total value of the shipments was $28,277,991. In addition to the use of the canals by commercial craft, about 2,000 permits were granted to pleasure boats.

FACTS ABOUT THE EARTH.

(Revised by the National Geographic Society of Washington, D. C., from the latest available figures and estimates.)

THE superficial area of the earth is estimated to be 196,550,000 square miles, of which 55,500,000 square miles are land and 141,050,000 square miles water. The diameter of the earth at the equator is 7,926 miles, and at the poles 7,899 miles. The equatorial circumference is 24,872.4 miles, divided into 360 degrees of longitude, each of 69.09 (or 60 geographical) miles; these degrees are measured from the Meridian of Greenwich, and numbered east and west of that point to meet in the Antipodes at the 180th degree. Distance north and south of the equator is marked by parallels of latitude, which proceed from zero (at the equator) to 90° at the poles.

AREA AND POPULATION OF THE EARTH BY CONTINENTS.

CONTINENTAL DIVISIONS.	Area in Square Miles.	INHABITANTS.		CONTINENTAL DIVISIONS.	Area in Square Miles.	INHABITANTS.	
		Number.	Per Sq. Mile.			Number.	Per Sq. Mile.
Africa	11,632,000	127,312,000	10.9	Australasia	3,456,290	8,000,000	2.31
America, N.	7,146,641	136,939,000	19.1	Europe	3,671,624	458,795,000	124.9
America, S.	7,344,508	55,444,000	7.05	Polar Reg	6,970,000	300,000	.04
Asia	17,470,282	842,100,000	48.02	Total	57,691,345	1,628,890,000	29.9

The estimates in the above tables are based on the statistics of area and population of the various countries occupying each continent as disclosed by the Statesman's Yearbook. The statement as to the polar continent of course is only an approximation. These seem to be the most dependable statistics of area and population that can be had.

The best estimates of the earth's area place the fertile regions at 29,000,000 square miles; steppes at 14,000,000 square miles; deserts at 4,861,000 square miles; and polar regions at 6,970,000 square miles.

The population of the earth at the death of Emperor Augustus, estimated by Bodio, was 54,000,000. The population of Europe hardly exceeded 50,000,000 before the fifteenth century.—*Mulhall.* The population of the earth, at its present ratio of gain, will be about 4,000,000,000 in 2014.

The proportion of females to each 1,000 males in 1910 was: United States, 934; England, 1,068; Germany, 1,026. In France (1901), 1,033.

The area and cubic contents of the earth are approximately as follows: Surface, 196,791,000 square miles; cubic contents 259,944,035,515 cubic miles.

The deepest trench in the seas yet discovered is off Mindanao, in the Pacific, 32,088 feet deep. Seven other soundings in the Pacific show depths greater than 30,000 feet. From the bottom of the deepest hole in the seas to the top of the highest peak on the land (Mt. Everest) there is a range of 61,090 feet, which on a globe six feet in diameter would be represented by the tenth of an inch. The deepest place yet found in the Atlantic Ocean is in Nare's Deep, to the north of the West Indies, 27,972 feet; of the Indian Ocean, 21,968 feet. According to Murray the area of the oceans approximates 139,400,000 square miles, divided between the three great oceans as follows: Atlantic 41,321,000 square miles; Pacific 68,634,000 square miles, and Indian, 29,430,000 square miles.

HIGHEST AND LOWEST CONTINENTAL ALTITUDES.

	HIGHEST POINT.	Elevation (ft.).	Lowest Point.	Below Sea Level (ft.)
North America	Mount McKinley, Alaska	20,300	Death Valley, California	276
South America	Mount Aconcagua, Chile-Argentina	23,080	Sea level	.....
Europe	Mont Blanc, France	15,782	Caspian Sea, Russia	86
Asia	Mount Everest, India-China	29,002	Dead Sea, Palestine	1,290
Africa	Kibo Peak, German East Africa	19,320	Desert of Sahara	150
Australia	Mount Kosciusko, New South Wales	7,328	Lake Torrens, South Australia	25

POPULATION OF THE EARTH ACCORDING TO RACE.

RACE.	Location.	Number.	RACE.	Location.	Number.
Indo-Germanic or Aryan (white)	Europe, America, Persia, India, Australia	775,000,000	Malay and Polynesian (brown)	Australasia	33,000,000
Mongolian or Turanian (yellow and brown)	Asia	600,000,000	American Indian, North and South (red and half breeds)		25,000,000
Semitic (white)	Africa, Arabia, etc.	65,000,000			
Negro and Bantu (black)	Africa	130,000,000	Total		1,628,000,000

For statistics of earth's population according to creed, see RELIGIOUS STATISTICS.

The human family is subject to 54 independent and three quasi-independent governments. The British Empire and Russia are the largest two, while Monaco with its eight square miles and San Marino with its thirty-eight square miles of territory are the smallest two. The absolute monarchies are Abyssinia, Afghanistan, Morocco, Siam, Oman, and Monaco; the limited monarchies are Albania, Austria-Hungary, Belgium, Bhutan, British Empire, Bulgaria, Denmark, German Empire, Greece, Italy, Japan, Liechtenstein, Luxemburg, Montenegro, Nepal, Netherlands, Norway, Persia, Rumania, Russia, Servia, Spain, Sweden, and Turkey; the republics are Andorra, Argentina, Bolivia, Brazil, Chile, China, Colombia, Costa Rica, Cuba, Ecuador, Guatemala, Haiti, Honduras, Liberia, Mexico, Nicaragua, Panama, Paraguay, Peru, Portugal, Salvador, San Marino, Santo Domingo, Switzerland, United States, Uruguay, Venezuela.

The average duration of human life is about 33 years. One-quarter of the people on the earth die before age 6, one-half before age 16, and only about 1 person of each 100 born lives to 65.

EUROPEAN LANGUAGES SPOKEN.

LANGUAGES.	NUMBER OF PERSONS SPOKEN BY.		PROPORTION OF THE WHOLE.		LANGUAGES.	NUMBER OF PERSONS SPOKEN BY.		PROPORTION OF THE WHOLE.	
	1801.	1916.	1801.	1916.		1801.	1916.	1801.	1916.

Italian	15,070,000	50,000,000	9.3	8.6	Total	161,800,000	585,000,000	100.0	100.0
Spanish	26,190,000	50,000,000	16.2	8.6					

These estimates (that for 1801 being by Mulhall) exhibit the superior growth of the English language.

METRIC SYSTEM OF WEIGHTS AND MEASURES.

THE METRIC SYSTEM has been adopted by Mexico, Brazil, Chile, Peru, etc., and except Russia and Great Britain, where it is permissive, by all European nations. Various names of the preceding systems are, however, frequently used: In Germany, ½ kilogram = 1 pound; in Switzerland, 3-10 of a metre = 1 foot, etc. If the first letters of the prefixes *deka*, *hecto*, *kilo*, *myria*, from the Greek, and *deci*, *centi*, *mili*, from the Latin, are used in preference to our plain English, 10, 100, etc., it is best to employ capital letters for the multiples and small letters for the subdivisions, to avoid ambiguities in abbreviations: 1 dekametre or 10 metres = 1 dm.; 1 decimetre or 1-10 of a metre = 1 dm.

The METRE, unit of length, is nearly the ten-millionth part of a quadrant of a meridian, of the distance between Equator and Pole. The International Standard Metre is, practically, nothing else but a length defined by the distance between two lines on a platinum-iridium bar at 0° Centigrade, deposited at the International Bureau of Weights and Measures, Paris, France.

The LITRE, unit of capacity, is derived from the weight of one kilogram pure water at greatest density, a cube whose edge is one-tenth of a metre and, therefore, the one-thousandth part of a metric ton.

The GRAM, unit of weight, is a cube of pure water at greatest density, whose edge is one-hundredth of a metre, and, therefore, the one-thousandth part of a kilogram, and the one-millionth part of a metric ton.

The Metric System was legalized in the United States on July 28, 1866, when Congress enacted as follows:

"The tables in the schedule hereto annexed shall be recognized in the construction of contracts, and in all legal proceedings, as establishing, in terms of the weights and measures now in use in the United States, the equivalents of the weights and measures expressed therein in terms of the metric system, and the tables may lawfully be used for computing, determining, and expressing in customary weights and measures the weights and measures of the metric system."

The following are the tables annexed to the above:

MEASURES OF LENGTH.

Metric Denominations and Values.		Equivalents in Denominations in Use.	
Myriametre	10,000 metres.	6.2137	miles.
Kilometre	1,000 metres.	0.62137	mile, or 3,280 feet 10 inches.
Hectometre	100 metres.	328	feet 1 inch.
Dekametre	10 metres.	393 7	inches.
Metre	1 metre.	39.37	inches.
Decimetre	1-10 of a metre.	3.937	inches.
Centimetre	1-100 of a metre.	0.3937	inch.
Millimetre	1-1000 of a metre.	0.0394	inch.

MEASURES OF SURFACE.

Metric Denominations and Values.		Equivalents in Denominations in Use.	
Hectare	10,000 square metres.	2.471	acres.
Are	100 square metres.	119.6	square yards.
Centare	1 square metre.	1,550	square inches.

MEASURES OF CAPACITY.

Metric Denominations and Values.			Equivalents in Denominations in Use.	
Names.	Number of Litres.	Cubic Measure.	Dry Measure.	Liquid or Wine Measure.
Kilolitre or stere.	1,000	1 cubic metre	1 308 cubic yards	264.17 gallons.
Hectolitre	100	1-10 of a cubic metre	2 bush. and 3.35 pecks	26.417 gallons.
Dekalitre	10	10 cubic decimetres	9.08 quarts	2.6417 gallons.
Litre	1	1 cubic decimetre	0.908 quart	1.0567 quarts.
Decilitre	1-10	1-10 of a cubic decimetre.	6.1022 cubic inches	0.845 gill.
Centilitre	1-100	10 cubic centimetres	0.6102 cubic inch	0.338 fluid ounce.
Millilitre	1-1000	1 cubic centimetre	0.061 cubic inch	0.27 fluid dram.

METRIC SYSTEM—*Continued.*

WEIGHTS.

Metric Denominations and Values.			Equivalents in Denominations in Use.
Names.	Number of Grams.	Weight of What Quantity of Water at Maximum Density.	Avoirdupois Weight.
Miller or tonneau	1,000,000	1 cubic metre	2204.6 pounds.
Quintal	100,000	1 hectolitre	220.46 pounds.
Myriagram	10,000	10 litres	22.046 pounds.
Kilogram or kilo	1,000	1 litre	2.2046 pounds.
Hectogram	100	1 decilitre	3.5274 ounces.
Dekagram	10	10 cubic centimetres	0.3527 ounce.
Gram	1	1 cubic centimetre	15.432 grains.
Decigram	1-10	1-10 of a cubic centimetre	1.5432 grains.
Centigram	1-100	10 cubic millimetres	0.1543 grain.
Milligram	1-1000	1 cubic millimetre	0.0154 grain.

TABLES FOR THE CONVERSION OF METRIC WEIGHTS AND MEASURES INTO CUSTOMARY UNITED STATES EQUIVALENTS AND THE REVERSE.

From the legal equivalents are deduced the following tables for converting United States weights and measures:

METRIC TO CUSTOMARY. CUSTOMARY TO METRIC.

THE METRIC SYSTEM SIMPLIFIED.

The following tables of the metric system of weights and measures have been simplified as much as possible for THE WORLD ALMANAC by omitting such denominations as are not in practical, everyday use in the countries where the system is used exclusively.

TABLES OF THE SYSTEM.

Length.—The denominations in practical use are millimetres (mm.), centimetres (cm.), metres (m.), and kilometres (km.).

10 mm. = 1 cm.; 100 cm. = 1 m.; 1,000 m. = 1 km. NOTE.—A decimetre is 10 cm.

Weight.—The denominations in use are grams (g.), kilos* (kg.), and tons (metric tons).

1,000 g. = 1 kg.; 1,000 kg. = 1 metric ton.

Capacity.—The denominations in use are cubic centimetres (c. c.) and litres (l.).

1,000 c c. = 1 l. NOTE —A hectolitre is 100 l. (seldom used).

Relation of capacity and weight to length. A cubic decimetre is a litre, and a litre of water weighs a kilo.

APPROXIMATE EQUIVALENTS.

A metre is about a yard; a kilo is about 2 pounds; a litre is about a quart; a centimetre is about ⅓ inch; a metric ton is about same as a ton; a kilometre is about ⅝ mile; a cubic centimetre is about a thimbleful; a nickel weighs about 5 grams.

PRECISE EQUIVALENTS.

1 acre	= .40	hectare	.4 047	1 mile	= 1.6	kilometres	1.609
1 bushel	= 35	litres	35.24	1 millimetre	= .039	inch	.0394
1 centimetre	= .39	inch	.3937	1 ounce (av'd)	= 28	grams	28.35
1 cubic centimetre	= .061	cubic inch	.0610	1 ounce (Troy)	= 31	grams	31.10
1 cubic foot	= .028	cubic metre	.0283	1 peck	= 8.8	litres	8.809
1 cubic inch	= 16	cubic cent. †	16.39	1 pint	= .47	litre	.4732

1 metre	= 3.3	feet	3.281	1 yard	= .91	metre	.9144

* Contraction for kilogram. † Centimetres.

MINIMUM WEIGHTS OF PRODUCE.

THE following are minimum weights of certain articles of produce according to the laws of the United States:

	Per Bushel.		Per Bushel.		Per Bushel.
Wheat	60 lbs.	White Potatoes	60 lbs.	Hungarian Grass Seed	50 lbs.
Corn, in the ear	70 "	Sweet Potatoes	55 "	Timothy Seed	45 "
Corn, shelled	56 "	Onions	57 "	Blue Grass Seed	44 "
Rye	56 "	Turnips	55 "	Hemp Seed	44 "
Buckwheat	48 "	Dried Peaches	33 "	Salt (see note below).	
Barley	48 "	Dried Apples	26 "	Corn Meal	48 "
Oats	32 "	Clover Seed	60 "	Ground Peas	24 "
Peas	60 "	Flax Seed	56 "	Malt	34 "
White Beans	60 "	Millet Seed	50 "	Bran	20 "
Castor Beans	46 "				

SALT.—Weight per bushel as adopted by different States ranges from 50 to 80 pounds. Coarse salt in Pennsylvania is reckoned at 80 pounds, and in Illinois at 50 pounds per bushel. Fine salt in Pennsylvania is reckoned at 62 pounds, in Kentucky and Illinois at 55 pounds per bushel.

MEASURES AND WEIGHTS OF GREAT BRITAIN.

THE measures of length and the weights are nearly, practically, the same as those in use in the United States. The English ton is 2,240 lbs. avoirdupois, the same as the long ton, or shipping ton of the United States. The English hundredweight is 112 lbs. avoirdupois, the same as the long hundredweight of the United States. The English stone is usually equal to one eighth hundredweight of 112 lbs., or 14 lbs. avoirdupois. The metre has been legalized at 39 37079 inches, but the length of 39.370432 inches, as adopted by France, Germany, Belgium, and Russia is frequently used.

The Imperial gallon, the basis of the system of capacity, involves an error of about 1 part in 1,836; 10 lbs. of water = 277.123 cubic inches. (A late authority gives the weight of the Imperial gallon as 10.017 pounds and of the United States gallon as 8.345 pounds.)

The English statute mile is 1,760 yards or 5,280 feet. The following are measures of capacity:

NAMES.	Pounds of Water.	Cubic Inches.	Litres	United States Equivalents.
4 gills = 1 pint	1.25	34.66	0 56793	1.20032 liquid pints.
2 pints = 1 quart	2.5	69.32	1 13586	1.20032 " quarts.
2 quarts = 1 pottle	5	138.64	2.27173	2.40064 " "
2 pottles = 1 gallon	10	277.27	4.54346	1 20032 " gallons.
2 gallons = 1 peck (Dry measure)	20	554.55	9.08692	1 03152 dry pecks.
4 pecks = 1 bushel (Dry measure)	80	2218.19	36 34766	1 03152 " bushels.
4 bushels = 1 coomb (Dry measure)	320	8872.77	145.39062	4 12606 " "
2 coombs = 1 quarter (Dry measure)	640	17745.54	290.7813	8.2521 " "

A cubic foot of pure gold weighs 1,210 pounds; pure silver, 655 pounds. cast iron, 450 pounds; copper, 550 pounds, lead 710 pounds; pure platinum, 1,220 pounds; tin, 456 pounds; aluminum, 163 pounds

DOMESTIC WEIGHTS AND MEASURES.

Apothecaries' Weight: 20 grains = 1 scruple; 3 scruples = 1 dram; 8 drams = 1 ounce; 12 ounces = 1 pound.

Avoirdupois Weight (short ton): 27 11 32 grains = 1 dram; 16 drams = 1 ounce; 16 ounces = 1 pound; 25 pounds = 1 quarter; 4 quarters = 1 cwt.; 20 cwt. = 1 ton

Avoirdupois Weight (long ton): 27 11-32 grains = 1 dram; 16 drams = 1 ounce; 16 ounces = 1 pound; 112 pounds = 1 cwt.; 20 cwt. = 1 ton.

Troy Weight: 24 grains = 1 pennyweight; 20 pennyweights = 1 ounce; 12 ounces = 1 pound.

Circular Measure: 60 seconds = 1 minute; 60 minutes = 1 degree; 30 degrees = 1 sign; 12 signs = 1 circle or circumference.

Cubic Measure: 1,728 cubic inches = 1 cubic foot; 27 cubic feet = 1 cubic yard.

Dry Measure: 2 pints = 1 quart; 8 quarts = 1 peck; 4 pecks = 1 bushel.

Liquid Measure: 4 gills = 1 pint; 2 pints = 1 quart; 4 quarts = 1 gallon; 31½ gallons = 1 barrel; 2 barrels = 1 hogshead.

Long Measure: 12 inches = 1 foot; 3 feet = 1 yard; 5½ yards = 1 rod or pole; 40 rods = 1 furlong; 8 furlongs = 1 statute mile (1,760 yards or 5,280 feet); 3 miles = 1 league.

Mariners' Measure: 6 feet = 1 fathom; 120 fathoms = 1 cable length; 7½ cable lengths = 1 mile; 5,280 feet = 1 statute mile; 6,085 feet = 1 nautical mile.

Paper Measure: 24 sheets = 1 quire; 20 quires = 1 ream (480 sheets); 2 reams = 1 bundle; 5 bundles = 1 bale.

Square Measure: 144 square inches = 1 square foot; 9 square feet = 1 square yard; 30¼ square yards = 1 square rod or perch; 40 square rods = 1 rood; 4 roods = 1 acre; 640 acres = 1 square mile; 36 square miles (6 miles square) = 1 township.

Time Measure: 60 seconds = 1 minute; 60 minutes = 1 hour; 24 hours = 1 day; 7 days = 1 week; 365 days = 1 year; 366 days = 1 leap year.

MEDICAL SIGNS AND ABBREVIATIONS.

℞ (Lat. Recipe), take; āā, of each; ℔, pound; ℥, ounce; ʒ, drachm; ℈, scruple; ♏, minim, or drop; O or o, pint; f ℥, fluid ounce: f ʒ, fluid drachm; as, ℥ss, half an ounce; ℥ i, one ounce; ℥ iss, one ounce and a half; ℥ ij, two ounces; gr., grain; Q. S., as much as sufficient; Ft. Mist., let a mixture be made; Ft. Haust., let a draught be made; Ad., add to; Ad lib., at pleasure; Aq., water; M., mix; Mac., macerate; Pulv., powder; Pil., pill; Solv., dissolve, St., let it stand; Sum. to be taken; D., dose; Dil., dilute; Filt., filter; Lot., a wash; Garg., a gargle; Hor. Decub., at bed time; Inject., injection; Gtt., drops; ss, one-half; Ess., essence.

TEXAS LAND MEASURE.

(Also used in Mexico, New Mexico, Arizona, and California.)

26,000,000	square varas (square of 5,099	varas) = 1 league and 1 labor	= 4,605.5	acres.
1,000,000	square varas (square of 1,000	varas) = 1 labor	= 177.136	acres.
25,000,000	square varas (square of 5,000	varas) = 1 league	= 4 428 4	acres.
12,500,000	square varas (square of 3,535.5	varas) = ½ league	= 2 214 2	acres.
8,333,333	square varas (square of 2,886.7	varas) = ⅓ league	= 1,476.13	acres.
6,250,000	square varas (square of 2,500	varas) = ¼ league	= 1 107 1	acres.
7,225,600	square varas (square of 2,688	varas)	= 1,280	acres.
3,612,800	square varas (square of 1,900.8	varas) = 1 section	= 640	acres.
1,806,400	square varas (square of 1,344	varas) = ½ section	= 320	acres.
903,200	square varas (square of 950.44	varas) = ¼ section	= 160	acres.
451,600	square varas (square of 672	varas) = ⅛ section	= 80	acres.
225,800	square varas (square of 475	varas) = 1-16 section	= 40	acres.
5,645.376	square varas (square of 75.137	varas) = 4,840 square yards	= 1	acre

To find the number of acres in any number of square varas, multiply the latter by 177 (or to be more exact, by 177½), and cut off six decimals.

1 vara = 33⅓ inches. 1,900.8 varas = 1 mile.

WEIGHTS AND MEASURES OF THE PHILIPPINES.

1 pulgada (12 linea)	= .927	inch.	1 libra (16 onzo)	= 1.0144	lb av.
1 pie	= 11.125	inches.	1 arroba	= 25.360	lb. av
1 vara	= 33.375	inches.	1 catty (16 tael)	= 1.394	lb av.
1 gantah	= .8796	gallon.	1 pecul (100 catty)	= 139.482	lb. av.
1 caban	= 21.991	gallons.			

KNOTS AND MILES.

THE **Statute Mile** is 5,280 feet.

The **British Admiralty Knot** or **Nautical Mile** is 6,080 feet.

The **Statute Knot** is 6.082.66 feet, and is generally considered the standard. The number of feet in a statute knot is arrived at thus: The circumference of the earth is divided into 360 degrees, each degree containing 60 knots or (360x60), 21,600 knots to the circumference. 21.600 divided into 131.385,456—the number of feet in the earth's circumference—gives 6,082.66 feet—the length of a standard mile.

1 knot	= 1.151 miles	4 knots =	4.606 miles	20 knots =	23.030 miles	600 feet	= 1 cable
2 knots	= 2.303 miles	5 knots =	5.757 miles	25 knots =	28.787 miles	10 cables	= 1 knot
3 knots	= 3.454 miles	10 knots =	11.515 miles	6 feet	= 1 fathom		

ANCIENT GREEK AND ROMAN WEIGHTS AND MEASURES.

WITH AMERICAN EQUIVALENTS.

WEIGHTS.

The Roman libra or pound = 10 oz. 18 pwt. 13 5-7 gr., Troy.
The Attica mina or pound = 11 oz. 7 pwt. 16 2-7 gr., Troy.
The Attica talent (60 minæ) = 56 lbs. 11 oz. 0 pwt. 17 1-7 gr., Troy.

DRY MEASURE.

The Roman modus = 1 pk. 2-9 pint.
The Attic chœnix = nearly 1½ pints.
The Attic medimnus = 4 pk. 6 1-10 pints.

LIQUID MEASURE.

The cotyle = a little over ½ pint.
The cyathus = a little over 1½ pints.
The chus = a little over 6⅔ pints.

LONG MEASURE.

The Roman foot = 11 3-5 inches.
The Roman cubit = 1 ft. 5⅔ inches.
The Roman pace = 4 ft. 10 inches.
The Roman furlong = 604 ft. 10 inches.
The Roman mile = 4,835 feet.
The Grecian cubit = 1 ft. 6⅛ inches.
The Grecian furlong = 504 ft. 4 1-5 inches.
The Grecian mile = 4,030 ft.

MONEY.

The quadrans = 1 1-10 mills.
The as = 1 3-10 mills.
The sestertius = 3.58 + cents.
The sestertium (1.000 sestertii) = $35.80+.
The denarius = 14.35 + cents.
The Attic obolus = 2.39 + cents.
The drachma = 14.35 + cents.*
The mina (100 drachmæ) = $14.35+.
The talent (60 minæ) = $861.00+.
The Greek stater = aureus (same as the Roman †) = $3.58,79.
The stater = daricus = $7.16,66.

*The modern drachma equals 19.3 cents. † Did not remain, at all periods, at this value, but this is the value indicated by Tacitus.

BIBLICAL WEIGHTS REDUCED TO TROY WEIGHT.

	Lbs.	Oz.	Pwt.	Gr.
The Gerah, one-twentieth of a Shekel	0	0	0	12
The Bekah, half a Shekel	0	0	5	0
The Shekel	0	0	10	0
The Maneh, 60 Shekels	2	6	0	0
The Talent, 50 manehs, or 3,000 Shekels	125	0	0	0

ELECTRICAL UNITS AND THEIR POPULAR DEFINITIONS.

THE watt is the unit expressing electrical energy as horsepower (HP) represents energy in mechanics. It is the sum of the volt (pressure) times ampere (rate of flow). Thus 2 volts times 2 amperes would give you 4 watts. Electrical energy is sold at so much per watt hour or more generally at a given amount per kilowatt hour—which means 1,000 watt-hours. This may represent 1 watt for 1,000 hours or say 1,000 watts for 1 hour. 746 watts are equal to one horsepower or inversely 1 kilowatt (kw) is equal to 1⅓ horsepower.

The horsepower represents the energy required to lift a weight of 33.000 pounds—1 foot in 1 minute or 550 lbs. 1 foot in 1 second.

The ohm is the unit of electrical resistance and represents the physical property of a material which offers a resistance to the flow of electricity permitting just 1 ampere to flow at 1 volt of pressure. For example, 1,000 feet of copper wire of 10 gauge has just 1 ohm of resistance and allows the flow of 1 ampere at 1 volt.

A dry battery is made by placing in a hollow receptacle of zinc a piece of carbon, the intervening space being filled with a mixture containg certain chemicals, such as manganese dioxide, powdered carbon and some absorbent material such as sawdust, which is then saturated with salammoniac and the receptacle sealed. The chemical action set up produces a flow of electricity when the two electrodes, the carbon and the zinc, are connected by a conductor of electricity such as a wire, a lamp or a motor.

THEODORE DWIGHT.

FOREIGN MONEYS.

English Money: 4 farthings = 1 penny (*d*); 12 pence = 1 shilling (*s*); 20 shillings = 1 pound (£). 21 shillings = one guinea; 5 shillings = one crown.

French Money: 100 centimes = 1 franc.

German Money: 100 pfennig = 1 mark.

Russian Money: 100 copecks = 1 ruble.

Austro-Hungarian Money: 100 heller = 1 krone

For United States equivalents, see table of "Value of Foreign Coins in U. S. Money."

TABLE OF GEOMETRICAL PROGRESSION.

(WHEREBY any questions of Geometrical Progression and of Double Ratio may be solved by Inspection, the Number of Terms not exceeding 56.)

STANDARD NEWSPAPER MEASURES.

THE Standard Newspaper Measure, as recognized and now in general use is 13 ems pica. The standard of measurement of all sizes of type is the "em quad," not the letter "m."

The basis of measurements adopted by the International Typographical Union is the lower-case alphabet, from "a" to "z" inclusive, and the ems used are the same body as the type measured.

The weight of a cubic foot of distilled water at a temperature of 60° F. is 1,000 ounces Avoirdupois, *very nearly*, therefore the weight (in ounces, Avoirdupois) of a cubic foot of any of the substances in the above table is found by multiplying the specific gravities by 10, thus:—one cubic foot of oak weighs 1,170 ounces; one cubic foot of marble 2,700 ounces, and so on.

* Compared with water.

FREEZING, FUSING, AND BOILING POINTS.

Substances.	Reaumur.	Centigrade.	Fahrenheit.	Substances.	Reaumur.	Centigrade.	Fahrenheit.
Bromine freezes at	− 17.6°	− 22°	− 7.6°	Silver fuses at	800°	1,000°	1,832°

Tensile Strength is the resistance of the fibres or particles of a body to separation. It is therefore proportional their number, or to the area of its transverse section. The fibres of wood are strongest near the centre of the trunk or limb a tree. * Tensile strength in pounds per square inch.

THE CAPITOL AT WASHINGTON.

THE Capitol is situated in latitude 38° 53′ 20″.4 north and longitude 77° 00′ 35″.7 west from Greenwich. It fronts east, and stands on a plateau eighty-eight feet above the level of the Potomac.

The entire length of the building from north to south is seven hundred and fifty-one feet four inches, and its greatest dimension from east to west three hundred and fifty feet. The area covered by the building is 153,112 square feet.

The dome of the original central building was constructed of wood, covered with copper. This was replaced in 1856 by the present structure of cast iron. It was completed in 1865. The entire weight of iron used is 8,909,200 pounds.

The dome is crowned by a bronze statue of Freedom, which is nineteen feet six inches high and weighs 14,985 pounds. It was modelled by Crawford. The height of the dome above the base line of the east front is two hundred and eighty-seven feet five inches. The height from the top of the balustrade of the building is two hundred and seventeen feet eleven inches. The greatest diameter at the base is one hundred and thirty-five feet five inches.

The rotunda is ninety-seven feet six inches in diameter, and its height from the floor to the top of the canopy is one hundred and eighty feet three inches.

The Senate Chamber is one hundred and thirteen feet three inches in length, by eighty feet three inches in width, and thirty-six feet in height. The galleries will accommodate one thousand persons.

The Representatives' Hall is one hundred and thirty-nine feet in length, by ninety-three feet in width, and thirty-six feet in height.

The southeast corner-stone of the original building was laid September 18, 1793, by President Washington with Masonic ceremonies. The corner-stone of the extensions was laid July 4, 1851, by President Fillmore.

The room now occupied by the Supreme Court was, until 1859, occupied as the Senate Chamber. Previous to that time the court occupied the room immediately beneath, now used as a law library.

LINCOLN'S GETTYSBURG SPEECH.

(*Address at the Dedication of Gettysburg Cemetery, November* 19, 1863.)

FOURSCORE and seven years ago our fathers brought forth upon this continent a new nation, conceived in liberty, and dedicated to the proposition that all men are created equal.

Now we are engaged in a great civil war, testing whether that nation, or any nation so conceived and so dedicated, can long endure. We are met on a great battlefield of that war. We are met to dedicate a portion of it as the final resting-place of those who here gave their lives that that nation might live. It is altogether fitting and proper that we should do this.

But in a larger sense we cannot dedicate, we cannot consecrate, we cannot hallow this ground. The brave men, living and dead, who struggled here have consecrated it far above our power to add or detract. The world will little note nor long remember what we say here, but it can never forget what they did here. It is for us, the living, rather to be dedicated here to the unfinished work that they have thus far so nobly carried on. It is rather for us to be here dedicated to the great task remaining before us; that from these honored dead we take increased devotion to the cause for which they here gave the last full measure of devotion; that we here highly resolve that the dead shall not have died in vain; that the nation shall, under God, have a new birth of freedom, and that government of the people, by the people, and for the people, shall not perish from the earth.

UNITED STATES COAST AND GEODETIC SURVEY.

THE Coast and Geodetic Survey of the Department of Commerce is charged with the survey of the coasts of the United States and coasts under the jurisdiction thereof, and the publication of charts covering said coasts. This includes base measure, triangulation, topography, and hydrography along said coasts; the survey of rivers to the head of tide water or ship navigation, deep sea soundings, temperature and current observations along said coasts and throughout the Gulf and Japan streams, magnetic observations and researches and the publication of maps showing the variations of terrestrial magnetism; gravity research, determination of heights, the determination of geographic positions by astronomic observations for latitude, longitude and azimuth, and by triangulation to furnish reference points for State surveys and to co-ordinate Governmental surveys.

The results obtained are published in annual reports and in special publications; charts upon various scales, including sailing charts, general charts of the coast and harbor charts; tide tables issued annually in advance; coast pilots with sailing directions covering the navigable waters; notices to mariners issued weekly as a joint publication of the Coast and Geodetic Survey and the Bureau of Lighthouses and containing current information necessary for safe navigation; catalogues of charts and publications, and such other publications as may be required to carry out the organic law governing the survey.

Constitution of the United States.

Preamble. WE, the people of the United States, in order to form a more perfect Union, establis justice, insure domestic tranquillity, provide for the common defense, promote the gen era! welfare, and secure the blessings of liberty to ourselves and our posterity, d ordain and establish this CONSTITUTION for the United States of America.

ARTICLE I.

Legislative powers. SECTION I. All legislative powers herein granted shall be vested in a Congress of the United States, whic shall consist of a Senate and House of Representatives.

House of Representatives. SECTION II. 1. The House of Representatives shall be composed of members chosen every second year by t people of the several States, and the electors in each State shall have the qualifications requisite for electors of t most numerous branch of the State Legislature.

Qualifications of Representatives. 2. No person shall be a Representative who shall not have attained to the age of twenty-five years, and be seven years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State which he shall be chosen.

Apportionment of Representatives. 3. Representatives and direct taxes shall be apportioned among the severa' States which may be included wit in this Union according to their respective numbers, which shall be determined by adding to the whole number free persons, including those bound to service for a term of years, and excluding Indians not taxed, three-fifths of a other persons. The actual enumeration shall be made within three years after the first meeting of the Congress the United States, and within every subsequent tern or ten years, in such manner as they shall by law direct. T number of Representatives shall not exceed one for every thirty thousand, but each State shall have at least o Representative; and until such enumeration shall be made, the State of New Hampshire shall be entitled to choo 3; Massachusetts, 8; Rhode Island and Providence Plantations, 1; Connecticut, 5; New York, 6; New Jersey, Pennsylvania, 8; Delaware, 1; Maryland, 6; Virginia, 10; North Carolina, 5; South Carolina, 5, and Georgia,

Vacancies, how filled. 4. When vacancies happen in the representation from any State, the Executive Authority thereof shall iss writs of election to fill such vacancies.

Officers, how appointed. 5. The House of Representatives shall choose their Speaker and other officers, and shall have the sole power impeachment.

Senate. SECTION III. [See Article XVII., Amendments.] 1. The Senate of the United States shall be composed two Senators from each State, chosen by the Legislature thereof, for six years; and each Senator shall have one vot

Classification of Senators. 2. Immediately after they shall be assembled in consequence of the first election, they shall be divided equally as may be into three classes. The seats of the Senators of the first class shall be vacated at the expirati of the second year, of the second class at the expiration of the fourth year, and of the third class at the expirati of the sixth year, so that one-third may be chosen every second year; and if vacancies happen by resignation, otherwise, during the recess of the Legislature of any State, the Executive thereof may make temporary appoin ment until the next meeting of the Legislature, which shall then fill such vacancies.

Qualifications of Senators. 3. No person shall be a Senator who shall not have attained to the age of thirty years, and been nine years citizen of the United States, and who shall not, when elected, be an inhabitant of that State for which he shall chosen.

President of the Senate. 4. The Vice-President of the United States shall be President of the Senate, but shall have no vote unless th be equally divided.

5. The Senate shall choose their other officers, and also a President pro tempore, in the absence of the Vic President, or when he shall exercise the office of President of the United States.

Senate a court for trial of impeachments. 6. The Senate shall have the sole power to try all impeachments. When sitting for that purpose, they shall on oath or affirmation. When the President of the United States is tried, the Chief Justice shall preside; and person shall be convicted without the concurrence of two-thirds of the members present.

Judgment in case of conviction. 7. Judgment in cases of impeachment shall not extend further than to removal from office, and disqualificati to hold and enjoy any office of honor, trust, or profit under the United States; but the party convicted shall neve theless be liable and subject to indictment, trial, judgment, and punishment, according to law.

Elections of Senators and Representatives. SECTION IV. 1. The times, places, and manner of holding elections for Senators and Representatives shall prescribed in each State by the Legislature thereof; but the Congress may at any time by law make or alter su regulations, except as to places of choosing Senators.

Meeting of Congress. 2. The Congress shall assemble at least once in every year, and such meeting shall be on the first Monday December, unless they shall by law appoint a different day

Organization of Congress. SECTION V. 1. Each House shall be the judge of the elections, returns, and qualifications of its own member and a majority of each shall constitute a quorum to do business; but a smaller number may adjourn from day day, and may be authorized to compel the attendance of absent members in such manner and under such penalti as each House may provide.

Rule of proceedings. 2. Each House may determine the rules of its proceedings, punish its members for disorderly behavior, and wi the concurrence of two-thirds expel a member.

Journals of each House. 3. Each House shall keep a journal of its proceedings, and from time to time publish the same, excepting su parts as may in their judgment require secrecy; and the yeas and nays of the members of either House on a question shall, at the desire of one-fifth of those present, be entered on the journal.

Adjournment of Congress. 4. Neither House, during the session of Congress, shall, without the consent of the other, adjourn for mo than three days, nor to any other place than that in which the two Houses shall be sitting.

Pay and privileges of members. SECTION VI. 1. The Senators and Representatives shall receive a compensation for their services, to be asce tained by law, and paid out of the Treasury of the United States. They shall in all cases, except treason, felon and breach of the peace, be privileged from arrest during their attendance at the session of their respective House and in going to and returning from the same; and for any speech or debate in either House they shall not be que tioned in any other place.

Other offices prohibited. 2. No Senator or Representative shall, during the time for which he was elected, be appointed to any civil offi under the authority of the United States which shall have been created, or the emoluments whereof shall have be increased during such time; and no person holding any office under the United States shall be a member of eith House during his continuance in office.

Revenue bills. SECTION VII. 1. All bills for raising revenue shall originate in the House of Representatives, but the Sens may propose or concur with amendments, as on other bills.

How bills become laws. 2. Every bill which shall have passed the House of Representatives and the Senate shall, before it become law, be presented to the President of the United States; if he approve, he shall sign it, but if not, he shall return with his objections, to that House in which it shall have originated, who shall enter the objections at large on th journal, and proceed to reconsider it. If after such reconsideration two-thirds of that House shall agree to pass t bill, it shall be sent, together with the objections, to the other House, by which it shall likewise be reconsidere and if approved by two-thirds of that House it shall become a law. But in all such cases the votes of both Hou shall be determined by yeas and nays, and the names of the persons voting for and against the bill shall be enter on the journal of each House respectively. If any bill shall not be returned by the President within ten da (Sundays excepted) after it shall have been presented to him, the same shall be a law in like manner as if he h signed it, unless the Congress by their adjournment prevent its return; in which case it shall not be a law.

* See Article XIV., Amendments.

pproval and veto powers of the President.

3. Every order, resolution, or vote to which the concurrence of the Senate and House of Representatives may be necessary (except on a question of adjournment) shall be presented to the President of the United States; and before the same shall take effect shall be approved by him, or being disapproved by him, shall be repassed by two-thirds of the Senate and the House of Representatives, according to the rules and limitations prescribed in the case of a bill.

owers vested in Congress.

SECTION VIII. 1. The Congress shall have power.

To lay and collect taxes, duties, imposts, and excises, to pay the debts and provide for the common defence and general welfare of the United States; but all duties imposts, and excises shall be uniform throughout the United States.

2. To borrow money on the credit of the United States.

3. To regulate commerce with foreign nations, and among the several States, and with the Indian tribes.

4. To establish an uniform rule of naturalization and uniform laws on the subject of bankruptcies throughout the United States.

5. To coin money, regulate the value thereof, and of foreign coin, and fix the standard of weights and measures.

6. To provide for the punishment of counterfeiting the securities and current coin of the United States.

7. To establish post-offices and post-roads.

8. To promote the progress of science and useful arts by securing for limited times to authors and inventors the exclusive rights to their respective writings and discoveries.

9. To constitute tribunals inferior to the Supreme Court.

10. To define and punish piracies and felonies committed on the high seas, and offences against the law of nations.

11. To declare war, grant letters of marque and reprisal, and make rules concerning captures on land and water.

12. To raise and support armies, but no appropriation of money to that use shall be for a longer term than two years.

13. To provide and maintain a navy.

14. To make rules for the government and regulation of the land and naval forces.

15. To provide for calling forth the militia to execute the laws of the Union, suppress insurrections, and repel invasions.

16. To provide for organizing, arming, and disciplining the militia, and for governing such part of them as may be employed in the service of the United States, reserving to the States respectively the appointment of the officers, and the authority of training the militia according to the discipline prescribed by Congress.

17. To exercise exclusive legislation in all cases whatsoever over such district (not exceeding ten miles square) as may, by cession of particular States and the acceptance of Congress, become the seat of Government of the United States, and to exercise like authority over all places purchased by the consent of the Legislature of the State in which the same shall be, for the erection of forts, magazines, arsenals, dry-docks, and other needful buildings.

18. To make all laws which shall be necessary and proper for carrying into execution the foregoing powers, and all other powers vested by this Constitution in the Government of the United States, or in any department or officer thereof.

mmigrants, how admitted.

SECTION IX. 1. The migration or importation of such persons as any of the States now existing shall think proper to admit shall not be prohibited by the Congress prior to the year one thousand eight hundred and eight, but a tax or duty may be imposed on such importation, not exceeding ten dollars for each person.

Iabeas corpus.

2. The privilege of the writ of habeas corpus shall not be suspended, unless when in cases of rebellion or invasion the public safety may require it.

ttainder.

3. No bill of attainder or ex post facto law sha. be passed.

Direct taxes.

4. No capitation or other direct tax shall be laid, unless in proportion to the census or enumeration hereinbefore directed to be taken.

Regulations regarding customs duties.

5. No tax or duty shall be laid on articles exported from any State.

6. No preference shall be given by any regulation of commerce or revenue to the ports of one State over those of another, nor shall vessels bound to or from one State be obliged to enter, clear, or pay duties in another.

Moneys, how drawn.

7. No money shall be drawn from the Treasury but in consequence of appropriations made by law; and a regular statement and account of the receipts and expenditures of all public money shall be published from time to time.

itles of nobility prohibited.

8. No title of nobility shall be granted by the United States. And no person holding any office of profit or trust under them shall, without the consent of the Congress, accept of any present, emolument, office, or title of any kind whatever from any king, prince, or foreign state.

owers of States defined.

SECTION X. 1. No State shall enter into any treaty, alliance, or confederation, grant letters of marque and reprisal, coin money, emit bills of credit, make anything but gold and silver coin a tender in payment of debts, pass any bill of attainder, ex post facto law, or law impairing the obligation of contracts, or grant any title of nobility.

2. No State shall, without the consent of the Congress, lay any impost or duties on imports or exports, except what may be absolutely necessary for executing its inspection laws, and the net produce of all duties and imposts, laid by any State on imports or exports, shall be for the use of the Treasury of the United States; and all such laws shall be subject to the revision and control of the Congress.

3. No State shall, without the consent of Congress, lay any duty of tonnage, keep troops or ships of war in time of peace, enter into any agreement or compact with another State, or with a foreign power, or engage in war, unless actually invaded, or in such imminent danger as will not admit of delay.

ARTICLE II.

Executive power, in whom vested.

SECTION I. 1. The Executive power shall be vested in a President of the United States of America. He shall hold his office during the term of four years, and, together with the Vice-President, chosen for the same term, be elected as follows:

lectors.

2. Each State shall appoint, in such manner as the Legislature thereof may direct, a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative or person holding an office of trust or profit under the United States shall be appointed an elector.

roceedings of electors.

3. [The electors shall meet in their respective States and vote by ballot for two persons, of whom one at least shall not be an inhabitant of the same State with themselves. And they shall make a list of all the persons voted for, and of the number of votes for each, which list they shall sign and certify and transmit, sealed, to the seat of the Government of the United States, directed to the President of the Senate. The President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates, and the votes shall then be counted. The person having the greatest number of votes shall be the President, if such number be a majority of the whole number of electors appointed, and if there be more than one who have such majority, and have an equal number of votes, then the House of Representatives shall immediately choose by ballot one of them for President; and if no person have a majority, then from the five highest on the list the said House shall in like manner choose the President. But in choosing the President, the vote shall be taken by States, the representation from each State having one vote. A quorum, for this purpose, shall consist of a member or members from two-thirds of the States, and a majority of all the States shall be necessary to a choice. In every case, after the choice of the President, the person having the greatest number of votes of the electors shall be the Vice-President. But if there should remain two or more who have equal votes, the Senate shall choose from them by ballot the Vice-President.]*

roceedings of the House of Representatives.

ime of choosing electors.

4. The Congress may determine the time of choosing the electors and the day on which they shall give their votes, which day shall be the same throughout the United States.

* This clause is superseded by Article XII., Amendments.

Qualifications of the President. 5. No person except a natural born citizen, or a citizen of the United States at the time of the adoption of this Constitution, shall be eligible to the office of President; neither shall any person be eligible to that office who shall not have attained to the age of thirty-five years and been fourteen years a resident within the United States.

Provision in case of his disability. 6. In case of the removal of the President from office, or of his death, resignation, or inability to discharge the powers and duties of the said office, the same shall devolve on the Vice-President, and the Congress may by law provide for the case of removal, death, resignation, or inability, both of the President and Vice-President, declaring what officer shall then act as President, and such officer shall act accordingly until the disability be removed or a President shall be elected.

Salary of the President. 7. The President shall, at stated times, receive for his services a compensation which shall neither be increased nor diminished during the period for which he shall have been elected, and he shall not receive within that period any other emolument from the United States, or any of them.

Oath of the President. 8. Before he enter on the execution of his office he shall take the following oath or affirmation:

"I do solemnly swear (or affirm) that I will faithfully execute the office of President of the United States, and will, to the best of my ability, preserve, protect, and defend the Constitution of the United States."

Duties of the President. SECTION II. 1. The President shall be Commander-in-Chief of the Army and Navy of the United States, and of the militia of the several States when called into the actual service of the United States; he may require the opinion, in writing, of the principal officer in each of the executive departments upon any subject relating to the duties of their respective offices, and he shall have power to grant reprieves and pardons for offences against the United States except in cases of impeachment.

May make treaties, appoint ambassadors, judges, etc. 2. He shall have power, by and with the advice and consent of the Senate, to make treaties, provided two-thirds of the Senators present concur; and he shall nominate, and by and with the advice and consent of the Senate shall appoint ambassadors, other public ministers and consuls, judges of the Supreme Court, and all other officers of the United States whose appointments are not herein otherwise provided for, and which shall be established by law; but the Congress may by law vest the appointment of such inferior officers as they think proper in the President alone, in the courts of law, or in the heads of departments.

May fill vacancies. 3. The President shall have power to fill up all vacancies that may happen during the recess of the Senate by granting commissions, which shall expire at the end of their next session.

May make recommendations to and convene Congress. SECTION III. He shall from time to time give to the Congress information of the state of the Union, and recommend to their consideration such measures as he shall judge necessary and expedient; he may, on extraordinary occasions, convene both Houses, or either of them, and in case of disagreement between them with respect to the time of adjournment, he may adjourn them to such time as he shall think proper; he shall receive ambassadors and other public ministers; he shall take care that the laws be faithfully executed, and shall commission all the officers of the United States.

How officers may be removed. SECTION IV. The President, Vice-President, and all civil officers of the United States shall be removed from office on impeachment for and conviction of treason, bribery, or other high crimes and misdemeanors.

ARTICLE III.

Judicial power, how invested. SECTION I. The judicial power of the United States shall be vested in one Supreme Court, and in such inferior courts as the Congress may from time to time ordain and establish. The judges, both of the Supreme and inferior courts, shall hold their offices during good behavior, and shall at stated times receive for their services a compensation which shall not be diminished during their continuance in office.

To what cases it extends. SECTION II. 1. The judicial power shall extend to all cases in law and equity arising under this Constitution, the laws of the United States, and treaties made, or which shall be made, under their authority; to all cases affecting ambassadors, other public ministers, and consuls; to all cases of admiralty and maritime jurisdiction; to controversies to which the United States shall be a party; to controversies between two or more States, between a State and citizens of another State, between citizens of different States, between citizens of the same State claiming lands under grants of different States, and between a State, or the citizens thereof, and foreign States, citizens, or subjects.

Jurisdiction of the Supreme Court. 2. In all cases affecting ambassadors, other public ministers, and consuls, and those in which a State shall be party, the Supreme Court shall have original jurisdiction. In all the other cases before-mentioned the Supreme Court shall have appellate jurisdiction both as to law and fact, with such exceptions and under such regulations as the Congress shall make.

Rules respecting trials. 3. The trial of all crimes, except in cases of impeachment, shall be by jury, and such trial shall be held in the State where the said crimes shall have been committed; but when not committed within any State the trial shall be at such place or places as the Congress may by law have directed.

Treason defined. SECTION III. 1. Treason against the United States shall consist only in levying war against them, or in adhering to their enemies, giving them aid and comfort. No person shall be convicted of treason unless on the testimony of two witnesses to the same overt act, or on confession in open court.

How punished. 2. The Congress shall have power to declare the punishment of treason, but no attainder of treason shall work corruption of blood or forfeiture except during the life of the person attained.

ARTICLE IV.

Rights of States and records. SECTION I. Full faith and credit shall be given in each State to the public acts, records, and judicial proceedings of every other State. And the Congress may by general laws prescribe the manner in which such acts, records, and proceedings shall be proved, and the effect thereof.

Privileges of citizens. SECTION II. 1. The citizens of each State shall be entitled to all privileges and immunities of citizens in the several States.

Executive requisitions. 2. A person charged in any State with treason, felony, or other crime, who shall flee from justice, and be found in another State, shall, on demand of the Executive authority of the State from which he fled, be delivered up, to be removed to the State having jurisdiction of the crime.

Laws regulating service or labor. 3. No person held to service or labor in one State, under the laws thereof, escaping into another shall, in consequence of any law or regulation therein, be discharged from such service or labor, but shall be delivered up on claim of the party to whom such service or labor may be due.

New States, how formed and admitted. SECTION III. 1. New States may be admitted by the Congress into this Union; but no new State shall be formed or erected within the jurisdiction of any other State, nor any State be formed by the junction of two or more States, or parts of States, without the consent of the Legislatures of the States concerned, as well as of the Congress.

Power of Congress over public lands. 2. The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States; and nothing in this Constitution shall be so construed as to prejudice any claims of the United States, or of any particular State.

Republican government guaranteed. SECTION IV. The United States shall guarantee to every State in this Union a republican form of government, and shall protect each of them against invasion, and, on application of the Legislature, or of the Executive (when the Legislature cannot be convened), against domestic violence.

ARTICLE V.

Constitution, how amended. The Congress, whenever two-thirds of both Houses shall deem it necessary, shall propose amendments to this Constitution, or, on the application of the Legislatures of two-thirds of the several States, shall call a convention for proposing amendments, which, in either case, shall be valid to all intents and purposes, as part of this Constitution, when ratified by the Legislatures of three-fourths of the several States, or by conventions in three-fourths thereof, as the one or the other mode of ratification may be proposed by the Congress; provided that no amendment which may be made prior to the year one thousand eight hundred and eight shall in any manner affect the first and fourth clauses in the Ninth Section of the First Article; and that no State, without its consent, shall be deprived of its equal suffrage in the Senate.

ARTICLE VI.

Validity of debts recognized. 1. All debts contracted and engagements entered into before the adoption of this Constitution shall be as valid against the United States under this Constitution as under the Confederation.

preme law of the land defined.

2. This Constitution and the laws of the United States which shall be made in pursuance thereof and all treaties made, or which shall be made, under the authority of the United States, shall be the supreme law of the land, and the judges in every State shall be bound thereby, anything in the Constitution or laws of any State to the contrary notwithstanding.

ath; of whom required and for what.

3. The Senators and Representatives before mentioned, and the members of the several State Legislatures, and all executive and judicial officers, both of the United States and of the several States, shall be bound by oath or affirmation to support this Constitution; but no religious test shall ever be required as a qualification to any office or public trust under the United States

ARTICLE VII.

tification of the Constitution.

The ratification of the Conventions of nine States shall be sufficient for the establishment of this Constitution between the States so ratifying the same.

AMENDMENTS TO THE CONSTITUTION.

ARTICLE I.

eligion and free speech.

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.

ARTICLE II.

ght to bear arms.

A well-regulated militia being necessary to the security of a free State, the right of the people to keep and bear arms shall not be infringed.

ARTICLE III.

ldiers in time of peace.

No soldier shall, in time of peace, be quartered in any house without the consent of the owner, nor in time of war but in a manner to be prescribed by law.

ARTICLE IV.

ght of search.

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no warrants shall issue but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

ARTICLE V.

pital crimes and arrest therefor.

No person shall be held to answer for a capital or other infamous crime unless on a presentment or indictment of a grand jury, except in cases arising in the land or naval forces, or in the militia, when in actual service, in time of war or public danger; nor shall any person be subject for the same offence to be twice put in jeopardy of life or limb; nor shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use without just compensation.

ARTICLE VI.

ght to speedy trial.

In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed, which district shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the assistance of counsel for his defence.

ARTICLE VII.

ial by jury.

In suits at common law, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved, and no fact tried by a jury shall be otherwise re-examined in any court of the United States than according to the rules of the common law.

ARTICLE VIII.

cessive bail.

Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted.

ARTICLE IX.

umeration of rights.

The enumeration in the Constitution of certain rights shall not be construed to deny or disparage others retained by the people.

ARTICLE X.

served rights of States.

The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.

ARTICLE XI.

dicial power.

The judicial power of the United States shall not be construed to extend to any suit in law or equity, commenced or prosecuted against one of the United States, by citizens of another State, or by citizens or subjects of any foreign State.

ARTICLE XII.

lectors in Presidential elections.

The electors shall meet in their respective States, and vote by ballot for President and Vice-President, one of whom at least shall not be an inhabitant of the same State with themselves; they shall name in their ballots the person voted for as President, and in distinct ballots the person voted for as Vice-President; and they shall make distinct lists of all persons voted for as President, and of all persons voted for as Vice-President, and of the number of votes for each, which list they shall sign and certify, and transmit, sealed, to the seat of the Government of the United States, directed to the President of the Senate; the President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates, and the votes shall then be counted; the person having the greatest number of votes for President shall be the President, if such number be a majority of the whole number of electors appointed; and if no person have such majority, then from the persons having the highest numbers, not exceeding three, on the list of those voted for as President, the House of Representatives shall choose immediately, by ballot, the President. But in choosing the President, the votes shall be taken by States, the representation from each State having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the States, and a majority of all the States shall be necessary to a choice. And if the House of Representatives shall not choose a President, whenever the right of choice shall devolve upon them, before the fourth day of March next following, then the Vice-President shall act as President, as in the case of the death or other constitutional disability of the President. The person having the greatest number of votes as Vice-President shall be the Vice-President, if such number be a majority of the whole number of electors appointed, and if no person have a majority, then from the two highest numbers on the list the Senate shall choose the Vice-President; a quorum for the purpose shall consist of two-thirds of the whole number of Senators, and a majority of the whole number shall be necessary to a choice. But no person constitutionally ineligible to the office of President shall be eligible to that of Vice-President of the United States.

ce-President.

ARTICLE XIII.

avery prohibited.

1. Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction.

2. Congress shall have power to enforce this article by appropriate legislation.

CONSTITUTION OF THE UNITED STATES—*Continued.*

ARTICLE XIV.

Protection for all citizens.

1. All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property without due process of law, nor deny to any person within its jurisdiction the equal protection of the laws.

Apportionment of Representatives.

2. Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State, excluding Indians not taxed. But when the right to vote at any election for the choice of electors for President and Vice-President of the United States, Representatives in Congress, the executive and judicial officers of a State, or the members of the Legislature thereof, is denied to any of the male members of such State, being of twenty-one years of age, and citizens of the United States, or in any way abridged, except for participation in rebellion or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens twenty-one years of age in such State.

Rebellion against the United States.

3. No person shall be a Senator or Representative in Congress, or elector of President and Vice-President, or holding any office, civil or military, under the United States, or under any State, who, having previously taken an oath, as a member of Congress, or as an officer of the United States, or as a member of any State Legislature, or as an executive or judicial officer of any State, to support the Constitution of the United States, shall have engaged in insurrection or rebellion against the same, or given aid and comfort to the enemies thereof. But Congress may, by a vote of two-thirds of each House, remove such disability.

The public debt.

4. The validity of the public debt of the United States, authorized by law, including debts incurred for payment of pensions and bounties for services in suppressing insurrection and rebellion, shall not be questioned. But neither the United States nor any State shall assume or pay any debt or obligation incurred in aid of insurrection or rebellion against the United States, or any claim for the loss or emancipation of any slave; but all such debts, obligations, and claims shall be held illegal and void.

5. The Congress shall have power to enforce by appropriate legislation the provisions of this article.

ARTICLE XV.

Right of suffrage.

1. The right of the citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude.

2. The Congress shall have power to enforce the provisions of this article by appropriate legislation.

ARTICLE XVI.

Taxes on Incomes.

The Congress shall have power to lay and collect taxes on incomes, from whatever source derived, without apportionment among the several States, and without regard to any census or enumeration.

ARTICLE XVII.

Senators elected by the people.

1. The Senate of the United States shall be composed of two Senators from each State, elected by the people thereof, for six years; and each Senator shall have one vote. The electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State Legislatures.

Filling of vacancies.

2. When vacancies happen in the representation of any State in the Senate, the executive authority of such State shall issue writs of election to fill such vacancies: Provided, That the Legislature of any State may empower the executive thereof to make temporary appointment until the people fill the vacancies by election as the Legislature may direct.

3. This amendment shall not be so construed as to affect the election or term of any Senator chosen before it becomes valid as part of the Constitution.

RATIFICATION OF THE CONSTITUTION.

The Constitution was ratified by the thirteen original States in the following order

Delaware, December 7, 1787, unanimously.
Pennsylvania, December 12, 1787, vote 46 to 23.
New Jersey, December 18, 1787, unanimously.
Georgia, January 2, 1788, unanimously.
Connecticut, January 9, 1788, vote 128 to 40.
Massachusetts, February 6, 1788, vote 187 to 168.
Maryland, April 28, 1788, vote 63 to 12.
South Carolina, May 23, 1788, vote 149 to 73.
New Hampshire, June 21, 1788, vote 57 to 46.
Virginia, June 25, 1788, vote 89 to 79.
New York, July 26, 1788, vote 30 to 28.
North Carolina, November 21, 1789, vote 193 to 75.
Rhode Island, May 29, 1790, vote 34 to 32.

RATIFICATION OF THE AMENDMENTS.

I. to X. inclusive were declared in force December 15, 1791.

XI. was declared in force January 8, 1798.

XII., regulating elections, was ratified by all the States except Connecticut, Delaware, Massachusetts, and New Hampshire, which rejected it. It was declared in force September 28, 1804.

XIII. The emancipation amendment was ratified by 31 of the 36 States; rejected by Delaware and Kentucky, not acted on by Texas; conditionally ratified by Alabama and Mississippi. Proclaimed December 18, 1865.

XIV. Reconstruction amendment was ratified by 23 Northern States; rejected by Delaware, Kentucky, Maryland, and 10 Southern States, and not acted on by California. The 10 Southern States subsequently ratified under pressure. Proclaimed July 28, 1868.

XV. Negro citizenship amendment was not acted on by Tennessee, rejected by California, Delaware, Kentucky, Maryland, New Jersey, and Oregon; ratified by the remaining 30 States. New York rescinded its ratification January 5, 1870. Proclaimed March 30, 1870.

XVI. Income tax amendment was ratified by all the States except Connecticut, Florida, Pennsylvania, Rhode Island, Utah and Virginia. Declared in force February 25, 1913.

XVII. Providing for the direct vote of United States Senators by the people, was ratified by all the States except Alabama, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Rhode Island, South Carolina, Utah and Virginia. Declared in force May 31, 1913.

WHITE HOUSE RULES.

THE following rules have been arranged for the conduct of business at the Executive Offices during the Winter of 1915-16:

The Cabinet will meet on Tuesdays and Fridays from 11 A. M. until 1 P. M.

Senators and Representatives having business to transact will be received from 10.30 A. M. to 12 M. excepting on Cabinet days. In view of the pressure of business at the Executive Offices during the Congressional session it would greatly facilitate matters if Senators and Members could telephone for an appointment before calling, as many will have first made appointments in this way, and those calling without appointments are therefore necessarily delayed in seeing the President.

The East Room will be open daily, Sundays excepted, for the inspection of visitors, between the hours of 10 A. M. and 2 P. M.

JOSEPH P. TUMULTY, *Secretary to the President.*

DECLARATION OF INDEPENDENCE.

IN CONGRESS JULY 4, 1776.

THE unanimous declaration of the thirteen United States of America. When in the Course of uman events, it becomes necessary for one people to dissolve the political bands which have con- nected them with another, and to assume among the powers of the earth, the separate and equal sta- ion to which the Laws of Nature and of Nature's God entitles them, a decent respect to the opinions f mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident, that all men are created equal, that they are endowed by heir Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness. That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed, That whenever any Form of Government becomes destruc- ive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Govern- nent, laying its foundation on such principles and organizing its powers in such form, as to them hall seem most likely to effect their Safety and Happiness. Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes; and accordingly ll experience hath shewn, that mankind are more disposed to suffer, while evils are sufferable, than o right themselves by abolishing the forms to which they are accustomed. But when a long train of buses and usurpations, pursuing invariably the same Objec evinces a design to reduce them under bsolute Despotism, it is their right, it is their duty, to throw off such Government, and to provide ew Guards for their future security Such has been the patient sufferance of these Colonies; and uch is now the necessity which constrains them to alter their former Systems of Government. The istory of the present King of Great Britain is a history of repeated injuries and usurpations, all aving in direct object the establishment of an absolute Tyranny over these States. To prove this, et Facts be submitted to a candid world.

He has refused his Assent to Laws, the most wholesome and necessary for the public good.

He has forbidden his Governors to pass Laws of immediate and pressing importance, unless sus- ended in their operation till his Assent should be obtained; and when so suspended, he has utterly eglected to attend to them.

He has refused to pass other Laws for the accommodation of large districts of people, unless those eople would relinquish the right of Representation in the Legislature, a right inestimable to them nd formidable to tyrants only.

He has called together legislative bodies at places unusual, uncomfortable, and distant from the epository of their public Records, for the sole purpose of fatiguing them into compliance with his easures.

He has dissolved Representative Houses repeatedly, for opposing with manly firmness his inva- ions on the rights of the people.

He has refused for a long time, after such dissolutions, to cause others to be elected; whereby the egislative powers, incapable of Annihilation, have returned to the People at large for their exer- ise; the State remaining in the meantime exposed to all the dangers of invasion from without, and onvulsions within.

He has endeavored to prevent the population of these States; for that purpose obstructing the aws for Naturalization of Foreigners; refusing to pass others to encourage their migrations hither, nd raising the conditions of new Appropriations of Lands.

He has obstructed the Administration of Justice, by refusing his Assent to Laws for establishing udiciary Powers.

He has made Judges dependent on his Will alone, for the tenure of their offices, and the amount nd payment of their salaries.

He has erected a multitude of New Offices, and sent hither swarms of Officers to harass our peo- le, and eat out their substance.

He has kept among us, in times of peace, Standing Armies without the Consent of our legislature.

He has affected to render the Military independent of and superior to the Civil power.

He has combined with others to subject us to a jurisdiction foreign to our constitution, and nacknowledged by our laws; giving his Assent to their Acts of pretended Legislation:

For quartering large bodies of armed troops among us:

For protecting them, by a mock Trial, from punishment for any Murders which they should com- it on the Inhabitants of these States:

For cutting off our Trade with all parts of the world:

For imposing Taxes on us without our Consent:

For depriving us in many cases, of the benefits of Trial by jury:

For transporting us beyond Seas to be tried for pretended offences:

For abolishing the free System of English Laws in a neighboring Province, establishing therein an rbitrary government, and enlarging its Boundaries so as to render it at once an example and fit strument for introducing the same absolute rule into these Colonies:

For taking away our Charters, abolishing our most valuable Laws, and altering fundamentally e Forms of our Governments:

For suspending our own Legislatures, and declaring themselves invested with power to legislate r us in all cases whatsoever.

He has abdicated Government here, by declaring us out of his Protection and waging War ainst us.

He has plundered our seas, ravaged our Coasts, burnt our towns, and destroyed the lives of our eople:

He is at this time transporting large Armies of foreign Mercenaries to compleat the works of eath, desolation and tyranny, already begun with circumstances of Cruelty & perfidy scarcely ralleled in the most barbarous ages, and totally unworthy the Head of a civilized nation.

He has constrained our fellow-Citizens taken captive on the high Seas to bear Arms against their untry, to become the executioners of their friends and Brethren, or to fall themselves by their ands.

He has excited domestic insurrections amongst us, and has endeavored to bring on the inhabitants our frontiers, the merciless Indian Savages, whose known rule of warfare, is an undistinguished struction of all ages, sexes and conditions.

In every stage of these Oppressions We have Petitioned for Redress in the most humble terms:

DECLARATION OF INDEPENDENCE—*Continued.*

Our repeated Petitions have been answered only by repeated injury A Prince, whose character is thus marked by every act which may define a Tyrant, is unfit to be the ruler of a free people.

Nor have We been wanting in attentions to our British brethren. We have warned them from time to time of attempts by their legislature to extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity, and we have conjured them by the ties of our common kindred to disavow these usurpations, which would inevitably interrupt our connections and correspondence. They too have been deaf to the voice of justice and of consanguinity. We must, therefore, acquiesce in the necessity, which denounces our Separation, and hold them, as we hold the rest of mankind, Enemies in War, in Peace Friends.

WE, THEREFORE, the REPRESENTATIVES of the UNITED STATES OF AMERICA, IN GENERAL CONGRESS, Assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, do, in the Name, and by authority of the good People of these Colonies, solemnly PUBLISH and DECLARE, That these United Colonies are, and of Right ought to be FREE AND INDEPENDENT States; that they are Absolved from all Allegiance to the British Crown, and that all political connection between them and the State of Great Britain is and ought to be totally dissolved; and that as FREE AND INDEPENDENT STATES, they have full Power to levy War, conclude Peace, contract Alliances, establish Commerce, and to do all other Acts and Things which INDEPENDENT STATES may of right do. And for the support of this Declaration, with a firm reliance on the protection of Divine Providence, We mutually pledge to each other our Lives, our Fortunes, and our sacred Honor.

SIGNERS OF THE DECLARATION OF INDEPENDENCE.

WASHINGTON'S FAREWELL ADDRESS.

EXTRACTS FROM HIS ADDRESS COUNSELLING THE MAINTENANCE OF THE UNION.—CONFINEMENT OF THE GENERAL GOVERNMENT TO ITS CONSTITUTIONAL LIMITATIONS, AND AVOIDANCE OF RELATIONS WITH FOREIGN POLITICAL AFFAIRS.

(*To the People of the United States on His Approaching Retirement from the Presidency.*)

Here, perhaps, I ought to stop; but a solicitude for your welfare, which cannot end but with my life, and the apprehension of danger natural to that solicitude, urge me, on an occasion like the present, to offer to your solemn contemplation, and to recommend to your frequent review, some sentiments, which are the result of much reflection, of no inconsiderable observation, and which appear to me all-important to the permanency of your felicity as a people. These will be afforded to you with the more freedom, as you can only see in them the disinterested warnings of a parting friend, who can possibly have no personal motive to bias his counsel; nor can I forget, as an encouragement to it, your indulgent reception of my sentiments on a former and not dissimilar occasion.

Interwoven as is the love of liberty with every ligament of your hearts, no recommendation of mine is necessary to fortify or confirm the attachment.

PRESERVATION OF THE UNION.

The unity of government, which constitutes you one people, is also now dear to you. It is justly so; for it is a main pillar in the edifice of your real independence—the support of your tranquillity at home, your peace abroad, of your safety, of your prosperity, of that very liberty which you so highly prize. But as it is easy to foresee that, from different causes and from different quarters, much pains will be taken, many artifices employed, to weaken in your minds the conviction of this truth; as this is the point in your political fortress against which the batteries of internal and external enemies will be most constantly and actively (though often covertly and insidiously) directed—it is of infinite moment that you should properly estimate the immense value of your national union to your collective and individual happiness; that you should cherish a cordial, habitual and immovable attachment to it; accustoming yourselves to think and speak of it as of the palladium of your political safety and prosperity; watching for its preservation with jealous anxiety; discountenancing whatever may suggest even a suspicion that it can, in any event, be abandoned; and indignantly frowning upon the first dawning of every attempt to alienate any portion of our country from the rest, or to enfeeble the sacred ties which now link together the various parts.

For this you have every inducement of sympathy and interest. Citizens by birth or choice of a common country, that country has a right to concentrate your affections. The name of America, which belongs to you in your national capacity, must always exalt the just pride of patriotism, more than any appellation derived from local discriminations. With slight shades of difference, you have the same religion, manners, habits, and political principles. You have, in a common cause, fought and triumphed together; the independence and liberty you possess are the work of joint counsels and joint efforts, of common dangers, sufferings, and successes.

ENCROACHMENTS BY THE GOVERNMENT.

It is important, likewise, that the habits of thinking, in a free country, should inspire caution in those intrusted with its administration, to confine themselves within their respective constitutional spheres, avoiding, in the exercise of the powers of one department, to encroach upon another. The spirit of encroachment tends to consolidate the powers of all the departments in one, and thus to create, whatever the form of government, a real despotism. A just estimate of that love of power, and proneness to abuse it which predominates in the human heart, is sufficient to satisfy us of the truth of this position. The necessity of reciprocal checks in the exercise of political power, by dividing and distributing it into different depositories, and constituting each the guardian of the public weal, against invasions by the others, has been evinced by experiments, ancient and modern; some of them in our own country, and under our own eyes. To preserve them must be as necessary as to institute them. If, in the opinion of the people, the distribution or modification of the constitutional powers be, in any particular, wrong, let it be corrected by an amendment in the way which the Constitution designates. But let there be no change or usurpation; for though this, in one instance, may be the instrument of good, it is the customary weapon by which free governments are destroyed. The precedent must always greatly overbalance, in permanent evil, any partial or transient benefit which the use can, at any time, yield.

Observe good faith and justice toward all nations; cultivate peace and harmony with all; religion and morality enjoin this conduct; and can it be that good policy does not equally enjoin it? It will be worthy of a free, enlightened, and, at no distant period, a great nation, to give to mankind the magnanimous and too novel example of a people always guided by an exalted justice and benevolence. Who can doubt that, in the course of times and things, the fruits of such a plan would richly repay any temporary advantages which might be lost by a steady adherence to it? Can it be that Providence has not connected the permanent felicity of a nation with its virtue? The experiment, at least, is recommended by every sentiment which ennobles human nature. Alas! is it rendered impossible by its vices?

ENTANGLEMENTS WITH FOREIGN POWERS.

Against the insidious wiles of foreign influence (I conjure you to believe me, fellow-citizens) the jealousy of a free people ought to constantly awake; since history and experience prove that foreign influence is one of the most baneful foes of republican government. But that jealousy to be useful, must be impartial; else it becomes the instrument of the very influence to be avoided, instead of a defence against it. Excessive partiality for one foreign nation, and excessive dislike for another, cause those whom they actuate to see danger only on one side, and serve to veil, and even second, the arts

of influence on the other. Real patriots, who may resist the intrigues of the favorite, are liable to become suspected and odious, while its tools and dupes usurp the applause and confidence of the people, to surrender their interests.

The great rule of conduct for us, in regard to foreign nations, is, in extending our commercial relations, to have with them as little political connection as possible. So far as we have already formed engagements, let them be fulfilled with perfect good faith. Here let us stop.

Europe has a set of primary interests, which to us have none, or a very remote relation. Hence she must be engaged in frequent controversies, the causes of which are essentially foreign to our concerns. Hence, therefore, it must be unwise in us to implicate ourselves, by artificial ties, in the ordinary vicissitudes of her politics, or the ordinary combinations and collisions of her friendships or enmities.

Our detached and distant situation invites and enables us to pursue a different course. If we remain one people under an efficient government, the period is not far off when we may defy material injury from external annoyance; when we may take such an attitude as will cause the neutrality we may at any time resolve upon, to be scrupulously respected; when belligerent nations, under the impossibility of making acquisitions upon us, will not lightly hazard the giving us provocation; when we may choose peace or war, as our interest, guided by justice, shall counsel.

PARTING COUNSELS.

In offering to you, my countrymen, these counsels of an old and affectionate friend, I dare not hope that they will make the strong and lasting impression I could wish; that they will control the usual current of the passions, or prevent our nation from running the course which hitherto has marked the destiny of nations; but if I may even flatter myself that they may be productive of some partial benefit, some occasional good; that they may now and then recur to moderate the fury of party spirit, to warn against the mischiefs of foreign intrigues, to guard against the impostures of pretended patriotism, this hope will be full recompense for the solicitude for your welfare by which they have been dictated.

United States, September 17, 1796. GEORGE WASHINGTON.

THE MONROE DOCTRINE.

"THE Monroe doctrine" was enunciated in the following words in President Monroe's message to Congress December 2, 1823:

"In the discussions to which this interest has given rise, and in the arrangements by which they may terminate, the occasion has been deemed proper for asserting, as a principle in which rights and interests of the United States are involved, that the American continents, by the free and independent condition which they have assumed and maintain, are henceforth not to be considered as subjects for future colonization by any European power. * * * We owe it, therefore, to candor and to the amicable relations existing between the United States and those powers to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety. With the existing colonies or dependencies of any European power we have not interfered and shall not interfere. But with the governments who have declared their independence and maintain it, and whose independence we have, on great consideration and on just principles, acknowledged, we could not view any interposition for the purpose of oppressing them or controlling in any other manner their destiny by any European power in any other light than as the manifestation of an unfriendly disposition toward the United States."

Secretary of State Olney in his despatch of July 20, 1895, on the Venezuelan Boundary Dispute, said:

"It (the Monroe doctrine) does not establish any general protectorate by the United States over other American States. It does not relieve any American State from its obligations as fixed by international law, nor prevent any European power directly interested from enforcing such obligations or from inflicting merited punishment for the breach of them."

President Roosevelt in a speech in 1902 upon the results of the Spanish-American war, said:

"The Monroe doctrine is simply a statement of our very firm belief that the nations now existing on this continent must be left to work out their own destinies among themselves, and that this continent is no longer to be regarded as the colonizing ground of any European power. The one power on the continent that can make the power effective is, of course, ourselves; for in the world as it is, a nation which advances a given doctrine, likely to interfere in any way with other nations, must possess the power to back it up, if it wishes the doctrine to be respected."

The United States Senate on August 2, 1912, adopted the following resolution proposed by Senator Lodge, by a vote of 51 to 4, the negative votes being those of Senators Cummins of Iowa, McCumber of North Dakota, Percy of Mississippi, and Stone of Missouri,

"*Resolved*, That when any harbor or other place in the American Continent is so situated that the occupation thereof for naval or military purposes might threaten the communications or the safety of the United States, the Government of the United States could not see without grave concern the possession of such harbor or other place by any corporation or association which has such a relation to another Government, not American, as to give that Government practical power of control for national purposes."

This action of the Senate grew out of the report that a stretch of territory bordering on Magdalena Bay, Mexico, might be acquired by the subjects of a foreign country, and thus through their control by their own national Government become the base of permanent naval or military occupation. In explanation of the resolution Senator Lodge said: "The declaration rests on a much broader and older ground than the Monroe doctrine. This resolution rests on the generally accepted principle that every nation has a right to protect its own safety; and if it feels that the possession of any given harbor or place is prejudical to its safety, it is its duty and right to intervene." The Senate added that the opening of the Panama Canal gave to Magdalena Bay an importance that it had never before possessed, as the Panama routes pass in front of it.

Not being a joint resolution requiring the concurrence of the House of Representatives and the signature of the President, the resolution adopted as above was an expression of opinion of the Senate only. The other house took no action.

LINCOLN MEMORIAL.

TO COST TWO MILLION DOLLARS.

THE Sixty-first Congress, third session, passed an act, approved February 9, 1911. "to provide a commission to secure plans and designs for a monument or memorial to the memory of Abraham Lincoln." The text of the act is as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That William H. Taft, * Shelby M. Cullom, Joseph G. Cannon, George Peabody Wetmore, Samuel Walker McCall, † H. D. Money, and Champ Clark are hereby created a commission to be known as the Lincoln Memorial Commission, to procure and determine upon a location, plan, and design for a monument or memorial in the city of Washington, District of Columbia, to the memory of Abraham Lincoln, subject to the approval of Congress.

SEC. 2. That in the discharge of its duties hereunder said commission is authorized to employ the services of such artists, sculptors, architects, and others as it shall determine to be necessary, and to avail itself of the services or advice of the Commission of Fine Arts, created by the act approved May 17, 1910.

SEC. 3. That the construction of the monument or memorial, herein and hereby authorized, shall be upon such site as shall be determined by the commission herein created, and approved by Congress, and said construction shall be entered upon as speedily as practicable after the plan and design therefor is determined upon and approved by Congress, and shall be prosecuted to completion, under the direction of said commission and the supervision of the Secretary of War, under a contract or contracts hereby authorized to be entered into by said Secretary in a total sum not exceeding two million dollars.

SEC. 4. That vacancies occurring in the membership of the commission shall be filled by appointment by the President of the United States.

By joint resolution, approved February 1, 1913, Congress approved the plan, design and location for the memorial recommended by the commission.

The memorial is being erected in Potomac Park on the axis of the United States Capitol and the Washington Monument, in accordance with plans prepared by Henry Bacon of New York City.

Work on the construction of the memorial was commenced on Lincoln's Birthday, February 12, 1914, when the first sod was turned by the Special Resident Commissioner, ex-Senator Blackburn. The foundation was completed and the cornerstone laid February 12, 1915. One million three hundred thousand dollars has been appropriated by Congress toward the construction, which is to cost $2,000,000, the memorial to be completed in four years from the commencement of work.

The foundation of the memorial, which is of reinforced concrete, rises 45 feet above the present grade, and will be surrounded by a mound of earth 1,000 feet in diameter. The exterior of the memorial proper is of white Colorado Yule marble, and the interior limestone. The only sculpture will be a colossal statue of Lincoln, being designed by Daniel Chester French, flanked by two bronze panels bearing Lincoln's Gettysburg and Second Inaugural addresses.

* Joseph C. S. Blackburn, former United States Senator from Kentucky, was appointed by President Wilson on February 2, 1914, to fill the vacancy on the commission caused by the death of Mr. Cullom. † Thomas S. Martin, United States Senator from Virginia, was afterward appointed to fill the vacancy on the commission caused by the death of Senator Money. Secretary of the Memorial, Henry A. Vale, Office Building, United States Senate.

TELESCOPES.

THERE are two kinds of telescopes, viz., refracting and reflecting. In the former the rays of light are made to converge to a focus by lenses, while in the latter they are made to converge by being reflected from the surface of a slightly concaved, highly polished mirror.

The chief disadvantages of refracting telescopes are the chromatic and spherical aberrations of the lenses. In reflecting telescopes these aberrations can be done away with by using parabolic mirrors, but the great objection to the latter are the many mechanical difficulties that have to be overcome.

Owing to the travelling of the earth in its orbit and revolving about its axis, stars if viewed by a fixed telescope would soon disappear. It is thus necessary that a telescope be mounted so a star will always be in its field. This is accomplished by using an equatorial mounting.

In an equatorial mounting there are two axes, one called the "polar" that is parallel to the axis of the earth, and the other the "declination" at right angles to it. Hence, when a star is to be followed, the telescope is clamped in position, and by means of clockwork follows the star so it always remains in view.

The magnifying power of telescopes is generally expressed in diameters, the practical limit of power being 100 diameters per inch of diameter of the telescope. Thus the 36-inch telescope at the Lick Observatory may give a magnifying power of 3,600 diameters. But such high power can only be used in a very clear atmosphere, and consequently most astronomical observations are made at 1,000 diameters.

REFRACTING TELESCOPES.

The largest in the world are in the United States. The one at Yerkes Observatory, Geneva Lake, Wis., has an object lens 40 inches in diameter with a focal length of 64 feet. The movable part of the instrument turning on the polar axis weighs about 12 tons, and the clock 1½ tons. Other large telescopes are the 36-inch at Lick Observatory, Mt. Hamilton, Cal., where many important astronomical discoveries have been made; the 26-inch at the U. S. Observatory, Washington, D. C., and the 24-inch belonging to Harvard University. There is a 30-inch refracting telescope at the Allegheny Observatory, Riverview Park Pa.

Abroad is the 30-inch at the Imperial Observatory, Pulovak (near St Petersburg), Russia. This telescope has a platform at the lower end of the polar axis, from which observers can readily operate the instrument. The Meudon Observatory (near Paris, France) has a 32-inch, the Potsdam, Prussia, a 31-inch, and the Royal Observatory, at Greenwich, England, a 28-inch. There is a 32-inch being installed at the Nicolaieff Observatory of Russia.

REFLECTING TELESCOPES.

One of the most perfect instruments ever built is at Mt. Wilson Observatory, Pasadena, Cal. The mirror is silver on glass, 60 inches in diameter, and weighs nearly a ton. The telescope is moved by electric motors in right ascension and declination. An important feature in this instrument is the different focal lengths that can be obtained. The 60-inch mirror has a 25-foot focus, but by a suitable arrangement of mirrors it is possible to get focal lengths of 80, 100 and 150 feet. At the same observatory a 100-inch reflector is being constructed. The tube of the telescope, with the mirror at the bottom, will be 43 feet long, and with the mountings will weigh nearly 20 tons. There is a 36-inch reflector at Lick Observatory, Harvard University has a 28-inch and a 60-inch, and at the Yerkes Observatory is a 24-inch.

Other notable reflectors are the Lord Rosse, at Birr Castle, Ireland, which has a mirror 72 inches in diameter of speculum metal and a focal length of 54 feet, a 48-inch at Melbourne, Australia, a 60-inch at Ealing, England, a 48-inch at Paris, France, and a 39-inch at Meudon, France. The Dominion Astronomical Observatory has had plans prepared for erecting a 72-inch near Victoria, B. C. The contract for the construction of a 60-inch reflecting telescope for the National Observatory at Cordoba, Argentina, was awarded.

THE NATIONAL FLAG.

THE official flag of the United States bears forty-eight white stars in a blue field, arranged in six rows of eight stars each. Two stars were added in 1912 by the admission of Arizona and New Mexico to the Union. The garrison flag of the Army is made of bunting, thirty-six feet fly and twenty feet hoist, thirteen stripes, and in the upper quarter, next the staff, is the field or "union" of stars, equal to the number of States, on blue field, over one-third length of the flag, extending to the lower edge of the fourth red stripe from the top. The storm flag is twenty feet by ten feet, and the recruiting flag nine feet nine inches by four feet four inches. The "Union Jack" is blue with a star for every State in white. The Revenue Marine Service flag, authorized by act of Congress, March 2, 1799, was originally prescribed to "consist of sixteen perpendicular stripes, alternate red and white, the union of the ensign bearing the arms of the United States in dark blue on a white field." The sixteen stripes represented the number of States which had been admitted to the Union at that time, and no change has been made since. June 14, the anniversary of the adoption of the flag, is celebrated as Flag Day in a large part of the Union.

The National flag should be hoisted preferably at, but not earlier than sunrise, and never later than 8 o'clock. When the National and State or other flags fly together the National flag should be on the right. When used on a bier or casket at a funeral the stars should be placed at the head. In no case should the flag be allowed to touch the ground. The statutes of the United States forbid the use of the flag in registered trade-marks, and the use of the flag for advertising purposes is illegal.

The President's flag consists of a blue background, in the centre of which appears the seal of the United States.

The flag of Admiral of U. S. Navy is blue with four white stars—two horizontal and two perpendicular in centre.

The flag of the Secretary of the Navy is blue with two white stars (perpendicular) at either end and white anchor in centre.

The consular flag is blue with large white C in centre, surrounded by thirteen white stars.

The flag of the Panama Canal consists of a blue square bearing the letters "P. C." in white.

The flag of New York State is blue charged with the arms of the State. The flag of New York City consists of three perpendicular lines, blue, white, and orange (the blue nearest the flag staff); on the white bar is the seal of the city, without the legend.

LIFEBOAT REQUIREMENTS.

As contained in part in the General Rules and Regulations of the Board of Supervising Inspectors, Steamboat-Inspection Service, edition of July 22, 1914, and in amendments of said rules:

All pleasure steamers, and all other steamers over 150 tons, but not exceeding 1,000 tons, limited by their certificates of inspection to routes not more than 15 miles from any harbor, shall not be required to have more than one of the lifeboats to be of 180 cubic feet capacity. Nothing, however, in this proviso shall exempt any such steamer from carrying the aggregate cubic feet of lifeboat capacity required by the rules.

All ocean, coastwise, lake, bay, and sound steamers carrying passengers, except as otherwise provided for in the rules, shall be equipped with lifeboats of sufficient capacity to accommodate at one time all persons on board. One-half of such equipment may be in approved life rafts or approved collapsible lifeboats.

All river steamers not carrying passengers, except as otherwise provided, shall have at least one good substantial boat with lines attached, and properly supplied with oars, and kept at all times in good condition and ready for immediate use.

Ocean steamers carrying passengers shall be equipped with lifeboats of sufficient capacity to accommodate at one time all persons on board, including passengers and crew. One-half of such lifeboat equipment may be in aporoved liferafts or approved collapsible lifeboats.

Coastwise steamers carrying passengers shall be equipped with lifeboats of sufficient capacity to accommodate at one time all persons on board, including passengers and crew. Provided, however, that such steamers navigating during the interval from the fifteenth day of May to the fifteenth day of September in any one year, both dates inclusive, will be required to be equipped with lifeboats of only such capacity as will be sufficient to accommodate at one time at least 60 per cent. of all persons on board, including passengers and crew; two-thirds of such required lifeboat equipment throughout the year may be in approved, liferafts or approved collapsible lifeboats.

Lake, bay, and sound steamers carrying passengers shall be equipped with lifeboats of sufficient capacity to accommodate at one time all persons on board, including passengers and crew: Provided, however, that such steamers navigating during the interval from the fifteenth day of May to the fifteenth day of October, in any one year, both dates inclusive, shall be required to be equipped with lifeboats of only such capacity as will be sufficient to accommodate at one time at least 30 per cent. of all persons on board, including passengers and crew: Provided, further, That such steamers navigating routes lying at all points within a distance of three miles from land, or over waters whose depth is not sufficient to entirely submerge the vessel in case of disaster, shall, during the interval from the fifteenth day of May to the fifteenth day of October, in any one year, both dates inclusive, be required to be equipped with lifeboats of only such capacity as will be sufficient to accommodate at one time at least 10 per cent. of all persons on board, including passengers and crew: Provided, further, That lake, bay, and sound steamers carrying passengers and navigating the waters of the lakes, bays, and sounds tributary to the Pacific coast, the Atlantic coast south of the thirty-third parallel of north latitude, and the Gulf of Mexico shall be equipped with lifeboats of sufficient capacity to accommodate at one time at least 30 per cent. of all persons on board, including passengers and crew: Provided, however, That such steamers navigating routes lying at all points within a distance of three miles from land, or over waters whose depth is not sufficient to entirely submerge the vessel in case of disaster, shall be required to be equipped with lifeboats of only such capacity as will be sufficient to accommodate at one time at least 10 per cent. of all persons on board, including passengers and crew. Three-fourths of the lifeboat capacity required on lake, bay, and sound steamers may be in approved decked lifeboats, liferafts, or approved collapsible lifeboats: Provided, further, That such steamers equipped with wireless telegraphy navigating in daylight only and whose routes are at all times within a distance of 10 miles from land or over waters whose depth is not sufficient to entirely submerge the vessel in case of disaster shall, during the interval from the fifteenth day of May to the fifteenth day of October, in any one year, both dates inclusive, be required to be equipped with lifeboats of only such capacity as will be sufficient to accommodate at one time at least 15 per cent. of all persons on board, including passengers and crew. Three-fourths of the lifeboat capacity may be in approved liferafts or approved collapsible lifeboats.

River steamers carrying passengers shall be equipped with lifeboats of sufficient capacity to accommodate at one time at least 10 per cent. of all persons on board, including passengers and crew. Three-fourths of such lifeboat equipment may be in approved liferafts or approved collapsible lifeboats.

The navigation of ferryboats shall be confined to the ferry routes specified in the certificate of inspection, but such vessels may be permitted to go beyond their authorized routes with passengers only, or without such permit, to lighten or relieve vessels in distress. When any ferryboat leaves her ferry route and carries passengers she shall be required to carry the same officers, crew, and equipment as required of other steamers carrying passengers.

THE SINGLE TAX.

THE following statement of the single tax principle was written by Henry George, Sr.:

We assert as our fundamental principle the self-evident truth enunciated in the Declaration of American Independence, that all men are created equal and are endowed by their Creator with certain inalienable rights. We hold that all men are equally entitled to the use and enjoyment of what God has created and of what is gained by the general growth and improvement of the community of which they are a part. Therefore, no one should be permitted to hold natural opportunities without a fair return to all for any special privilege thus accorded to him, and that value which the growth and improvement of the community attaches to land should be taken for the use of the community; that each is entitled to all that his labor produces; therefore, no tax should be levied on the products of labor.

To carry out these principles, we are in favor of raising all public revenues for national, State, county, and municipal purposes by a single tax upon land values, irrespective of improvements, and of the abolition of all other forms of direct and indirect taxation.

Since in all our States we now levy some tax on the value of land, the single tax can be instituted by the simple and easy way of abolishing, one after another, all other taxes now levied and commensurately increasing the tax on land values until we draw upon that one source for all expenses of government, the revenue being divided between local government, State government, and the general government, as the revenue from direct taxes is now divided between the local and State governments, or by a direct assessment being made by the general government upon the States and paid by them from revenues collected in this manner. The single tax we propose is not a tax on land, and therefore would not fall on the use of land and become a tax on labor.

It is a tax not on land, but on the value of land. Thus it would not fall on all land, but only on valuable land, and on that not in proportion to the use made of it, but in proportion to its value—the premium which the user of land must pay to the owner, either in purchase money or rent, for permission to use valuable land. It would thus be a tax not on the use and improvement of land, but on the ownership of land, taking what would otherwise go to the owner as owner, and not as user.

In assessments under the single tax all values created by individual use or improvement would be excluded, and the only value taken into consideration would be the value attaching to the bare land by reason of neighborhood, etc., to be determined by impartial periodical assessments. Thus the farmer would have no more taxes to pay than the speculator who held a similar piece of land idle, and the man who on a city lot erected a valuable building would be taxed no more than the man who held a similar lot vacant. The single tax in short would call upon men to contribute to the public revenues not in proportion to what they produce or accumulate, but in proportion to the value of the natural opportunities they hold. It would compel them to pay just as much for holding land idle as for putting it to its fullest use. The single tax, therefore, would—

1st. Take the weight of taxation off the agricultural districts, where land has little or no value irrespective of improvements, and put it on towns and cities, where bare land rises to a value of millions of dollars per acre.

2d. Dispense with a multiplicity of taxes and a horde of tax-gatherers, simplify government, and greatly reduce its cost.

3d. Do away with the fraud, corruption, and gross inequality inseparable from our present methods of taxation, which allow the rich to escape while they grind the poor. Land cannot be hid or carried off, and its value can be ascertained with greater ease and certainty than any other.

4th. Give us with all the world as perfect freedom of trade as now exists between the States of the Union, thus enabling our people to share through free exchanges in all the advantages which nature has given to other countries, or which the peculiar skill of other peoples has enabled them to attain. It would destroy the trusts, monopolies, and corruptions which are the outgrowths of the tariff. It would do away with the fines and penalties now levied on any one who improves a farm, erects a house, builds a machine, or in any way adds to the general stock of wealth. It would leave every one free to apply labor or expend capital in production or exchange without fine or restriction, and would leave to each the full product of his exertion.

5th. It would, on the other hand, by taking for public use that value which attaches to land by reason of the growth and improvement of the community, make the holding of land unprofitable to the mere owner and profitable only to the user. It would thus make it impossible for speculators and monopolists to hold natural opportunities unused or only half used, and would throw open to labor the illimitable field of employment which the earth offers to man. It would thus solve the labor problem, do away with involuntary poverty, raise wages in all occupations to the full earnings of labor, make overproduction impossible until all human wants are satisfied, render labor-saving inventions a blessing to all, and cause such an enormous production and such an equitable distribution of wealth as would give to all comfort, leisure, and participation in the advantages of an advancing civilization, in securing to each individual equal right to the use of the earth. It is also a proper function of society to maintain and control all public ways for the transportation of persons and property, and the transmission of intelligence; and also to maintain and control all public ways in cities for furnishing water, gas, and all other things that necessarily require the use of such common ways.

AMERICAN SCENIC AND HISTORIC PRESERVATION SOCIETY.

The society was founded by Andrew H. Green, incorporated in 1895, and is a National society for the protection of natural scenery, the preservation of historic landmarks and the improvement of cities. *President*—Geo. F. Kunz. *Secretary*—Edw. H. Hall, 154 Nassau St., New York. *Treasurer*—N. T. Phillips.

THE PHILIPPINE SOCIETY.

President—Gen. Luke E. Wright. *Vice-President*—Lieut.-Col. E.W. Halford, U. S. A. *Secretary*—Richard E. Forrest. *Treasurer*—Chas. D. Palmer. *Assistant Secretary*—William J. Platka, 149 Broadway, New York City.

The Philippine Society was founded in April, 1913, to diffuse among the American people a more accurate knowledge of the Philippine Islands; to benefit the people of the islands by co-operation in the fields of religion, philanthropy, education and commerce; to promote social intercourse in the United States among those who are interested in the islands—the society will be kept free of all partisanship or sectarianism. Ex-President Taft is the Honorary President.

The society is composed of persons residing in the United States or in the Philippine Islands who are in any way interested in the welfare of the islands. The dues are: Patron $500; life membership $100; annual membership $10 per year; associate membership, limited to officers in the army and navy, Filipinos, and those engaged in educational and religious work, $5 per year.

a Figures of 1915 are somewhat preliminary and subject to revision. *b* Exclusive of Alaska and islands belonging to the United States. *c* Census figures, relating to Continental United States; the figures for 1915 represent an estimate. *d* Census figures. *e* True valuation of real and personal property. *f* 1912. *g* 1800 to 1850, outstanding principal of the public debt, January 1. *h* Figures for the years 1800 to 1850 include the total public debt. *i* 1914. *j* Gold and silver cannot be stated separately prior to 1876. From 1862 to 1875, inclusive, gold and silver were not in circulation, except on the Pacific Coast, where it is estimated that the average specie circulation was about $25,000,000, and this estimate is continued for the three following years under the head of gold. After that period gold was available for circulation. *k* As the result of a special investigation by the Director of the Mint, a reduction of $135,000,000 was made in the estimate of gold coin in circulation on July 1, 1907, as compared with the basis of previous years, and on September 1, 1910, a reduction of $9,700,000 was made in the estimate of silver coin. *l* Includes notes of Bank of United States; State bank notes; demand notes of 1862 and 1863; fractional currency, 1870; Treasury notes of 1890-1891 to date, and currency certificates, act of June 8, 1892-1900. *m* Includes all deposits, demand and time. *n* Includes value of buildings, $3,556,639,496. The Twelfth Census was the first to collect statistics of buildings on farms. *o* Includes value of buildings, $6,325,451,528. *p* Gross value of all farm products. The figures of the various censuses are not comparable, reason for which will be found in census reports. *q* Exclusive of neighborhood industries and hand trades, included in years previous to 1905. *r* "Ordinary receipts" include receipts from customs, internal revenue, direct tax, public lands, and "miscellaneous," but do not include receipts from loans, premiums, Treasury notes, or revenues of Post-Office Department. *s* Includes corporation and income taxes, $79,828,675 in 1915. *t* "Ordinary disbursements" include disbursements for war, navy, Indians, pensions, payments for interest, and "miscellaneous," but do not include payments for premiums, principal of public debt, or disbursements for postal service paid from revenues thereof. *u* Imports for consumption after 1850. *v* Based on general imports. *w* Domestic exports only after 1860. *x* 1913. *y* Includes canal boats and barges prior to 1880. *z* First six months. (1) Figures relate to the Western Union only and after 1900 do not include messages sent over leased wires or under railroad contracts. (2) Estimated 1912. (3) 1800 to 1850, inclusive, from census of 1880; from 1880 to 1900, inclusive, from Rowell's Newspaper Directory; after 1900 from Ayer's American Newspaper Annual. Figures for 1914 include outlying possessions. (4) Includes salaries for teachers only. Figures are for 1912. (5) 1850, total alien passengers arrived; 1850, 15 months ending December 31; after 1850, fiscal years ending June 30.

UNITED STATES GEOGRAPHIC BOARD.

Acting Chairman—Andrew Braid, Coast and Geodetic Survey, Department of Commerce. *Secretary*—Charles S. Sloane. Bureau of the Census, Department of Commerce. Headquarters, Washington, D. C.

Frank Bond, General Land Office, Department of the Interior.
Goodwin D. Ellsworth, Post-Office Department.
William B. Greeley, Forest Service, Department of Agriculture.
David M. Hildreth, Topographer, Post-Office Department.
Frederick W. Hodge, Bureau of Ethnology, Smithsonian Institution.
Brig.-Gen. Montgomery M. Macomb, President Army War College.
Robert B. Marshall, Geological Survey, Department of the Interior.
William McNeir, Bureau of Accounts, Department of State.
C. Hart Merriam, Bureau of Biological Survey, Department of Agriculture.
John S. Mills, Department of the Treasury.
James E. Payne, Government Printing Office.
George R. Putnam, Bureau of Lighthouses, Department of Commerce.
Charles W. Stewart, Library and Naval War Records Office, Department of the Navy.
Capt. Thomas Washington, Hydrographic Office, Department of the Navy.

By executive order of August 10, 1906, the official title of the United States Board on Geographic Names was changed to United States Geographic Board, and its duties enlarged. The board passes on all unsettled questions concerning geographic names which arise in the departments, as well as determining, changing, and fixing place names within the United States and its insular possessions, and all names hereafter suggested by any officer of the Government shall be referred to the board before publication. The decisions of the board are to be accepted by all the departments of the Government as standard authority. Advisory powers were granted the board concerning the preparation of maps compiled, or to be compiled, in the various offices and bureaus of the Government, with a special view to the avoidance of unnecessary duplication of work; and for the unification and improvement of the scales of maps, of the symbols and conventions used upon them, and of the methods of representing relief. Hereafter, all such projects as are of importance shall be submitted to this board for advice before being undertaken.

UNITED STATES COURT OF CUSTOMS APPEALS.

(WASHINGTON, D. C.)

Presiding Judge—Robert M. Montgomery. *Associate Judges*—James F. Smith, Orion M. Barber, Marion De Vries, George E. Martin. *Attorney-General*—Thomas W. Gregory. *Assistant Attorney-General*—Bert Hanson. *Clerk*—Arthur B. Shelton ($3,500). *Marshal*—Frank H. Briggs ($3,000).

SEC. 188. There shall be a United States Court of Customs Appeals, which shall consist of a Presiding Judge and four Associate Judges, each of whom shall be appointed by the President, by and with the advice and consent of the Senate, and shall receive a salary of seven thousand dollars a year. The Presiding Judge shall be so designated in the order of appointment and in the commission issued to him by the President; and the Associate Judges shall have precedence according to the date of their commissions. Any three members of said court shall constitute a quorum, and the concurrence of three members shall be necessary to any decision thereof. In case of a vacancy or of the temporary inability, or disqualification for any reason of one or two of the Judges of said court, the President may, upon the request of the Presiding Judge of said court, designate any qualified United States Circuit or District Judge or Judges to act in his or their places and such Circuit or District Judges shall be duly qualified to so act.

SEC. 189. The said Court of Customs Appeals shall always be open for the transaction of business, and sessions thereof may, in the discretion of the court, be held in the several judicial circuits, and at such places as said court may from time to time designate.

SEC. 195. That the Court of Customs Appeals established by this chapter shall exercise exclusive appellate jurisdiction to review by appeal, as herein provided, final decisions by a board of general appraisers in all cases as to the construction of the law and the facts respecting the classification of merchandise and the rate of duty imposed thereon under such classifications, and the fees and charges connected therewith, and all appealable questions as to the jurisdiction of said board, and all appealable questions as to the laws and regulations governing the collection of the customs revenues; and the judgments and decrees of said Court of Customs Appeals shall be final in all such cases: *Provided, however*, That in any case in which the judgment or decree of the Court of Customs Appeals is made final by the provisions of this title, it shall be competent for the Supreme Court, upon the petition of either party, filed within sixty days next after the issue by the Court of Customs Appeals of its mandate upon decision, in any case in which there is drawn in question the construction of the Constitution of the United States, or any part thereof, or of any treaty made pursuant thereto, or in any other case when the Attorney-General of the United States shall, before the decision of the Court of Customs Appeals is rendered, file with the court a certificate to the effect that the case is of such importance as to render expedient its review by the Supreme Court, to require, by certiorari or otherwise, such case to be certified to the Supreme Court for its review and determination, with the same power and authority in the case as if it had been carried by appeal or writ of error to the Supreme Court: *And provided further*, That this act shall not apply to any case involving only the construction of section 1, or any portion thereof, of an act entitled "An act to provide revenue, equalize duties, and encourage the industries of the United States, and for other purposes," approved August 5, 1909, nor to any case involving the construction of section 2 of an act entitled "An act to promote reciprocal trade relations with the Dominion of Canada, and for other purposes," approved July 26, 1911. (Amendment as approved, August 22, 1914.)

SEC. 196. No appeal shall be taken or allowed from any Board of United States General Appraisers to any other court, and no appellate jurisdiction shall thereafter be exercised or allowed by any other courts in cases decided by said Board of United States General Appraisers, but all appeals allowed by law from such Board of General Appraisers shall be subject to review only in the Court of Customs Appeals hereby established, according to the provisions of this chapter: *Provided*, That nothing in this chapter shall be deemed to deprive the Supreme Court of the United States of jurisdiction to hear and determine all customs cases which have heretofore been certified to said court from the United States Circuit Courts of Appeals on applications for writs of certiorari or otherwise, nor to review by writ of certiorari any customs case heretofore decided or now pending and hereafter decided by any Circuit Court of Appeals, provided application for said writ be made within six months after August 5, 1909: *Provided further*, That all customs cases decided by a Circuit or District Court of the United States or a court of a Territory of the United States prior to said date above mentioned, and which have not been removed from said courts by appeal or writ of error, and all such cases theretofore submitted for decision in said courts and remaining undecided may be reviewed on appeal at the instance of either party by the United States Court of Customs Appeals, provided such appeal be taken within one year from the date of the entry of the order, judgment, or decrees sought to be reviewed.

SEC. 197. Immediately upon the organization of the Court of Customs Appeals, all cases within the jurisdiction of that court pending and not submitted for decision in any of the United States Circuit Courts of Appeals, United States Circuit, Territorial or District Courts, shall, with the record and samples therein, be certified by said courts to said Court of Customs Appeals for further proceedings in accordance herewith: *Provided*, That where orders for the taking of further testimony before a referee have been made in any of such cases, the taking of such testimony shall be completed before such certification.

SEC. 198. If the importer, owner, consignee, or agent of any imported merchandise, or the Collector or Secretary of the Treasury, shall be dissatisfied with the decision of the Board of General Appraisers as to the construction of the law and the facts respecting the classification of such merchandise and the rate of duty imposed thereon under such classification, or with any other appealable decision of said board, they, or either of them, may, within sixty days next after the entry of such decree or judgment, and not afterward, apply to the Court of Customs Appeals for a review of the questions of law and fact involved in such decision: *Provided*, That in Alaska and in the insular and other outside possessions of the United States ninety days shall be allowed for making such application to the Court of Customs Appeals. Such application shall be made by filing in the office of the clerk of said court a concise statement of errors of law and fact complained of; and a copy of such statement shall be served on the collector, or the importer, owner, consignee, or agent, as the case may be. Thereupon the court shall immediately order the Board of General Appraisers to transmit to said court the record and evidence taken by them, together with the certified statement of the facts involved in the case and their decision thereon; and all the evidence taken by and before said board shall be competent evidence before said Court of Customs Appeals. The decision of said Court of Customs Appeals shall be final, and such cause shall be remanded to said Board of General Appraisers for further proceedings to be taken in pursuance of such determination.

SEC. 199. Immediately upon receipt of any record transmitted to said court for determination the clerk thereof shall place the same upon the calendar for hearing and submission; and such calendar shall be called and all cases thereupon submitted, except for good cause shown, at least once every sixty days: *Provided*, That such calendar need not be called during the months of July and August of any year.

A TABLE OF LEADING ARTICLES IMPORTED INTO THE UNITED STATES OR INTO ANY OF ITS POSSESSIONS (EXCEPT PHILIPPINE ISLANDS, GUAM AND TUTUILA), GIVING RATES AT ENTRY BY THE TARIFF ACT OF 1913 COMPARED WITH THE TARIFF ACT OF 1909.

(The following table covers only the articles of principal importance imported.)
(ad val.—ad valorem; n.s.p.f.—not specially provided for.)

CUSTOM HOUSE EXAMINATION OF BAGGAGE.

The Tariff of 1913 provides for the exemption from duty of wearing apparel, etc., as shown in paragraph 642, as follows:

642. Wearing apparel, articles of personal adornment, toilet articles, and similar personal effects of persons arriving in the United States; but this exemption shall include only such articles as were actually owned by them and in their possession abroad at the time of or prior to their departure from a foreign country, and as are necessary and appropriate for the wear and use of such persons and are intended for such wear and use, and shall not be held to apply to merchandise or articles intended for other persons or for sale: *Provided*, That in case of residents of the United States returning from abroad all wearing apparel, personal and household effects taken by them out of the United States to foreign countries shall be admitted free of duty, without regard to their value, upon their identity being established under appropriate rules and regulations to be prescribed by the Secretary of the Treasury: *Provided further*, That up to but not exceeding one hundred dollars in value of articles acquired abroad by such residents of the United States for personal or household use or as souvenirs or curios, but not bought on commission or intended for sale, shall be admitted free of duty.

BAGGAGE DECLARATIONS.

The law requires that every person entering the United States shall make a declaration and entry of personal baggage. The senior member of a family present as a passenger may, however, declare for the entire family. A failure to declare articles acquired abroad and brought in as baggage renders the articles subject to forfeiture and the passengers liable to criminal prosecution. (Sections 2802 and 3082, R. S.)

Returning residents of the United States should use the form of declaration printed in black; nonresidents should use the form printed in red.

The exact number of pieces of baggage accompanying a passenger must be stated in the declaration, including trunks, valises, boxes, hand bags, and packages or bundles of every kind. Forms of baggage declarations will be furnished passengers by the steamship officers. The declaration should

CUSTOM HOUSE EXAMINATION OF BAGGAGE—*Continued.*

be prepared and signed at least one day before the expected arrival of the vessel. Declarations spoiled in preparation should not be destroyed, but should be turned over to the purser, who will furnish a new blank.

When the declaration has been prepared and signed, the coupon at the bottom of the form must be detached and retained by the passenger and the declaration delivered to the ship's officer designated to receive the same. After all the baggage and effects of the passenger have been landed, the coupon which has been retained must be presented at the inspector's desk, and an inspector will then be detailed to examine the bagggage.

Passengers must acknowledge in person, on the pier, their signatures to the declarations.

RETURNING RESIDENTS OF THE UNITED STATES.

Returning residents of the United States must declare all articles acquired abroad. in their baggage or on their persons, whether by purchase, by gift, or otherwise, and whether dutiable or free of duty. Exemption, however, will be allowed by customs officers of articles aggregating not over $100 in value, if suitable for personal or household use or as souvenirs or curios, and whether intended for the personal use of the passengers or as gifts or presents to others, provided the articles are not bought on commission for another person nor intended for sale. Articles so exempt from duty must, nevertheless, be declared. Articles belonging to one passenger can not be included in the exemption of another.

Use does not exempt from duty wearing apparel or other articles obtained abroad. Such articles which have been used abroad may, however, be specifically noted on the declaration, and due allowance will be made by the appraising officers for depreciation through wear and use and duties charged upon the articles at their value in their condition as imported.

Passengers must not deduct the $100 exemption in making out their declarations. Such deductions will be made by customs officers on the pier.

All wearing apparel, personal and household effects taken out of the United States by residents shall be admitted free of duty without regard to their value upon their identity being established. If remodelled, repaired, or improved abroad, the cost of such remodelling, repairing, or improvement must be declared, and receipted bills for such alterations should be presented. The cost of such repairs is subject to duty, but may be included by customs officers within the $100 exemption. If the cost or value of the repairs be not declared, the articles will be subject to duty upon their entire value.

Citizens of the United States or persons who have at any time resided in this country shall be deemed to be residents of the United States, unless they shall have abandoned their residence in this country and acquired an actual bona fide residence in a foreign country. Such citizens or former residents who declare as nonresidents must present satisfactory evidence to the customs officers upon the pier that they have given up their residence in the United States and have become bona fide residents of a foreign country.

The residence of a wife follows that of the husband, and the residence of a minor child follows that of its parents.

The examination of baggage will be facilitated and difficulties avoided if receipted bills for foreign purchases be presented, and if all articles acquired abroad be packed separately in one or more trunks.

NONRESIDENTS OF THE UNITED STATES.

Nonresidents of the United States must declare all articles in their baggage or on their persons which do not constitute wearing apparel, articles of personal adornment, toilet articles, or similar personal effects, whether intended for their personal use or for others. They must also declare all articles of wearing apparel, jewelry, and other articles of personal adornment, toilet articles, and similar effects when not owned by them or when intended for other persons or for sale.

HOUSEHOLD EFFECTS.

Household effects, such as furniture, table linen, bed linen, tableware, etc., imported as baggage must be declared. If shown to the satisfaction of the customs officers to have been actually owned and used abroad by the passenger not less than one year and not intended for any other person nor for sale, such effects will be admitted free of duty. If not so owned and used abroad, duties must be paid thereon, unless included in the $100 exemption allowed returning residents.

CIGARS AND CIGARETTES.

Each passenger over eighteen years of age may bring in free of duty 50 cigars or 300 cigarettes, or smoking tobacco not exceeding three pounds, if for the bona fide use of such passenger. These articles must be declared, but will be passed free by customs officers in addition to the $100 exemption.

CONTESTED VALUATION.

Passengers dissatisfied with values placed upon dutiable articles by the customs officers on the pier may demand a re-examination. Application therefor should be made to the officers in charge immediately. If, for any reason, this course is impracticable, the packages containing the articles should be left in customs custody and application for reappraisement made to the collector of customs in writing within ten days after the original appraisement. No request for reappraisement can be entertained after the articles have been removed from customs custody.

Examination of any baggage may be postponed if the passenger requests the officer taking his declaration to have the baggage sent to the appraiser's stores.

Currency or certified checks only can be accepted in payment of duties, but upon request baggage will be retained on the pier for 24 hours to enable the owner to secure currency or certified checks.

The offering of gratuities or bribes to customs officers is a violation of law. Customs officers who accept gratuities or bribes will be dismissed from the service, and all parties concerned are liable to criminal prosecution.

Discourtesy or incivility on the part of customs officers should be reported to the collector at the custom house, to the deputy collector or deputy surveyor at the pier, or to the Secretary of the Treasury. Passengers should not, however, deem customs officers discourteous merely because such officers examine baggage thoroughly or appraise articles at a value different from that stated in the passenger's declaration.

BAGGAGE FOR TRANSPORTATION IN BOND.

Baggage containing dutiable articles may be forwarded in bond to any other port of entry upon good reason therefor being shown.

Passengers desiring to have such baggage forwarded in bond should so indicate on their declarations, and also make a request therefor upon the inspector at the time he is assigned to the examination of their baggage. Similar action should be taken when it is desired to have baggage forwarded to another country in transit through the United States.

CUSTOM HOUSE EXAMINATION OF BAGGAGE—*Continued.*

SEALSKIN GARMENTS.

An act of Congress of 1897, as amended in 1912, expressly forbids the importation into the United States of garments made in whole or in part of the skins of seals taken in the waters of the Pacific Ocean. Unless the owner is able to establish to the satisfaction of the collector that the garments are not prohibited by said act, they cannot be admitted.

AIGRETTES AND OTHER PLUMAGE.

Paragraph 347 of the present Tariff act contains the following proviso:

"The importation of aigrettes, egret plumes, or so-called osprey plumes, and the feathers, quills, heads, wings, tails, skins, or parts of skins, of wild birds, either raw or manufactured, and not for scientific or educational purposes, is hereby prohibited; but this provision shall not apply to the feathers or plumes of ostriches or to the feathers or plumes of domestic fowls of any kind."

Any of the above-described prohibited articles will be excluded from entry when brought in by passengers as trimmings on hats or other articles of wearing apparel, and will be confiscated whether found in the baggage or on the person. In cases where there has been no wilful intent to violate the law, such prohibited articles may be exported to a foreign country.

W. G. McAdoo, Secretary of the Treasury.

THE UNITED STATES CENSUS.

The Constitution requires that a census of the United States shall be taken decennially. The First Census was taken in 1790 under the supervision of the President; subsequent censuses, to and including that of 1840, were taken under the supervision of the Secretary of State. In 1849 the supervision of the census was transferred to the newly organized Department of the Interior, and continued under the control of that department until the passage, in 1903, of the act creating the Department of Commerce and Labor; by this act the Census Bureau was transferred to the new department. Congress, by act approved March 6, 1902, made the Census Office a permanent bureau of the Government. Since March 4, 1913, when the Department of Commerce and the Department of Labor were separately organized, the Bureau of the Census has been attached to the former department.

The work of the Census Bureau is divided into two main branches, namely the decennial census and special statistical inquiries, the latter mostly made in the intervals between the decennial censuses. The Thirteenth Decennial Census was taken as of date April 15, 1910. It covered the three main subjects—(1) population, (2) agriculture, and (3) manufactures, mines, and quarries.

The results of this census have been published and have been used wherever available for the tables of the present Almanac. The aggregate cost of the census of 1910 was about $14,290,000, in addition to which $1,675,000 was spent in carrying on the annual investigations of the permanent bureau during the census period. Of this amount $7,200,000 represents the cost of collecting the data through the employment of over 70,000 paid enumerators, besides supervisors, clerks, and special agents. The balance is the cost of tabulating and publishing the results. A more detailed account of the census of 1910 is given in the 1911 issue of The World Almanac.

The permanent work of the Census Bureau is provided for by the act of Congress approved March 6, 1902, and amendments thereto. These acts authorize and direct the bureau to make statistical inquiries regarding the insane, feeble-minded, deaf and dumb, and blind; crime, pauperism, and benevolence; deaths and births in the areas maintaining registration systems; social and financial statistics of cities; wealth, debt and taxation; religious bodies; electric light and power, telephones and telegraphs, and street and electric railways; transportation by water; cotton produced, consumed, imported, exported, and on hand, and active cotton spindles; stocks of leaf tobacco held by manufacturers and dealers. The statistics of deaths (which now cover about two-thirds of the population) of cities, of production of cotton and of tobacco stocks, are secured annually; the other statistics mentioned are taken usually at intervals of five or ten years, not, however, at the same time as the regular decennial censuses. The act of 1902 also provides for a census of manufactures in the fifth year intervening between the decennial censuses.

The Director of the Census is appointed by the President of the United States and receives a salary of $6,000 *per annum*. The present Director is Samuel L. Rogers of North Carolina. The permanent office organization includes a chief clerk, William L. Austin; four chief statisticians—for Population, William C. Hunt; for Manufactures, William M. Steuart; for Finance and Municipal Statistics, Starke M. Grogan, and for Vital Statistics, Richard C. Lappin; a geographer, Charles S. Sloane, and eight chiefs of division. The entire number of employés in the bureau at Washington is now about 600; in addition there are about 775 special agents employed intermittently in the Southern States for the collection of cotton statistics. The number of employés in Washington was greatly increased during the decennial census; on November 1, 1910, it was 3,565, in addition to field employés.

UNITED STATES SECRET SERVICE.

The Secret Service Division of the Treasury Department is under the direction of Wm. J. Flynn, chief of the division. The service is principally engaged in detecting and prosecuting makers and dealers in counterfeit paper money and coin. Details are also furnished for the protection of the President of the United States.

The arrests of counterfeiters number about 400 annually; other arrests are for bribery, impersonating United States Government officers, perjury, and violating sections of the United States Revised Statutes relating to foreign and domestic obligations and coins.

NATIONAL GRANGE, PATRONS OF HUSBANDRY.

Master—Oliver Wilson, Peoria, Ill. *Overseer*—W. H. Vary, Watertown, N. Y. *Lecturer*—George W. F. Gaunt, Mullica Hill, N. J. *Steward*—F. C. Bancroft, Wyoming, Del. *Assistant Steward*—J. A. Sherwood, Long Hill, Ct. *Chaplain*—A. P. Reardon, McLouth, Kan. *Treasurer*—Mrs. Eva S. McDowell, 6 Norfolk Terrace, Wellesley, Mass. *Secretary*—C. M. Freeman, Tippecanoe City, Ohio. *Gatekeeper*—C. L. Rice, Austin, Minn. *Ceres*—Mrs. Esther E. Pattee, Laconia, N. H. *Pomona*—Mrs. Cora E. Ketcham, Hastings, Mich. *Flora*—Mrs. Ella Peckham, Newport, R. I. *L. A. Steward*—Mrs. Mabel H. Harland, Payette, Idaho. *High Priest*—C. M. Gardner, Westfield, Mass. *Priest Archon*—Oliver Wilson, Peoria, Ill. *Priest Annalist*—C. E. Spence, Oregon City, Ore. Executive Committee: C. S. Stetson, Chairman, Greene, Me.; A. B. Judson, Balfour, Iowa; W. N. Cady, Secretary, Middlebury, Vt.

The National Grange has established over 30,000 subordinate granges throughout the United States.

Postal Information.

(*Revised by the Post-Office Department for* THE WORLD ALMANAC. *Sections quoted by numbers in this subject refer to the Postal Laws and Regulations.*)

DOMESTIC RATES OF POSTAGE.

ALL mailable matter for transmission by the United States mails within the United States is divided into four classes, under the following regulations: (Domestic rates apply to mail for Canada, Mexico, Cuba, Tutuila, Porto Rico, Guam, Hawaii, the Philippines, the "Canal Zone," the Republic of Panama, and Shanghai, China, also to mail for officers or members of the crew of vessels of war of the United States, and officers and men of the United States Navy in the United States Naval Hospital, Yokohama, Japan.)

First-Class Matter—This class includes letters, postal cards, "post cards," and anything sealed or otherwise closed against inspection (except as provided for under other classifications) or anything containing writing not authorized on mail matter of other classifications.

First-class or letter rate of postage to any part of the United States, its possessions, or the above-named countries, *two cents per ounce or fraction thereof.*

Rates on local or drop letters at free delivery offices, two cents per ounce or fraction thereof. At offices where there is no free delivery by carriers, and the addressee cannot be served by rural free delivery carriers, one cent per ounce or fraction thereof.

Rates on **postal cards,** one cent (double or "reply" cards, two cents). Postal cards issued by the Post-Office Department may bear written, printed, or other additions as follows:

(*a*) The face of the card may be divided by a vertical line placed approximately one-third of the distance from the left end of the card; the space to the left of the line to be used for a message, etc., but the space to the right for the address only.

(*b*) Addresses upon postal cards may be either written, printed, or affixed thereto, at the option of the sender.

(*c*) Very thin sheets of paper may be attached to the card on condition that they completely adhere thereto. Such sheets may bear both writing and printing.

(*d*) Advertisements, illustrations, or writing may appear on the back of the card and on the left third of the face.

2. The addition to a postal card of matter other than as above authorized will subject the card, when sent in the mails, to postage according to the character of the message—at the letter rate if wholly or partly in writing or the third-class rate if entirely in print. In either case the postage value of the stamp impressed upon the card will not be impaired.

3. Postal cards must be treated in all respects as sealed letters, except that those mailed for local delivery will be returned to the sender if undeliverable and the name and address of the sender appears thereon. Undeliverable "double" postal cards will be returned to the sender if known.

4. Postal cards bearing particles of glass, metal, mica, sand, tinsel or other similar substances, are unmailable, except when inclosed in tightly sealed envelopes with proper postage attached, or when treated in such manner as will prevent the objectionable substances from being rubbed off or injuring persons handling the mails.

Cards that have been spoiled in printing or otherwise will be redeemed from the *original purchasers* at 75 per cent. of their face value if unmutilated.

POST CARDS—(private mailing cards)—bearing written or printed messages are transmissible in the mails.

Private mailing cards ("post cards") in the domestic mails must conform to the following conditions:

(*a*) A "post card" must be an unfolded piece of cardboard not exceeding approximately 3 9-16 by 5 9-16 inches, nor less than approximately 2¾ by 4 inches.

(*b*) It must in form and in the quality and weight of paper be substantially like the Government postal card.

(*c*) It may be of any color not interfering with a legible address and postmark.

(*d*) It may or may not, at the option of the sender, bear near the top of the face the words "post card."

(*e*) The face of the card may be divided by a vertical line; the left half to be used for a message, etc., but that to the right for the address only.

(*f*) Very thin sheets of paper may be attached to the card, and then only on condition that they completely adhere thereto. Such sheets may bear both writing and printing.

(*g*) Advertisements and illustrations may appear on the back of the card and on the left half of the face.

2. Cards, without cover, conforming to the foregoing conditions are transmissible in the domestic mails (including the possessions of the United States) and to Cuba, Canada, Mexico, the Republic of Panama, and Shanghai, China, at the postage rate of 1 cent each.

3. When "post cards" are prepared by printers and stationers for sale, it is desirable that they bear in the upper right hand corner of the face an oblong diagram containing the words "Place postage stamp here," and at the bottom of the space to the right of the verticle dividing line, the words "This space for the address."

4. Cards which do not conform to the conditions prescribed by these regulations are, when sent in the mails, chargeable with postage according to the character of the message—at the letter rate, if wholly or partly in writing, or at the third-class rate, if entirely in print.

5. Cards bearing particles of glass, metal, mica, sand, tinsel, or other similar substances, are *unmailable*, except when inclosed in tightly sealed envelopes, or when treated in such manner as will prevent the objectionable substances from being rubbed off or injuring persons handling the mails.

Postage on all letters should be *fully* prepaid, but if prepaid one full rate and no more, they will be forwarded, and the amount of deficient postage collected on delivery; if wholly unpaid, or prepaid with less than one full rate and deposited at a post-office, the addressee will be notified to remit postage; and if he fails to do so they will be sent to the Dead Letter Office; but they will be returned to the sender if he is located at the place of mailing, and if his address be printed or written upon them.

Letter rate is charged on typewriting and carbon or letter press copies thereof, and on all printed imitations or reproductions of typewriting or manuscript obtained by mechanical process unless such reproductions are presented at post-office windows in the minimum number of twenty identical unsealed copies.

Letters and other matter prepaid at the letter rate—two cents an ounce or fraction thereof—(but no other class of mail matter) will be returned to the sender free, if a request to that effect is printed or written on the envelope or wrapper. The limit of weight is four pounds, except for a single book, and except, also, gold for or from Alaska sent by registered mail.

DOMESTIC RATES OF POSTAGE—*Continued.*

Prepaid letters and other matter prepaid at the letter rate will be forwarded from one post-office to another upon the written request of the person addressed, without additional charge for postage. The direction on forwarded letters may be changed as many times as may be necessary to reach the person addressed. Nothing may be added to such letters except the forwarding address without subjecting them to new postage.

Second-Class Matter—This class includes all printed newspapers and periodicals that have been "Entered as second-class matter," under the act of March 3, 1879, and are regularly issued at stated intervals as frequently as four times a year, from a known office of publication, and mailed by the publishers or news agents to actual subscribers or as sample copies or to news agents for sale, and newspapers and publications of this class mailed by persons other than publishers. Also periodical publications entered under the act of August 24, 1912, of benevolent and fraternal societies, organized under the lodge system and having a membership of a thousand persons, and the publications of strictly professional, literary, historical and scientific societies, and incorporated institutions of learning, trade unions, etc., provided that these be published at stated intervals not less than four times a year, and that they be formed of printed paper sheets without board, cloth, leather or other substantial binding. Also periodicals issued by State Departments of Agriculture which are entered under the act of June 6, 1900. Publishers who wish to avail themselves of the privileges of the act are required to make formal application to the department through the postmaster at the place of publication, producing satisfactory evidence that the organizations, societies, and institutions represented come within the purview of the law. Publications designed primarily for advertising or free circulation, or circulation at a nominal rate, or not having a legitimate list of subscribers, are not entitled to the pound rate under the act of March 3, 1879.

Rates of postage to publishers and news agents, *one cent a pound or fractional part thereof*, prepaid in currency. Newspapers (except weeklies) mailed by the publishers or by registered news agents for local delivery by city letter carriers and periodicals not exceeding 2 ounces in weight are subject to the rate of one (1) cent each, to be prepaid by stamps affixed. Periodicals exceeding two ounces in weight mailed for local carrier delivery are subject to the rate of two (2) cents each, to be prepaid by stamps affixed.

Publications which have not been admitted to the second-class are third- or fourth-class matter.

Publications sent to actual subscribers in the county where printed and published are free, unless mailed for delivery at a letter-carrier office.

Rates of postage on second-class newspapers, magazines, or periodicals, mailed by others than the publishers or news agents, *one cent for each four ounces or fraction thereof*. It should be observed that the rate is one cent for each four ounces, not one cent for each paper contained in the same wrapper. This rate applies only when a complete copy is mailed. Parts of second-class publications or partial or incomplete copies are not entitled to second-class rates. Second-class matter is entitled to special delivery when special delivery stamps (or ten cents in ordinary stamps and the words "Special Delivery" placed on the wrapper) are affixed in addition to the regular postage.

Second-class matter must be so wrapped that it may be easily examined. The sender's name and address may be written in them or on the wrapper, also the words "sample copy" when sent as such, or "marked copy" when it contains a marked item or article. Typographical errors in the text may be corrected, but any other writing subjects the matter to letter postage.

Third-Class Matter—Mail matter of the third class includes printed engravings, circulars in print (or by the mimeograph, multigraph, hectograph, electric-pen, or similar process when at least twenty identical copies are mailed at post-office windows at one time), and other matter wholly in print (except books), proof sheets, corrected proof sheets, and manuscript copy accompanying the same. Printed books are fourth-class matter. See "Parcel Post or Fourth-Class Mail."

The rate on matter of this class is *one cent for each two ounces or fraction thereof*. Postage must be paid by stamps affixed, unless 2,000 or more identical pieces are mailed under special permit when the postage at that rate may be paid in money.

Manuscript unaccompanied by proof sheets of the same is subject to the letter rate.

Third-class matter must admit of easy inspection, otherwise it will be charged letter rate on delivery. It must be fully prepaid, or it will not be despatched. New postage must be prepaid for forwarding to a new address or returning to senders.

The limit of weight is four pounds. Packages of miscellaneous printed matter weighing over four pounds are mailable at the parcel post pound or zone rates. It is entitled, like matter of the other classes, to special delivery when special delivery stamps are affixed in addition to the regular postage, or when ten cents in ordinary stamps are affixed in addition to the regular postage and the words "Special Delivery" are placed on the wrapper.

Upon matter of the third class, or upon the wrapper or envelope inclosing the same, or the tag or label attached thereto, the sender may write his own name, occupation, and residence or business address, preceded by the word "from," and may make marks other than by written words to call attention to any word or passage in the text, and may correct any typographical errors. There may be placed upon articles of the third class, a simple manuscript dedication or inscription not of the nature of a personal correspondence. Upon the wrapper or envelope of third-class matter, or the tag or label attached thereto, may be placed in writing or otherwise the words "Please do not open until Christmas" or words to that effect, and there may be printed any matter mailable as third class. Written designation of the contents such as "photo," "printed matter," is also permissible, but there must be left on the address side a space sufficient for a legible address, postmark and the necessary stamps.

Fourth-Class Matter—See "Parcel Post or Fourth-Class Mail."

Third- or Fourth-Class Matter Mailable Without Stamps—Under special permits postage may be paid in money for third- or fourth-class matter mailed in quantities of 2,000 or more *identical* pieces. For information concerning the regulations governing such mailings inquiry should be made of the postmaster.

Special Delivery Service—Ten cents on each letter or other article in *addition* to the regular postage, entitles the article to immediate delivery by special messenger. Special delivery stamps are sold at post-offices, and must be affixed to such mail. Ordinary stamps to the value of ten cents in addition to the regular postage, affixed to a letter or other piece of mail, will entitle it to special delivery if it is marked "Special Delivery." The delivery, at carrier offices, extends to the limits of the carrier routes. At non-carrier offices it extends to one mile from the post-office. Also to patrons of rural routes residing within one-half mile of such routes. Postmasters are not obliged to deliver beyond these limits, and letters addressed to places beyond must await delivery in the usual way, notwithstanding the special delivery stamp.

Registration—All domestic mail matter except fourth-class matter may be registered at the rate of *ten cents for each package* in addition to the regular rates of postage, to be fully prepaid by stamps. Each package must bear the name and address of the sender, and a receipt will be returned from the person to whom addressed, when indorsed "receipt desired," or words of similar import. Mail matter can be registered at all post-offices in the United States.

An indemnity—not to exceed $50 for any one registered piece, or the actual value of the piece, if it is less than $50—shall be paid for the loss of first-class registered matter mailed at and addressed to a United States post-office, and an indemnity not to exceed $25 is paid for domestic third-class matter, but no indemnity will be paid if the loser has been otherwise reimbursed. Claims for indemnity must be made within one year from date of loss of domestic mail and date of mailing of foreign mail. The limit of indemnity paid for registered articles lost in the international mails is 50 francs.

Domestic Money Orders—Domestic money orders are issued by money-order post-offices for any amount up to $100, at the following rates:

DOMESTIC RATES OF POSTAGE—*Continued.*

For sums not exceeding $2.50, 3 cents; over $2.50 to $5, 5 cents; over $5 to $10, 8 cents; over $10 to $20, 10 cents; over $20 to $30, 12 cents; over $30 to $40, 15 cents; over $40 to $50, 18 cents; over $50 to $60, 20 cents; over $60 to $75, 25 cents; over $75 to $100, 30 cents.

All domestic money orders must be made payable at a designated money order office, but those issued at any money order office in the continental United States, excepting Alaska, may be paid at any money order office in the continental United States, excepting Alaska, if presented for payment on or before the expiration of the thirtieth day following the date of issue. If presented after that date and within one year from the last day of the month in which issued, they shall be paid only at the office designated in the money order as the paying office, or repaid at the office of issue.

Stamped Envelopes—Embossed stamped envelopes and newspaper wrappers of several denominations, sizes and colors are kept on sale at post-offices, singly or in quantities, at a small advance on the postage rate. Stamps cut from stamped envelopes or wrappers are valueless, but postmasters are authorized to give good stamps for stamped envelopes or newspaper wrappers that may be spoiled in directing, if presented in a substantially whole condition.

Unmailable Matter—See also "Parcel Post or Fourth-Class Mail."—Unmailable domestic matter—that is, matter which is not admissible to the United States mails for delivery in the United States or in any of its possessions—includes:

All matter illegibly, incorrectly, or insufficiently addressed.

Held for Postage—All second-class matter and all matter of the third or fourth class not wholly prepaid; and letters and other first-class matter not prepaid one full rate—2 cents.

All matter weighing over four pounds, except second-class matter, fourth-class matter (parcel post), single books, official matter emanating from the Executive Departments and documents printed and circulated by authority of Congress and gold for or from Alaska.

Postal cards or post cards which bear delineations, epithets, terms, or language of an indecent, lewd, lascivious, obscene, libellous, scurrilous, defamatory or threatening character, or calculated by the terms or manner or style of display, and obviously intended to reflect injuriously upon the character or conduct of another, also articles bearing such matter upon the wrapper or outside cover. Dunning postal or other cards are included in this class.

Post cards bearing particles of glass, metal, mica, sand, tinsel, or other similar substances, are unmailable, except as provided under "First-Class Matter."

All matter concerning any lottery, gift, enterprise, or similar scheme, offering prizes dependent in whole or in part upon lot or chance, or concerning fraudulent schemes devised for the purpose of obtaining money or property under false pretenses, representations or promises.

Applications for the establishment of post-offices should be addressed to the Postmaster-General, accompanied by a statement of the necessity therefor. Instructions will then be given and blanks furnished to enable the petitioners to provide the department with the necessary information.

The franking privilege was abolished July 1, 1873, but the following mail matter may be sent free by legislative saving clauses, viz.:

1. All public documents printed by order of Congress, the Congressional Record and speeches contained therein, franked by Members of Congress, or the Secretary of the Senate, or Clerk of the House.

2. Seeds transmitted by the Secretary of Agriculture, or by any Member of Congress, procured from that Department.

3. Letters and packages relating exclusively to the business of the Government of the United States, mailed only by officers of the same, and letters and parcels mailed by the Smithsonian Institution. All these must be covered by specially printed "penalty" envelopes or labels.

4. The Vice-President, Members and Members-elect and Delegates and Delegates-elect to Congress may frank any mail matter to any Government official or to any person correspondence, not over four ounces in weight, upon official or departmental business.

All communications to Government officers and to Members of Congress are required to be prepaid by stamps unless inclosed in "penalty" envelopes furnished for replies.

Suggestions to the Public—Mail all letters, etc., as early as practicable, especially when sent in large numbers, as is frequently the case with newspapers and circulars.

All mail matter at large post-offices is necessarily handled in great haste and should therefore in all cases be SO PLAINLY addressed as to leave NO ROOM FOR DOUBT AND NO EXCUSE FOR ERROR on the part of postal employés. Names of States should be written in full (or their abbreviations very distinctly written) in order to prevent errors which arise from the similarity of such abbreviations as Cal., Col.; Pa., Va., Vt.; Me., Mo., Md.; Ioa., Ind.; N. H., N. M., N. Y., N. J., N. C., D. C.; Miss., Minn., Mass.; Nev., Neb.; Penn., Tenn., etc., when hastily or carelessly written. This is especially necessary in addressing mail matter to places of which the names are borne by several post-offices in different States.

Avoid as much as possible using envelopes made of flimsy paper, especially where more than one sheet of paper, or any other article than paper, is inclosed. Being often handled, and even in the mail-bags subject to pressure, such envelopes not infrequently split open, giving cause of complaint.

Never send money or any other article of value through the mail except either by means of a money order or in a registered letter or by insured parcel post. Any person who sends money or valuables otherwise not only runs a risk of losing his property, but exposes to temptation every one through whose hands his letter passes, and may be the means of ultimately bringing some clerk or letter-carrier to ruin.

See that every letter or package bears the full name and post-office address of the writer, in order to secure the return of the letter if the person to whom it is directed cannot be found. A much larger portion of the undelivered letters could be returned if the names and addresses of the senders were always fully and plainly written or printed inside or on the envelopes. Persons who have large correspondence find it most convenient to use "special request envelopes;" but those who only mail an occasional letter can avoid much trouble by writing a request to "return if not delivered," etc., on the envelope.

When dropping a letter, newspaper, etc., into a street mailing-box, or into the receptacle at a post-office, always see that the packet falls into the box and does not stick in its passage; observe, also, particularly, whether the postage stamps remain securely in their places.

Postage stamps should be placed on the upper right-hand corner of the addressed side of all mail matter.

Imitations of postage stamps are not permissible on mail matter.

Space should be left on the address side of all mail matter sufficient for a legible address and for all directions permissible thereon, for postage stamps, for postmarking, rating, and any words necessary for forwarding or return. Watermarks or printing in light tints which do not render the reading of the address difficult will be permitted.

The street and number (or box number) should form a part of the address of all mail matter directed to cities. In most cities there are many persons, and even firms, bearing the same name. Before depositing any package or other article for mailing, the sender should assure himself that it is wrapped and packed in the manner prescribed by postal regulations; that it does not contain *unmailable* matter nor exceed the limit of weight as fixed by law; and that it is fully prepaid and properly addressed.

It is unlawful to send an ordinary letter by express or otherwise outside of the mails unless it be inclosed in a Government-stamped envelope of sufficient value to pay the postage to which it is subject. It is also unlawful to inclose a letter in an express package unless it pertains wholly to the contents of the package.

DOMESTIC RATES OF POSTAGE—*Continued.*

It is forbidden by the regulations of the Post-Office Department for postmasters to give any person information concerning the mail matter of another, or to disclose the name of a box-holder at a post-office.

Letters addressed to persons temporarily sojourning in a city where the Free Delivery System is in operation should be marked "Transient" or "General Delivery," if not addressed to a street and number or some other designated place of delivery.

Foreign books, etc., infringing United States copyright are *undeliverable* if received in foreign mails, or mailed here.

The foregoing rates, rules, and suggestions *apply to postal matters in the United States.*]

PARCEL POST OR FOURTH-CLASS MAIL.

Fourth-Class Matter Embraces that known as domestic parcel post mail, and includes merchandise, farm and factory products, seeds, cuttings, bulbs, roots, scions, and plants, books (including catalogues), miscellaneous printed matter weighing more than 4 pounds, and all other mailable matter not embraced in the first, second, and third classes.

Rates of Postage on Fourth-Class or Parcel Post Matter—To Be Fully Prepaid—Unsealed— are as follows:

(*a*) Parcels weighing 4 ounces or less, except books, seeds, plants, etc., 1 cent for each ounce or fraction thereof, any distance.

(*b*) Parcels weighing 8 ounces or less containing books, seeds, cuttings, bulbs, roots, scions, and plants, 1 cent for each 2 ounces or fraction thereof, regardless of distance.

(*c*) Parcels weighing more than 8 ounces containing books, seeds, plants, etc., parcels of miscellaneous printed matter weighing more than 4 pounds, and all other parcels of fourth-class matter weighing more than 4 ounces are chargeable, according to distance or zone, at the pound rates shown in the following table, a fraction of a pound being considered a full pound:

WEIGHT.	Local Rate.*	1st Zone Rate. 50 Miles. See note below	2d Zone Rate. 50 to 150 Miles.	WEIGHT.	Local Rate.*	1st Zone Rate, 50 Miles. See note below	2d Zone Rate. 50 to 150 Miles.

* The local rate applies to parcels mailed under the following conditions: (1) At any post-office for local delivery at such office. (2) At any city letter carrier office, or at any point within its delivery limits, for delivery by carriers from that office. (3) At any post-office from which a rural route starts, for delivery on such route, or when mailed at any point on a rural route for delivery

PARCEL POST OR FOURTH-CLASS MAIL—*Continued.*

at any other point thereon, or at the office from which the route starts, or for delivery on any other rural route starting from the same office.

Zones—Parcel Post Guide and Maps—For parcel post purposes the United States is divided into units of area thirty minutes square. Such units form the basis of the eight postal zones. To ascertain in which zone a post-office is located from the office of mailing, a parcel post guide, costing 55 cents, and map, costing 20 cents, are jointly used. The guide applies to all offices, but a separate map is required for each unit. A zone key is furnished with the guide and makes the map unnecessary. The guide and maps may be purchased by sending a postal money order to the Third Assistant Postmaster-General, Washington, D. C. Stamps are not accepted.

Alaska, Hawaiian, and Philippine Islands, etc.—The eighth zone rate of 12 cents for each pound or fraction thereof on all parcels weighing more than 4 ounces (except books, seeds, cuttings, bulbs, roots, scions, and plants, weighing 8 ounces or less) applies (1) between the United States and the Hawaiian Islands; (2) between the United States and its postal agency at Shanghai, China; (3) between any two points in Alaska and between any point in Alaska and any other point in the United States; (4) between the United States and the Canal Zone; (5) between the United States and the Philippine Islands; (6) to, from, or between Guam, Tutuila, and Manua and other islands of the Samoan group east of longitude 171° west of Greenwich, and the United States and its other possessions; (7) between the United States and its naval vessels stationed in foreign waters.

Canada, Cuba, Mexico, and Republic of Panama—The rate of 12 cents for each pound or fraction thereof also applies to fourth-class matter, including seeds, cuttings, bulbs, roots, scions, and plants (but excepting books and other printed matter on which the rate is 1 cent for each two ounces or fraction thereof in all cases), weighing more than four ounces and not exceeding 4 pounds 6 ounces when mailed to Canada, Mexico, Cuba, and the Republic of Panama. (Parcels weighing up to 11 pounds may be sent to Mexico and the Republic of Panama as foreign parcel post mail under the parcel post conventions with those countries.)

The Limit of Weight of fourth-class matter is 50 pounds for parcels mailed for delivery within the first and second zones, and 20 pounds for all other zones.

Limit of Size—Parcel post matter may not exceed 84 inches in length and girth combined. In measuring a parcel the greatest distance in a straight line between the ends (but not around the parcel) is taken as its length, while the distance around the parcel at its thickest part is taken as its girth. For example, a parcel 35 inches long, 10 inches wide, and 5 inches high measures 65 inches in length and girth combined.

Name and Address of Sender—A parcel of fourth-class matter may not be accepted for mailing unless it bears the name and address of the sender, which should be preceded by the word "From."

Additions to Fourth-Class Mail—There may be placed on fourth-class matter, or on the wrapper or cover, tag or label, any marks, numbers, names, or letters for purpose of description. There may be written on the blank leaves or cover of any book a simple manuscript dedication or inscription not in the nature of personal correspondence. Space sufficient for a legible address, postmark, the necessary postage stamps, and any words necessary for forwarding or return, must be left on the address side of parcels.

Inclosures—There may be inclosed with fourth-class matter a written or printed invoice showing the name and address of the sender and of the addressee; the names and quantities of articles inclosed together with inscriptions indicating, "for purpose of description," the price, style, stock number, size, and quality of the articles; the order or file number, date of order, and date and manner of shipment; and the initials or name of the salesman, or of the person by whom the articles were packed or checked.

Inscriptions, such as "Merry Christmas," "With best wishes," "Do not open until Christmas," or words to that effect, may be written on fourth-class mail, or on a card inclosed therewith.

Communications Attached to Parcels—When it is desired to send a communication with a parcel on which postage at the fourth-class rate has been fully prepaid, the communication may be placed in an envelope fully prepaid at the first-class rate and addressed to correspond with the address on the parcel and then be tied to or otherwise securely attached to the outside of the parcel in such manner as to prevent its separation therefrom and not to interfere with the address on the parcel. The stamps to cover the postage on the parcel must be affixed to the wrapper of the parcel, and those to pay the postage on the communication must be affixed to the envelope of the communication. Parcels to which such communications are attached are treated as fourth-class matter. Only one special delivery fee is required on such parcels sent as special delivery matter.

Public Library Books, otherwise mailable as parcel post matter, may bear any printed or written mark constituting a necessary inscription for the purpose of a permanent library record.

Proprietary Articles of Merchandise, such as harmless medicinal preparations, soaps, tobacco, food products, etc., put up in fixed quantities, in original sealed packages, by the manufacturer so as to allow examination of the packages in their simplest mercantile form and labelled in printing so as to show the nature of contents, quantity, and name of the manufacturer, are mailable at the fourth-class rates of postage. If such sealed packages are inclosed in an outer wrapper, the latter must not be sealed.

Meats and Meat-Food Products—Before meat or meat-food products of cattle, sheep, swine, or goats may be accepted for mailing from one State or Territory to another State or Territory, the certificate of inspection or exemption required by sec. 477, Postal Laws and Regulations, must be filed with the postmaster. Such certificate must be prepared and furnished by the sender.

Game—The dead bodies of any wild animals or birds, or parts thereof, including furs, skins, plumage, etc., lawfully killed and offered for shipment, may be accepted for mailing only when the parcels are plainly marked to show the actual nature of the contents and the name and address of the sender. The dead bodies, or parts thereof, of any wild animals or birds which have been killed or offered for shipment in violation of the laws of a State, Territory, or district, are unmailable, persons sending such articles and the addressees knowingly receiving them in violation of the law being liable to a fine of not more than $200.

Nursery Stock, including all field-grown florists' stock, trees, shrubs, vines, cuttings, grafts, scions, buds, fruit pits, and other seeds of fruit and ornamental trees or shrubs, and other plants and plant products for propagation, except field, vegetable, and flower seeds, bedding plants, and other herbaceous plants, bulbs, and roots, may be admitted to the mails only when accompanied with a certificate from a State or Government inspector to the effect that the nursery from which such nursery stock is shipped has been inspected within a year and found free from injurious insects, and the parcel containing such nursery stock is plainly marked to show the nature of the contents and the name and address of the sender.

Place of Mailing—Parcels of fourth-class matter weighing more than four ounces must be mailed at a post-office, branch post-office, named, numbered, or lettered station, or delivered to a rural or other carrier duly authorized to receive such matter. Parcels weighing four ounces or less may be deposited in letter or package boxes.

SENDER'S RECEIPTS FOR ORDINARY FOURTH-CLASS PARCELS.

The postmaster at the mailing office may, on payment of one cent, give the sender of an ordinary parcel of fourth-class mail a receipt therefor. A postage stamp to cover the charge for the receipt shall

be affixed thereto. The name and address of the addressee of the parcel shall be written in the receipt by the sender. (Section 458½, Postal Laws and Regulations.)

The purpose of this receipt is to provide senders of fourth-class parcels, when desired, a record evidencing their mailing, for which a fee of one cent is charged. Their issuance does not in any way insure the parcels against loss while in the mails and no receipt is obtained from the addressee upon delivery. Patrons who desire either of these latter facilities must be advised to insure their parcels.

Receipt will be given on tag form 3817, an initial supply of which will be furnished to all postmasters prior to September 1, 1915, the date this service is inaugurated. The name and address of the addressee shall be written on the tag by the sender who may place his own name thereon if he desires, and affix on the tag a one-cent postage stamp in the space provided. The tag shall be tied to the parcel before mailing. The postal employé accepting the article shall compare the address on the tag with that on the parcel, postmark the stamp to show the date of acceptance, detach the receipt, and deliver it to the sender.

The Firm Registration Book must be modified to provide such receipts when they are desired by firms and individuals mailing a number of parcels at one time. Each sheet must have affixed postage stamps at the rate of one cent for each parcel listed thereon, which stamps shall be postmarked and the sheet returned to the sender. These sheets are to be filled out by the sender and a carbon copy must not be filed at the post-office.

When such receipts are desired by patrons residing on rural routes, the parcel should be delivered to the rural carrier, payment being made at the time at the rate of one cent for each parcel, in addition to the postage. The carrier will obtain receipts at the post-office to which he is attached, affix stamp, postmark, and deliver the receipts to the senders on his next trip.

INSURANCE OF FOURTH-CLASS MAIL.

Fees and Conditions—Fourth-class mail shall not be registered, but may oe insured against loss in an amount equivalent to its actual value, but not to exceed $5 in any one case, on payment of a fee of 3 cents; not to exceed $25 on payment of a fee of 5 cents; not to exceed $50 on payment of a fee of 10 cents, or not to exceed $100 on payment of a fee of 25 cents, in addition to the postage, both to be prepaid by stamps affixed; but indemnity will not be allowed in cases of loss of such mail addressed to the Philippine Islands, unless the loss occurred in the postal service of the United States. Such mail may be insured at any post-office or station thereof, or by rural carriers. The sender must fill out an insurance tag, which will be furnished him on request, to be attached to the parcel. Return receipts for insured parcels may be obtained by indorsing the parcels "Return receipt desired." No indemnity is payable on account of mere partial damage. However, when an article is so damaged as to render it wholly worthless, it is regarded as lost, provided it was packed and indorsed in accordance with the postal requirements. No indemnity is paid for labor, workmanship, etc., in repairing partial damage.

COLLECT-ON-DELIVERY SERVICE.

Conditions and Fee—Parcels of fourth-class or parcel post matter may be sent C. O. D. from one money order post-office to another on payment of a fee of 10 cents in addition to the postage, both to be prepaid with stamps affixed. The amount to be collected and remitted to the sender must not exceed $100. The remittance is made by post-office money order, the fee therefor being included in the amount collected from the addressee. A C. O. D. tag furnished by the postmaster must be filled in by the sender and attached to the parcel. The C. O. D. fee also covers insurance against loss up to $50 actual value.

A receipt is given to the sender of a C. O. D. parcel at the time of mailing, but no return receipt is furnished, as the remittance shows that delivery has been made. Examination of contents of a C. O. D. parcel is not permitted until it has been receipted for and all charges paid. Indemnity for lost C. O. D. parcels is paid for the actual value, not to exceed $50, under the conditions governing the payment of indemnity for lost insured parcels.

PREPARATION AND WRAPPING OF MAIL MATTER.

Examination—Fourth-class or parcel post matter must be so wrapped or enveloped that the contents may be examined easily by postal officials. When not so wrapped, or when bearing or containing writing not authorized by law, the matter will be treated as of the first class. Nailed Boxes—Parcel post mail may be inclosed in boxes to which the lids are nailed or screwed, provided the lids can be readily removed with a chisel or screw driver for examination of contents.

Wrapping—All matter should be securely wrapped so as to bear transmission without breaking, or injuring mail bags, their contents, or the persons handling them. Many articles are damaged in the mails for the reason that they are not properly wrapped to withstand the necessary handling. Umbrellas, canes, golf sticks, and similar articles must be reinforced by strips of wood or otherwise sufficiently wrapped to withstand handling and transportation. Hats must be packed in strong boxes; if in ordinary pasteboard hat boxes they must be properly crated. But flowers, candies, etc., should be inclosed in strong and suitable boxes. Stove castings and pieces of machinery should be protected with excelsior or similar material and wrapped in cloth or strong paper or be properly boxed or crated. Mailable hides and pelts must be thoroughly wrapped to prevent the escape of grease. Parcels weighing 20 pounds or under are generally carried inside mail bags with other mail; those weighing over 20 pounds are usually carried outside mail bags. They should be wrapped with that understanding. Parcels improperly or insufficiently wrapped will not be accepted for transmission in the mails.

Harmful Articles not absolutely excluded from the mails, but which, from their form or nature, might, unless properly secured, destroy, deface, or otherwise damage the contents of the mail bag, or harm the person of any one engaged in the postal service, may be transmitted in the mails only when packed in accordance with the postal regulations. *Sharp-pointed or sharp-edged instruments or tools* must have their points and edges protected so that they cannot cut through their covering, and be thoroughly wrapped. *Powders and all pulverized dry substances* must be so wrapped that none of the contents of the package will sift out. *Pastes, salves, etc.*, not easily liquefiable must be inclosed in water-tight containers and placed in strong boxes and securely wrapped.

Liquids—Admissible liquids in packages not exceeding the limit of weight of fourth-class matter will be accepted for mailing when intended for delivery at the office of mailing or on a rural route starting therefrom when inclosed in a glass or metal container securely inclosed and heavily wrapped, provided it is not necessary to transport them over steam or electric railways.

Admissible liquids and oils, pastes, salves, or other articles easily liquefiable, will be accepted for mailing, regardless of distance, when they conform to the following conditions:

(*a*) *When in strong glass bottles holding 4 ounces or less*, the total quantity sent in one parcel shall not exceed 24 ounces, liquid measure. Each bottle shall be wrapped in paper or other absorbent substance and then all placed in a box made of cardboard or other suitable material and packed in a container made of double-faced corrugated pasteboard of good quality. The corners of the container must fit tightly and be reinforced with tape so as to prevent the escape of any liquid if the contents should be broken, and the whole parcel shall be securely wrapped with strong paper and tied with twine. Single bottles of liquid holding 4 ounces or less may also be packed as prescribed in the following paragraphs (*b*) and (*c*):

PARCEL POST OR FOURTH-CLASS MAIL—*Continued.*

(*b*) *When in glass bottles holding more than 4 ounces*, the total quantity sent in one parcel shall not exceed 16 ounces liquid measure. The bottle must be very strong and must be inclosed in a block or tube of metal, wood, papier mâché or similar material; and there must be provided between the bottle and the block or tube a cushion of cotton, felt, or other absorbent. The block or tube, if of wood or papier mâché, must be at least one-eighth of an inch thick for bottles holding 8 ounces or less, and at least three-sixteenths of an inch thick for bottles holding more than 8 ounces. The block or tube must be rendered watertight by an application on the inside of paraffin or other suitable substance and must be closed by a screw top cover with sufficient screw threads to require at least one and one-half complete turns before it will come off. The cover must be provided with a washer, so that no liquid could escape if the bottle should be broken. Any number of bottles separately packed as herein prescribed may be included in a single package if the limit of weight and size for fourth-class matter be not exceeded.

(*c*) *Bottles containing liquid* may also be packed in strong and tight receptacles of wood, metal, or waterproof corrugated pasteboard. Space must be left all around the bottle, which must be filled with bran, sawdust, or other absorbent material in sufficient quantity to absorb all the liquid if the bottle should get broken.

(*d*) *When in a metal container*, the weight limit of the parcel is the same as for other fourth-class matter. The container must be securely sealed and inclosed in a strong box.

(*e*) When in parcels weighing more than 20 pounds, mailable liquids in securely sealed glass bottles or metal cans will be accepted for mailing to offices in the first and second zones when packed in strong boxes and surrounded with sawdust or other suitable substances to protect the contents from breakage. All such packages to be marked "FRAGILE—THIS SIDE UP," or with similar inscriptions and to be transported outside of mail bags.

All packages containing liquid must be marked "FRAGILE."

Fragile Articles—Articles easily broken must be very securely wrapped for safe transmission. Among such articles are: Amber, cakes, candies, chalk, china, combs, clocks, delicate mechanisms, fans, flowers, fountain pens, hats, instruments of precision, millinery, musical instruments, pipes, plaster-of-paris articles, plumes, pottery, porcelain, phonographs and phonograph records, test tubes, typewriters, watches, wax articles, etc. *Glass, crockery, fragile toys, and other fragile articles* must be so packed as to prevent the escape of particles or pieces from the packages if broken in transit. *Cigars* should be packed in a manner to prevent damage by shock or jar. *Maps, drawings, paintings, etc.*, must be suitably protected with stout material to prevent damage. When not flat, they should be rolled around a stout stick and carefully wrapped or inclosed in a strong pasteboard tube. All such articles should be marked "FRAGILE." Eggs will be accepted for local delivery when so packed in a basket or other container as to prevent damage to other mail. Eggs will be accepted for mailing regardless of distance when each egg is separately wrapped and surrounded with excelsior, cotton, or other suitable material and packed in a strong container made of double-faced corrugated pasteboard, metal, wood, or other suitable material and wrapped so that nothing can escape from the package. All such parcels shall be labeled "EGGS." Eggs in parcels weighing more than 20 pounds will be accepted for mailing to offices in the first and second zones when packed in crates, boxes, baskets, or other containers having tight bottoms to prevent the escape of anything from the packages and so constructed as properly to protect the contents. Such packages are to be marked "EGGS—THIS SIDE UP," and to be transported outside of mail bags.

Perishable Articles—Parcels containing perishable articles shall be marked "PERISHABLE." Articles likely to spoil within the time reasonably required for transportation and delivery shall not be accepted for mailing. *Butter, lard, and perishable articles*, such as fish, fresh meats, dressed fowl, vegetables, fruits, berries, and articles of a similar nature which decay quickly, when so packed or wrapped as to prevent damage to other mail, will be accepted for local delivery either at the office of mailing or on any rural route starting therefrom. When inclosed in an inner cover and a strong outer cover of wood, metal, heavy corrugated pasteboard, or other suitable material, and wrapped so that nothing can escape from the package, they will be accepted for mailing to all offices to which in the ordinary course of mail they can be sent without spoiling. *Butter, dressed fowl, vegetables, fruits*, and other perishable articles in parcels weighing more than 20 pounds will be accepted for mailing to offices in the first and second zones when suitably wrapped or inclosed and packed in crates, boxes, or other suitable containers having tight bottoms to prevent the escape of anything from the package, and so constructed as properly to protect the contents. All such parcels to be transported outside of mail bags. Vegetables and fruits which do not decay quickly will be accepted for mailing to any zone if packed so as to prevent damage to other mail.

Forwarding and Return—A new prepayment of postage at the rate applicable between the forwarding office and the one to which fourth-class matter is to be forwarded must be made by the addressee or by some one for him each time it is forwarded. A new prepayment must likewise be made before undeliverable fourth-class matter may be returned to the sender.

Requests for Further Information should be addressed as follows: Third Assistant Postmaster-General, Division of Classification, relative to the classification and admissibility of matter as parcel post mail, rates of postage, limit of weight and size, permissible inclosures and additions, attaching communications to parcels, etc. Third Assistant Postmaster-General, Division of Registered Mails, relative to the insurance and C. O. D. features. Second Assistant Postmaster-General, Division of Railway Mail Service, relative to the admissibility to the mails and wrapping of matter which from its form or character would be liable to injure the mails or the person of postal employés.

Unmailable Matter—Matter manifestly obscene, lewd, or lascivious; articles intended for preventing conception or for procuring abortion; articles intended for indecent or immoral purposes, and all matter otherwise mailable by law, the outside cover or wrapper of which bears any delineations or language of a libellous, scurrilous, defamatory, or threatening character, is declared non-mailable by law.

Spirituous, vinous, malted, fermented or other intoxicating liquors of any kind; poisons of every kind, and articles and compositions containing poison (except as prescribed in par. 4, sec. 472), and poisonous animals, insects, and reptiles, and explosives of every kind, and inflammable materials, including matches, moving picture films (unless made of cellulose-acetate), gasoline, naphtha, benzine, denatured alcohol, and all liquids having flash point at or below 80° F., and infernal machines, and mechanical, chemical, or other devices or compositions which may ignite or explode, and disease germs or scabs (except as prescribed in sec. 473), and other natural or artificial articles, compositions, or materials of whatever kind which may kill, or in anywise hurt, harm or injure another, or damage, deface, or otherwise injure the mail or other property, live animals (except as prescribed in sec. 476), guano or any article exhaling bad odor, whether sealed as first-class matter or not, shall not be admitted to the mails. (Par. 2, sec. 472.)

Poisons, Explosives, Inflammable Materials, Dangerous Articles, Intoxicating Liquors, Etc.—Section 472. All kinds of poison and all articles and compositions containing poison, and all poisonous animals, insects and reptiles, and explosives of all kinds and inflammable materials, and infernal machines and mechanical, chemical or other devices or compositions which may ignite or explode, and all disease germs or scabs, and all other natural or artificial articles, compositions or materials of whatever kind which may kill or in anywise hurt,

harm, or injure another, or damage, deface, or otherwise injure the mails or other property, whether sealed as first-class matter or not, are hereby declared to be nonmailable matter, and shall not be conveyed in the mails or delivered from any post-office or station thereof, nor by any letter carrier; but the Postmaster-General may permit the transmission in the mails, under such rules and regulations as he shall prescribe as to preparation and packing, of any article hereinbefore described which are not outwardly or of their own force dangerous or injurious to life, health or property: *Provided*, That all spirituous, vinous, malted, fermented or other intoxicating liquors of any kind, are hereby declared to be nonmailable and shall not be deposited in or carried through the mails. Whoever shall knowingly deposit or cause to be deposited for mailing or delivery, or shall knowingly cause to be delivered by mail according to the direction thereon, or at any place at which it is directed to be delivered by the person to whom it is addressed, anything declared by this section to be nonmailable unless in accordance with the rules and regulations hereby authorized to be prescribed by the Postmaster-General, shall be fined not more than one thousand dollars, or imprisoned not more than two years, or both; and whoever shall knowingly deposit or cause to be deposited for mailing or delivery, or shall knowingly cause to be delivered by mail according to the direction thereon, or at any place to which it is directed to be delivered by the person to whom it is addressed, anything declared by this section to be nonmailable, whether transmitted in accordance with the rules and regulations authorized to be prescribed by the Postmaster-General or not, with the design, intent, or purpose to kill, or in anywise hurt, harm, or injure another, or damage, deface, or otherwise injure the mails or other property, shall be fined not more than five thousand dollars, or imprisoned not more than ten years, or both.

2. Spirituous, vinous, malted, fermented, or other intoxicating liquors of any kind, poisons of every kind, and articles and compositions containing poison (except as prescribed in the fourth paragraph hereof), and poisonous animals, insects, and reptiles, and explosives of every kind, and inflammable materials (including matches, kerosene oil, gasoline, naphtha, benzine, turpentine, denatured alcohol, etc.), and infernal machines, and mechanical, chemical or other devices or compositions which may ignite or explode, and disease germs or scabs (except as prescribed in sec. 473), and other natural or artificial articles, compositions, or materials of whatever kind which may kill, or in anywise hurt, harm, or injure another, or damage, deface, or otherwise injure the mail or other property, live animals (except as prescribed in sec. 476), raw hides or pelts, guano, or any article exhaling bad odor, whether sealed as first-class matter or not, shall not be admitted to the mails.

3. Liquids not spirituous, vinous, malted, fermented, or otherwise intoxicating (including samples of altar or communion wine used in church services), and not liable to explosion or spontaneous combustion or ignition by shock or jar, and not inflammable, fruits or vegetable matter liable to decomposition, comb honey, soft soap, paste or confections, ointments, salves, and articles of similar consistency, may be admitted to the mails for transmission in the domestic mails when inclosed in packages in conformity with the conditions prescribed in secs. 474 and 475.

4. Medicines and anaesthetic agents, which are not outwardly or of their own force dangerous or injurious to life, health or property, and not in themselves unmailable, may be admitted to the mails for transmission in the domestic mails when inclosed in packages in conformity with the conditions prescribed in Parcel Post Regulations; *Provided*, That the terms "medicines" and "anaesthetic agents" shall not be construed to mean poisons; *Provided further*, That the article mailed bears the label or superscription of the manufacturer thereof, or dealer therein, or of the licensed physician, surgeon, dentist, or veterinarian preparing or prescribing the same.

FOREIGN MAILS.

POSTAGE RATES AND CONDITIONS—See Exceptions Below.

THE rates of postage to all foreign countries and colonies except Canada, Cuba, Mexico and Panama are as follows:

Letters	first ounce or less, 5 cents; each additional ounce	3 cents.
Postal cards, each		2 cents.
Newspapers and other printed matter, per 2 ounces		1 cent.
Commercial papers (such as legal and insurance papers, deeds, bills of lading, invoices, manuscript for publication, etc.)	Packets not in excess of 10 ounces	5 cents.
	Packets in excess of 10 ounces, for each 2 ounces or fraction thereof	1 cent.
Samples of merchandise.	Packets not in excess of 4 ounces	2 cents.
	Packets in excess of 4 ounces, for each 2 ounces or fraction thereof	1 cent.
Registration fee on letters or other articles		10 cents.

On printed matter and commercial papers the limit of weight is 4 pounds 6 ounces, except that single volumes of books to Salvador, Canada, Mexico, Cuba, and Panama, are unrestricted as to weight. Size—The limit of size is 18 inches in any one direction, except that printed matter or commercial papers in rolls may be 30 inches long by 4 inches in diameter.

Ordinary letters for countries of the Postal Union (except Canada and Mexico) will be forwarded, whether any postage is prepaid on them or not. All other mailable matter must be prepaid at least partially. Domestic rates apply to matter for Porto Rico, Guam, Philippine Islands, Cuba, "Canal Zone," Republic of Panama, Tutuila, Hawaii, Shanghai City, U. S. Naval Vessels and officers and men of the U. S. Navy in the U. S. Naval Hospital, Yokohama, Japan.

EXCEPTIONS.

GREAT BRITAIN AND IRELAND, NEWFOUNDLAND, BAHAMAS, BARBADOS, BRITISH HONDURAS, DUTCH WEST INDIES, AND LEEWARD ISLANDS.

The rate on letters for these countries is two cents for each ounce or fraction. The Postal Union rates apply to postal cards, post cards, printed matter, commercial papers and samples.

GERMANY.*

The postage rate on letters for Germany by direct ocean transportation is two cents an ounce. Letters paid at the two-cent rate are despatched only by steamers able to land the mails at a German port. Letters paid at the Postal Union rate are despatched by the quickest route.

A fast steamer sailing for Germany via Plymouth and Cherbourg carries letters for Germany prepaid at the Postal Union rate and at the two-cent rate—the letters paid at the five-cent (Postal Union) rate are landed at Plymouth (the quickest route), whereas the letters paid at the two-cent rate are carried through to Germany by the transatlantic steamer.

The Postal Union rates apply to postal cards, post cards, printed matter, commercial papers and samples regardless of the route by which sent, also to letters despatched via England and France.

*The 2-cent letter rate to Germany is suspended owing to war. All letters for Germany are now subject to the Postal Union rate of 5 cents for the first ounce or less and 3 cents for each additional ounce or fraction thereof.

FOREIGN MAILS—*Continued.*

CANADA.

Letters, two cents for each ounce or fraction of an ounce.

Postal cards and post cards, one cent.

Double postal cards (with paid reply), two cents.

Second-class matter (newspapers and periodicals), one cent for each 4 ounces or fraction thereof. No limit of weight.

Printed matter (except second-class), one cent for each 2 ounces or fraction thereof. Limit of weight 4 pounds 6 ounces, except for single volumes of printed books. Packages of miscellaneous printed matter and packages of books weighing over 4 pounds but not over 4 pounds 6 ounces may also be sent as fourth-class matter at the rate of 12 cents a pound.

Fourth-class matter (domestic parcel post) not exceeding 4 ounces in weight is subject to the rate of one cent for each ounce or fraction of an ounce, and when exceeding 4 ounces in weight is subject to the rate of 12 cents a pound or fraction thereof. Packages of seeds, plants, etc., not exceeding 4 ounces in weight are subject to the rate of one cent for each ounce or fraction of an ounce, and when exceeding 4 ounces are subject to the rate of 12 cents a pound or fraction thereof. Limit of weight 4 pounds 6 ounces, except for a single book.

Commercial papers, samples, printed books and miscellaneous printed matter may be mailed at the Postal Union postage rates and under the conditions applicable to such articles in foreign mails.

Any mailable matter may be registered, but cannot be sent as insured mail.

Sealed articles, other than letters in their usual and ordinary form, are unmailable. But unsealed packages may contain, in sealed receptacles, articles which cannot be safely transmitted in unsealed receptacles; provided the contents of the closed receptacles are plainly visible or are precisely stated on the covers of the closed receptacles and with the packages so wrapped that the outer cover can be easily opened.

Prepayment of postage upon any article, except the reply half of a double postal card, can be effected only by means of United States postage stamps. Letters will be despatched if prepaid one full rate of postage. Postage on other articles must be prepaid in full.

CUBA.

Letters, 2 cents for each ounce or fraction of an ounce.

Postal cards and post cards, 1 cent.

Double post cards (with paid reply), 2 cents.

Second-class matter (newspapers and periodicals), 1 cent for each 4 ounces or fraction thereof. No limit of weight.

Printed matter (except second-class), 1 cent for each 2 ounces or fraction thereof. Limit of weight 4 pounds 6 ounces, except for single volumes of printed books Packages of miscellaneous printed matter and packages of books weighing over 4 pounds but not over 4 pounds 6 ounces may also be sent as fourth-class matter at the rate of 12 cents a pound.

Fourth-class matter (domestic parcel post) not exceeding 4 ounces in weight is subject to the rate of 1 cent for each ounce or fraction of an ounce, and when exceeding 4 ounces in weight is subject to the rate of 12 cents a pound or fraction thereof. Packages of seeds, plants, etc., not exceeding 4 ounces in weight are subject to the rate of 1 cent for each ounce or fraction of an ounce, and when exceeding 4 ounces are subject to the rate of 12 cents a pound or fraction thereof. Limit of weight 4 pounds 6 ounces, except for a single book.

Commercial papers, samples, printed books and miscellaneous printed matter may be mailed at the Postal Union postage rates and under the conditions applicable to such articles in foreign mails.

Any mailable matter may be registered, but cannot be sent as insured mail.

Liquids and fatty substances (except samples) are unmailable.

Sealed articles, other than letters in their usual and ordinary form, are unmailable. But unsealed packages may contain, in sealed receptacles, articles which cannot be safely transmitted in unsealed receptacles; provided the contents of the closed receptacles are plainly visible or are precisely stated on the covers of the closed receptacles and with the packages so wrapped that the outer cover can be easily opened.

Prepayment of postage upon any article, except the reply half of a double postal card, can be effected only by means of United States postage stamps. Letters and postal cards must be despatched whether prepaid or not. Postage on other articles (except fourth-class matter) must be prepaid at least in part, and on fourth-class matter in full.

MEXICO.

Letters, 2 cents for each ounce or fraction of an ounce.

Postal cards and post cards, 1 cent.

Double postal cards (with paid reply), 2 cents.

Second-class matter (newspapers and periodicals), 1 cent for each 4 ounces or fraction thereof. No limit of weight.

Printed matter (except second-class), 1 cent for each 2 ounces or fraction thereof. Limit of weight 4 pounds 6 ounces, except for single volumes of printed books. Packages of miscellaneous printed matter and packages of books weighing over 4 pounds but not over 4 pounds 6 ounces may also be sent as fourth-class matter at the rate of 12 cents a pound.

Fourth-class matter (domestic parcel post) not exceeding 4 ounces in weight is subject to the rate of 1 cent for each ounce or fraction of an ounce and when exceeding 4 ounces in weight is subject to the rate of 12 cents a pound or fraction thereof. Packages of seeds, plants, etc., not exceeding 4 ounces in weight are subject to the rate of 1 cent for each 2 ounces or fraction of an ounce, and when exceeding 4 ounces are subject to the rate of 12 cents a pound or fraction thereof. Limit of weight 4 pounds 6 ounces, except for a single book.

Customs declarations must be attached to all parcels of fourth-class matter and all packages sent by foreign parcel post.

Commercial papers, samples, printed books and miscellaneous printed matter may be mailed at the Postal Union postage rates and under the conditions applicable to such articles in foreign mails.

Any mailable matter may be registered, but cannot be sent as insured mail.

Sealed articles, other than letters in their usual and ordinary form, are unmailable. But unsealed packages may contain, in sealed receptacles, articles which cannot be safely transmitted in unsealed receptacles; provided the contents of the closed receptacles are plainly visible or are precisely stated on the covers of the closed receptacles and with the packages so wrapped that the covers can be easily opened.

Prepayment of postage upon any article, except the reply half of a double postal card, can be effected only by means of United States postage stamps. Letters will be despatched if prepaid one full rate of postage. Postage on other articles must be prepaid in full.

Matter addressed to Mexico must, in all cases, bear as part of the address the name of the State in which the city or town is located. For example, Acapulco, *Guerrero,* Mexico; not Acapulco, Mexico.

PANAMA.

Letters, 2 cents for each ounce or fraction of an ounce.

Postal cards and post cards, 1 cent.

Double postal cards (with paid reply), 2 cents.

Second-class matter (newspapers and periodicals), 1 cent for each 4 ounces or fraction thereof. No limit of weight.

FOREIGN MAILS—*Continued.*

Printed matter (except second-class), 1 cent for each 2 ounces or fraction thereof. Limit of weight 4 pounds 6 ounces, except for single volumes of printed books. Packages of miscellaneous printed matter and packages of books weighing over 4 pounds but not over 4 pounds 6 ounces may also be sent as fourth-class matter at the rate of 12 cents a pound.

Fourth-class matter (domestic parcel post) not exceeding 4 ounces in weight is subject to the rate of 1 cent for each ounce or fraction of an ounce, and when exceeding 4 ounces in weight is subject to the rate of 12 cents a pound or fraction thereof. Packages of seeds, plants, etc., not exceeding 4 ounces in weight are subject to the rate of 1 cent for each ounce or fraction of an ounce, and when exceeding 4 ounces are subject to the rate of 12 cents a pound or fraction thereof. Limit of weight 4 pounds 6 ounces, except for a single book.

Parcels up to 11 pounds in weight may also be sent by foreign parcel post, under the conditions of the parcel post convention with Panama.

Customs declarations must be attached to all parcels of fourth-class matter and all packages sent by foreign parcel post.

Commercial papers, samples, printed books and miscellaneous printed matter may be mailed at the Postal Union postage rates and under the conditions applicable to such articles in foreign mails.

Any mailable matter may be registered, but cannot be sent as insured mail.

Liquids and fatty substances (except samples) are unmailable.

Sealed articles, other than letters in their usual and ordinary form, are unmailable. But unsealed packages may contain, in sealed receptacles, articles which cannot be safely transmitted in unsealed receptacles; provided the contents of the closed receptacles are plainly visible or are precisely stated on the covers of the closed receptacles and with the packages so wrapped that the cover can be easily opened.

Prepayment of postage upon any article, except the reply half of a double postal card, can be effected only by means of United States postage stamps. Letters and postal cards must be despatched whether prepaid or not. Postage on other articles (except fourth-class matter) must be prepaid at least in part, and on fourth-class matter in full.

SHANGHAI, CHINA.

Articles intended for delivery in the city of Shanghai, China, are subject to United States domestic postage rates and conditions, but letters specially addressed via Europe-Siberia are subject to the foreign rate. Certain matter may also be sent by *foreign* parcel post.

UNITED STATES NAVAL VESSELS.

Mail matter for officers or members of the crews of United States vessels of war stationed abroad is subject to domestic postage rates and conditions. Packages of fourth-class matter exceeding 4 ounces in weight are subject to the rate of 12 cents for each pound or fraction of a pound *when the vessels are stationed in foreign waters.* Articles should be addressed "U. S. S. (name of vessel), care of Postmaster, New York, N. Y." and be fully prepaid. Mail so addressed will be forwarded to the vessels, whether at domestic or foreign ports. Express packages will not be received unless they conform to the postal regulations and are placed in the mail with the postage properly prepaid.

UNITED STATES NAVAL HOSPITAL, YOKOHAMA, JAPAN.

Mail for officers and men of the United States Navy in the United States Naval Hospital at Yokohama, is subject to domestic rates and conditions, the same as that for officers and men on U. S. naval vessels stationed abroad.

SAMPLES OF MERCHANDISE

must be bona fide trade samples without any salable value. **Wrapping**—Samples of merchandise must be wrapped so that the contents may be easily examined without injury to wrappers. **Permissible Writing**—They must bear no writing except the name or the social position of the sender, a manufacturer's or trade mark, numbers, prices and indications relating to the weight, size, dimensions and quantity to be disposed of, and words which are necessary to precisely indicate the origin and nature of the merchandise. **Weight**—Packages of samples must not exceed 12 ounces in weight. **Size**—The size must not exceed 12 inches in length, 8 inches in breadth, and 4 inches in depth, except when in the form of a roll, they may be 12 inches in length and 6 inches in diameter. **Postage**—The postage on samples is 2 cents for the first 4 ounces or less, and 1 cent for each additional 2 ounces or fraction of 2 ounces. Register all valuable articles. Registration fee 10 cents.

PARCEL POST.

Postage, 12 cents a pound or fraction thereof; greatest length (unless specially noted below), 3 feet 6 inches; greatest length and girth combined (unless specially noted below), 6 feet; limit of weight (unless specially noted below), 11 pounds; value (unless specially noted below), not limited; registration fee, 10 cents.

Unsealed packages of mailable merchandise may be sent by parcel post to Dutch Guiana (parcels cannot be registered. See item "Customs Declarations"), Uruguay (parcels cannot be registered. See item "Customs Declarations"), Hungary, Bermuda, Jamaica, including Cayman Islands, Turks Island, including Caicos Islands, Barbados (parcels cannot be registered), the Bahamas, British Honduras, Mexico (limit of size, 2 feet in length, 4 feet in girth; limit of weight for places named in "Postal Guide," 11 pounds; for other places, 4 pounds 6 ounces), Leeward Islands (Antigua, Anguilla, Barbuda, Dominica, Montserrat, Nevis, Redonda, St. Kitts and the Virgin Islands), Colombia (limit of size, 2 feet in length, 4 feet in girth), Costa Rica, Salvador (see item "Customs Declarations"), British Guiana, Danish West Indies (St. Croix, St. John and St. Thomas), and the Windward Islands (Grenada, Grenadines, St. Lucia, and St. Vincent), Trinidad, including Tobago; Venezuela (see item "Customs Declarations"), Bolivia, Ecuador, Peru and Chile, Newfoundland, including Labrador. Parcels for Labrador can only be forwarded during the months of July, August and September; Honduras (Republic of), *Germany, including Cameroon (Kamerun), Toga, German Samoa, German East Africa and German Southwest Africa; Greece (parcels cannot be registered), Italy, including Erythrea, Benadir, Bengazi and Tripoli in Tripoli (Barbary) and Republic of San Marino and Islands of Carpatos and Rhodes. Liberia, Netherlands (parcels cannot be registered. See item "Customs Declarations"), New Zealand, including Cook and Fanning Islands; Nicaragua, Guatemala, Norway, Japan, including Formosa, Karafuto (Japanese Saghalien), and Korea (Chosen); Hongkong, including Kowloon, Austria, including Durazzo, San Giovanni de Medua, Santi Quaranta, Scutari, and Valona, all in Albania*, Gibraltar (parcels cannot be registered. See item "Customs Declarations"), French Guiana (parcels cannot be registered. See item "Customs Declarations"), Belgium, ‡France, excluding Algeria and Corsica (parcels cannot be registered. See item "Customs Declarations"), Great Britain and Ireland (parcels cannot be registered), Australia, including Tasmania, Denmark, including Faroe Islands and Iceland; Sweden. †China—Parcels addressed for the following places are mailable subject to the rate and conditions applicable to parcels for HONGKONG: Aberdeen, Amoy, Au Tan, Canton, Chung Chow (i. e., Cheungchow or Cheung Chau, colony of Hongkong), Foochow, Hoihow, Hongkong, Kowloon, Liu Kung Tau, Ningpo, Ping Shan, Shanghai, Sai Kung, Stanley, Sha Tin, Shung Shui, Shoo Tow Kok, Swatow, Tai-o, Tai-Po, and Wei Hai Wei. Parcels addressed for delivery in the

* Service suspended on account of war at time ALMANAC was printed.

† Only for places here mentioned. ‡ Service to the French Departments (states) of Aisne, Ardennes, Aube, Haute-Marne, Haute-Saonne, Marne, Neurthe et Moselle, Meuse, Nord, Oise, Pas de Calais, Seine-et-Marne, Somme, and Vosges suspended.

FOREIGN MAILS—*Continued.*

following places are mailable subject to the rate and conditions applicable to parcels for JAPAN: Amoy, Changsha, Cheefoo, Foochow, Hangchow, Kiukiang, Newchwang, Peking, Shanghaikawan, Shasi, Soochow, Tientsin, Tongku, and Wuhu, China; or at the following places in Manchuria: Antoken (Antung), Bujum (Fushun), Choshun (Changchun), Dairen (Tairen, Talien, formerly Dalny), Daisekkio (Tashichiao), Daitoko (Tatungkou), Furanten (Pulentien), Gwaboten (Wafantien), Gaihei (Kaiping), Giukaton (Newchatun), Hishiko (Pitzuwo), Hoten (Mukden), Honkeiko (Pengshihu), Howojreo (Fenghuangcheng), Kaigen (Kalyuen), Kaijo (Haimueng), Kinshu (Chinchow), Koshurei (Kungchuling), Riujuton (Liushuton), Riojun (Port Arthur), Rioyo (Liaoyang), Senkinsai (Chienchinsai), Shiheigai (Ssupingchieh), Shinminfu (Shingmingfu), Shoto (Changtu), Sokato (Tsaohokow), Sokaton (Suchiatun), Taikozan (Takushan), Tetsurei (Tiehling), Yendai (Yentai), Yugakujreo (Hsiungyocheng). Parcels addressed for delivery in the following places are mailable subject to the rate and conditions applicable to parcels for GERMANY, and are included in closed mails made up for the German Post-Office at Shanghai: Hankow, Nanking, Shanghai, Chingkaing, Tsinanfoo, Weihsien, Kiowchow (including Tsingtow, Litsun Mecklinburghaus, Shatsikoo, Sifang, Taputow, Tsangkow, Tsingtoo-Gr. Hafen, Tsingtow-Tabatau). Parcels for the city of Shanghai to include only such matter as may be inadmissible to domestic parcel post mail for United States Postal Agency at Shanghai, e. g., books, etc.; Hayti, Brazil, Dominican Republic, Dutch West Indies: Curacao and Aruba, Bonaire, Saba, St. Eustatius and the Dutch part of St. Martins (parcels cannot be registered. See item "Customs Declarations"); French West Indies: Martinique, Guadeloupe (including Marie Galante, Deseade, Les Saints, St. Bartholomew and the French portion of St. Martins) (parcels cannot be registered. See item "Customs Declarations"), Panama. Parcels must be wrapped so as to permit their contents to be easily examined by postmasters. The presence, in an unsealed parcel, of sealed receptacles containing mailable articles which cannot be safely transmitted in the unsealed receptacles, will not render the parcel unmailable, provided the contents of the sealed receptacles are plainly visible, or are unmistakably indicated by the method of packing or by a precise statement on the covers. But such sealed receptacles will not be admitted to the parcel post unless inclosed in an outside cover open to inspection. Any article absolutely prohibited admission to the regular mails for any country is also inadmissible to parcel post mails for that country; but no article is excluded from parcel post mails solely because it is dutiable in the country of destination. ‡Liquids, poisonous, explosive, and inflammable substances are excluded.

CUSTOMS DECLARATIONS.

A "Customs Declaration' Form 4402 (which will be furnished on application at the post-office or a station) must be properly and fully filled out, stating the actual contents, value, etc., of the parcel. General terms, such as "merchandise" or "samples," will not answer; the contents must be accurately described. "Customs Declarations" must be firmly attached to the cover of the parcel, but not pasted or affixed so that they will seal the package and prevent examination of the contents without damaging the cover. In addition to being tied by means of a cord passing through the eyelet, the tag should be bound flat to the parcel (with the front or "declaration' side facing out), so that the tag cannot be used as a handle to lift the parcel while in transit.

Two (2) copies of the "declaration" (Form 4402) must be attached to each parcel for Dutch Guiana, Dutch West Indies, French West Indies, Netherlands, French Guiana, Gibraltar, Salvador, and Uruguay, and three (3) copies to each parcel for Venezuela.

France—Two copies of the special customs declaration, "Form No. 2 Bis" (4402½), showing in addition to the usual entries the gross weight of the parcel and net weight of the contents, must be attached to parcels for France. One copy may be pasted to the package, but the other copy must be affixed in such a manner that it can be readily removed at the exchange office where the mail is prepared for despatch to France.

‡ Liquids and oils, pastes, salves or other articles easily liquefiable are admissible to the parcel post mails for Austria, Brazil, Germany, Great Britain, and Norway, provided they are packed in accordance with the regulations prescribed for the admission of such substances to the United States domestic parcel post mails.

GENERAL REGULATIONS RESPECTING FOREIGN MAILS.

Rates and conditions to countries not in the Universal Postal Union are now the same as those to Universal Postal Union countries.

Postage can be prepaid upon articles (other than the reply half of double postal cards) only by means of the postage stamps of the country *in* which the articles are mailed. Hence articles mailed in one country addressed to another country which bear postage stamps of the country to which they are addressed are treated as if they had no postage stamps attached to them.

Unpaid letters received from the Postal Union and insufficiently prepaid correspondence of all kinds is chargeable with double the amount of the deficient postage.

Matter to be sent in the mails at less than letter rates must be so wrapped that it can be readily examined at the office of delivery, as well as the mailing office, without destroying the wrapper.

Packages of newspapers and periodicals sent in the mails to foreign countries are restricted to a single (outside) address. Those sent to Canada, Cuba, Mexico, Panama, and Shanghai (City), China, are transmissible as in domestic mails.

The United States two-cent postal card should be used for card correspondence with foreign countries (except Canada, Cuba, Mexico, Panama, and Shanghai City, to which countries the one-cent card is transmissible), but where these cards cannot be obtained, it is allowable to use for this purpose the United States one-cent postal card with a one-cent United States adhesive postage stamp attached thereto. Private cards can be used if conforming in size, etc., to Government cards, such cards should bear the words "post card."

Mail matter *of all kinds* received from any country of the Postal Union is required to be reforwarded at the request of the addressee, from one post-office to another, and in the case of articles other than parcel post packages, to any foreign country embraced in the Postal Union, without additional charge for postage.

All articles prohibited from domestic mails are also excluded from circulation in the mails to and from foreign countries. Postal cards or letters addressed to go around the world will not be forwarded, being prohibited.

FOREIGN (INTERNATIONAL) MONEY ORDERS.

When payable in any foreign country, as follows:

For sums from $0.01 to $10.00	10 cents	From $50.01 to $60.00	60 cents
From $10.01 to $20.00	20 "	" 60.01 to 70.00	70 "
" 20.01 to 30.00	30 "	" 70.01 to 80.00	80 "
" 30.01 to 40.00	40 "	" 80.01 to 90.00	90 "
" 40.01 to 50.00	50 "	" 90.01 to 100.00	1 dollar

NOTE—It should be understood that these tables are subject to change, it being the aim of the Post-Office Department to make reductions whenever conditions warrant such action.

POSTAL-SAVINGS SYSTEM.

INFORMATION FOR DEPOSITORS ANNOUNCED BY POST-OFFICE DEPARTMENT.

Object—1. The Postal-Savings System is established by authority of the act of Congress approved June 25, 1910, for the purpose of providing facilities for depositing savings at interest, with the security of the United States Government for repayment.

Safety—2. The faith of the United States is solemnly pledged to the payment of deposits made in postal-savings depository offices, with accrued interest thereon, as provided by the Postal-Savings act.

Who May Deposit—3. An account may be opened and deposits made by any person of the age of 10 years or over in his or her own name, or by a married woman in her own name and free from any control or interference by her husband.

4. Deposits will be accepted only from individuals, and no account will be opened in the name of any corporation, association, society, firm or partnership, or in the name of two or more persons jointly. No account will be opened in the name of one person in trust for or on behalf of another person or persons.

5. A person may open a postal-savings account at any depository post-office, but no person may at the same time have more than one postal-savings account either at the same office or at different offices.

6. All accounts shall be opened in person by the depositor or his authorized representative. After opening an account, a depositor may forward subsequent deposits to the post-office by registered mail or by money order made payable to the postmaster. See paragraph No. 26.

No Charges to Depositors—7. No charges or fees are collected or required from depositors in connection with the opening of accounts or the subsequent deposit or withdrawal of moneys.

How to Open an Account—8. When a person applies to open an account, he shall furnish the necessary information to enable the postmaster to fill out an application, which the depositor will then be required to sign.

Deposits—9. Deposits are evidenced by postal-savings certificates issued in fixed denominations of $1, $2, $5, $10, $20, $50, and $100, each bearing the name of the depositor, the number of his account, the date of issue, and the name of the depository office. The depositor shall sign a duplicate of each certificate, which the postmaster will retain.

10. No account may be opened for less than $1, nor will fractions of a dollar be accepted for deposit. (See paragraph 16 relative to postal-savings cards and stamps.)

11. No person is permitted to deposit more than $100 in any one calendar month nor to have a total balance to his credit at any time of more than $500 exclusive of accumulated interest.

12. Postal-savings certificates are not transferable or negotiable and are payable only to the person to whom issued, except as provided in paragraphs 27, 28, and 29.

13. On opening an account a depositor is supplied with an envelope in which he may keep his savings certificates. This envelope bears information for his guidance, and a blank ledger record on which an account of his deposits and withdrawals may be kept.

14. If a postal-savings certificate is lost or destroyed the depositor should notify the postmaster. Upon compliance by the depositor with the necessary requirements, a new certificate will be issued by the Third Assistant Postmaster-General if deemed proper.

15. Postmasters are not permitted to receive issued postal-savings certificates for safe-keeping.

Postal-Savings Cards and Stamps—16. Amounts less than $1 may be saved for deposit by purchasing 10-cent postal-savings cards and 10-cent postal-savings stamps. Each postal-savings card bears blank spaces in which such stamps may be affixed from time to time. A postal-savings card with nine postal-savings stamps affixed will be accepted as a deposit of $1 either in opening an account or in adding to an existing account.

17. Postal-savings cards and stamps are not valid for postage, and postmasters will not exchange them for postage stamps nor exchange postage stamps for postal-savings cards or stamps.

Interest—18. Interest at the rate of 2 per cent. per annum will be allowed on the amount represented by each postal-savings certificate, payable annually. Interest will not be paid for any fraction of a year.

19. Deposits will bear interest from the first day of the month next following that in which made.

20. Interest will continue to accrue annually on a postal-savings certificate as long as it remains outstanding, certificates being valid until paid, without limitation as to time.

21. Compound interest is not allowed on an outstanding certificate, but a depositor may withdraw interest accrued and make a new deposit, subject to the restriction that deposits at interest will not be received for less than $1.

Withdrawals—22. A depositor may at any time withdraw the whole or any part of the deposits to his credit, with any interest payable thereon, by surrendering, at the office of issue, postal-savings certificates, properly indorsed, for the amount to be withdrawn.

23. A depositor presenting a certificate for payment in full shall indorse it in the presence of the postmaster or his representative and surrender it. The postmaster or his representative, upon being satisfied as to the depositor's identity, will then make payment.

24. When a depositor desires to withdraw only a part of the amount represented by any certificate, the postmaster will cancel the certificate and issue a new certificate or certificates covering the amount remaining on deposit, which will bear interest from the first day of the following month.

25. When a depositor desires to withdraw the interest payable on any certificate, he will be required to give his receipt for the amount of the interest paid. The postmaster will enter on the back of the certificate the date of the interest payment.

Deposits Not Made in Person—26. When a depositor, for good and sufficient reason, is unable to appear in person to make an additional deposit, the amount to be deposited may be sent by a representative or forwarded by registered mail if the money order service is not available, by a money order made payable to the postmaster. Postal-savings accounts may be opened by mail. This important extension of the service will have the practical effect of bringing postal-savings facilities within the reach of every person in the United States. A person residing at a post-office not authorized to accept postal-savings deposits may open an account on or after that date by applying to his local postmaster, who will act as agent for a nearby post-office authorized to accept such deposits. After an account has been opened deposits may be made either in person, by a representative, by money order, or by registered mail if the money order service is not available.

Withdrawals Not Made in Person—27. When, for good and sufficient reason, a depositor is unable to appear in person to make a withdrawal, a blank order for the purpose will be furnished upon his application by mail or at the request of his representative. When the order has been properly filled out and signed by the depositor, his signature witnessed by a disinterested person, and the order returned to the postmaster, together with each certificate to be paid properly indorced, payment will be made to the depositor's representative, or a money order covering the amount withdrawn, less the money-order fee, will be forwarded to the depositor.

28. When a depositor who is unable to appear in person desires to withdraw the interest payable on any certificate, the blank order furnished will be accompanied by a receipt for the interest to be paid. Upon return of such papers, properly signed by the depositor, the postmaster will make payment as provided in paragraph 27.

Death of Depositor—29. In case of the death of a depositor the amount standing to his credit will be paid to the executor or administrator of his estate upon compliance with necessary requirements. In case of the death of a depositor intestate, where no formal administration is desired by his relatives, the

POSTAL-SAVINGS SYSTEM—*Continued.*

Third Assistant Postmaster-General may authorize the postmaster, upon obtaining an affidavit in proper form, to pay the amount to the persons entitled under the State laws to receive it.

Account of Woman Who Marries—30. A woman who opens an account and afterward marries should present her postal-savings certificates to the postmaster at the issuing office in order that the certificates may be indorsed as payable to her in her new name. The postmaster will receive no further deposits from a woman who marries and fails to comply with this requirement.

Postal-Savings Bonds—31. A depositor may exchange the whole or any part of his deposits in sums of $20, or any multiple of $20 up to and including $500, for United States registered or coupon bonds bearing interest at the rate of 2½ per cent. per annum, payable semi-annually, redeemable at the pleasure of the United States after one year from date of issue, and both principal and interest being payable 20 years from such date in United States gold coin. The exchange may be made as of January 1 and July 1 of each year.

32. A depositor desiring to convert his postal-savings deposits into bonds on January 1 and July 1 of any year shall make application to the postmaster at least one month previously on a form which will be supplied in triplicate for the purpose. At the time of making application the depositor shall indorse and surrender postal-savings certificates covering the amount of the bonds desired, and the postmaster will give him a receipt for the certificates. When the bonds applied for have been issued by the Secretary of the Treasury, he will forward them to the depositor. The exchange is considered as taking effect on the date when the bonds begin to bear interest (January 1 or July 1), and any yearly interest due on the certificates surrendered will be paid by the postmaster on or after that date.

33. Postal-savings deposits which have been exchanged for bonds are not counted as a part of the maximum of $500 allowed one depositor, and there is no limitation upon the amount of postal-savings bonds which may be acquired by a depositor.

34. Postal-savings bonds are exempt from all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority.

35. Postal-savings bonds can be procured only by the surrender of postal-savings deposits and will not be issued to persons who are not depositors, but whether in registered or coupon form they may, after receipt by the depositor, be sold or transferred at any time. A leaflet containing additional information concerning postal-savings bonds may be obtained from the postmaster.

Information—36. Further information concerning the Postal-Savings System may be obtained by application at any depository post-office or by addressing the Third Assistant Postmaster-General, Division of Postal Savings, Washington, D. C.

A person desiring to open a postal-savings account should visit the post-office in person, where full instructions will be given. If for any good reason he cannot visit the office a representative may be sent, who will be instructed how to proceed.

BOYCOTTING, BLACKLISTING, AND INTIMIDATION LAWS.

THE States having laws prohibiting *boycotting* in terms are Alabama, Colorado, Illinois, Indiana, and Texas.

The States having laws prohibiting *blacklisting* in terms are Alabama, Arizona, Arkansas, California, Colorado, Connecticut, Florida, Illinois, Indiana, Iowa, Kansas, Minnesota, Mississippi (applies to telegraph operators only), Missouri, Montana, Nevada, New Mexico, North Carolina, North Dakota, Oklahoma, Oregon, Texas, Utah, Virginia, Washington, and Wisconsin.

Boycotting and picketing by peaceful and lawful means are declared legal by a Federal statute.

A number of States have laws concerning *intimidation*, conspiracy against workingmen, and interference with employment, viz.: Alabama, Colorado, Connecticut, Delaware, Florida, Georgia, Idaho (applies to mine employés only), Illinois, Kansas, Kentucky, Louisiana, Maine, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nevada, New Hampshire, New Jersey, New York, North Dakota, Oklahoma, Oregon, Pennsylvania, Porto Rico, Rhode Island, South Dakota, Texas, Utah, Vermont, Washington, West Virginia and Wisconsin.

In the following States it is unlawful for an employer to exact any agreement, either written or verbal, from an employé not to join or become a member of a labor organization, as a condition of employment: California, Colorado, Connecticut, Idaho, Indiana, Louisiana, Massachusetts, Minnesota, Mississippi (applies to telegraph operators only), Nevada, New Jersey, Ohio, Oklahoma, Oregon, Pennsylvania, Porto Rico, South Carolina, Utah, and Wisconsin.

EIGHT-HOUR LAWS.

Alaska.—Eight hours constitute a day's labor on all public works and in all mines and workings smelting and reduction works, and at coke ovens.

Arizona.—Eight hours constitute a day's labor on all public works and in all mines and workings, smelting and reduction works, blast furnaces, rolling mills, etc.

Arkansas.—Eight hours constitute a day's work on public highways and bridges and for railway telegraph operators.

California.—Unless otherwise expressly stipulated, eight hours constitute a day's work. The time of service of all laborers, workmen, and mechanics employed upon any public works of, or work done for, the State, or for any political sub-division thereof, whether the work is to be done by contract or otherwise, and of employés in mines and smelters, is limited and restricted to eight hours in any one calendar day.

Colorado.—A day's work for all workingmen employed by the State, or any county, township, school district, municipality, or incorporated town, and for all employés in underground or open cut mines or workings, and in smelting and refining works, is restricted to eight hours.

Connecticut.—Eight hours of labor constitute a lawful day's work unless otherwise agreed. Railroad telegraph operators controlling the movement of trains may work but eight hours, except at stations kept open only in the daytime. Engineers, firemen, machinists and other mechanics employed in State institutions may work but eight hours, except in case of emergency.

Delaware.—Eight hours constitute a lawful day's work for all municipal employés of the city of Wilmington.

District of Columbia.—A day's work for all laborers and mechanics employed by the District of Columbia, or by any contractor or sub-contractor upon any public works of the District, is limited to eight hours.

Hawaii.—For all mechanics, clerks, laborers, and other employés on public works and in public offices eight hours of actual service constitute a day's work.

Idaho.—Eight hours' actual work constitute a lawful day's labor for manual laborers employed by the day on all State, county, and municipal works. Labor in mines and smelters is limited to eight hours per day.

Illinois.—Eight hours are a legal day's work in all mechanical employments, except on farms, and when otherwise agreed; the law does not apply to service by the year, month or week. Eight hours constitute a day's labor on the public highways.

Indiana.—Eight hours of labor constitute a legal day's work on the public roads, and for all classes of mechanics, workingmen, and laborers, excepting those engaged in agricultural and domestic labor. Overwork by agreement and for extra compensation is permitted.

Iowa.—Eight hours constitute a day's labor on the public roads.

Kansas.—Eight hours are a day's work for all laborers, mechanics, or other persons employed by or on behalf of the State or any county, city, township or other municipality.

Kentucky.—Eight hours constitute a day's work on all public works of the State.

Maryland.—No mechanic or laborer employed by the Mayor or City Council of Baltimore, or by any agent or contractor under them, shall be required to work more than eight hours as a day's labor.

Massachusetts.—Eight hours shall constitute a day's work for all laborers, workmen, and mechanics employed by or on behalf of the Commonwealth or any county therein, or of any city or town in the Commonwealth upon acceptance of the statute by a majority of voters present and voting upon the same at any general election.

Minnesota.—Eight hours constitute a day's labor for all laborers, workmen, or mechanics employed by or on behalf of the State, whether the work is done by contract or otherwise.

Mississippi.—Eight hours are a day's labor on highways.

Missouri.—Eight hours constitute a legal day's work. The law does not prevent an agreement to work for a longer or a shorter time and does not apply to agricultural laborers. It is unlawful for employers to work their employés longer than eight hours per day in mines and smelters, or as train despatchers, etc., on railroads, unless the office is open only during the daytime. Eight hours are a day's labor on highways, and on all public works in cities of the second class.

Montana.—Eight hours constitute a legal day's work for persons engaged to operate or handle hoisting engines at mines. The law applies only to such plants as are in operation sixteen or more hours per day, or at or in mines where the engine develops fifteen or more horse-power, or where fifteen or more men are employed underground in the twenty-four hours. A day's labor on public works and in smelters, underground mines and in railroad and other tunnels is limited to eight hours.

Nebraska.—Eight hours constitute a day's work on public roads and on all public works in cities of the first class.

Nevada.—For labor on public highways, in and about all mines, in smelters, plaster and cement mills, as train despatchers, etc., on railroads, and on all works and undertakings carried on or aided by the State, county, or municipal governments, the hours of labor are fixed at eight per day.

New Jersey.—Eight hours is the limit of a day's work by any person employed by or on behalf of the State or any municipality thereof.

New Mexico.—Eight hours constitute a day's labor in all employment by or on behalf of the State or municipality.

New York.—Eight hours constitute a day's work on highways, and on work done by or for the State, or a municipal corporation, whether directly by contractors or sub-contractors; also for all

classes of employés, except in farm or domestic labor, though overwork for extra pay is permitted in private employments.

North Dakota.—Eight hours are a day's labor on public roads.

Ohio.—Eight hours constitute a day's work on all public works; also in all engagements to labor in any mechanical, manufacturing or mining business, unless otherwise expressly stipulated in the contract.

Oklahoma.—Eight hours constitute a day's labor on all public works, and in underground mines.

Oregon.—Eight hours constitute a day's labor on all public works, and in underground mines yielding metal.

Pennsylvania.—Eight hours of labor shall be deemed and held to be a legal day's work in all cases of labor and service by the day where there is no agreement or contract to the contrary. This does not apply to farm or agricultural labor or to service by the year, month or week. Eight hours constitute a day's labor for all mechanics, workmen, and laborers in the employ of the State, or of any municipal corporation therein, or otherwise engaged on public works. This act shall be deemed to apply to employés of contractors. Engineers hoisting workmen at anthracite coal mines may work but eight hours per day.

Philippine Islands.—Eight hours constitute a day's work on highways.

Porto Rico.—No laborer may be compelled to work more than eight hours per day on public works.

South Dakota.—For labor on public highways a day's work is fixed at eight hours.

Tennessee.—Eight hours shall be a day's work on the highways.

Texas.—Eight hours constitute a day's work on the highways, and by train despatchers, etc., except at stations where but one operator is employed.

Utah.—Eight hours constitute a day's labor on all works carried on or aided by the State, county or municipal governments, and in all underground mines or workings, and in smelters and all other establishments for the reduction of ores.

Washington.—Eight hours in any calendar day shall constitute a day's work on any work done for the State, or for any county or municipality, and in underground coal mines.

West Virginia.—Eight hours shall constitute a day's work for all laborers, workmen, and mechanics who may be employed by or on behalf of the State, and for telegraph operators directing the movement of trains where three or more passenger or ten or more freight trains pass in 24 hours.

Wisconsin.—In all engagements to labor in any manufacturing or mechanical business, where there is no express contract to the contrary, a day's work shall consist of eight hours, but the law does not apply to contracts for labor by the week, month or year. Eight hours constitute a day's labor on the public highways. Employés on public works and train despatchers may be employed but eight hours per day.

Wyoming.—Eight hours' actual work constitute a legal day's labor in all underground mines, in smelters, and on all State and municipal works.

United States.—A day's work for all laborers, workmen and mechanics who may be employed by the United States, or by any contractor or sub-contractor upon any of the public works of the United States, including dredging and rock excavation in river and harbor work, is limited to eight hours.

THE WORLD ALMANAC is indebted to Commissioner Royal Meeker of the U. S. Bureau of Labor Statistics for this Summary of Labor Legislation revised to date.

General Labor Organizations.

AMERICAN FEDERATION OF LABOR.

PRESIDENT, Samuel Gompers, 801-809 G Street N. W., Washington, D. C.; Secretary, Frank Morrison, same address; Treasurer, John B. Lennon, Bloomington, Ill.; First Vice-President, James Duncan, Hancock Building, Quincy, Mass.; Second Vice-President, James O'Connell, 512 Ouray Building, Washington, D. C., Third Vice-President, D. A. Hayes, 930 Witherspoon Building, Philadelphia, Pa.; Fourth Vice-President, Jos. F. Valentine, Commercial Tribune Building, Cincinnati, Ohio; Fifth Vice-President, John R. Alpine, 401 Bush Temple of Music, Chicago, Ill.; Sixth Vice-President, H. B. Perham, Star Building, St. Louis, Mo.; Seventh Vice-President, Frank Duffy, Carpenters' Building, Indianapolis, Ind.; Eighth Vice-President William Green, 1102-08 Merchants' Bank Building, Indianapolis, Ind.

The federation is composed of 110 national and international unions, representing approximately 22,000 local unions, 5 departments, 44 State branches, 631 city central unions, and 485 local unions. The approximate paid membership is 2,000,000. The affiliated unions publish about 540 weekly or monthly papers, devoted to the cause of labor. The official organ is the *American Federationist*, edited by Samuel Gompers. There are 1,715 organizers of local unions acting under the orders of the American Federation of Labor. The objects and aims of the American Federation of Labor are officially stated to render employment and means of subsistence less precarious by securing to the workers an equitable share of the fruits of their labor.

INTERNATIONAL UNIONS COMPRISING THE AMERICAN FEDERATION OF LABOR.

Carvers' Association of North America, International Wood. Thomas J. Lodge, 10 Carlisle Street, Roxbury, Mass.
Cement Workers, American Brotherhood of. F. C. Gengenback, 646 West Marquette Road, Chicago, Ill.
Cigarmakers' International Union of America. George W. Perkins, Monon Building, Chicago, Ill.
Clerks' International Protective Association, Retail. H. J. Conway, Lock Drawer 248, Lafayette, Ind.
Cloth Hat and Cap Makers of North America, United. Max Zuckerman, 62 East Fourth St., New York.
Commercial Telegraphers' Union of America, The. Wesley Russell, Monon Building, Chicago, Ill.
Compressed Air and Foundation Workers' Union of the United States and Canada. Henry Kuhlmann, 12 St. Mark's Place, New York City.
Coopers' International Union of North America. William R. Deal, Bishop Building, Kansas City, Kan.
Cutting Die and Cutter Makers, International Union of. William Bondy, 727 Manida Street, New York.
Diamond Workers' Protective Union of America. Andries Meyer, 323 Washington Street, Brooklyn, N. Y.
Electrical Workers of America, International Brotherhood of. Charles P. Ford, Reisch Building, Springfield, Ill.
Elevator Constructors, International Union of. William Young, 418 Perry Building, Philadelphia, Pa.
Engineers, International Union of Steam and Operating. James G. Hannahan, 6334 Yale Avenue, Chicago, Ill.
Firemen, International Brotherhood of Stationary. C. L. Shamp, 3615 N. 24th Street, Omaha, Neb.
Foundry Employés, International Brotherhood of. Geo. Bechtold, 810 Olive Street, St. Louis, Mo.
Fur Workers' Union of United States and Canada, International. Samuel Korman, 32 Union Square, New York City.
Garment Workers of America, United. B. A. Larger, Rooms 116-122 Bible House, New York City.
Garment Workers' Union, International Ladies'. Morris Sigman, 32 Union Square, New York City.
Glass Bottle Blowers' Association of the United States and Canada. William Launer, Rooms 930-932 Witherspoon Building, Juniper and Walnut Streets, Philadelphia, Pa.
Glass Workers' International Association, Amalgamated. A. J. Scott, 118 East 28th Street, New York City.
Glass Workers' Union, American Flint. William P. Clarke, Ohio Building, Toledo, Ohio.
Glove Workers' Union of America, International. Elizabeth Christman, Room 506, Bush Temple of Music, Chicago, Ill.
Granite Cutters' International Association of America, The. James Duncan, Hancock Building, Quincy, Mass.
Grinders' and Finishers' National Union, Pocket Knife Blade. F. A. Didsbury, 508 Brook Street, Bridgeport, Ct.
Hatters of North America, United. Martin Lawlor, Bible House, New York City.
Hod Carriers', Building and Common Laborers' Union of America, International. A. Persion, 82 State Street, Albany, N. Y.
Horseshoers of United States and Canada, International Union of Journeymen. Hubert S. Marshall, 605 Second National Bank Building, Cincinnati, Ohio.
Hotel and Restaurant Employés' International Alliance and Bartenders' International League of America. Jere L. Sullivan, Commercial Tribune Building, Cincinnati, Ohio.
Iron, Steel, and Tin Workers, Amalgamated Association of. M. F. Tighe, House Building, Smithfield and Water Streets, Pittsburgh, Pa.
Lace Operatives of America, The Chartered Society of Amalgamated. David L. Gould, 545 West Lehigh Avenue, Philadelphia, Pa.
Lathers, International Union of Wood, Wire, and Metal. Ralph V. Brandt, 401 Superior Building, Cleveland, Ohio.
Laundry Workers' International Union. H. L. Morrison, Box 11, Station 1, Troy, N. Y.
Leather Workers on Horse Goods, United Brotherhood of. J. J. Pfeiffer, 504 Postal Building, Kansas City, Mo.

GENERAL LABOR ORGANIZATIONS—*Continued.*

Lithographers' International Protective and Beneficial Association of the United States and Canada. James M. O'Connor, Langdon Building, 309 Broadway, New York City.
Longshoremen's Association, International. John J. Joyce, 702 Brisbane Building, Buffalo, N. Y.
Machine Printers and Color Mixers of the United States, National Association of. P. E. Lyons, 334 Trenton Avenue, Buffalo, N. Y.
Machinists, International Association of. George Preston, 908 G Street N. W., Washington, D. C.
Maintenance of Way Employés, International Brotherhood of. George Seal, 27 Putnam Avenue, Detroit, Mich.
Marble Workers, International Association of. Stephen C. Hogan, 406 East 149th Street, New York City.
Meat Cutters and Butchers' Workmen of North America, Amalgamated. Homer D. Call, 212 May Avenue, Syracuse, N. Y.
Metal Polishers, Buffers, Platers, Brass and Silver Workers' Union of North America. Charles R. Atherton, Neave Building, Cincinnati, Ohio.
Metal Workers' International Alliance, Amalgamated Sheet. John E. Bray, 407 Nelson Building, Kansas City, Mo.
Mine Workers of America, United. William Green, Merchants' Bank Building, Indianapolis, Ind.
Miners, Western Federation of. Ernest Mills, 503 Denham Building, Denver, Col.
Moulders' Union of North America, International. Victor Kleiber, 530 Walnut Street, Cincinnati, Ohio.
Musicians, American Federation of. Owen Miller, 3535 Pine Street, St. Louis, Mo.
Painters, Decorators, and Paperhangers of America, Brotherhood of. J. C. Skemp, Drawer 99, Lafayette, Ind.
Papermakers, International Brotherhood of. J. T. Carey, 127 North Pearl Street, Albany, N. Y.
Patternmakers' League of North America. James Wilson, Second National Bank Building, Ninth and Main Streets, Cincinnati, Ohio.
Pavers, Rammermen, Flag Layers, Bridge and Stone Curb Setters, International Union of. Edward I. Hannah, 249 East 57th Street, New York City.
Paving Cutters' Union of the United States of America and Canada. Carl Bergstrom, Lock Box 27, Albion, N. Y.
Photo-Engravers' Union of North America, International. Louis A. Schwarz, 5609 Germantown Avenue, Philadelphia, Pa.
Piano and Organ Workers' Union of America, International. Charles Dold, 1037 Altgeld Street, Chicago, Ill.
Plasterers' International Association of the United States and Canada, Operative. T. A. Scully, 442 East Second Street, Middletown, Ohio.
Plate Printers' Union of North America, International Steel and Copper. Charles T. Smith, Washington Loan & Trust Co. Building, Washington, D. C.
Plumbers and Steam Fitters of United States and Canada, United Association of. Thomas E. Burke, 411 Bush Temple of Music, Chicago, Ill.
Post-Office Clerks, National Federation of. Thomas F. Flaherty, 712 Ouray Building, Washington, D. C.
Potters, National Brotherhood of Operative. John T. Wood, Box 6, East Liverpool, Ohio.
Powder and High Explosive Workers of America, United. Ira Sharpnack, Columbus, Kan.
Print Cutters' Association of America, National. Richard H. Scheller, 108 Washington Street, Lodi, N. J.
Printing Pressmen's Union, International. Joseph C. Orr, Rogersville, Tenn.
Pulp, Sulphite, and Paper Mill Workers of the United States and Canada, International Brotherhood of. John H. Malin, P. O. Drawer K, Fort Edward, N. Y.
Quarry Workers' International Union of North America. Fred. W. Suitor, Scampini Building, Barre, Vt.
Railroad Telegraphers, Order of. L. W. Quick, Star Building, St. Louis, Mo.
Railway Carmen of America, Brotherhood of. E. William Weeks, 507 Hall Building, Kansas City, Mo.
Railway Clerks, Brotherhood of. R. E. Fisher, 409 Kansas City Life Building, Kansas City, Mo.
Railway Employés of America, Amalgamated Association of Street and Electric. W. D. Mahon, 601 Hodges Block, Detroit, Mich.
Railway Postal Clerks, Brotherhood of. Urban A. Walter, Box 1302, Denver, Col.
Roofers, Composition, Damp, and Waterproof Workers of the United States and Canada, International Brotherhood of. D. J. Ganley, 14 North Oxford Street, Brooklyn, N. Y.
Sawsmiths' National Union. F. E. Kingsley, 2915 McPherson Street, Indianapolis, Ind.
Seamen's Union of America, International. Thomas A. Hanson, 570 West Lake Street, Chicago, Ill.
Signalmen of America, Brotherhood of Railroad. D. R. Daniels, 28 Newton Street, Mansfield, Mass.
Slate and Tile Roofers' Union of America, International. Joseph M. Gavlak, 3643 West 47th Street, Cleveland, Ohio.
Slate Workers, American Brotherhood of. Philip Jago, Pen Argyle, Pa.
Spinners' International Union. Urban Fleming, 188 Lyman Street, Holyoke, Mass.
Stage Employés' International Alliance, Theatrical. M. A. Carney, 107 West 46th Street, New York City.
Steam Shovel and Dredge Men, International Brotherhood of. T. J. Dolan, 508 Fort Dearborn Building, Chicago, Ill.
Steel Plate Transferrers' Association of America, The. H. Wilbur Hoagland, 106 W. Sidney Avenue, Mount Vernon, N. Y.
Stereotypers' and Electrotypers' Union of North America, International. George W. Williams, Room 29, Globe Building, Boston, Mass.
Stone Cutters' Association of North America, Journeymen. Walter W. Drayer, Central Life Building, Indianapolis, Ind.
Stove Mounters' International Union. Frank Grimshaw, 1210 Jefferson Avenue E., Detroit, Mich.
Switchmen's Union of North America. M. R. Welch, 326 Brisbane Building, Buffalo, N. Y.
Tailors' Union of America, Journeymen. Thomas Sweeney, cor. E. 67th Street and Stony Island Avenue, Chicago, Ill.
Teamsters, Chauffeurs, Stablemen, and Helpers of America, International Brotherhood of. Thomas L. Hughes, 222 East Michigan Street, Indianapolis, Ind.
Textile Workers of America, United. Albert Hibbert, 86 Bible House, New York City.
Tile Layers' and Helpers' International Union, Ceramic, Mosaic, and Encaustic. James P. Reynolds, 119 Federal Street, Pittsburgh, Pa.
Timber Workers, International Union of. William H. Reid, Maynard Building, Seattle, Wash.
Tobacco Workers' International Union. E. Lewis Evans, Room 50, American National Bank Building, Third and Main Streets, Louisville, Ky.
Travellers' Goods and Leather Novelty Workers' International Union of America. Murt Malone, 191 Boyd Street, Oshkosh, Wis.
Tunnel and Subway Constructors' International Union. Michael Carraher, 150 East 125th Street, New York City.
Typographical Union, International. J. W. Hays, Newton Claypool Building, Indianapolis, Ind.
Upholsterers' International Union of North America. James H. Hatch, 229 E. 67th Street, New York City.
Weavers' Amalgamated Association, Elastic Goring. Alfred Haughton, 50 Cherry Street, Brockton, Mass.
Weavers' Protective Association, American Wire. E. E. Desmond, 468 Grove Street, Brooklyn, N. Y.
White Rats Actors' Union of America. W. J. Cooke, 227 West 46th Street, New York City.

NATIONAL UNIONS

NOT AFFILIATED WITH THE AMERICAN FEDERATION OF LABOR.

Bricklayers, Masons and Plasterers International. William Dobson, University Park Building, Indianapolis, Ind.

Brotherhood of Locomotive Engineers. Warren S. Stone, Grand Chief Engineer, Cleveland, Ohio; W. B. Prenter, General Secretary, Cleveland, Ohio.

Brotherhood of Locomotive Firemen and Enginemen. A. H. Hawley, General Secretary and Treasurer, Jefferson Building, Peoria, Ill.

Brotherhood of Railroad Trainmen. A. E. King, General Secretary-Treasurer, American Trust Building, Cleveland, Ohio.

Order of Railway Conductors of America. A. B. Garretson, President, Cedar Rapids Savings Bank Building, Cedar Rapids, Iowa; C. E. Whitney, Grand Secretary.

KNIGHTS OF LABOR.

General Executive Board: General Master Workman, John W. Hayes, Washington, D. C., Chairman; General Worthy Foreman, William A. Denison, Rochester, N. Y.; General Secretary-Treasurer, I. D. Chamberlain, Washington, D. C.; Assistant General Secretary-Treasurer, Bennett M. Jayne, Philadelphia, Pa.; Chris. Hill, Brooklyn, N. Y.; F. W. Bonehill, Rochester, N. Y.

TRADE UNION STATISTICS OF THE WORLD.

THE following table shows the membership of Trade Unions in the 12 principal trade union countries, according to returns received through various sources for the year ending January 1, 1912. The figures in parentheses indicate the relative order of the membership and percentage figures to the remaining figures under those headings in each column. The figures for the United States include those for Canada, where trade unionists are estimated to number 150,000.

TRADE UNION MEMBERSHIP.

COUNTRY	Total Membership.	Percentage of Membership to Total Pop.	COUNTRY.	Total Membership.	Percentage of Membership to Total Pop.
Austria	421,905..(6)	1.4..(11)	Italy	817,034..(5)	2.4..(7)
Belgium	210,902..(7)	2.6..(4)	Netherlands	152,071..(8)	2.5..(5)
Denmark	142 786..(9)	4.6..(3)	Sweden	81,000..(12)	2.2..(9)
France	1,029,238..(4)	2.5..(6)	Switzerland	114,520..(10)	2.3..(8)
German Empire	3,791,665..(1)	5.8..(2)	United Kingdom	3,010,346..(2)	6.7..(1)
Hungary	97,000..(11)	.4..(12)	United States	2,810,420..(3)	2.2..(10)

WAGE-EARNERS' LOSSES BY SICKNESS.

THE average wage-earner in the United States loses approximately nine days every year on account of sickness.

The total annual loss in wages and expenses for medical attention is $750,000,000. It has been conservatively estimated that the people in the United States spend annually $500,000,000 for medicines alone, and most of this is consumed haphazardly and not under the direction of a physician. This would make an average of $5 annual expense for medicines for each man, woman, and child in the United States.

These figures are the results of study in a new field of industrial economics made by the Public Health Service for the Federal Commission on Industrial Relations. Every city and every town has its Health Department that operates principally to prevent contagious and infectious diseases and to lower the death rate.

This latest scientific investigation aims to get at the relation of good health to work and the purely practical benefits resulting from a man being able to be on his job every day in good physical condition. It means not only more wages and less expense to him, but it has an important effect upon his productive capacity for the benefit of his employer.

The greater part of the heavy tax of ill health falls upon those workers who are least able to afford it. Dr. B. S. Warren, Surgeon, United States Public Health Service, who made investigation of records of nearly a million workers, found sickness much more prevalent among low paid workers than among those whose incomes are sufficient to provide sanitary housing, adequate food and pleasant surroundings in the home and the shop.

In Great Britain and Germany there has been wider inquiry into this subject, and records have been kept for a number of years. The deductions and percentages of the American inquiry are said to correspond closely with the foreign tabulations, showing that the estimates of losses made here are well grounded.

It is not merely loss of wages and direct expense of medical attendance that must be taken into consideration from an economic standpoint. Impairment of the worker's efficiency and the burdens cast upon his family by sickness cannot be computed in dollars and cents.

From the many statistics interesting deductions are drawn concerning industrial conditions. One conclusion is that fully one-half of the wage-earners in this country do not receive incomes sufficient to maintain healthful conditions of living.

POPULATION ENGAGED IN INDUSTRIAL OCCUPATIONS.

THE following table gives the percentages of total occupied population for the principal groups in the eight leading industrial countries prior to the war:

OCCUPATION GROUP.	Great Britain.	France.	Germany.	Austria.	Hungary.	Italy.	Belgium.	United States.
Agriculture	12.66	41.42	35.11	60.80	70.15	59.06	21.90	See separate classification below.
Commercial occupations	11.39	6.54	6.30	3.34	2.56	3.43	11.79	
Conveyance of men, goods and messages	8.20	2.89	2.89	1.70	1.55	3.12	2.03	
Mines and quarries	5.00	1.59	3.25	1.56	.78	.89	6.46	
Metals, machines, implements and conveyances	7.89	4.35	6.99	2.78	2.15	2.14	5.95	
Building and works of construction	6.77	4.20	6.99	2.96	1.48	5.02	7.28	
Textile fabrics	6.92	4.55	3.75	3.26	.37	4.81	6.86	
Dress	7.23	8.05	5.39	3.92	2.85	6.64	7.86	

A distinct classification adopted by United States Census Bureau based on 1910 Census is as follows: All occupations, 38,167,336 (consisting of 30,091,564 males and 8,075,772 females) with per cent. in parentheses showing distribution of total. Agriculture, forestry, and animal husbandry, 12,659,203 (33.2); extraction of minerals, 964,824 (2.5); manufacturing and mechanical industries, 10,658,881 (27.9); transportation, 2,637,671 (6.9); trade 3,614 670 (9.5); public service (not elsewhere classified), 459,291 (1.2); professional service, 1,663,569 (4.4); domestic and personal service, 3,772,174 (9.9); clerical occupations, 1,737,053 (4.6).

INDUSTRIAL WORKERS OF THE WORLD.

(A distinct organization from that given below bearing same name.)

HEADQUARTERS, 164 West Washington St., Chicago, Ill. Wm. D. Haywood, General Secretary-Treasurer; Joseph J. Ettor, Assistant Secretary and General Organizer. Executive Board—F. H. Little, A. C. Christ, M. J. Welsh, Francis Miller, W. E. Mattingly.

PREAMBLE—The working class and the employing class have nothing in common.

Between these two classes a struggle must go on until the workers of the world organize as a class, take possession of the earth and the machinery of production, and abolish the wage system.

We find that the centring of the management of industries into fewer and fewer hands makes the trades unions unable to cope with the ever-growing power of the employing class. The trades unions foster a state of affairs which allows one set of workers to be pitted against another set of workers in the same industry, thereby helping defeat one another in wage wars. Moreover, the trades unions aid the employing class to mislead the workers into the belief that the working class have interests in common with their employers.

These conditions can be changed and the interest of the working class upheld only by an organization formed in such a way that all its members in any one industry, or in all industries, if necessary, cease work whenever a strike or lockout is on in any department thereof, thus making an injury to one an injury to all.

Instead of the conservative motto, "A fair day's wages for a fair day's work," we must inscribe on our banner the revolutionary watchword, "Abolition of the wage system."

It is the historic mission of the working class to do away with capitalism. The army of production must be organized, not only for the every day struggle with capitalists but also to carry on production when capitalism shall have been overthrown. By organizing industrially we are forming the structure of the new society within the shell of the old.

The organization differs from syndicalism in that great stress is laid upon having a form of organization to correspond, cell for cell, tissue for tissue, with capitalist industry itself, and also because it seeks to build a new union on revolutionary lines rather than to attempt to change the present reactionary and out-of-date craft unions. The organization claims to have blended the practical features of socialism, anarchism, and syndicalism, and yet it is distinct from all three.

The I. W. W. is composed of 300 local unions, 3 national industrial unions (textile, lumber and marine transport workers), having a total membership of 70,000, five national administrations—Hawaiian, Australian, New Zealand, Great Britain and South African.

Excerpts from Constitution and By-Laws follow:

The Industrial Workers of the World shall be composed of actual wage-workers brought together in an organization embodying thirteen national industrial departments, national industrial unions, local industrial unions, local recruiting unions, industrial councils, and individual members.

The annual convention of the Industrial Workers of the World shall be held on the third Monday of September each year at such place as may be determined by previous convention.

Members-at-large shall pay an initiation fee of $2.00 and $1.00 per month dues and assessments. No working man or woman shall be excluded from membership in local unions because of creed or color.

That to the end of promoting industrial unity and of securing necessary discipline within the organization, the Industrial Workers of the World refuse all alliances, direct or indirect, with existing political parties or anti-political sects.

INDUSTRIAL WORKERS OF THE WORLD.

(A distinct organization from that given above bearing same name.)

HEADQUARTERS, Detroit, Mich. General Secretary Treasurer, H. Richter, Detroit; General Organizer, Caleb Harrison, Pittsburgh, Pa. General Executive Board—R. Katz, Maywood, N. J.; W. W. Cox, St. Louis, Mo.; H. Olson, Seattle, Wash.; W. A. Peyton, Cincinnati, Ohio; W. Hammerlindl, San Francisco, Cal.

PREAMBLE—The working class and the employing class have nothing in common.

Between these two classes a struggle must go on until all the toilers come together on the political as well as on the industrial field, and take and hold that which they produce by their labor through an economic organization of the working class, without affiliation with any political party.

The rapid gathering of wealth and the centring of the management of industries into fewer and fewer hands make the trades unions unable to cope with the ever-growing power of the employing class, because the trades unions foster a state of things which allows one set of workers to be pitted against another set of workers in the same industry, thereby helping defeat one another in wage wars. The trades unions aid the employing class to mislead the workers into the belief that the working class have interests in common with their employers.

Excerpts from Constitution and By-Laws follow:

The Industrial Workers of the World shall be composed of actual wage-workers brought together in an organization embodying thirteen national industrial departments, national industrial unions, local industrial unions, local recruiting unions, industrial councils and individual members.

A national industrial union shall be comprised of the local industrial unions of the various localities in America in a given industry.

The industrial departments shall consist of not less than ten local unions, aggregating a membership of not less than ten thousand members. The industrial departments shall be sub-divided in industrial unions of closely kindred industries in the appropriate organizations for representation in the departmental administration. The departments included are: Department of Mining Industry; Transportation Industry; Metal and Machinery Industry; Glass and Pottery Industry; Food-Stuffs Industry; Brewery, Wine and Distillery Industry; Floricultural, Stock and General Farming Industries; Building Industry; Textile Industries; Leather Industries; Wood Working Industries; Public Service Industries; Miscellaneous Manufacturing.

The annual convention shall be held on the third Monday in September of each year at such place as may be determined by previous convention.

Individual members may be admitted to membership-at-large in the organization on payment of 50 cents initiation fee and 25 cents per month dues, together with assessments.

None but actual wage-workers shall be members of the Industrial Workers of the World. No member of the Industrial Workers of the World shall be an officer in a pure and simple trade union. No member of one industrial or trade organization in the Industrial Workers of the World can at the same time hold a card in another industrial or trade organization of this body. No workingman or workingwoman shall be excluded from membership because of creed or color.

ESTIMATED NUMBER OF UNEMPLOYED IN NEW YORK CITY AND PER CENT. OF WAGE-EARNERS IN CERTAIN SELECTED OCCUPATIONS, BY SEX.
(Enumeration of February 17, 1915, by United States Bureau of Labor Statistics.)

COMMISSION ON INDUSTRIAL RELATIONS.

(WASHINGTON, D. C.—Field Headquarters, Chicago, Ill.)

Act of Congress approved August 23, 1912:

Sec. 4. That the commission shall inquire into the general condition of labor in the principal industries of the United States, including agriculture, and especially in those which are carried on in corporate forms; into existing relations between employers and employés; into the effect of industrial conditions on public welfare and into the rights and powers of the community to deal therewith; into the conditions of sanitation and safety of employés and the provisions for protecting the life, limb and health of the employés; into the growth of associations of employers and of wage-earners and the effect of such associations upon the relations between employers and employés; into the extent and results of methods of collective bargaining; into any methods which have been tried in any State or in foreign countries for maintaining mutually satisfactory relations between employés and employers; into methods for avoiding or adjusting labor disputes through peaceful and conciliatory mediation and negotiations; into the scope, methods and resources of existing bureaus of labor and into possible ways of increasing their usefulness; into the question of smuggling or other illegal entry of Asiatics into the United States or its insular possessions, and of the methods by which such Asiatics have gained and are gaining such admission, and shall report to Congress as speedily as possible with such recommendation as said commission may think proper to prevent such smuggling and illegal entry. The commission shall seek to discover the underlying causes of dissatisfaction in the industrial situation and report its conclusions thereon.

Frank P. Walsh, Chairman, Kansas City, Mo.; Prof. John R. Commons of Madison, Wis.; Mrs. J. Borden Harriman, New York City; Harris Weinstock, Sacramento, Cal.; S. Thruston Ballard, Louisville, Ky.; John B. Lennon, Bloomington, Ill.; James O'Connell, Washington, D. C., and Austin B. Garretson, Cedar Rapids, Iowa; R. H. Aishton, Evanston, Ill. Secretary, Lewis K. Brown.

In 1915 the commission held hearings covering the subjects enumerated, in the following cities:

New York, January 18-February 6: Control of Industry and Responsibility for Labor Conditions; Rockefeller Endowments and Labor Conditions in Rockefeller Properties.

Dallas, March 16-20: American Land Question.

Chicago, April 5, 6, and 16: Pullman Employés, Car Service Department. April 7, 10, 12: Illinois Central and Harriman Lines. April 12-16: Telegraphers. April 15-16: Life and Labor of Chicago Stockyard Employés. April 16: Conditions of Employment of Waiters and Cooks.

Washington, May 4: Pullman Employés, Car Service Department. May 4-7, 27: Conditions of Labor on the Pennsylvania Railroad. May 6 and 8: Pennsylvania State Police. May 10-19, 26-27: Labor and the Law. May 19-25: Colorado Coal Miners' Strike. May 26-27: Inquiry into Industrial Relations in Porto Rico.

CHILDREN'S BUREAU.

DEPARTMENT OF LABOR.

Headquarters, Washington, D. C. Chief of Bureau, Miss Julia C. Lathrop ($5,000); Lewis Meriam, Assistant Chief ($2,400).

The Children's Bureau was created by an act of April 9, 1912, to investigate and report upon all matters pertaining to the welfare of children and child-life among all classes of our people, and especially to investigate the questions of infant mortality, the birth rate, orphanage, juvenile courts, desertion, dangerous occupations, accidents, and diseased children, employment and legislation affecting children in the several States and Territories.

The staff for the first two fiscal years of the bureau's existence (to June 30, 1914) consisted of fifteen persons, and a yearly appropriation of $25,640. For the fiscal years beginning July 1, 1914, and July 1, 1915, an appropriation of $164,640 was made by Congress, providing for a staff of seventy-six persons. With this staff and appropriation the organization of the bureau falls into certain divisions, as an industrial division, a social service division, a division on sanitation, a statistical division, and a division of exhibits.

THE NATIONAL CIVIC FEDERATION.

OFFICE, 1 MADISON AVENUE, NEW YORK.

AN organization of prominent representatives of capital, labor, and the general public formed in 1900 as the direct outgrowth of conventions held in Chicago and New York in 1898-1899. Its purpose is to organize the best brains of the nation in an educational movement seeking the solution of some of the great problems related to social and industrial progress; to provide for study and discussion of questions of national import; to aid thus in the crystallization of the most enlightened public opinion; and, when desirable, to promote legislation in accordance therewith. At the present time the work of the federation is carried on through the following agencies:

(1) The Industrial Conciliation Department, dealing entirely with strikes, lockouts and trade agreements. Its membership includes representatives of the general public and the leading organizations of employers and wage-earners. The services of this department have been enlisted in more than five hundred cases involving every phase of industrial controversy.

(2) The Industrial Economics Department, organized to promote discussion of practical economic and social problems. It is now making a survey of the changes in the social, industrial, and economic conditions in this country in the last thirty years.

(3) Welfare Department, composed of employers of labor in stores, factories, mines, and on railroads, and officials who have to do with the working conditions of public employés, chairmen of boards of health, heads of departments of public safety, leading physicians connected with public hospitals, and others. It is devoted to securing improvements in the working and living conditions of the employé by the employer.

A permanent Welfare Exhibit is maintained, which includes models, photographs, illuminated views and literature.

(4) The Woman's Department, composed largely of women who are themselves stockholders or who through family relationships are financially interested in industrial organizations. Emergency work for the unemployed here and relief for injured soldiers in the European war; stimulation of vacation savings funds and recreation resources; the passage of a law as the dying request of its honorary chairman, Mrs. Woodrow Wilson, to secure the abolishment of the unhealthful alley tenements in Washington; improvements in conditions of industrial and Government employés; prison reforms and efforts for rural improvements in agricultural communities, are phases of its endeavors.

(5) The Department on Compensation for Industrial Accidents and Their Prevention, composed of employers, representative labor men, attorneys, insurance experts, economists, State officials, members of State compensation commissions, and others concerned. Its object is: To advocate the amendment of State laws on employers' liability with a view to securing uniform provisions looking toward compensation for industrial accidents, and to look into means of preventing accidents in commercial and manufacturing enterprises. Joint commission of this department and the American Federation of Labor studied operation of State Workmen's Compensation laws; its report was published as Senate document 419

(6) Social Insurance Department: To investigate the need for uniformity of State legislation governing insurance plans relating to sickness, death benefits for widows and orphans, old-age pensions or unemployment Committee on Preliminary Inquiry: J. W. Sullivan, Chairman, representing wage-earners, Arthur Williams, representing employers; P. Tecumseh Sherman, attorney, social insurance specialist, reported upon Great Britain's National Health Insurance act, answering the question: Should there be a systematic scheme of compulsory sickness insurance advocated for State legislation? Unemployment insurance and old-age pensions also are covered.

(7) Department on Regulation of Combinations and Trusts: Working for co-ordination of Federal and State laws and unification of the latter.

(8) Department on Regulation of Interstate and Municipal Utilities: Has published "Commission Regulaton of Public Utilities," a compilation and analysis of laws of forty-three States and of the Federal Government for the regulation by central commissions of railroads and other public utilities. Has drafted a model bill for uniform State legislation on the subject

(9) The Food and Drugs Department is composed of representatives of State food and dairy departments, public health associations and organizations of physicians, farmers, labor, and food and drug manufacturers, as well as large individual employers of labor. Its object is to promote uniform legislation on this subject among the States, work for effective co-operation between State and Federal Governments, stimulate the public to demand a better enforcement of existing laws and make evident to employers how their employés too frequently are defrauded in both quality and measurement.

OFFICERS AND EXECUTIVE COUNCIL.

President, Seth Low; Vice-Presidents, Samuel Gompers, Benjamin Ide Wheeler; Treasurer, Isaac N. Seligman; Chairman Executive Council, Ralph M. Easley; Chairman Industrial Economics Department, John Hays Hammond; Chairman Welfare Department, Louis A. Coolidge; Chairman Woman's Department, Miss Maude Wetmore; Chairman Taxation Department, E. Bacon, New York City; Chairman National Country Life Committee, Mrs. Thomas M. Owen, Montgomery, Ala.; Executive Secretary, Mrs. Lyndsay Van Rensselaer.

NATIONAL ASSOCIATION OF MANUFACTURERS.

President, George Pope; *Secretary*, George S. Boudinot; *Assistant Secretary*, W. M. Benney; *Treasurer*, Henry Abbott; *General Manager*, J. Philip Bird. Headquarters, 30 Church Street, New York.

DECLARATION OF LABOR PRINCIPLES.

1. Fair dealing is the fundamental and basic principle on which relations between employés and employers should rest.

2. The National Association of Manufacturers is not opposed to organizations of labor as such, but it is unalterably opposed to boycotts, blacklists and other illegal acts of interference with the personal liberty of employer or employé.

3. No person should be refused employment or in any way discriminated against on account of membership or non-membership in any labor organization, and there should be no discriminating against or interference with any employé who is not a member of a labor organization by members of such organizations.

4. With due regard to contracts, it is the right of the employé to leave his employment whenever he sees fit, and it is the right of the employer to discharge any employé when he sees fit.

5. Employers must be free to employ their work people at wages mutually satisfactory, without interference or dictation on the part of individuals or organizations not directly parties to such contracts.

6. Employers must be unmolested and unhampered in the management of their business in determining the amount and quality of their product, and in the use of any methods or systems of pay which are just and equitable.

7. In the interest of employés and employers of the country, no limitation should be placed upon the opportunities of any person to learn any trade to which he or she may be adapted.

8. The National Association of Manufacturers disapproves absolutely of strikes and lockouts, and favors an equitable adjustment of all differences between employers and employés by any amicable method that will preserve the rights of both parties.

9. Employés have the right to contract for their services in a collective capacity, but any contract that contains a stipulation that employment should be denied to men not parties to the contract is an invasion of the constitutional rights of the American workman, is against public policy, and is in violation of the conspiracy laws. This association declares its unalterable antagonism to the closed shop and insists that the doors of no industry be closed against American workmen because of their membership or non-membership in any labor organization.

10 The National Association of Manufacturers pledges itself to oppose any and all legislation not in accord with the foregoing declaration.

Permanent Court of Arbitration of The Hague,

PROVIDED FOR BY THE CONVENTION SIGNED AT THE HAGUE JULY 29, 1899.

(The following list corrected to September 1, 1915.)

Argentina—His Excellency Mr. Estanislas S. Zeballos, LL D., formerly Minister for Foreign Affairs and Worship.

May 6, 1913—In the "Manouba" case between France and Italy.

INTERNATIONAL TRIBUNALS OF EGYPT.

In 1876, as the result of negotiations between the Ottoman and Egyptian Governments and the various Christian powers having representatives at Cairo, certain courts were created in Egypt for the trial of civil and commercial causes arising between natives and foreigners of different nationality, as well as all questions of real estate between any person and suits of foreigners against the Egyptian Government and members of the Khedival family. These mixed tribunals, in civil matters within their exclusive jurisdiction, superseded the consular courts. A mixed tribunal consists of five Judges, three of whom are foreigners and two natives. The foreign Judges are appointed by the Khedive on the recommendation of the great powers, each of which is represented by from one to three Judges. There are three tribunals of original jurisdiction (first instance), one each at Cairo, Alexandria, and Mansura, and a Court of Appeals at Alexandria. The United States is represented in these courts by the following Judges:

Court of Appeals.—Somerville P. Tuck of New York (appointed 1908; appointed to Court of First Instance 1894).

Court of First Instance.—William G. Van Horne of Utah (appointed 1902); Pierre Crabités of Louisiana (appointed 1911).

THE NEW YORK PEACE SOCIETY.

This society was founded in 1815, merged with the American Peace Society in 1828, refounded in 1906 and incorporated in 1910. It has a membership of 1800, with branches in Poughkeepsie, Albany, North Tonawanda, and elsewhere.

Its purpose is "To foster a spirit of justice and good will among the nations, to promote the judicial settlement of international disputes and to support public measures which tend to remove causes of enmity, to unite nations in friendly co-operation and to hasten the coming brotherhood of man."

Both men and women are eligible for membership in the society, and receive free its monthly magazine and tickets to its annual course of lectures.

The officers of the society are: *President*—Andrew Carnegie. *Secretary*—William H. Short. *Treasurer*—Central Trust Company of New York, Forty-second Street branch. Headquarters, 507 Fifth Avenue, New York City.

THE HAGUE CONVENTION OF 1907 CONCERNING THE RIGHTS AND DUTIES OF NEUTRAL POWERS IN NAVAL WAR.

[Signed at The Hague, October 18, 1907.]

His Majesty the German Emperor, King of Prussia; [etc.]:

With a view to harmonizing the divergent views which, in the event of naval war, are still held on the relations between neutral powers and belligerent powers, and to anticipating the difficulties to which such divergence of views might give rise;

Seeing that, even if it is not possible at present to concert measures applicable to all circumstances which may in practice occur, it is nevertheless undeniably advantageous to frame, as far as possible, rules of general application to meet the case where war has unfortunately broken out;

Seeing that, in cases not covered by the present convention, it is expedient to take into consideration the general principles of the law of nations;

Seeing that it is desirable that the powers should issue detailed enactments to regulate the results of the attitude of neutrality when adopted by them;

Seeing that it is, for neutral powers, an admitted duty to apply these rules impartially to the several belligerents;

Seeing that, in this category of ideas, these rules should not, in principle, be altered, in the course of the war, by a neutral power, except in a case where experience has shown the necessity for such change for the protection of the rights of that power;

Have agreed to observe the following common rules, which cannot, however, modify provisions laid down in existing general treaties, and have appointed as their plenipotentiaries, namely:

[Here follow the names of plenipotentiaries.]

Who, after having deposited their full powers, found in good and due form, have agreed upon the following provisions:

ARTICLE 1—Belligerents are bound to respect the sovereign rights of neutral powers and to abstain, in neutral territory or neutral waters, from any act which would, if knowingly permitted by any power, constitute a violation of neutrality.

ARTICLE 2—Any act of hostility, including capture and the exercise of the right of search, committed by belligerent warships in the territorial waters of a neutral power, constitutes a violation of neutrality and is strictly forbidden.

ARTICLE 3—When a ship has been captured in the territorial waters of a neutral power this power must employ, if the prize is still within its jurisdiction, the means at its disposal to release the prize with its officers and crew, and to intern the prize crew.

If the prize is not in the jurisdiction of the neutral power, the captor Government, on the demand of that power, must liberate the prize with its officers and crew.

ARTICLE 4—A prize court cannot be set up by a belligerent on neutral territory or on a vessel in neutral waters.

ARTICLE 5—Belligerents are forbidden to use neutral ports and waters as a base of naval operations against their adversaries, and in particular to erect wireless telegraphy stations or any apparatus for the purpose of communicating with the belligerent forces on land or sea.

ARTICLE 6—The supply, in any manner, directly or indirectly, by a neutral power to a belligerent power, of warships, ammunition, or war material of any kind whatever, is forbidden.

ARTICLE 7—A neutral power is not bound to prevent the export or transit, for the use of either belligerent, of arms, ammunitions, or, in general, of anything which could be of use to an army or fleet.

ARTICLE 8—A neutral Government is bound to employ the means at its disposal to prevent the fitting out or arming of any vessel within its jurisdiction which it has reason to believe is intended to cruise, or engage in hostile operations, against a power with which that Government is at peace. It is also bound to display the same vigilance to prevent the departure from its jurisdiction of any vessel intended to cruise, or engage in hostile operations, which had been adapted entirely or partly within the said jurisdiction for use in war.

ARTICLE 9—A neutral power must apply impartially to the two belligerents the conditions, restrictions or prohibitions made by it in regard to the admission into its ports, roadsteads, or territorial waters, of belligerent warships or of their prizes.

Nevertheless, a neutral power may forbid a belligerent vessel which has failed to conform to the orders and regulations made by it, or which has violated neutrality, to enter its ports or roadsteads.

ARTICLE 10—The neutrality of a power is not affected by the mere passage through its territorial waters of warships or prizes belonging to belligerents.

ARTICLE 11—A neutral power may allow belligerent warships to employ its licensed pilots.

ARTICLE 12—In the absence of special privisions to the contrary in the legislation of a neutral power, belligerent warships are not permitted to remain in the ports, roadsteads, or territorial waters of the said power for more than twenty-four hours, except in the cases covered by the present convention.

ARTICLE 13—If a power which has been informed of the outbreak of hostilities learns that a belligerent warship is in one of its ports or roadsteads, or in its territorial waters, it must notify the said ship to depart within twenty-four hours or within the time prescribed by local regulations.

ARTICLE 14—A belligerent warship may not prolong its stay in a neutral port beyond the permissible time except on account of damage or stress of weather. It must depart as soon as the cause of the delay is at an end.

The regulations as to the question of the length of time which these vessels may remain in neutral ports, roadsteads, or waters, do not apply to warships devoted exclusively to religious, scientific, or philanthropic purposes.

ARTICLE 15—In the absence of special provisions to the contrary in the legislation of a neutral power, the maximum number of warships belonging to a belligerent which may be in one of the ports or roadsteads of that power simultaneously shall be three.

ARTICLE 16—When warships belonging to both belligerents are present simultaneously in a neutral port or roadstead, a period of not less than twenty-four hours must elapse between the departure of the ship belonging to one belligerent and the departure of the ship belonging to the other.

The order of departure is determined by the order of arrival, unless the ship which arrived first is so circumstanced that an extension of its stay is permissible.

A belligerent warship may not leave a neutral port or roadstead until twenty-four hours after the departure of a merchant ship flying the flag of its adversary.

ARTICLE 17—In neutral ports and roadsteads belligerent warships may only carry out such repairs as are absolutely necessary to render them seaworthy, and may not add in any manner whatsoever to their fighting force. The local authorities of the neutral power shall decide what repairs are necessary, and these must be carried out with the least possible delay.

ARTICLE 18—Belligerent warships may not make use of neutral ports, roadsteads, on territorial waters for replenishing or increasing their supplies of war material or their armament, or for completing their crews.

ARTICLE 19—Belligerent warships may only revictual in neutral ports or roadsteads to bring their supplies to the peace standard.

Similarly these vessels may only ship sufficient fuel to enable them to reach the nearest port in their own country. They may, on the other hand, fill up their bunkers built to carry fuel, when in neutral countries which have adopted this method of determining the amount of fuel to be supplied.

THE HAGUE CONVENTION—*Continued.*

If, in accordance with the law of the neutral power, the ships are not supplied with coal within twenty-four hours of their arrival, the permissible duration of their stay is extended by twenty-four hours.

ARTICLE 20—Belligerent warships which have shipped fuel in a port belonging to a neutral power may not within the succeeding three months replenish their supply in a port of the same power

ARTICLE 21—A prize may only be brought into a neutral port on account of unseaworthiness, stress of weather, or want of fuel or provisions.

It must leave as soon as the circumstances which justified its entry are at an end. If it does not, the neutral power must order it to leave at once; should it fail to obey, the neutral power must employ the means at its disposal to release it with its officers and crew and to intern the prize crew.

ARTICLE 22—A neutral power must, similarly, release a prize crew brought into one of its ports under circumstances other than those referred to in Article 21.

ARTICLE 23—A neutral power may allow prizes to enter its ports and roadsteads, whether under convoy or not, when they are brought there to be sequestrated pending the decision of a prize court. It may have the prize taken to another of its ports.

If the prize is convoyed by a warship, the prize may go on board the convoying ship.

If the prize is not under convoy, the prize crew are left at liberty.

ARTICLE 24—If, notwithstanding the notification of the neutral power, a belligerent ship of war does not leave a port where it is not entitled to remain, the neutral power is entitled to take such measures as it considers necessary to render the ship incapable of taking the sea during the war, and the commanding officer of the ship must facilitate the execution of such measures.

When a belligerent ship is detained by a neutral power, the officers and crew are likewise detained.

The officers and crew thus detained may be left in the ship or kept either on another vessel or on land, and may be subjected to the measures of restriction which it may appear necessary to impose upon them. A sufficient number of men for looking after the vessel must, however, be always left on board.

The officers may be left at liberty on giving their word not to quit the neutral territory without permission.

ARTICLE 25—A neutral power is bound to exercise such surveillance as the means at its disposal allow to prevent any violation of the provisions of the above articles occurring in its ports or roadsteads or in its waters.

ARTICLE 26—The exercise by a neutral power of the rights laid down in the present convention can under no circumstances be considered as an unfriendly act by one or other belligerent who has accepted the articles relating thereto.

ARTICLE 27—The contracting powers shall communicate to each other in due course all laws, proclamations, and other enactments regulating in their respective countries the status of belligerent warships in their ports and waters, by means of a communication addressed to the Government of the Netherlands, and forwarded immediately by that Government to the other contracting powers.

ARTICLE 28—The provisions of the present convention do not apply except to the contracting powers, and then only if all the belligerents are parties to the convention.

ARTICLE 29—The present convention shall be ratified as soon as possible.

The ratifications shall be deposited at The Hague.

The first deposit of ratifications shall be recorded in a *proces-verbal* signed by the representatives of the powers which take part therein and by the Netherland Minister for Foreign Affairs.

The subsequent deposits of ratifications shall be made by means of a written notification addressed to the Netherland Government and accompanied by the instrument of ratification.

A duly certified copy of the *proces-verbal* relative to the first deposit of ratifications, of the ratifications mentioned in the preceding paragraph, as well as of the instruments of ratification, shall be at once sent by the Netherland Government, through the diplomatic channel, to the powers invited to the Second Peace Conference, as well as to the other powers which have adhered to the convention. In the cases contemplated in the preceding paragraph, the said Government shall inform them at the same time of the date on which it received the notification.

ARTICLE 30—Non-signatory powers may adhere to the present convention.

The power which desires to adhere notifies in writing its intention to the Netherland Government, forwarding to it the act of adhesion, which shall be deposited in the archives of the said Government.

That Government shall at once transmit to all the other powers a duly certified copy of the notification as well as of the act of adhesion, mentioning the date on which it received the notification.

ARTICLE 31—The present convention shall come into force in the case of the powers which were a party to the first deposit of the ratifications, sixty days after the date of the *proces-verbal* of that deposit, and, in the case of the powers who ratify subsequently or who adhere, sixty days after the notification of their ratification or of their decision has been received by the Netherland Government.

ARTICLE 32—In the event of one of the contracting powers wishing to denounce the present convention, the denunciation shall be notified in writing to the Netherland Government, who shall at once communicate a duly certified copy of the notification to all the other powers, informing them of the date on which it was received.

The denunciation shall only have effect in regard to the notifying power, and one year after the notification has been made to the Netherland Government.

ARTICLE 33—A register kept by the Netherland Ministry for Foreign Affairs shall give the date of the deposit of ratifications made by Article 29, paragraphs 3 and 4, as well as the date on which the notifications of adhesion (Article 30, paragraph 2), or of denunciation (Article 32, paragraph 1), have been received.

Each contracting power is entitled to have access to this register and to be supplied with duly certified extracts.

In faith whereof the plenipotentiaries have appended their signatures to the present convention.

Done at The Hague, the 18th October, 1907, in a single copy, which shall remain deposited in the archives of the Netherland Government, and duly certified copies of which shall be sent, through the diplomatic channel, to the powers which have been invited to the Second Peace Conference.

[Here follow signatures.]

RATIFICATIONS, ADHESIONS AND RESERVATIONS.

The foregoing convention was *ratified* by the following signatory powers on the dates indicated:

Austria-Hungary	Nov. 27, 1909	Luxemburg	September 5, 1912	Siam	March 12, 1910
Belgium	August 8, 1910	Mexico	November 27, 1909	Sweden	November 27, 1909
Brazil	January 5, 1914	Netherlands	November 27, 1909	Switzerland	May 12, 1910
Denmark	November 27, 1909	Norway	September 19, 1910		
France	October 7, 1910	Panama	September 11, 1911		
Germany	November 27, 1909	Portugal	April 13, 1911		
Guatemala	March 15, 1911	Roumania	March 1, 1912		
Haiti	February 2, 1910	Russia	November 27, 1909		
Japan	December 13, 1911	Salvador	November 27, 1909		

ADHESIONS:

China	January 15, 1910
Liberia	February 4, 1914
Nicaragua	December 16, 1909
United States	December 3, 1909

The following powers signed the convention but have not yet ratified:

Argentine Republic	Bulgaria	Dominican Republic	Great Britain	Montenegro	Peru	Uruguay
Bolivia	Chile	Ecuador	Greece	Paraguay	Servia	Venezuela
	Colombia		Italy	Persia	Turkey	

THE HAGUE CONVENTION—*Continued.*

RESERVATIONS.*

China—Adhesion with reservation of paragraph 2 of Article 14, paragraph 3 of Article 19, and of Article 27. Dominican Republic—With reservation regarding Article 12. Germany—Under reservation of Articles 11, 12, 13, and 20.† Great Britain—Under reservation of Articles 19 and 23. Japan—With reservation of Articles 19 and 23.† Persia—Under reservation of Articles 12, 19, and 21. Siam—Under reservation of Articles 12, 19, and 23†. Turkey—Under reservation of the declaration concerning Article 10 contained in the *proces-verbal* of the eighth plenary session of the conference held on October 9, 1907.

*All these reservations, except those of China and the United States, were made at signature.
†Reservation maintained at ratification.

Extract from the proces-verbal: The Ottoman delegation declares that the straits of the Dardanelles and the Bosporus cannot in any case be referred to by Article 10. The Imperial Government could undertake no engagement whatever tending to limit its undoubted rights over these straits.—(Statement of Turkhan Pasha.)

UNITED STATES.

The act of adhesion contains the following reservation:

That the United States adheres to the said convention, subject to the reservation and exclusion of its Article 23 and with the understanding that the last clause of Article 3 thereof implies the duty of a neutral power to make the demand therein mentioned for the return of a ship captured within the neutral jurisdiction and no longer within that jurisdiction.

[It should be noted that the conventions and declarations are not binding prior to the deposit of ratifications at The Hague. The mere signature of these conventional agreements may be regarded as the indication of an intention to ratify them, but creates no legal obligation. Adhesion has the effect of ratification. In this relation it is proper to remark that only the formal agreements of the conferences—such as the conventions and the signed declarations—contemplate ratification. The informal agreements—such as the unsigned declarations, resolutions, recommendations, and *vœux*—are not signed separately. They are contained in the Final Act, which is an official summary of the proceedings of each conference, and as such is signed.]

The foregoing statement concerning The Hague Convention is from Pamphlet No. 20, issued by the Carnegie Endowment for International Peace.

THE PANAMA CANAL.

THE organization for the completion, maintenance, operation, government and sanitation of the Panama Canal and its adjuncts and the government of the Canal Zone consists of the following departments, offices and agencies, and such others as may be established by the Governor of the Panama Canal on the Isthmus or elsewhere with the approval of the President of the United States, all to be under the direction of the Governor, subject to the supervision of the Secretary of War:

Executive Department—Headquarters, Balboa Heights; Geo. W. Goethals, U. S. A., Governor; C. A. McIlvaine, Executive Secretary; W. P. Copeland, Chief Clerk; John K. Baxter, Chief Division of Civil Affairs; Capt. Harry D. Mitchell, Chief Division of Police and Fire; A. R. Lang, Superintendent Division of Schools; Charles R. Williams, District-Attorney, Ancon, Canal Zone.

Department of Operation and Maintenance—Headquarters, Balboa Heights; Lieut.-Col. Chester Harding, Engineer of Maintenance; C. J. Embree, Office Engineer; Capt. W. H. Rose, Electrical Engineer; D. E. Wright, Resident Engineer; H. H. Rousseau, Engineer of Terminal Construction; F. H. Cooke, Designing Engineer; T. B. Mönniche, Engineer of Docks, Cristobal; Capt. T. H. Dillon, Superintendent of Gatun Locks, Gatun; W. G. Thompson, Superintendent, Cristobal; W. G. Comber, Resident Engineer, Paraiso; D. C. Nutting, Jr., Superintendent Mechanical Division, Balboa; Capt. Hugh Rodman, Marine Superintendent; Lieut. P. P. Bassett, Captain of the Port, Cristobal; Lieut. A. B. Reed, Captain of the Port, Balboa; Board of Local Inspectors, Lieut. P. P. Bassett, Lieut. A. B. Reed, and J. Macfarlane, headquarters, Balboa Heights; First Lieut. Creswell Garlington, Assistant Engineer Division of Fortifications; George M. Wells, Resident Engineer Building Division; F. C. Clark, Superintendent Pacific Locks, Pedro Miguel; F. D. Wilson, Chief Hydrographer; O. E. Malsbury, Assistant Engineer Section of Surveys; J. A. Walker, General Superintendent, Balboa; C. C. Snedeker, Supervisor, Coco Solo, Cristobal.

Supply Department—Major W. R. Grove, Chief Quartermaster, Balboa Heights; Capt. F. H. Smith, Assistant Chief Quartermaster; C. H. Mann, Sales Agent, Cristobal; Benjamin L. Jacobson, Depot Commissary, Cristobal.

Accounting Department—Headquarters, Balboa Heights; H. A. A. Smith, Auditor; T. L. Clear, Collector; John H. McLean, Paymaster; Ad. Faure, Chief Accountant.

Health Department—Lieut.-Col. Charles F. Mason, Chief Health Officer, Balboa Heights; Major Elbert E. Persons, General Inspector, Balboa Heights; Lieut.-Col. G. D. Deshon, Superintendent Ancon Hospital; Dr. M. C. Guthrie, Chief Quarantine Officer, Balboa Heights; Capt. H. P. Carter, Health Officer of Panama, Ancon; Capt. D. W. Harmon, Health Officer of Colon, Cristobal.

Washington Office—Major F. C. Boggs, U. S. A., General Purchasing Officer and Chief of Office; Ray L. Smith, Assistant Chief of Office; A. L. Flint, Chief Clerk, Purchasing Department.

Panama Railroad Company—C. H. Motsett, Superintendent, Balboa Heights; Samuel W. Heald, Master of Transportation, Balboa Heights. Office in the United States, No. 24 State Street, New York.

Courts—William H. Jackson, District Judge, Ancon; E. M. Goolsby, Clerk, Ancon; W. H. May, Marshal, Ancon; S. E. Blackburn, Magistrate, Balboa; John W. Thompson, Magistrate, Cristobal.

The Canal has a summit elevation of 85 feet above the sea. It is about 50 miles in length from deep water in the Caribbean Sea to deep water in the Pacific Ocean. The distance from deep water to the shore line in Limon Bay is about 4½ miles, and from the Pacific shore line to deep water is about 4 miles; hence the length of the Canal from shore to shore is approximately 41½ miles. The channel ranges in width from 300 to 1,000 feet. The average bottom width of the channel in this project is 649 feet, and the minimum width is 300 feet. The Canal has a minimum depth of 41 feet.

The Gatun Dam along the crest is 8,000 feet long, including the spillway, or about 1½ miles, and 2,100 feet wide at its greatest width. The crest of the dam is at an elevation of 115 feet above sea level, or 30 feet above the normal level of Gatun Lake, and 100 feet wide. The width of the dam at the normal water level of the lake, *i. e.*, 85 feet above sea level, is about 388 feet.

The Panama Canal was opened to navigation on August 14, 1914.

The cost at present estimated for completing the Canal is $325,201,000, which includes $20,053,000 for sanitation and $7,382,000 for civil administration. These figures do not include the $50,000,000 paid to the New French Canal Company and to the Republic of Panama for property and franchises. Hence it is estimated that the total cost of the Canal to the United States will approximate $375,000,000.

Appropriations by Congress to August 1, 1914, $362,019,275; fortifications, $12,050,825; total credits by United States Treasury to March 31, 1915, $374,070,100.

TRAFFIC FOR FISCAL YEAR ENDING JUNE 30, 1915.

Covering the period from August 14, 1914, to July 1, 10½ months, or seven-eighths of a calendar year, and showing the number of vessels passing through the Canal in each direction:

THE PANAMA CANAL—*Continued.*

Month.	Eastbound. Vessels.	Eastbound. Cargo Tons.	Westbound. Vessels.	Westbound. Cargo Tons.	Total. Vessels.	Total. Cargo Tons.	Month.	Eastbound. Vessels.	Eastbound. Cargo Tons.	Westbound. Vessels.	Westbound. Cargo Tons.	Total. Vessels.	Total. Cargo Tons.
August.	13	49,106	11	62,178	24	111,284	March..	57	217,447	80	417,610	137	635,057
Sept...	27	141,762	30	180,276	57	322,038	April...	59	237,384	60	285,457	119	522,841
Oct....	44	168,069	40	253,288	84	421,357	May...	67	246,534	75	332,174	142	578,708
Nov...	54	206,510	38	242,291	92	448,801	June...	83	320,619	60	282,561	143	603,180
Dec....	43	179,235	57	271,219	100	450,454							
Jan....	44	208,082	54	240,925	98	449,007	Total	530	2,125,735	558	2,844,057	1,088	4,969,792
Feb....	39	150,987	53	276,078	92	427,065							

According to nationality, the American vessels led in number, being 471, only seven more than the 464 British. Vessels of other nations using the Canal were, in the order of their numbers: Norwegian, 41; Chilean, 35; Danish, 24; Swedish, 18; Dutch, 7; Japanese and Russian, 6 each; Peruvian, 4; French and Honduran, 3 each; Italian, Nicaraguan, and Panamanian, 2 each.

The tolls levied during the fiscal year, not including $80,872.79 levied on vessels of the United States Government, amounted to $4,343,383.69. The current expenses for operation and maintenance during the same period were $4,112,550.48. The excess of toll earnings over expenses was, accordingly, $230,833.21. These figures do not include the interest on the money invested, or a charge to amortize the debt.

The following is a summary of the earnings by months during the year ending June 30, 1915:

July....	$7,598	December.....	$410,043	May.....	$547,054
August....	88,401	January.....	419,037	June.....	541,181
September....	266,513	February.....	383,904		
October.....	375,787	March.....	560,784	Total.....	$4,424,256
November.....	381,533	April.....	442,415		

The force report of June 23, 1915, showed the actual working force of the Panama Canal on that date to have been 21,677; of the Panama Railroad, 4,845; and of contractors, 375, a total effective working force of 26,897.

Distances from New York to San Francisco by water, former route, 13,135 miles; via Panama Canal, 5,262 miles. New York to Hawaii, former all-water route 12,800 miles; by Canal, 7,000 miles. New York to Manila via Hawaii, former route, 17,800 miles; by Canal, 12,000 miles.

The Canal brings Callao 4,320 miles nearer Liverpool by steamer, reducing the distance from 10,230 miles to 5,910 miles and saving about 14 days in time. To Valparaiso the shortening in distance is 1,813 miles, making it 7,185 instead of 8,998, and the saving in time is about 6 days. By its means the United States has an all-sea route, which is from 2,500 to 3,000 miles shorter than routes from Europe. New York, via the Canal, is 3,779 miles from Callao, instead of 9,769 as formerly, while New Orleans is only 3,264 miles from Callao.

Between New York and Yokohama the reduction is 3,729 miles, and that Japanese city is brought nearer to New York than Liverpool by 1,805 miles. Shanghai is 1,629 miles nearer to New York. Sydney, Australia, is 3,806 miles nearer to New York, and the distance between the two cities is 2,382 miles less than the distance between Sydney and Liverpool. Wellington, New Zealand, is 2,542 miles nearer New York, and the distance between them is 2,759 miles less than between Wellington and Liverpool. Between New Zealand and Europe there is an average saving of 1,600 miles.—(From United States Consular Report.)

PANAMA CANAL TOLL RATES.

1. On merchant vessels carrying passengers or cargo, one dollar and twenty cents ($1.20) per net vessel ton—each one hundred (100) cubic feet—of actual earning capacity.

2. On vessels in ballast without passengers or cargo, forty (40) per cent. less than the rate of tolls for vessels with passengers or cargo.

3. Upon naval vessels, other than transports, colliers, hospital ships and supply ships, fifty (50) cents per displacement ton.

4. Upon Army and Navy transports, colliers, hospital ships and supply ships, one dollar and twenty cents ($1.20) per net ton, the vessels to be measured by the same rules as are employed in determining the net tonnage of merchant vessels.

The Panama Canal act of 1912, providing for the permanent government of the Canal Zone and other regulations, was amended in a bill signed by the President on June 15, 1914, known as the "Panama Tolls Exemption Repeal bill," whereby the clause exempting American coastwise vessels from paying tolls was repealed. Full text of the Panama Canal act of 1912 was printed in the 1914 edition of THE WORLD ALMANAC.

PANAMA CANAL NEUTRAL.

ALL NAVIES OF THE WORLD MAY USE IT DURING WAR.

It is provided by treaties that the Panama Canal, like the Suez Canal, shall remain absolutely neutral. It "shall be free and open to the vessels of commerce and war of all nations and shall never be blockaded, nor shall any right of war be exercised nor any act of hostility be committed within it."

Strict rules of neutrality have been devised for the passage of war vessels of the nations engaged in conflict. The warships will be compelled to pass through with the least possible delay and with only such intermissions as may result from the necessities of the service.

No belligerent may "embark or disembark troops, munitions of war or warlike materials in the Canal, except in the case of accidental hindrance of the transit, and in such case the transit shall be resumed with all possible despatch."

The treaty provides that no warship will have the right to exercise the law of search on a commercial ship in transit through the Canal and the provision likewise protects all ships within three marine miles of either terminal.

Ships carrying contraband either in the Atlantic or Pacific do so at their own risk, but warships may not remain in the three-mile zone longer than twenty-four hours, and the treaty stipulates that "a vessel of one belligerent shall not depart within twenty-four hours from the departure of a vessel of war of the other belligerent."

TERRITORIAL EXPANSION OF THE UNITED STATES.

ADDITIONS to the original territory of the Union, include Alaska, Hawaiian and Philippine Islands, Samoa and Guam, in the Pacific, and Porto Rico and Pine Islands, in the West Indies, and the Panama Canal Zone. The area of the original thirteen States (years 1783-1817) comprised 892,135 square miles.

The additions to the territory of the United States subsequent to the peace treaty with Great Britain of 1783 are shown by the following table:

TERRITORIAL EXPANSION OF THE UNITED STATES—*Continued.*

ADDITIONS TO THE TERRITORY OF THE UNITED STATES FROM 1800 TO 1900.

Territorial Division.	Year	Area Added. S. Miles	Territorial Division.	Year	Area Added. S. Miles.	Territorial Division.	Year	Area Added. S. Miles.
Louisiana purchase..	1803	827,987	Gadsden purchase...	1853	29,670	Addit'nal Philippines	1901	68
Gained through treaty with Spain	1819	13,435	Alaska.....	1867	590,884	Panama Canal Zone.	1904	436
Florida.....	1819	58,666	Hawaiian Islands...	1898	6,449			
Texas	1845	389,166	Porto Rico.....	1898	3,435	Total added area.	..	2851,171
Oregon	1846	286,541	Guam	1898	210			
Mexican cession	1848	529,189	Philippine Islands ..	1898	114,958	Total United States including original 13 States,		3,743,306
			Samoa.....	1899	77			

Payments for above were made by the United States as follows. Louisiana purchase, $15,440,000; Gadsden purchase, $10,000,000; Alaska, $7,200,000; Florida, $5,000,000; Hawaiian Islands, public debt assumed to the amount of $4,000,000.

By treaty of February 2, 1848, a payment of $8,250,000 was made to Mexico in consideration of the extension acquired by the boundaries of the United States, as defined in that treaty.

The treaty of Paris, of December 10, 1898, terminating the Spanish-American war, provided for a money payment to Spain (for relinquishing claim to Porto Rico, Guam and Philippine Islands) of $20,000,000, and a subsequent treaty of November 7, 1900, provided for a further payment of $100,000 for other Philippine Islands.

By the first treaty the Philippine Islands were ceded to the United States, and the later treaty of November 7, 1900, ceded certain outlying islands of the Philippines not included in the first cession.

A payment of $10,000,000 was made to the Republic of Panama under treaty stipulations governing the control of the Panama Canal strip.

No money payments were made upon the acquisition of the other territories mentioned in the list.

The United States did not acquire, by the Isthmian Canal Convention of November 18, 1903, any title to territory in the Republic of Panama, but merely a perpetual right of occupation, use, and control of and over a zone of land ten miles in width. For this privilege it paid to the Republic of Panama the sum of $10,000,000, and undertook to pay the sum of $250,000 annually so long as such occupancy continued, such payments beginning on February 26, 1913.

Insular Possessions of the United States.

THE PHILIPPINES.

The Philippine group, lying off the southern coast of Asia, extending almost due north and south from Formosa to Borneo and the Moluccas, between longitude 116° 40′ and 126° 34′, and latitude 4° 40′ and 21° 10′ approximately number about 3,141 islands and islets, of which 1,668 are listed by name, while 1,473 are, so far as known, without names. The actual land area is about 114,958 square miles. The six New England States, New York, and New Jersey have about an equal area. The island of Luzon, on which the capital city (Manila) is situated, is the largest, most populous, and wealthiest member of the group, being about the size of the State of New York. Mindanao is nearly as large, but its population is very much smaller. There are two islands with areas exceeding 10,000 square miles each, namely, Luzon with 40,969, and Mindanao with 36,292. There are nine islands, each of which has an area of more than 1,000 square miles and less than 10,000. There are twenty between 100 and 1,000 square miles, seventy-three between 10 and 100 square miles, and two hundred and sixty-two between 1 and 10 square miles. The remaining number, 2,775, or seven-eighths of all, have areas less than a square mile each. The areas of the largest islands are: Luzon, 40,969; Mindanao, 36,292, Samar, 5,031; Panay, 4,611; Mindoro, 3,851; Leyte, 2,722; Negros, 4,881; Cebu, 1,762.

The islands with large populations are: Luzon, with 3,798,507 inhabitants, of whom 223,506 are uncivilized; Panay, 743,646 (14,933 uncivilized); Cebu, 592,247 (all civilized); Mindanao, 499,634 (252,940 uncivilized); Negros, 460,776 (21,217 uncivilized); Leyte, 357,641 (all civilized); Bohol, 243,148 (all civilized); Samar, 222,690, (688 uncivilized). The capital of the Archipelago is Manila, with 266,943 inhabitants. Other towns are: In Luzon, Bauan (39,094), Lipa (37,934), Laoag (34,454), Batangas (33,131), San Carlos (27,166), Tabaco (21,946); in Samar, Calbayog (15,895); in Panay, Janiuay (20,738), Miagao (20,656), Iloilo (19,054); in Cebu, Argao (35,448), Cebu (31,079), Barili (31,617), Carcar (31,895), Sibonga (25,848), in Leyte, Baybay (22,990), Ormoc (16,128).

A census of the Philippines was taken by the United States Government in 1903 under the auspices of the Census Office. The population returned was 7,635,426. Of this number almost seven millions are more or less civilized. The wild tribes form about 9 per cent. of the entire population. Racially the inhabitants are principally Malays. The civilized tribes are practically all adherents of the Catholic Church, that religion being introduced into the country by the Spaniards when they took possession of the islands in 1565. The church has since then been a strong ruling power and the priesthood is numerous. The Moros are Mohammedans and the other wild peoples have no recognized religious beliefs. The total number of non-Christian peoples is 647,740.

The density of population in the Philippines is 67 per square mile. In Continental United States it is 26 per square mile. Foreigners number about 50,000, of whom nearly three-fourths are Chinese. Exclusive of the army there are 8,135 Americans in the islands, nearly one-half being located in the city of Manila. There are about twenty-five different tribes in the islands, speaking fifteen or sixteen distinct dialects, the largest tribe being the Visayans, who form nearly one-fourth of the entire civilized population (3,219,030). The Tagalogs, occupying the provinces in the vicinity of Manila (1,460,695), rank second in numbers, and the Ilocanos (803,942) the third. Education has been practically reorganized by the Americans. The total annual enrolment for the year 1914 was 621,030. The total number of schools is 4,199. One thousand additional primary schools, largely increasing the total enrolment, were opened in 1913. Altogether 748 permanent school buildings of all classes have been completed since the beginning of American occupation, representing a total of 3,950 rooms. 9,940 teachers were employed in December, 1914, of whom 539 are Americans and 9,401 Filipinos. English is very generally taught, and the next generation of Filipinos will probably speak that tongue. Pauperism is almost unknown in the islands. In 1902 there were only 1,668 paupers maintained at public charge. Vital statistics are as yet restricted to Manila. Population of Manila is 266,943. The death rate in the city of Manila is 23.21 per thousand. The birth rate is 34.88 per

thousand. In 1912 there were 70 newspapers and periodicals published in the islands, 19 being in English, 16 in Spanish, 15 in native dialects, 7 in Spanish and English, 11 in Spanish and native dialects, and 2 in Spanish, English, and native dialects. The assessed real estate property value in 1912 was 484,037,327.10 pesos. The reported value of church buildings, mostly Catholic, is 41,698,710 pesos. The bonded indebtedness of the Philippine Government, including the bonded indebtedness of the cities of Manila and Cebu, is $16,125,000.

The climate is one of the best in the tropics. The islands extend from 5° to 21° north latitude, and Manila is in 14° 35′. The thermometer during July and August rarely goes below 79° or above 85°. The extreme ranges in a year are said to be 61° and 97°, and the annual mean 81°.

AGRICULTURE.

Although agriculture is the chief occupation of the Filipinos, yet only one-ninth of the surface is under cultivation. The soil is very fertile, and even after deducting the mountainous areas it is probable that the area of cultivation can be very largely extended and that the islands can support a population equal to that of Japan.

The chief products are hemp, rice, corn, sugar, tobacco, cocoanuts, and cacao, hemp being the most important commercial product and constituting 43 per cent. of the value of all exports. Coffee and cotton were formerly produced in large quantities—the former for export and the latter for home consumption; but the coffee plant has been almost exterminated by insects and the home-made cotton cloths have been driven out by the competition of those imported from England. The rice and corn are principally produced in Luzon and Mindoro and are consumed in the islands. The cacao is raised in the southern islands, the best quality of it at Mindanao. The sugar cane is raised in the Visayas. The hemp is produced in Southern Luzon, Mindoro, the Visayas, and Mindanao. It is nearly all exported in bales. Tobacco is raised in many of the islands, especially Luzon and Negros.

IMPORTS AND EXPORTS.

In the year ending June 30, 1915, the imports of domestic merchandise from the United States into the Philippines were $22,617,367, and the total exports from the Philippines for the same period to the United States were $23,001,275.

The imports of merchandise from foreign countries, year ending June 30, 1915, were $21,862,494, and the exports were $27,809,058. The principal foreign countries trading with the Philippines are Great Britain, French East Indies, China, and Spain.

CIVIL GOVERNMENT OF THE PHILIPPINES.

On July 1, 1902, Congress passed (chapter 1369) "An act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands and for other purposes." Under this act complete civil government was established in the Archipelago, except that portion inhabited by Moros, comprising part of Mindanao and the Sulu Islands, and the office of Military Governor was terminated. Wm. H. Taft was appointed Civil Governor by the President, the title being subsequently changed to that of Governor-General. Governor Taft was succeeded by Luke E. Wright in December, 1903, by Henry Clay Ide in 1905, James F. Smith in 1906, W. Cameron Forbes in 1909, and Francis Burton Harrison in 1913. The Government was composed of a Civil Governor and seven commissioners, of whom four were Americans and three Filipinos. By act of Congress approved May 11, 1908, the commission was increased by one member, to be appointed by the President, making the commission nine members in all, including the Governor-General, who is President of the Philippine Commission. The Philippine Commission is now composed of five Filipinos and four Americans. There are four executive departments—Interior, Finance, and Justice, Commerce and Police, and Public Instruction. There are thirty-eight provinces, each with a Governor, a Treasurer, and prosecuting attorney (provincial fiscal). Local governments have been established in about 725 towns. The officials consist of a President, Vice-President, and Councilmen (the latter varying in number according to the population) and are elected by the qualified voters of the municipality and serve for four years. The Judiciary consists of a Supreme Court, with seven Judges; Courts of First Instance, and Justice of the Peace Courts. There are twenty-six Judicial Districts. In each province there is a Court of First Instance and a Court of the Justice of the Peace in each organized municipality in every province where there is a Court of First Instance. In March, 1907, the President in accordance with the act of Congress, directed the commission to call a general election of delegates to a Philippine Assembly. The new Assembly was chosen July 30, and was opened October 16 by Secretary of War Taft. It was politically divided as follows: Nacionalists, 31; Progresistas, 16; Independents, 20; Immediatistas, 7; Independistas, 4; Nacional Independiente, 1; Catolico, 1. The total vote recorded at the election for delegates was 104,000, which is only 1.4 per cent. of the population. The second election was held on November 2, 1909. The number of persons registered was 208,845 and the number of votes cast 192,975, which is 2.81 per cent. of the population. The third election was held on June 4, 1912. Incomplete returns showed 248,154 registered voters and 235,786 votes cast. By act of February 15, 1911, the members of the Philippine Assembly are elected for four years from the 16th day of October following their election, and the resident commissioners for four years, their term of office beginning on March 4 following their election. The next election will take place about June 1, 1916. At the first session of the Sixty-first Congress an act was passed and approved August 5, 1909, readjusting the customs duties on imports from all countries, including the United States, on the basis generally of reductions. By an act of Congress approved March 23, 1912, section four of the act of Congress approved July 1, 1902, entitled "An act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes," was amended to read as follows:—"That all inhabitants of the Philippine Islands continuing to reside therein who were Spanish subjects on the eleventh day of April, eighteen hundred and ninety-nine, and then resided in said islands, and their children born subsequent thereto, shall be deemed and held to be citizens of the Philippine Islands and as such entitled to the protection of the United States, except such as shall have elected to preserve their allegiance to the Crown of Spain in accordance with the provisions of the treaty of peace between the United States and Spain, signed at Paris, December tenth, eighteen hundred and ninety-eight: *Provided*, That the Philippine Legislature is hereby authorized to provide by law for the acquisition of Philippine citizenship by those natives of the Philippine Islands who do not come within the foregoing provisions, the natives of other insular possessions of the United States, and such other persons residing in the Philippine Islands who could become citizens of the United States, under the laws of the United States if residing therein."

The Philippine Constabulary, which is distributed throughout the Archipelago in 119 stations, consists of 327 officers and 4,768 enlisted men.

There are in operation 685 post-offices, free delivery municipal letter-carrier service in 447 municipalities, 302 money-order offices, and 439 postal-savings banks, with 48,876 accounts. Of the 48,876 depositors, 41,414 are Filipinos.

The total kilometreage of telegraph and cable lines on December 31, 1914, was 9,794.60, and the number of telegraph offices 303. There are also four wireless stations operated. There are in operation about 732 miles of railroad, of which about 600 miles are in Luzon, 70 miles in Panay, and 60 miles in Cebu. Manila has an urban and suburban electric railway system operating about 40 miles of line. Already more than 9,400 miles of public roads have been built.

Of the legislation recently enacted by the legislative authority in the islands might be mentioned those revising the insurance laws and regulating the insurance business in the islands; those concerning the grading and shipping of hemp; those authorizing the additional investment of the Gold Standard Fund and of the deposits of the Postal Savings Bank, that regulating the creation and operation of rural Agricultural co-operative associations, and that providing Government aid for the erection of sugar centrals.

PORTO RICO.

The island of Porto Rico, over which the flag of the United States was raised in token of formal possession on October 18, 1898, is the most eastern of the Greater Antilles in the West Indies and is separated on the east from the Danish island of St. Thomas by a distance of about fifty miles, and from Hayti on the west by the Mona passage, seventy miles wide. Distances from San Juan, the capital, to important points are as follows: New York, 1,411 miles; Charleston, S. C., 1,200 miles; Key West, Fla., 1,050 miles; Havana, 1,000 miles.

The island is a parallelogram in general outline, 108 miles from the east to the west, and from 37 to 43 miles across, the area being about 3,604 square miles, or somewhat less than half that of the State of New Jersey (Delaware has 2,050 square miles and Connecticut 4,990 square miles). The population according to an enumeration made by the United States Government in 1900 is 953,243, of whom 589,426 are white and 363,817 are colored. The density was 260 to the square mile in 1900; 83.2 per cent. of the population could not read. The population in 1910 is reported as 1,118,012.

Porto Rico is unusually fertile, and its dominant industries are agriculture and lumbering. In elevated regions the vegetation of the temperate zone is not unknown. There are more than 500 varieties of trees found in the forests, and the plains are full of palm, orange, and other trees. The principal crops are sugar, coffee, tobacco, and maize, but oranges, bananas, rice, pineapples, and many other fruits are important products. The largest article of export from Porto Rico is sugar. The next is tobacco. Other exports in order of amount are coffee, fruits, molasses, cattle, timber, and hides.

The principal minerals found in Porto Rico are gold, carbonates, and sulphides of copper and magnetic oxide of iron in large quantities. Lignite is found at Utuado and Moca, and also yellow amber. A large variety of marbles, limestones, and other building stones are deposited on the island, but these resources are very undeveloped. There are salt works at Guanica and Salina on the south coast, and at Cape Rojo on the west, and these constitute the principal mineral industry in Porto Rico

The principal cities are Mayaguez, with 16,939, Ponce, 35,027 inhabitants; and San Juan, the capital, with 48,716. The shipments of domestic merchandise from the United States to Porto Rico, year ending June 30, 1915, were $30,149,764. The exports of domestic merchandise to the United States were $42,306,350. The foreign trade, year ending June 30, 1915, was: Imports, $2,954,465; exports, $7,044,987. Exports of sugar to United States in year ending June 30, 1915, $27,277,839.

An act providing for a civil government for Porto Rico was passed by the Fifty-sixth Congress and received the assent of the President April 12, 1900. A statement of its provisions was printed in THE WORLD ALMANAC for 1901, pages 92 and 93. President Roosevelt in his message to Congress in December, 1906, recommended the granting of United States citizenship to the Porto Ricans, and a bill was introduced in the Sixty-second Congress providing for the same but failed to reach a final vote.

Under this act a civil government was established, which went into effect May 1, 1900. There are two legislative chambers, the Executive Council, or "upper house," composed of the Government Secretary, Attorney-General, Treasurer, Auditor, Commissioner of the Interior, and Commissioner of Education, and five citizens appointed by the President, and the House of Delegates, or "lower house," consisting of 35 members, elected by the people. The island is represented in the Congress of the United States by a Resident Commissioner.

The Legislature in 1914 authorized the issue of bonds in the amount of $1,000,000 for the construction of public improvements and a further issue of bonds in the sum of $150,000 for additional work on the irrigation systems, and provided for secondary railroads subventioned by the Government of Porto Rico.

In 1915 it made women eligible for membership on school boards, designated a Mothers' Day, established a system of juvenile courts, authorized the sale to laborers of certain public lands; granted to former owners of real property sold for taxes subsequent to July 1, 1901, or to any one interested therein, the right of redemption and provided for the protection of Porto Rican cigars from fraudulent misrepresentation.

GUAM.

The island of Guam, the largest of the Mariana Archipelago, was ceded by Spain to the United States by article 2 of the Treaty of Peace, concluded at Paris, December 10, 1898. It lies in a direct line from San Francisco to the southern part of the Philippines, and is 5,044 miles from San Francisco and 1,506 miles from Manila. It is about 30 miles long and 100 miles in circumference, and has a population of 12,517. The inhabitants are mostly immigrants or descendants of immigrants from the Philippines, the original race of the Mariana Islands being nearly extinct. The prevailing language is English. Spanish and Chamorro are also spoken. Nine-tenths of the islanders can read and write. The island is thickly wooded, well watered, and fertile, and possesses an excellent harbor. The productions are tropical fruits, cacao, rice, corn, tobacco, and sugar cane. The island of Guam was discovered by Hernando de Magallanes on March 6, 1521.

The island was captured by the U. S. S. Charleston, Capt. Henry Glass commanding, June 21, 1898, the American flag raised over Fort Santa Cruz, and a salute fired. Later the island was made a naval station, and Commander E. D. Taussig, of the U. S. S. Bennington, took possession February 1, 1899. The Governor is a naval officer, and the island has a marine garrison as well as a station ship.

TUTUILA (AMERICAN SAMOA).

Tutuila, the Samoan island which, with its attendant islets of Manu'a, Olosega, Ofu, Aunuu and Rose, became a possession of the United States by virtue of the tripartite treaty with Great Britain and Germany in 1899, covers, according to the Bureau of Statistics of the Department of Commerce, fifty-five square miles, and has (by census of February 1, 1912) 7,251 inhabitants. It possesses the most valuable island harbor, Pago-Pago, in the South Pacific, and perhaps in the entire Pacific Ocean. Commercially the island is unimportant at present, but is extremely valuable in its relations to the commerce of any nation desiring to cultivate trans-Pacific commerce.

Ex-Chief Justice Chambers, of Samoa, says of Pago-Pago that "The harbor could hold the entire naval force of the United States, and is so perfectly arranged that only two vessels can enter at the same time. The coaling station, being surrounded by high bluffs, cannot be reached by shells from outside." Capacity of coaling station, 4,200 tons.

The Samoan Islands, in the South Pacific, are fourteen in number and lie in a direct line drawn from San Francisco to Auckland, New Zealand. Tutuila is 4,160 miles from San Francisco, 2,263 miles from Hawaii, 1,580 miles from Auckland, 2,354 miles from Sydney, and 4,200 miles from Manila. The inhabitants are native Polynesians and Christians of different denominations.

The civil government is administered by a Governor, a naval officer nominated by the Navy Department and appointed by the President. All civil affairs are under the jurisdiction of the Navy Department.

WAKE AND OTHER ISLANDS.

The United States flag was hoisted over Wake Island on July 4, 1898, by Gen. F. V. Greene, commanding Second Detachment Philippine expedition. It is a small island in the direct route from Hawaii to Hongkong, about 2,000 miles from the first and 3,000 miles from the second.

The United States possesses a number of scattered small islands in the Pacific Ocean, some hardly more than rocks or coral reefs, over which the flag has been hoisted from time to time. They are of little present value and mostly uninhabited. The largest are Christmas, Gallego, Starbuck, Penrhyn, Phœnix, Palmyra, Howland, Baker, Johnston, Gardner, Midway, Morell, and Marcus Islands. The Midway Islands are occupied by a colony of telegraphers in charge of the relay in the cable line connecting the Philippines with the United States, in all about forty persons.

The Santa Barbara group is a part of California and the Aleutian chain, extending from the peninsula of Kamchatka in Asiatic Russia to the promontory in North America which separates Bering Sea from the North Pacific, a part of Alaska.

HAWAII.

Hawaii was annexed to the United States by joint resolution of Congress July 7, 1898. A bill to create Hawaii a Territory of the United States was passed by Congress and approved April 30, 1900.

The area of the several islands of the Hawaiian group is as follows: Hawaii, 4,210 square miles; Maui, 760; Oahu, 600; Kauai, 590; Molokai, 270; Lanai, 150; Niihau, 97; Kahoolawe, 63. Total, 6,740 square miles.

At the time of the discovery of the islands by Captain Cook in 1778 the native population was about 200,000. This has steadily decreased, so that at the census of 1910 the native born numbered but 98,157. Total foreign born (1910), 93,752.

The first United States census of the islands was taken in 1900 with the following result: Hawaii Island, 46,843; Kauai Island, 20,562; Niihau Island, 172; Maui Island, 25,416; Molokai Island and Lanai Island, 2,504; Oahu Island, 58,504. Total of the Territory, 154,001. The population of the city of Honolulu was 39,306. The population of Hawaii according to the 1910 census, made by the United States Census Bureau, was 191,909, Honolulu City having a population of 52,183. Estimated population in 1914 (by United States Consular Report), 207,743.

POPULATION OF HAWAII, BY ISLANDS, 1910.

Hawaii	55,382	Lanai	131	Molokai	1,791
Kahoolawe	2	Maui	28,623	Niihau	208
Kauai	23,744	Midway	35	Oahu	81,993

BY COLOR OR RACE.

Hawaiian	26,041	Spanish	1,900	Black	158
Caucasian Hawaiian	8,772	Other Caucasian	14,867	Mulatto	537
Asiatic Hawaiian	3,734	Chinese	21,674	All other	2,736
Portuguese	22,303	Japanese	79,674		
Porto Rican	4,890	Korean	4,533		

The exports of domestic merchandise from Hawaii to the United States in the twelve months ending June 30, 1915, were valued at $61,831,381. The imports into Hawaii from the United States for the same period were valued at $20,295,829. Exports of sugar from Hawaii in year ending June 30, 1915, was $52,949,697.

The value of imports and exports for the fiscal year ending June 30, 1914, aggregated $73,649,795, the imports valued at $32,055,970, and exports $41,593,825. (The imports from the United States have almost doubled during the last six years. The exports of pineapples have increased almost fivefold, or from about $800,000 to about $4,000,000, during the last five years. The customs receipts were $1,869,513.89.)

The Territorial bonded indebtedness was $6,844,000, or 4.25 per cent. of the assessed value of property, which is $161,187,226.

Bank deposits aggregated $16,647,665, of which commercial deposits were $10,371,874 and savings deposits $6,275,790.

There are 93 post-offices. There are powerful wireless stations for transmitting and receiving messages to and from San Francisco and Japan and with vessels at sea.

The number of schools is 219. There are 1,020 teachers and the number of pupils has increased during the 14 years of Territorial government from 15,537 to 33,288.

The new Territorial Government was inaugurated at Honolulu June 14, 1900, and the first Territorial Legislature began its sessions at Honolulu February 20, 1901. The Legislature is composed of two houses—the Senate of fifteen members, holding office four years, and the House of Representatives of thirty members, holding office two years. The Legislature meets biennially, and sessions are limited to sixty days.

The executive power is lodged in a Governor, a Secretary, both appointed by the President, and hold office four years, and the following officials appointed by the Governor, by and with the consent of the Senate of Hawaii. An Attorney-General, Treasurer, Commissioner of Public Lands, Commissioner of Agriculture and Forestry, Superintendent of Public Works, Superintendent of Public Instruction, Auditor and Deputy, Surveyor, High Sheriff, and members of the Boards of Health, Public Instruction, Prison Inspectors, etc. They hold office for four years, and must be citizens of Hawaii.

The Territorial Courts comprise a Supreme Court of three members, five Circuit Courts, of which one has three members, who sit separately, and the others one member each, and 29 District Courts. The Supreme Court and Circuit Court Judges are appointed by the President, and the District Magistrates by the Chief Justice of the Territorial Supreme Court. The Circuit Courts are the courts of general original jurisdiction. They try law, equity, probate, and divorce cases. The First Circuit Court acts also as a court of land registration. The Circuit and District Courts act also as Juvenile Courts. The Territory is a Federal Judicial District, with a District Judge, District-Attorney, and Marshal, all appointed by the President. The District Judge has all the powers of a Circuit Judge.

The Territory is represented in Congress by a delegate, who is elected biennially by the people.

Provision is made in the act creating the Territory for the residence of Chinese in the Territory, and prohibition as laborers to enter the United States.

CUBA.

The island of Cuba is 760 miles long, and its width varies from about 25 miles to 100 miles. Its area comprises 45,881 square miles, or about that of Pennsylvania. It has numerous safe and commodious harbors, that of Havana being one of the largest and finest in the world. Measuring from points of nearest approach to its neighbors, Cuba is about 100 miles from Key West, Fla., north; 54 miles from Hayti, east; 130 miles from Yucatan, west, and 85 miles from Jamaica, south. There are 2,360 miles of railway lines and 200 miles of electric railways.

The two principal agricultural staples of the island are sugar and tobacco. It also produces in consid-

erable quantities fruits, vegetables, timber and metals, mainly iron, manganese and copper ore, and is adapted to coffee and cotton raising. The ground has no rival for fertility, and when duly cultivated gives marvellous results. The sugarcane when planted in superior ground is cut during 50 years without being planted again. Cuba is superior to the rest of the tropical lands, with the possible exception of Porto Rico. The whole land is mantled with rich soils, fertile calcareous loams, which, under constant humidity, yield in abundance every form of useful vegetation of the tropical and temperate climes. It has 1,246 miles of shaded roads and highways. The average fluctuation of the temperature is 12 degrees. The average in January is 70.3; July, 82.4; extremes, 60 to 92. Value of farms, plantations, etc., $120,000,000; tobacco crop, calculated at $32,000,000, and although there are but few plantations, oranges, grapefruit, etc., produce annually $10,000,000, while pineapples, cocoa, molasses, asphalt, iron, nickel, mahogany, cedar, etc., produce $10,000,000 also. Cuba's annual sugar crop exceeds $130,000,000.

The Government is republican in form. The President, who is chosen by popular suffrage, serves four years and appoints his own Cabinet. The Congress consists of a Senate and House of Representatives, one Representative being chosen for every 25,000 inhabitants, as nearly as possible. The provinces, of which there are six, corresponding to the American States, elect their own Governors and control their own internal affairs.

POPULATION OF CUBA.

A census of Cuba was taken by the United States Provisional Government in 1907, under the direction of the Department of Agriculture at Washington. The results, of which the following is an abstract, were published in Spanish and English in 1909.

In 1907 Cuba had a population of 2,048,980, an increase from 1899 of 476,183, or 30.3 per cent. (In 1913, total population, 2,500,000.) The population of the provinces of Cuba based on the 1907 census was as follows: Habana, 538,010; Santa Clara, 457,431; Oriente, 455,086; Pinar del Rio, 240,372; Matanzas, 239,812; Camaguey, 118,269. Over half the population lived in the rural districts, the 134 towns and cities containing 899,667 inhabitants, or 43.9 per cent. of the total. The population of the six large cities was as follows: Habana, 297,159; Santiago de Cuba, 45,470; Matanzas, 36,009; Cienfuegos, 30,100; Camaguey, 29,616; Cardenas, 24,280.

The density of population in 1907 was 46.4 per square mile.

Males were more numerous than females, the numbers being 1,074,882 and 974,098, respectively.

Of the total population, 1,369,476, or 66.8 per cent., were single or divorced; 423,537, or 20.7 per cent., were married; 176,509, or 8.6 per cent., were consensually married; and 79,458, or 3.9 per cent., were widowed. The average number of persons to a family was 4.8.

In 1907 over two-thirds, 1,428,176, or 69.7 per cent., of the inhabitants were white. The colored population was composed of 274,272 negroes, 334,695 mixed, and 11,837 Chinese. Of the whites, 1,224,539 were native and 203,637 foreign born. Of the latter class, Spain contributed 185,393 and the United States 6,713.

Of the total population, 1,780,628, or 86.9 per cent., were of Cuban and 228,138, or 11.1 per cent., of Spanish citizenship. Of the 551,639 males of voting age, 430,514 were Cuban citizens, and of these, 212,930, or less than one-half, were literate, while 217,584 were illiterate; among those of other citizenship the proportion of literates was much greater, 89,217 being literate and 31,908 illiterate. Among the white males of voting age the literates were in the majority, the numbers being 161,742 literates and 130,944 illiterates for Cuban citizens, and 84,937 literates and 23,056 illiterates for all the others.

Almost one-third, 171,017, or 31.6 per cent., of the children attended school; the corresponding percentage for 1899 was only 15.7. In the six large cities 55,336, or 49.9 per cent. of those of school age, attended school.

Of the population at least ten years of age, 837,958, or 56.6 per cent., could read. For the large cities the percentage was 82.6; for the rest of Cuba it was 47.9.

In 1907, 772,502 persons were engaged in gainful occupations. The 698,982 male breadwinners formed 65 per cent. of all the males, while the 73,520 females gainfully employed formed 7.5 per cent. of all the females. Of the wage-earners, 374,969, or 48.5 per cent., were engaged in agriculture, fishing and mining; 136,419, or 17.6 per cent., in trade and transportation; 126,021, or 16.3 per cent., in manufacturing and mechanical pursuits; 122,288, or 16 per cent., in domestic and personal service; and 12,805, or 1.6 per cent., in professional service.

The principal trade is with the United States, which takes practically all the exports of sugar, fruit, and minerals, and more than nine-tenths of the raw tobacco. Trade with Spain has fallen off greatly.

The total trade of Cuba for the calendar year 1914: Imports, $134,008,000; exports, $170,797,000. Imports into the United States from Cuba, $136,936,039; exports from the United States to Cuba, $91,420,042.

THE CUBAN GOVERNMENT.

President..(Salary, $25,000).....GEN. MARIO G. MENOCAL.
Vice-President.....ENRIQUE JOSE VARONA.

CABINET.

Secretary of State—Dr. Pablo Desvernine.
Secretary of the Treasury—Leopoldo Cancio y Luna.
Secretary of Government—Aurelio Hevia.
Secretary of Justice—Cristobal de la Guardia.
Secretary of Public Works—José Ramón Villalón.
Sec'y of Agriculture, Commerce and Labor—Emilio Núñez.
Secretary of Public Instruction and Fine Arts—Ezequiel Garcíá Enseñat.
Secretary of Health and Charities—Enrique Núñez
Secretary of the Presidency—Dr. Rafael Montoro.

LEGISLATIVE.

President of the Senate—Dr. Eugenio Sánchez Agramonte.
President (Speaker) of the House of Representatives—Dr. Orestes Ferrara.

The Isle of Pines, which under the generally accepted survey is supposed to have an area of 614.34 square marine miles, or about 521,381 acres, is situated off the south coast of Western Cuba, its nearest point to the larger island being about 34 1-2 statute miles distant, while the island itself and its adjacent keys form the southern barrier of the Gulf of Batabano, a bight which extends northward to an extent sufficient to make Habana Province, to which the Isle of Pines is officially attached, the narrowest part of Cuba. The Isle of Pines is practically the only land southward of Cuba to Panama, from which it is distant about 850 miles; it is 230 miles almost due east of Cape Cartuche, Yucatan, and 370 miles northwest of the island of Jamaica.

NATIONAL PARKS IN THE UNITED STATES.

THE National parks and reservations mentioned below are under the supervision of the Secretary of the Interior. General information, the annual administrative reports, copies of the rules and regulations, and compilations of the laws relating to the parks may be obtained from the Secretary of the Interior or from the superintendents of the parks.

YELLOWSTONE NATIONAL PARK is in Wyoming, Montana, and Idaho, and has an area of 2,142,720 acres. The superintendent's address is Yellowstone Park, Wyoming. The park can be reached by the following railroads: Northern Pacific Railroad to Gardiner, the northern entrance, via Livingston, Mont.; Oregon Short Line Railroad to Yellowstone, Mont., the western entrance; Chicago, Burlington and Quincy Railroad to Cody, Wyo., from which the eastern entrance to the park is accessible. Stage and private transportation connections for the reservation are made at all these points. The tourist season extends from June 1 to September 15.

YOSEMITE NATIONAL PARK, CALIFORNIA, including the Yosemite Valley and Mariposa Big Tree Grove, embraces an area of 719,622 acres. The superintendent's address is Yosemite, Cal. The park can be reached from Merced on the Atchison, Topeka and Santa Fé and the Southern Pacific railroads by way of Yosemite Valley Railroad, which runs to the western boundary, and by connections of the same roads to Raymond, on the southwest; stage lines run from the terminus of the Yosemite Valley Railroad and from Raymond to Yosemite Valley within the park. The tourist season extends from May 1 to November 1, but the park is accessible and hotel accommodations are furnished the entire year.

GLACIER NATIONAL PARK, MONTANA, has an area of approximately 915,000 acres, of which 15,000 acres have been surveyed. Within the limits stated there are 250 lakes, ranging from 10 miles to a few hundred feet in extent. There are about 80 glaciers between 5 square miles and a few acres in area. There are wild animals, plants, and rocks in number and quantity to satisfy the most ardent student, and views of great variety, beauty and grandeur to gratify the artist and the lover of nature. The address of the superintendent is Belton, Mont. The park can be reached via the Great Northern Railway. The tourist season extends from May 1 to about September 15.

MOUNT RAINIER NATIONAL PARK, WASHINGTON, has an area of 207,360 acres. The superintendent's address is Ashford, Wash. The park is reached by stage or private transportation from Ashford, Wash., on the Tacoma Eastern Railroad, and by trail from Fairfax, on the Northern Pacific Railroad. The tourist season extends from June 15 to September 15.

SEQUOIA NATIONAL PARK, CALIFORNIA, has an area of 161,597 acres. The address of the superintendent is Three Rivers, Cal. This park may be reached from Visalia, on the Southern Pacific and the Atchison, Topeka and Santa Fé railroads by way of the Visalia Electric Railroad Company to Lemon Cove, thence by stage or private conveyance to the Giant Forest within the park, or by private conveyance from Visalia via Lemon Cove.

GENERAL GRANT NATIONAL PARK, CALIFORNIA, has an area of 2,536 acres. This reservation is administered jointly with Sequoia National Park, and the tourist season extends from June 1 to September 15. The address of the superintendent is given above. The park may be reached from Sanger, on the Southern Pacific Railroad, thence by auto stage or private conveyance, a distance of 46 miles to the park, also from Cuttler Station on the Atchison, Topeka and Santa Fé Railroad, thence 39 miles by stage or private conveyance by way of Orosi and Badger to the park.

CRATER LAKE NATIONAL PARK, OREGON, has an area of 159,360 acres. The address of the superintendent during the tourist months (June 15 to September 30) is Crater Lake, Ore., and during the balance of the year Klamath Falls, Ore. This park may be reached by stage or automobile from Klamath Falls, Medford, Chiloquin, or Ashland, Ore., on the Southern Pacific Railroad.

WIND CAVE NATIONAL PARK, SOUTH DAKOTA, contains 10,522 acres. The superintendent's address is Wind Cave, S. Dak. This park may be reached by private conveyances from Hot Springs, on the Chicago, Burlington and Quincy and the Chicago and Northwestern Railroads, or by similar conveyance from Custer, on the Chicago, Burlington and Quincy Railroad. The reservation is open to tourists the entire year.

SULLYS HILL PARK, NORTH DAKOTA, on the shore of Devils Lake, has an area of 780 acres. The address of the superintendent is Fort Totten, N. Dak. Devils Lake, Narrows, and Tokio, on the Great Northern Railroad, are close to the park, and from these points the reservation can be approached by wagon, or by boat (private conveyance).

PLATT NATIONAL PARK, AT SULPHUR, OKLAHOMA, has an area of 848.22 acres. Sulphur is the post-office address of the superintendent. The town is accessible by the Atchison, Topeka and Santa Fé and the St. Louis and San Francisco railroads. The park, which is open to tourists the entire year, is within walking or riding distance of the railroads.

MESA VERDE NATIONAL PARK, COLORADO, under the organic act approved June 29, 1906, contained an area of 42,376 acres, and the 5-mile strip under the park jurisdiction for the protection of ruins, provided for by the act, abutting the park, contained 175,360 acres. The 5-mile strip was eliminated from park supervision by the act of June 30, 1913, and the boundaries of the park proper were changed so as to make the present aggregate area 76.51 square miles, or 48,966.4 acres. The address of the superintendent is Mancos, Col., the nearest railroad station, on the Rio Grande Southern Railroad. This station is about 25 miles from the ruins, which may be reached only by horseback or on foot. The tourist season extends from May 1 to September 30.

CASA GRANDE RUIN, ARIZONA, a reservation; has an area of 480 acres. The nearest railroad station is Casa Grande, on the Southern Pacific Railroad. It may also be reached by private conveyance from Florence, Ariz., on the Phoenix and Eastern Railroad. The address of the custodian is Florence.

The Mesa Verde National Park and the Casa Grande Reservation were set aside to protect the instructive prehistoric ruins and other objects of antiquity which they contain. These ruins are being excavated and repaired and are open for the inspection of visitors. Reports on the repair of such ruins have been issued by the Department of the Interior, and more detailed accounts are distributed by the Bureau of American Ethnology, Smithsonian Institution.

ROCKY MOUNTAIN NATIONAL PARK, created by the act of January 26, 1915, is in Colorado, about 45 miles in an air line northwest of Denver. It has an area of approximately 229,000 acres, and is on both sides of the Continental Divide in the neighborhood of Longs Peak. The park may be reached from Lyons, on the Chicago, Burlington and Quincy Railroad; from Loveland, on the Colorado and Southern Railroad; and from Granby, on the Denver and Salt Lake Railroad.

HOT SPRINGS RESERVATION, ARKANSAS (the permanent reservation), has an area of 911.63 acres. Eleven bathhouses on the reservation and twelve in the city of Hot Springs, as well as several hotels operated in connection with bathhouses, receive hot water from the springs, under lease with the Secretary of the Interior. The address of the superintendent is Hot Springs, Ark.

PRESERVATION OF AMERICAN ANTIQUITIES—Under the act of Congress approved June 8, 1906, interdepartmental regulations governing the excavation, appropriation, etc., of prehistoric ruins or objects of antiquity have been promulgated by the Secretaries of the Interior, Agriculture, and War. Applications for permits to make excavations on the public lands, Indian reservations, or the national monuments named below should be addressed to the Secretary of the Interior. The following have been preserved from entry and set aside as national monuments: Devils Tower, Wyoming;

NATIONAL PARKS IN THE UNITED STATES—*Continued.*

Montezuma Castle, Arizona; Petrified Forest, Arizona; El Morro, New Mexico; Chaco Canyon, New Mexico; Muir Woods, California; Natural Bridges, Utah; Lewis and Clark Cavern, Montana; Tumacacori, Arizona; Navajo, Arizona; Mukuntuweap, Utah; Shoshone Cavern, Wyoming; Gran Quivira, New Mexico; Sitka National Monument, Alaska; Rainbow Bridge, Utah; Pinnacles, California; Colorado, Colorado; Papago Saguaro National Monument, Arizona.

Ten other National monuments within National forests have also been set aside under this act and placed under the jurisdiction of the Secretary of Agriculture, to whom inquiries in regard thereto should be addressed. Two other National monuments (Big Hole Battlefield, in Montana, and Cabrillo, in California) are under jurisdiction of the Secretary of War.

FORESTS AND FORESTRY.

(Report of year ending June 30, 1915).

OUR forests now cover 550,000,000 acres, or about one-fourth of the United States. Forests publicly owned contain one-fifth of all timber standing. Forests privately owned contain at least four-fifths of the standing timber. The timber privately owned is not only four times that publicly owned, but it is generally more valuable.

The original forests of the United States contained timber in quantity and variety far beyond that upon any other area of similar size in the world. They covered 850,000,000 acres, with a stand of not less than 5,200,000,000,000 feet of merchantable timber, according to present standards of use. There were five great forest regions—the Northern, the Southern, the Central, the Rocky Mountain and the Pacific.

The present rate of cutting is three times the annual growth of the forests of the United States. The great pineries of the lake States are nearing exhaustion and heavy inroads have been made upon the supply of valuable timber throughout all parts of the country.

The heavy demands for timber have been rapidly pushing the great centres of lumber industry toward the South and West. In consequence, the State of Washington has led for several years in lumber production, now followed in order by Louisiana, Mississippi, Oregon, and Texas. Among the soft woods the production of yellow pine lumber amounts to about fifteen billion feet, the Douglas fir of the Northwest holding second place with more than five and one-half billion feet, while white pine with two and one-half billion feet ranks third; oak comes first among the hardwoods, with three and one-fifth billion feet, and is followed in order by maple, red gum, yellow poplar, chestnut, birch, and beech.

We take from our forests yearly, including waste in logging and in manufacture, more than 22,000,000,000 cubic feet of wood, valued at about $1,375,000,000.

We use in a single year 90,000,000 cords of firewood, nearly 40,000,000,000 board feet of lumber, 135,000,000 ties, nearly 1,700,000,000 staves, 440,000,000 board feet for veneer, over 130,000,000 sets of heading, over 350,000,000 barrel hoops, over 3,300,000 cords of native pulp wood, 165,000,000 cubic feet of round mine timbers, nearly 1,500,000 cords of wood for distillation, over 140,000 cords for excelsior, and nearly 3,500,000 telegraph and telephone poles.

About 4,333,000 cords of wood are used in the manufacture of paper, of which about 1,000,000 cords are imported practically all from Canada. The demand for wood pulp is making a severe drain on the spruce forests, which furnish the principal supply, though a number of other woods, such as poplar, hemlock, pine, and balsam, are now being used in considerable quantities. Tests by the Forest Service of the United States Department of Agriculture have shown that pulp suitable for use in the manufacture of news and wrapping paper can be made from some ten species of native woods, including Sitka spruce, Western hemlock, Engelmann spruce, red fir, white fir, and lodgepole pine.

A larger drain upon our forest resources is made by the demand for railroad ties. White oak, hitherto the chief source of supply, is not plentiful enough to meet this demand indefinitely, and in many parts of the country the supplies of chestnut, cedar, and cypress are dwindling. In place of these highly durable woods, cheaper and more plentiful ones, such as Southern pine, Douglas fir, tamarack, and hemlock, are coming into use, largely in consequence of the introduction of treatment by preservatives which retard decay. A great saving has been effected in the naval stores industry, also largely through the work of the Forest Service, by the introduction of the so-called "cup" systems of turpentining in place of the old destructive system of "boxing." The new systems insure a larger product of better quality and prolong the life of the longleaf pine forests upon which the industry depends.

UNITED STATES FOREST SERVICE.

The Forest Service is one of the bureaus of the Department of Agriculture. It has charge of the administration and protection of the National forests and also promotes the practice of forestry generally through investigations and the diffusion of information.

The work of the Government in forestry was initiated by the appointment of Dr. Franklin B. Hough in 1876 as special agent in the Department of Agriculture. In 1881 a division of forestry was created in that department. In 1901 this division became the Bureau of Forestry, and in 1905, when the care of the National forests was given to this bureau, its name became the Forest Service.

Previously the care of National forests had been in the hands of the Department of Interior.

A law authorizing the President to set apart forest reserves was passed in 1891, but no provision for their administration and use was made until 1897. Previous to 1905 the Bureau of Forestry merely gave expert advice, on request, to the Department of the Interior concerning the application of forestry to the forest reserves. The change of name from "forest reserves" to "National forests" was made in 1906 to correct the impression that the forests were, as "reserves," withdrawn from use. Since the Forest Service took charge of them the fundamental aim has been to open them to the widest use consistent with their proper protection.

The National forests were set aside as follows: By President Harrison, 13,416,710 acres; by President Cleveland, 25,686,320 acres; by President McKinley, 7,050,089 acres; by President Roosevelt, 148,346,924 acres. Since early in 1909 a careful readjustment of the boundaries has been going on. In consequence President Taft added to the National forests 4,333,847 acres and eliminated from them 11,680,578 acres, while to June 30, 1915, President Wilson has added 445,363 acres and eliminated 3,081,063 acres. Acts of Congress prohibit any additions by the President to the National forest area in Washington, Oregon, California, Idaho, Montana, Wyoming, and Colorado.

The present net area of the National forests, including Alaska and Porto Rico, is 162,672,802 acres, with an additional 348,276 acres acquired by purchase in the White Mountains and Southern Appalachian regions for National forest purposes.

The expenditures upon the National forests for protection, administration, and improvement at present exceed the revenues from the forests by about $3,000,000 a year, depending partly on the severity of the fire season and partly on the activity of the general lumber market. The normal gross cost of administration and protection is approximately $4,750,000, while from $300,000 to $600,000 yearly is invested in the construction of roads, trails, buildings, and other permanent improvements. The cost of administration includes the cost of handling much free-use business, while the cost of protection is chiefly the cost of protecting water supplies and future timber supplies.

FORESTS AND FORESTRY—*Continued.*

COMPARISON OF RECEIPTS FROM THE SEVERAL SOURCES FOR THE FISCAL YEARS 1915 AND 1914.

Fiscal Year.	Timber.		Grazing.		Special Uses, Etc.		All Sources.	
	Total.	Per Acre	Total.	Per Acre.	Total.	Per Acre.	Total.	Per Acre.
1915	$1,174,473.35	.....	$1,130,495 00	.....	$176,501.00	.....	$2,481,469.35	.....
1914	1,304,053.56	$0.0070	1,002,347.59	$0.0054	131,309.06	$0.0007	2,437,710.21	$0.0132

Under the law 25 per cent. of the receipts are paid to the States in which the National forests are located, to be expended for roads and schools. The amount to be paid to the States in this way from the receipts in 1915 is about $610,797.75.

By the acts of Congress organizing them as States, Arizona and New Mexico also receive for their school funds an additional share of the receipts based on the proportion that their school lands within the National forests bear to the total National forest area in the States. The approximate amounts due on account of the receipts for 1915 are $28,966.46 to Arizona, and $9,311.87 to New Mexico.

Congress has also provided that 10 per cent. of the receipts shall be set aside as an appropriation to be used under the direction of the Secretary of Agriculture for road and trail building in National forests in co-operation with State authorities or otherwise. The amount thus appropriated on account of fiscal year 1915 receipts is $244,319.10. This, added to the amount carried over from 1914 receipts fund, $155,939.46, and the amount appropriated for improvements, in the regular agricultural bill, $400,000, makes the total available for the construction of roads, trails, cabins, bridges, telephone lines, etc., on the National forests for the fiscal year 1916, $800,258.56.

The total regular appropriation for salaries, general expenses, and improvements for the fiscal year 1916 is $5,553,256.00, as against $5,548,256.00 for 1915.

The grazing receipts for 1915 were paid by the holders of 25,641 permits to graze 1,727,046 cattle, horses, and swine, and of 4,968 permits to graze 7,283,685 sheep and goats. The receipts from timber sales were paid by approximately 11,000 purchasers to cut the equivalent of 565,754,000 board feet of timber. The receipts from special uses were paid by the holders of approximately 5,000 permits. In other words, these receipts represent profitable use of the forests by some 46,000 individuals or concerns. To the use for which payment was made must be added the heavy free use of the forests by the public. Figures for free use of timber are as follows:

FREE USE OF TIMBER ON NATIONAL FORESTS.

Fiscal Year.	Number of Permittees.	Cut.	Value.
		Board Feet.	
1915	40,015	123,168,000	$206,464.13
1914	39,427	120,575,000	182,774.20

In issuing permits for reservoirs, conduits, power-houses and transmission lines for commercial power development the Forest Service has steadfastly insisted on conditions designed to prevent speculative or perpetual holdings and to secure the full development of available power and the payment of reasonable charges for the use of land.

The total stand of timber on the National forests is estimated at nearly six hundred billions board feet. The following table shows the local cut of timber from the National forests in the fiscal year 1915:

TIMBER CUT FROM NATIONAL FORESTS.

State.	Cut Under Sale.	Cut Under Free Use.	Total Cut.	State.	Cut Under Sale.	Cut Under Free Use.	Total Cut.
	Board Feet.	*Board Feet.*	*Board Feet.*		*Board Feet.*	*Board Feet.*	*Board Feet.*
Idaho	100,793,000	24,848,000	125,641,000	Nevada	2,803,000	1,959,000	4,762,000
Montana	101,384,000	18,378,000	119,762,000	Minnesota	1,545,000	286,000	1,831,000
Oregon	49,414,000	12,122,000	61,536,000	Virginia	1,383,000	91,000	1,474,000
Colorado	42,609,000	10,587,000	53,196,000	North Carolina	828,000	2,000	830,000
Washington	42,378,000	2,462,000	44,840,000	Michigan	83,000	109,000	192,000
Arizona	40,076,000	4,255,000	44,331,000	Oklahoma	.....	175,000	175,000
California	37,115,000	6,778,000	43,893,000	Florida	99,000	33,000	132,000
Wyoming	34,114,000	9,337,000	43,451,000	North Dakota	.....	98,000	98,000
Utah	24,394,000	13,969,000	38,363,000	Tennessee	34,000	9,000	43,000
Alaska	37,160,000	.....	37,160,000	Nebraska	.....	5,000	5,000
New Mexico	17,819,000	13,131,000	30,950,000				
South Dakota	19,959,000	4,350,000	24,309,000	Total	565,754,000*	123,259,000	689,013,000
Arkansas	11,764,000	275,000	12,039,000				

* Includes 19,246,000 board feet cut under sales at cost

The value of the public property administered by the Forest Service is estimated at over two billion dollars.

The great areas contained in the National forests have now been brought to a condition where they are beginning to serve the purposes of the West. The conservation of timber and forage through wise use and the protection of stream flow are the means of sustaining many industries which have contributed materially to the prosperity of the country.

ORGANIZATION OF THE FOREST SERVICE.

At the head of the Forest Service are the Forester, Henry S. Graves, and the Associate Forester, A. F. Potter. The work is organized under the following branches: Operation, James B. Adams in charge; Lands, E. A. Sherman in charge; Silviculture, W. B. Greeley in charge; Grazing, A. F. Potter in charge; Research, including Forest Products Laboratory, Earle H. Clapp in charge; Acquisition of Lands under the Weeks law, William L. Hall in charge.

The 159 National forests are grouped in seven districts, with a District Forester in charge of each, and headquarters as follows: District 1 (Montana, Northeastern Washington, Northern Idaho, Northwestern South Dakota, and Southwestern North Dakota), Missoula, Mont., F. A. Silcox, District Forester; District 2 (Colorado, Wyoming, the remainder of South Dakota, Nebraska, and Western Kansas, Northern Michigan, and Northern Minnesota), Denver, Col., Smith Riley, District Forester; District 3 (most of Arizona and New Mexico), Albuquerque, N. Mex., A. C. Ringland, District Forester; District 4 (Utah, Southern Idaho, Western Wyoming, Eastern and Central Nevada, and a small portion of Northwestern Arizona), Ogden, Utah, L. F. Kneipp, District Forester; District 5

FORESTS AND FORESTRY—*Continued.*

(California and Southwestern Nevada), San Francisco, Cal., Coert Du Bois, District Forester; District 6 (Washington, Oregon, and Alaska), Portland, Ore., Geo. H. Cecil, District Forester; District 7 (Arkansas, Florida, Oklahoma, South Carolina, Georgia, North Carolina, Tennessee, Virginia, West Virginia, New Hampshire, Porto Rico), Washington, D. C., William L. Hall, District Forester.

On July 1, 1915, the force employed by the Forest Service numbered 3,875. Of these 3,225 were employed upon the National forests and 650 were engaged in administrative, scientific and clerical work at the Washington and district headquarters. Of the employés on the National forests the force engaged principally in protective work numbered 2,310 men, as follows: Forest Rangers, 399; Assistant Forest Rangers, 861; Forest Guards, 1,049; Game Warden 1. The protective force was therefore about one man for every 80,000 acres, or 125 square miles. (Prussia has one man for every 1,700 acres, and Baden one for every 750.)

BRANCH OF SILVICULTURE.

The branch of silviculture directs the management of the National forests as regards both the cutting of mature timber and the work of forest planting; co-operates with States in developing forest policies adapted to their requirements, and co-operates with private forest owners who desire to practise forestry on their lands.

The chief problems encountered in the management of the National forests, after fire protection, are to secure the removal of mature timber without cutting more than the forest is actually producing, and to replace this timber as it is sold and cut, by young growth of valuable species. Detailed plans are prepared for each forest on the basis of careful estimates of the present stand and its rate of growth, which specify the amount of timber that can be cut safely each year without impairing the permanent supply. This timber is then advertised for sale at prices which secure to the Government its full market value and at the same time allow a fair profit to the operator.

The replacement of old stands by new growth is accomplished mainly by regulating the cutting through the insertion of special provisions in timber sales contracts in such a way as to insure natural reproduction. On completely denuded areas, however, artificial reforestation by planting or sowing is generally necessary for the establishment of a new growth of trees. The object of such work is usually to produce commercial timber, although in a number of cases the reforesting of denuded watersheds is undertaken primarily to control and regulate the flow of streams directly supplying cities and towns. During the year ending June 30, 1915, over 15,000 acres in National forests were planted or sown to trees, chiefly Douglas fir, Western yellow pine, Western white pine, white pine, and lodgepole pine. There are 29 Government nurseries which supply the National forests. These have a present stock of about 34,000,000 plants and are capable of supplying 15,000,000 a year.

At the request of the States the Forest Service makes examinations of their forest conditions and conducts other studies needed to frame forest legislation and formulate a forest State policy adapted to the special requirements of each State. The cost of such work is shared by the State and the service. The service co-operates with private owners, especially small owners, in States which have no State Forester, by furnishing advice, with or without field examinations, concerning the best methods for managing and protecting their holdings. The cost of such examination is borne by the owner.

BRANCH OF GRAZING.

The branch of grazing supervises the grazing of live stock upon the National forests, the principal lines of work being the allotment of grazing privileges; the issuance of grazing permits; the division of the ranges between different classes of stock or their owners, and the regulation of the stock grazed under permit upon the ranges; and the development of the forage-producing capacity of the National forests by the restoration of depleted areas through systematic control of the stock grazed upon them or by artificial means, through the eradication of noxious range-destroying rodents and through the institution of new methods of range control. By co-operation with Federal and State authorities in the enforcement of quarantine regulations the National forests have been practically freed from infection or contagious diseases fatal to live stock, and by an active campaign against predaceous animals, destructive to live stock, the annual loss from this source within the National forests has been reduced by several hundred thousand dollars.

The number of stock grazed during the past season (1915), under permit, was 1,727,046 head of cattle, horses, and swine, and 7,283,685 head of sheep and goats. The annual productive value of this number of stock is more than $30,000,000. The number of persons holding permits to graze live stock during the past year was 30,610.

About 15 per cent. of all the sheep in the United States are grazed in the National forests.

BRANCH OF RESEARCH.

The Branch of Research supervises the investigative work of the service. This includes studies of the principal tree species, of the best methods of forest planting, and of State forest conditions; and investigations of the lumber and wood-using industries and lumber prices. It also has supervision over the Forest Products Laboratory maintained at Madison, Wis., in co-operation with the University of Wisconsin, where experiments are made to determine the physical properties of woods, to ascertain cheap and effective methods to prevent decay, to test the adaptability of untried woods for specific uses, to develop practical uses for sawmill, woods, and factory waste, and to discover processes to obtain valuable chemical by-products from the waste which cannot otherwise be utilized. Experiments in the manufacture of pulpwood from woods heretofore little used are also carried on.

EASTERN NATIONAL FORESTS.

The act of March 1, 1911, commonly known as the Weeks law, provides for the acquisition of forest lands on the watersheds of navigable streams. Its purpose is to promote and protect the navigability of the streams by preserving the forest on the upland portions of their watersheds. Through this act means are afforded of extending the National forest system to regions where the Government has hitherto owned no forest lands and taken no direct part in forest preservation.

The original appropriation was $2,000,000 per year for five and one-half years, beginning with the last half of the fiscal year 1911. The Agricultural Appropriation bill for the fiscal year 1913 made the appropriation for 1912 and subsequent years available until expended.

In order to concentrate the purchases where they will be of the greatest benefit from the standpoint of watershed protection, certain areas in the Appalachian region have been designated, aggregating 6,966,304 acres, to which purchases will be for the present confined. The United States Geological Survey has examined the greater part of this land, as required by law, in order to determine whether or not the forest cover exercises a beneficial influence in regulating the flow of navigable streams. Up to July 1, 1914, 6,013,103 acres were reported upon favorably by the Geological Survey.

The Forest Service has been designated as the bureau to receive proposals of land and to examine and value lands for purchase. The National Forest Reservation Commission considers the recommendations of the Forest Service and approves the lands to be purchased and fixes the price to be paid.

From April 1, 1911, to June 30, 1915, proposals were received covering 4,097,405 acres, of which

3,337,727 acres were within the general areas which had been selected for purchase in the White Mountains and the Southern Appalachians.

During the same period 1,980,941 acres were examined, and 1,317,551 acres were approved by the National Forest Reservation Commission. These are located as follows: Georgia Area, 61,021 acres, in Fannin, Union, Gilmer, and Lumpkin Counties, Ga. Massanutten Area, 59,168 acres, in Shenandoah, Warren, Page, and Rockingham Counties, Va. Mount Mitchell Area, 71,672 acres, in McDowell, Buncombel and Yancey Counties, N. C. Nantahala Area, 36,385 acres, in Macon and Swain Counties, N. C. Natura, Bridge Area, 79,286 acres, in Amherst, Augusta, Rockbridge, Bedford, and Botetourt Counties, Va. Smoky Mountain Area, 41,265 acres, in Blount and Sevier Counties, Tenn. White Mountain Area, 256,467 acres, in Carroll, Coos, and Grafton Counties, N. H. White Top Area, 83,439 acres, in Carter, Johnson, and Sullivan Counties, Tenn., and Washington County, Va. Cherokee Area, 135,686 acres, in Polk and Monroe Counties, Tenn. Monongahela Area, 52,610 acres, in Randolph and Tucker Counties, W. Va. Potomac Area, 76,431 acres, in Hardy County, W. Va., Shenandoah and Frederick Counties, Va. Savannah Area, 97,760 acres, in Rabun County, Ga., Oconee County, S. C., Macon and Jackson Counties, N. C. Shenandoah Area, 123,537 acres in Augusta, Highland, Rockingham Counties, Va., and Pendleton County, W. Va. Unaka Area, 19,756 acres, in Unicoi County, Tenn. Pisgah Area, 86,700 acres, in Transylvania, Henderson, Buncombe, and Haywood Counties, N. C. Booner Area, 36,386 acres, in Avery and Caldwell Counties, N. C.

As these lands are acquired they are administered along the same lines as are the National forests in the West, and the above-named areas will, as title is obtained and plans for handling them are prepared, be given formal designation as National forests.

FOREST POLICY OF THE STATES.

The movement for National forestry has been followed by a widespread development of State forest activities. New York and Pennsylvania, the pioneers in this field, inaugurated State policies before the work of the National Government had awakened general interest in forestry, but in most of the States forest work has been either a direct outgrowth of Federal activities or indirectly due to them. Ten or twelve years ago few States were giving their forest problems any serious consideration; to-day 32 have forest departments, 23 employ professionally trained foresters, and practically all show recognition of the need for a State forest policy.

State work has comprised activities along the lines of (1) education of public sentiment regarding the value of the State's forest resources and importance of their conservation; (2) the giving of technical advice to private owners regarding the application of forestry on their holdings; (3) the development of a systematic State forest fire protective system; (4) the provision of forest planting stock for citizens; (5) the modification of tax systems to lessen the burdens imposed on those who plant forests or otherwise apply forestry with a view to permanent timber production; (6) the formation of State forests or reserves. Each State has developed its own forest movement along its own lines, largely determined by varying natural and economic conditions.

In general, the Northeastern States have paid most attention to encouraging the actual practice of forestry by private owners, with a view to the production of a new forest crop. Men of professional training have been employed as State foresters, to give advice to applicants and to carry on educational work; provision for planting material has been made; and in several States tax laws have been modified. Protection of forests against fire has been advocated and largely provided by State action, with special reference to its need to prevent destruction of young growth. In the far West attention has been centred mainly on fire prevention to protect the vast supplies of mature timber now standing in the virgin coniferous forests of the Rocky Mountain and Pacific coast regions. In the lake States fire protection has, on the whole, had first place in importance, but with recognition of the need to protect both young growth and mature timber because of their commercial value. In the lake States also, and in New York and Pennsylvania, State-owned forests take a very prominent place. The South has, on the whole, been slow to see the need for State action, although the States of Maryland and North Carolina were among the first to have State foresters. Virginia, West Virginia, Kentucky, Tennessee, and Texas have recently followed their lead. While Maryland also was among the first States to establish a forest fire protective system, Virginia, West Virginia, North Carolina, Kentucky, and Texas are only just developing theirs. Louisiana has enacted a State law with some very advanced features, but has yet to take steps to put it in operation; as also has Delaware.

The appropriations for the yearly support of the several State forest departments vary greatly. The smallest is $500; the greatest approximately $315,000. Those which appropriate over $25,000 are: Pennsylvania, $315,000; New York, $178,000; Minnesota, $118,000; Michigan, $105,000; Massachusetts, $78,000, in addition to $175,000 for the suppression of gypsy and brown-tail moths; Maine, $73,000; New Hampshire, $39,000; Washington and Wisconsin, $35,000 each; Oregon, $30,000, and New Jersey, $29,000.

Systematic forest fire protection by the States has been greatly stimulated by the operation of the so-called Weeks law, under which the Federal Government co-operates through the Forest Service with individual States for protecting the watersheds of navigable streams, the Federal Government bearing in no case more than half the cost nor contributing more than $8,000 to any State in any one year. Under this law more than one hundred million acres of private and State-owned lands are fairly well protected against forest fires, at an average cost of less than two cents per acre. The States which have entered into co-operative agreements under this law are: Maine, New Hampshire, Vermont, Massachusetts, Connecticut, New York, New Jersey, Maryland, Virginia, West Virginia, North Carolina, Kentucky, Wisconsin, Minnesota, Michigan, South Dakota, Montana, Idaho, Washington, and Oregon.

Tennessee, Alabama, Colorado, and California have organized fire-warden systems, but do not appropriate State funds for fire protection. Maine, by means of a timber land tax, supports an efficient forest fire service covering the unorganized townships in the northern part of the State; in the remaining townships each bears the cost of an ex-officio warden system. The Forest Service of Minnesota covers 20,000,000 acres by systematic patrol and maintains a permanent field force of rangers and patrolmen, with ex-officio town fire-wardens as an auxiliary force. Idaho has adopted a co-operative system of protection with private owners, under which the State pays its pro rata share of the cost, on the basis of State-owned area within the area protected by a privately organized system. Throughout the Northwest and in Michigan, Vermont, New Hampshire, Maine, Pennsylvania, West Virginia, North Carolina, and Kentucky an important feature in fire protection is the organization of private timberland owners into associations supported by assessments on an acreage basis and maintaining as a rule a system of private protection similar to that maintained on the National forests by the Government; the land thus privately protected is now estimated at approximately 25 million acres.

In the fifty years preceding 1913, forest fires had caused an average annual loss in the United States of about 70 human lives and at least $25,000,000 worth of timber, besides the loss of live stock, crops, buildings, and various kinds of improvements worth many millions more. Added to this are the enormous losses from the destruction of young tree growth, soil deterioration, damage to water courses and water supplies, interruption of business, and depreciation of property.

New York has a State-owned "Forest Preserve" of 1,825,882 acres in the Adirondack and Catskill Mountains, under fire protection, but not under forest management, which the State Constitution forbids. The entire central portion of these two mountain regions, comprising 7,200,000

acres, is protected from fire by a State ranger system; in the rest of the State, town officers are depended on to keep fires down. Private owners are furnished tree seedlings at cost from the State nurseries, which also grow material for reforesting denuded portions of the Preserve. Three laws give forest lands reduction of, or exemption from, tax assessment under certain conditions. Pennsylvania has more than 1,000,000 acres of State-owned forests and practises forestry on them, maintaining a State ranger training school at Mont Alto. These forests are chiefly in the mountains of the central part of the State, and protect streamflow as well as supply timber. Additional lands may be purchased at not more than $10 per acre. Private lands are protected under a fire-warden system. The State distributes planting material and gives advice concerning forest management. The same is true of Maine, New Hampshire, Vermont, Connecticut, Maryland, Kentucky, Ohio, Kansas, Michigan, Wisconsin, Minnesota, North Dakota, and Idaho.

Minnesota, Wisconsin, and Michigan have large holdings of State forests. Minnesota has approximately 1,000,000 acres of school lands which are to be retained for State school forests, besides 43,000 acres now in State forests. Wisconsin has 400,000 acres reserved, and Michigan 589,000, of which 312,000 acres are used for exchange to add to the 277,000 acres permanently reserved in several large blocks in different parts of the State. South Dakota has 75,000 acres of State forest in the Black Hills. Massachusetts 15,000 acres, New Jersey 13,720 acres, and New Hampshire, Vermont, California, Connecticut, Indiana, and Maryland from 7,000 to 2,000 acres each.

In Vermont, Massachusetts, Connecticut, New York, Pennsylvania, and Michigan the tax on forest land may be levied chiefly on yield or income.

CONSERVATION OF NATURAL RESOURCES.

THE National Conservation Association, with headquarters in the Munsey Building, Washington, D. C., is now the organized head of the conservation movement in the United States.

In a booklet explaining the objects of the association is the following:

"The National Conservation Association is fighting for the prompt and orderly development of our natural resources, for the welfare of ourselves and our children, and for the rights of the plain people. The association is bound neither by political considerations nor official connections. It is free to speak the whole truth.

"That conservation means the use of our natural resources for the benefit of us all and not merely for the profit of a few is already household knowledge. The task which the National Conservation Association has set for itself is to get this principle put into practical effect."

The association is maintained by annual dues from membership, ranging from $1.00 to $20.00.

Gifford Pinchot, President; Charles W. Eliot, Honorary President; Harry A. Slattery, Secretary.

The National Conservation Congress is the National clearing-house for the State Conservation Commissions and Conservation Committees of National associations and all organizations concerned in the conservation of the country's natural resources. It is the organized head of the conservation movement in the United States. Its chief object is "to afford an agency through which the people of the country may frame policies and principles affecting the conservation and utilization of their resources, to be put into effect by their respective representatives in the State and Federal Governments."

The Congress holds annual meetings "to provide for discussion of the resources of the United States as the foundation for the prosperity of the people." The Congress also undertakes "to furnish definite information concerning the resources and their development, use, and preservation."

Membership dues range from $1 a year to $100 or more, according to classification.

The Congress is managed by its officers and an Executive Committee, and by an Advisory Board, consisting of one member from each National association having a Conservation Committee.

President—E. Lee Worsham, Atlanta, Ga. *Executive Secretary*—Thomas R. Shipp, 711 Riggs Building, Washington, D. C. *Treasurer*—Norman C. McLoud, Cleveland, Ohio.

THE AMERICAN FORESTRY ASSOCIATION.

THE American Forestry Association, with headquarters at 1410 H Street, Northwest, Washington, D. C., was organized in 1882 and incorporated in January, 1897. It is devoted to the conservation of private, State and National forests and to public education in the knowledge of trees, their care and development. It is a voluntary organization for the inculcation and spread of a forest policy on a scale adequate for our economic needs, and any person is eligible for membership. It is independent, has no official connection with any Federal or State department or policy, and is devoted to a public service conducive to National prosperity. It asserts that forestry means the propagation and care of forests for the production of timber as a crop; protection of watersheds; utilization of non-agricultural soil; use of forests for public recreation.

It declares that forestry is of immense importance to the people; that the census of 1913 shows our forests annually supply over one and a quarter billion dollars' worth of products; employ 735,000 people; pay $367,000,000 in wages; cover 550,000,000 acres unsuited for agriculture; regulate the distribution of water; prevent erosion of lands, and are essential to the beauty of the country and the health of the nation. It recognizes that forestry is an industry limited by economic conditions; that private owners should be aided and encouraged by investigations, demonstrations, and educational work, since they cannot be expected to practise forestry at a financial loss; that Federal and State Governments should undertake scientific forestry upon National and State forest reserves for the benefit of the public. It will devote its influence and educational facilities to the development of public thought and knowledge along these practical lines.

It supports these policies: Federal administration and management of National forests; adequate appropriations for their care and management; Federal co-operation with the States—especially in forest fire protection. State activity by acquirement of forest lands; organization for fire protection; encouragement of forest planting by communal and private owners; non-political departmentally independent forest organization, with liberal appropriations for these purposes. Forest fire protection by Federal, State and fire protective agencies, and its encouragement and extension, individually and by co-operation; without adequate fire protection all other measures for forest crop production will fail. Forest planting by Federal and State Governments and long-lived corporations, and acquirement of waste lands for this purpose; and also planting by private owners where profitable, and encouragement of natural regeneration. Forest taxation reforms removing unjust burdens from owners of growing timber. Closer utilization in logging and manufacturing without loss to owner; aid to lumbermen in achieving this. Cutting of mature timber where and as the domestic market demands it, except on areas maintained for park or scenic purposes, and compensation of forest owners for loss suffered through protection of watersheds, or on behalf of any public interest. Equal protection to the lumber industry and to public interests in legislation affecting private timberland operations, recognizing that lumbering is as legitimate and necessary as the forests themselves. Classification by experts of lands best suited for farming and those best suited for forestry; and liberal National and State appropriations for this work.

The membership of the association is close to 10,000 in every State in the Union, every Province in Canada and every civilized and semi-civilized country in the world. The subscribing membership is $3.00 a year; contributing membership is $10.00 a year; sustaining membership is $25.00 a year and life membership is $100.00. Members receive each month the *American Forestry Magazine* which contains articles on everything pertaining to trees.

President—Dr. Henry S. Drinker, South Bethlehem, Pa. *Treasurer*—John E. Jenks, Washington, D. C. *Executive Secretary*—Percival S. Ridsdale, Washington, D. C.

AMERICAN WOOD-PRESERVERS' ASSOCIATION.

President—J. H. Waterman, Galesburg, Ill. *First Vice-President*—H. S. Loud, New York City. *Secretary-Treasurer*—F. J. Angier, Baltimore, Md.

The objects and purposes of the association shall be to advance the wood-preserving industry in all its branches; to afford its members opportunities for the interchange of ideas with respect to improvements in the wood-preserving industry, and for the discussion of all matters bearing upon the industry of wood preserving; to maintain a high business and professional standard in all respects, and to standardize specifications for wood preservatives and their introduction into the materials to be preserved.

The means to be employed for these purposes shall be meetings for the presentation and discussion of appropriate papers, and for social and professional intercourse; the publication of such papers and discussions as may be deemed expedient; co-operation with other societies, associations and organizations in the work of standardizing specifications affecting the wood-preserving industry, and all other things incidental or conducive to the attainment of the objects of the association or any of them, and as the members may from time to time consider advisable

Next annual convention will be held in Chicago, January 18, 19 and 20, 1916.

UNITED STATES BUREAU OF PLANT INDUSTRY.

THE Bureau of Plant Industry studies plant life in all its relations to agriculture. It investigates the diseases of fruit and forest trees, truck crops and other plants, and carries on field tests and demonstrations of their control and prevention. It studies the bacteriological problems connected with plant production and also the factors of plant nutrition and distributes cultures of nitrogen-gathering bacteria for the inoculation of the seed of leguminous crop plants. It is engaged in the improvement of crops by breeding and selection and the acclimatization and adaptation of new crops and varieties. It is encouraging the production of drug-producing crops and other special crops, and is studying the general physiological problems influencing the growth of plants. In co-operation with the Bureau of Animal Industry and the Forest Service it is conducting a campaign for the eradication of poisonous plants, especially in the vast stock-grazing areas of the West. It is investigating various technological problems in connection with crop production, particularly with reference to fibre and paper-producing plants and to the standardization and handling of grain. It is engaged in the study of various phases of economic botany and in the devising of methods for the improvement of forest-grazing areas. It is carrying on a propaganda in the interest of good seeds for the farmer and the improvement in the quality of farm seeds. It is conducting extensive work in the breeding and testing of the principal field crops, such as the small grains, corn, cotton, tobacco, forage crops, and sugar-producing plants, with special reference to the improvement of these crops. It is engaged in the operation of testing stations in the semi-arid regions for the co-operative investigation of the problems encountered in crop production under the conditions existing in those areas. The adaptation and breeding of crops is a special feature of this work, which also includes physical determinations of the factors influencing plant growth in those regions.

It is conducting horticultural studies of gard en crops and maintains an experimental farm for this and other lines of the work of the bureau. It is eng aged in investigations of the transportation and storage of fruits, and in the general upbuilding of the fruit industry. It maintains greenhouses and trial grounds for the work of plant propagation and improvement. It is engaged in the introduction of seeds and plants from foreign countries and in the operation of plant introduction and testing gardens to aid in the development of new plant industries. It is also engaged in the Congressional distribution of seeds and plants.

THE UNITED STATES PUBLIC HEALTH SERVICE.

RUPERT BLUE, SURGEON-GENERAL.

THE United States Public Health Service is a bureau of the Treasury Department. The head of the bureau is a commissioned medical officer, with the title of Surgeon-General. The work of the service is administered, under the direction of the Surgeon-General, by seven bureau divisions—Personnel and Accounts, Scientific Research, Foreign and Insular Quarantine, Domestic (Interstate) Quarantine, Sanitary Reports and Statistics, Marine Hospitals and Relief and Miscellaneous.

The commissioned corps of the service consists of medical officers of the following grades: Surgeon-General, Assistant Surgeons-General (chiefs of divisions of the bureau), Senior Surgeons, Surgeons, Passed Assistant Surgeons, and Assistant Surgeons. Appointments in the corps are made to the grade of Assistant Surgeon, after successful examination. Qualifications for examination are graduation from a reputable medical college, one year's hospital experience or two years' professional work after graduation, and testimonials from responsible persons as to professional and moral character. Applicants for examination must be between the ages of 23 and 32 years.

The Public Health Service maintains twenty-three marine hospitals and 120 other relief stations throughout the country. Fifty-one quarantine stations in the United States and twenty-five stations in its insular possessions are also operated, and eighty-five stations for the medical inspection of immigrants. Eighteen officers are stationed at American consulates abroad to assist in the administration of quarantine and the inspection of immigrants.

At the Hygienic Laboratory, located in the city of Washington, research work in connection with investigations of disease, sanitation and water pollution is carried on, and tests are made of the purity and potency of viruses, serums and toxins, with the supervision of the manufacture and sale of which the Public Health Service is charged by law.

The Public Health Service co-operates with State and local Boards of Health in the eradication of epidemic diseases, such as plague, cholera, yellow fever, typhus fever, smallpox and leprosy. Details of officers are also made, on request from State and municipal health authorities, to assist in the suppression of typhoid fever, infantile paralysis, cerebro-spinal meningitis, and other diseases. The Public Health Service has supervision of measures for the prevention of the spread of infectious and contagious diseases in interstate traffic; the administration of matters in relation to the Interstate Quarantine Regulations regarding the prevention of the use of the common towel and commom drinking cup on vehicles or vessels operating in interstate traffic and the certification of water and ice furnished by common carriers for passengers in interstate traffic. Among the signal achievements of the service in recent years in the field of public health work have been the eradication of bubonic plague in California and Porto Rico, and the suppression of yellow fever in the South.

The personnel of the Public Health Service consists of 186 commissioned medical officers, 262 acting assistant surgeons (physicians appointed locally and not subject to change of station), 50 pharmacists, 1,418 attendants and 129 other employ*s, a total of 2,045 persons. During the fiscal year 1915 53,331 patients were treated—14,329 in hospitals and 39,005 as dispensary or out-patients.

Owing to conditions in Europe the fiscal year 1915 witnessed a considerable decrease in the number of vessels inspected at quarantine stations, a total of 10,397 such inspections having been made, as compared with 14,128 in 1914. These vessels carried 612,026 passengers and crews, as compared with 1,549,570 in 1914. Fumigations to the number of 2,731 were made in 1914, as compared with 1,680 in 1915.

The same reasons caused a great reduction in the number of medical inspections of immigrants. The total inspections reached 562,263, as compared with 1,485,957 in 1914, and the number certified for rejection on account of physical or mental defect was 17,840, whereas in 1914 41,250 such certifications were made.

THE PUBLIC LANDS OF THE UNITED STATES.

(Prepared for THE WORLD ALMANAC by the General Land Office.)

TABULAR statement showing area of public lands vacant and subject to entry and settlement in the public land States and Territories, July 1, 1915.

* The unappropriated lands in Alaska are not included herein. The total area of Alaska is 378,165,760 acres, of which about 20,898,000 acres are reserved. Approximately 300,000 acres have been surveyed under the rectangular system within the past five years.

Cash receipts of the General Land Office during the fiscal year ended June 30, 1915: From disposal of public lands, $3,782,053.65; sales of Indian lands, $1,556,630.97; leases of power sites, etc., $1,116.21; depredation on the public lands, $31,241.87; copies of records and plats, $19,639.61; and sales of Government property, etc., $3,231.61. Total receipts for the year, $5,393,918.92.

Area of public and Indian lands originally entered during the fiscal year, 16,861,214.69 acres; area of lands patented, 13,025,427.976 acres.

The total number of entries, acres sold and amount received therefor under the Timber and Stone acts of June 3, 1878, and August 4, 1892, were: From June 3, 1878, to June 30, 1915, entries, 102,919; acres, 13,289,906.97; amount, $33,630,183.83.

THE TORRENS SYSTEM OF REGISTRATION OF TITLES TO REAL ESTATE.

THE "Torrens System" or "Torrens Law" is a system of "Registration of Titles to Real Estate." It was devised in its present general form by Robert R. Torrens, and first promulgated in the form of law in South Australia in 1858. The "Registration of Titles to Land," however, was in use as early as 1811 in Austria and in 1855 in Hungary. Denmark registered such titles by judicial decree as early as 1550. The provisions of the later acts, however, differentiate the "Torrens" laws from these earlier forms. From South Australia the law spread to Queensland (1861), Tasmania (1862), New South Wales (1862), Victoria (1862), New Zealand (1870), Western Australia (1874), Fiji (1876), and New Guinea (1889). In all of these the registration of titles is compulsory on the alienation of crown lands, otherwise voluntary; only fee simple titles may be registered. The title obtained by registration is indefeasible.

Almost immediately after the launching of the system in Australia it was adopted in British Honduras (1858), followed by British Guiana (1880) the Leeward Islands (1886), Jamaica (1888). The system was also adopted in Central America, Tabago, Trinidad, Turks Island, Wales, Norway, Denmark, Germany and Austria. In England a similar law was passed (1862) and Ireland (1865). In these leaseholds for life or for twenty years were brought in. Absolute, qualified or possessory titles may be registered in England; only absolute titles in Ireland.

In Canada the system was adopted in British Columbia (1871), Ontario (1885), Manitoba (1885), Nova Scotia (1904), Alberta (1906), and Saskatchewan (1906). Throughout Canada the act is compulsory on alienation of crown lands, except in British Columbia, and voluntary otherwise except in Ontario. It is wholly voluntary in Ontario and permissive only in parts of that province. An estate of any kind is entitled to registration except in Ontario, which is open only to fee simple and life or twenty-one-year leaseholds, and Alberta and Saskatchewan, which excludes any estate for less than three years.

The registration of land titles under statutes either known as "Torrens acts" or such in fact, has been adopted in many of the States; Illinois was the first to adopt it in 1895, the act, however, being held unconstitutional because under its provisions judicial powers were conferred on the examiners of titles and the recorders. In 1897, however, the law was substantially re-enacted with the objection obviated, and this latter act has stood the test of the courts.

The Ohio law of 1896 was attacked and repealed in 1898. This checked further legislation until in 1913, when the Constitution was amended. The California statute (1897) has obtained a favorable decision from the final court of that State, in what has proved a leading case—Robinson vs. Kerrigan. The system was adopted in Massachusetts in 1898 and from its adoption proceedings have been very active under it and a large number of decisions have fixed its principles there. Minnesota adopted the system in 1901, applying it arbitrarily only to counties of over 75,000 inhabitants. Oregon followed in the same year, shortly followed by the Philippine Islands (1902), Colorado (1903), Hawaii (1903), and the State of Washington (1907). New York, see statement below, adopted the system in 1908.

In all of these States the law is voluntary except in the Philippines (Government grants, compulsory); Hawaii (lands owned by corporations compulsory) and Illinois (decedent's estates). The unit of registration is the county and generally the Register of Deeds or similar officer is the recorder. The operation of the act is confined to estates in fee simple absolute except in Hawaii, which, like the English law, includes qualified and possessory titles. In all there is a judicial proceeding which is heard, except in Massachusetts, the Philippines, and Hawaii, in the local court having equity jurisdiction. The "suit" is analogous to one to quit title. In Hawaii the law was changed in 1914 so as to admit of registration of the estate or interest of a person instead of the possessory title being registered. Massachusetts has a special "Land Court," and the Territories 'Courts of Land Registration." The proceedings are declared to be "*in rem*" in the three latter and in California. The facts are prepared for the court (based upon the petition or other pleadings) by officials generally known as examiners of title. These in California, Massachusetts, Minnesota, and Washington must be lawyers. The complaint or petition must set forth the names and addresses of all persons interested—jurisdiction over whom is obtained by service of summons either personally or by publication (the proceeding being "*in rem*"), and the allegations of the complaint may be traversed by any defendant. The local procedure varies widely, being generally conformed to the general procedure of the locality. In addition to the usual forms of service, the summons must be posted upon the property except in California, Minnesota, Oregon, Colorado, and Washington. If there be a contest—a hearing is had in the usual form and in due course a decree is entered by the court directing (or denying) registration of the title subject to whatever encumbrances may have been found existent, and a certificate and duplicate is thereupon issued by the Registrar. The decree after a varying period becomes absolute and conclusive. The time is thirty days in Massachusetts and the Philippines; ninety days in Colorado and Washington; six months in Minnesota; two years in Illinois and Oregon, and five years in California. The title so registered is, generally speaking, indefeasible, the exceptions being by private parties for fraud, for varying periods and under varying conditions becoming absolutely indefeasible for this cause in Massachusetts, the Philippines, and Hawaii after one year. It is indefeasible as to boundaries except in Illinois, Minnesota, Oregon, Colorado, and Washington, and in those States where the adjacent property owners have been "brought in." It is also defeasible as to unrecorded leases not required by the law to be recorded. Such a title is defeasible in actions by the State or Federal Government, as for eminent domain, taxes, etc. It is stated to be indefeasible as to adverse possession in Oregon and the Philippines and by implication in the others.

In order to protect the indefeasible quality of the title held under registration, provision has been generally made for an "Assurance Fund," the proceeds of which are used for the reimbursement of any one injured (that is deprived of his property or his rights) by reason of the decree upon which the registration was based. Such a person must bring suit within a fixed period—in Hawaii and Massachusetts within six years; in Minnesota, the Philippines, Colorado, and Washington, six years, and in case of any disability an additional two years after its removal; in Illinois and Oregon within ten years, with the same disability clause. North Carolina and Indiana have also adopted the system. Constitutional amendment submitted in 1915 in Pennsylvania provided that new courts be established for carrying the system into effect. The Torrens bill was before the Legislature in Michigan in 1915.

THE LAW IN NEW YORK.

Chapter 444 of the laws of 1908, known as the "Land Title Registration law," became a law May 20, 1908, with the approval of the Governor. It became effective February 1, 1909. Stated in brief, it prescribes: Sec. 2. Any property or interest therein permitted to be registered may be brought under the operation of the act by filing a complaint, as provided by the Code of Civil Procedure; a natural person, a corporation, or person *non sui juris* may apply under the usual representation. Sec. 3. The application shall be made to the Supreme Court, Special Term (of the county where the land is situated), and the proceedings shall be "*in rem*." On an issue raised, trial is had in Special Term, but an issue of fact may be tried by a jury as provided by the Code of Civil Procedure; should the business require a "Part" may be assigned as the "Title Part" of the Special Term, the Appellate Division shall formulate rules of practice before such part. Sec. 4. The various county clerks, or where there are "registers" then those officials shall be "Registrars' of titles in their respective counties. The Registrars shall be county officers. Sec. 9. Before application is made for the registration of a title it must be examined and certified by an "official examiner of title," who must be a duly admitted attorney and counsellor-at-law in the courts of record of the State or a corporation duly incorporated under the laws of the State and duly authorized to guarantee or insure titles to real property in this State. The Court of Appeals shall prescribe rules for ascertaining

THE TORRENS SYSTEM OF REGISTRATION OF TITLES TO REAL ESTATE—*Continued.*

the fitness of applicants for the office of examiners. An applicant is licensed by the Appellate Division of the Supreme Court. He may be required to give a bond. In counties of not over 300,000 the examiner's certificate may be based upon searches and abstracts made by a domestic corporation organized to make and certify to searches and abstracts of title, such corporation to be not less than two years old.

Sec. 10. Any person or persons holding or claiming a fee simple or some right therein, or holding or claiming a contract to purchase such an estate, or who have or claim the power of appointing or disposing of such an estate, may make application for registry of his title. No lien upon an estate and no estate less than a fee may be registered unless the fee is first registered. All lesser estates to which the fee is found subject must be noted on the certificate.

Sec. 11. The complaint must name all parties having or claiming an interest or lien upon the property as shown by the examiner's certificate of title and such other parties as the court may direct, with their addresses; facts as to marriage age, etc., must be shown; "the People of the State of New York" must be made a defendant; the examiner's certificate is attached to the complaint as an exhibit.

Sec. 12. The examiner's certificate must be sworn to and if the examiner be a corporation, a policy of insurance of the title must accompany it, and shall be recoverable upon for ten years because of any error, fraud, omission or misdescription in the certificates. The certificate shall set forth the exact state of the title to be registered, with names and addresses and rights and interests of all persons in the property or in that adjoining same. Miniments of title must be filed, those affecting property not to be registered being subsequently withdrawn on filing certified copies. The certificate shall include a description, which, after approval by the court, shall be used in the summons, etc. Sec. 13 provides also for a map by a competent surveyor showing adjacent lands and highways; it must be verified.

Sec. 14 provides for the filing of the usual "*lis pendens*" or notice of pendency of the action, with the usual effect of that notice. Sec. 15. Any person may file a "caution" (in the Registrar's office) requiring notice to him of any application for registration of the title to any piece of property showing his claimed right, in which case he must be served. The Registrar shall keep a locality index of all "cautions" so filed. Sec. 16. A non-resident may apply through an agent duly appointed.

Sec. 17. On the application and the examiner's certificate, if the court determines that plaintiff's title should be registered (for which determination he may require another examination of the title), it shall make an order directing the issuance of a summons and notice, which shall be served in manner as provided in the Code of Civil Procedure. Sec. 21. Any person interested may appear and defend, whether named as a defendant or not. Sec. 22. The court may find and decree in whom the title is vested; may remove clouds from the title; may determine as to the validity of liens, etc., etc, and may direct the Registrar to register such title either absolutely or as subject to any encumbrance. Sec. 23. The title to be registered must be free from reasonable doubt and the judgment is conclusive against the world, including infants, lunatics and those not yet in being. Sec. 24. Any registration may be set aside for fraud (except in the hands of an innocent purchaser) within ten years, but otherwise not after six months.

Sec. 25. The Registrar after final judgment shall register the title and issue a certificate and (Sec. 27) enter same in his records, issuing a duplicate (Sec. 28) to the owner.

Sec. 32. The person holding such a certificate, holds the property described free from all encumbrances except those noted thereon and any of the following: Liens, etc., of the United States not required to be of record; taxes, water rates, etc., laid after initial registration; leases not over one year and actual occupation; easements or servitudes accruing after initial registration and not requiring record. Property registered shall not be subject to adverse possession (33). When once registered property must remain registered. Registered property is transferred by ordinary deed to be filed with the Registrar and a "memorial" agreed on by vendor and vendee entered upon the original certificate, and he shall make out a new original and duplicate certificate certifying the ownership in the vendee; where the parties fail to agree on a statement to the Registrar, he shall not issue a new certificate. Provision is made (39) for the sale of a part only. A fee having been duly registered a mortgagee (48) may present a subsequently executed mortgage and have it registered (upon an agreed statement between the mortgager and himself) upon the proper certificate in the registration book and upon the owner's duplicate. Judgments, decrees, attachments, executions, mechanics' or other liens must, on filing a transcript with the Registrar (49), be memorialized by the Registrar.

Assignments of mortgages, leases, etc., and releases are similarly treated (50-51). Procedure in foreclosure remains practically the same. Upon the death of the registered owner his heirs-at-law or devisees may obtain a new certificate on a final decree establishing the will or the intestacy and a proceeding, analogous to that for initial registration but relating back only to the time of the death of the former owner (Sec. 55).

The law establishes an assurance fund (Sec. 58) and upon each original registration there shall be paid to the Registrar one-tenth of one per centum of the value as shown by last local taxation, but if applicant takes registry without recourse to such fund, such tax shall not be exacted. Any person damaged (Sec. 59) by the order of registration may bring an action to recover from this fund; such action to be brought within six years (Sec. 61). To fraudulently procure or assist in procuring the registry of a title (or anything incident thereto) is made a felony, punishable by a fine of not exceeding $500, or imprisonment for five years, or both. The fees of the Registrar are not greatly in excess of the usual court fees in New York County. The Court of Appeals, in addition, requires a bond of $5,000, to run ten years, from the Examiners of Title. Up to this but few applications have been made for registration.

BRITISH INCOME-TAX PAYERS.

(American Consular Report, May, 1915.)

It is probable that the total number of income-tax payers in Great Britain is somewhat under 1,000,000, many workingmen escaping payment of the tax because of the difficulty of obtaining an accurate record of individual earnings. In 1914 there were 709,356 assessments on individuals with incomes between £160 and £10,000 ($780 and $48,665) and 390 whose incomes exceeded the latter figure, the gross income of the 709,746 individuals being $1,228,226,600. Classified by incomes these tax payers numbered:

Income.	Number of Assessments.	Gross Amount of Income.	Income.	Number of Assessments.	Gross Amount of Income.
$780 to $975.....	257,499	$230,059,500	$4,380 to $4,865...	7,445	$35,199,100
$975 to $1,460.....	237,434	286,987,400	$4,865 to $9,735...	16,363	10,137,900
$1,460 to $1,945...	85,557	147,357,500	$9,735 to $14,600..	3,381	40,748,000
$1,945 to $2,435...	46,063	102,762,600	$14,600 to $19,465.	1,231	20,916,800
$2,435 to $2,920...	23,411	63,537,800	$19,465 to $24,330.	678	15,155,100
$2,920 to $3,405...	13,383	42,772,100	$24,330 to $48,665.	882	30,320,100
$3,405 to $3,895...	10,250	37,844,200	$48,665 and over...	390	40,440,400
$3,895 to $4,380...	5,779	23,988,100			

The foregoing schedule does not indicate the returns made by 55,949 firms nor the returns on incomes of public companies and local authorities.

UNITED STATES PENSION STATISTICS.

NUMBER OF ARMY AND NAVY PENSIONERS ON THE ROLL JUNE 30, 1915.

Regular Establishment—Invalids or survivors, 15,242; widows and dependents, 4,488.

Service—Act of May 11, 1912, invalids or survivors, 347,081; act of February 6, 1907, invalids or survivors, 2,872.

Civil War, General Law—Invalids or survivors, 45,336; widows and dependents, 56,020.

Civil War, Act of June 27, 1890—Invalids or survivors, 1,081; widows and dependents, 3,854.

Civil War, Act of April 19, 1908—Widows and dependents, 235,087.

War with Spain—Invalids or survivors, 24,370; widows and dependents, 4,542.

War of 1812—Widows and dependents, 134.

War with Mexico—Invalids or survivors, 680; widows and dependents, 4,253.

Indian Wars—Invalids or survivors, 786; widows and dependents, 2,046.

Army nurses (women), 275.

Total pensioners on roll June 30, 1915, 748,147.

Total number of original applications during fiscal year ending June 30, 1915, 73,521.

Total number of original claims allowed for fiscal year ending June 30, 1915, 17,112.

Number of pensioners on roll June 30, 1915—Invalids or survivors, 437,723; widows and dependents, 310,424; total, 748,147.

Paid pensioners during 1915, $165,518,266.

(For number of pension claims, pensioners and disbursements, by years, from 1867 to 1912, see WORLD ALMANAC for 1913, page 166.)

Expenses for the Pension Bureau and Disbursing Office in disbursing pension fund for the fiscal year ending June 30, 1915, $1,779,860.

All the pension agencies have been consolidated, and all pensioners are now paid by the Commissioner of Pensions through the Disbursing Office of the Pension Bureau, Washington, D. C.

TOTAL DISBURSEMENTS FOR PENSIONS FOR ALL WARS AND OF THE PEACE ESTABLISHMENT TO JUNE 30, 1915.

War of the Revolution (estimate), $70,000,000; war of 1812 (service pension), $45,972,895; Indian wars (service pension), $13,315,227; war with Mexico (service pension), $49,618,948; civil war, $4,614,643,267; war with Spain and insurrection in the Philippine Islands, $49,944,441; regular establishment, $35,472,408; unclassified, $16,508,447. Total disbursements for pensions, $4,895,475,637.

The following are the rates for total disability from causes incident to the service:

Army—Lieutenant-colonel and all officers of higher rank, $30; major, surgeon, and paymaster, $25; captain, provost marshal, and chaplain, $20; first lieutenant, assistant surgeon, and deputy provost marshal, $17; second lieutenant and enrolling officer, $15; enlisted men, $8.

Navy—Captain and officers of higher rank, commander, lieutenant commanding and master commanding, surgeon, paymaster, and chief engineer, respectively ranking with commander by law, $30; lieutenant, surgeon, paymaster, and chief engineer, respectively ranking with lieutenant by law, and passed assistant surgeon, $25; master, professor of mathematics, assistant surgeon, assistant paymaster and chaplain, $20; first assistant engineer, ensign, and pilot, $15; cadet midshipman, passed midshipman, midshipman, clerks of admirals, paymasters, or other officers commanding vessels, second and third assistant engineers, master's mate, and warrant officers, $10; enlisted men, $8.

Marine Corps—Lieutenant-colonel and officers of higher rank, $30; major, $25; captain, $20; first lieutenant, $17; second lieutenant, $15; enlisted men, $8.

Pension at certain ages on account of service in the civil and Mexican wars. Act of May 11, 1912.

Any person who served ninety days or more in the military or naval service of the United States during the late civil war, and who has been honorably discharged therefrom, and who has reached the age of sixty-two years or over, on making proof of such facts is entitled to receive a pension as follows: Age sixty-two years—For a service of 90 days, $13.00 per month; 6 months, $13.50; 1 year, $14.00; 1½ years, $14.50; 2 years, $15.00; 2½ years, $15.50, and 3 years and more, $16.00. Age 66 years—For a service of 90 days, $15.00 per month; 6 months, $15.50; 1 year, $16.00; 1½ years, $16.50; 2 years, $17.00; 2½ years, $18.00, and 3 years and more, $19.00. Age 70 years—For a service of 90 days, $18.00 per month; 6 months, $19.00; 1 year, $20.00; 1½ years, $21.50; 2 years, $23.00; 2½ years, $24.00, and 3 years and more $25.00. Age 75 years—For a service of 90 days, $21 per month; 6 months, $22.50; 1 year, $24.00; 1½ years, $27.00, and 2 years and more, $30.00. And such pension shall commence from the date of filing the application in the Bureau of Pensions. Any person who served sixty days or more in the war with Mexico, and who received an honorable discharge, is entitled to $30.00 per month. Any person who was wounded in battle or in line of duty in the civil war, and is now unfit for manual labor by reason thereof, or who from disease or other causes incurred in line of duty resulting in his disability, is now unable to perform manual labor, is entitled to $30.00 per month.

AMERICAN SOCIETY OF INTERNATIONAL LAW.

President—Elihu Root. *Vice-Presidents*—Chief Justice White, Justice William R. Day, P. C. Knox, Andrew Carnegie, Joseph H. Choate, John W. Foster, George Gray, William W. Morrow, Richard Olney, Horace Porter, Oscar S. Straus, Jacob M. Dickinson, James B. Angell, William H. Taft, William J. Bryan. *Recording Secretary*—James Brown Scott. *Corresponding Secretary*—Charles Henry Butler. *Treasurer*—Chandler P. Anderson. Headquarters, Washington, D. C.

PASSPORT REGULATIONS.

1. AUTHORITY TO ISSUE—Section 4075 of the Revised Statutes of the United States, as amended by the act of Congress approved June 14, 1902, provides that "the Secretary of State may grant and issue passports, and cause passports to be granted, issued, and verified in foreign countries by such diplomatic or consular officers of the United States, and by such chief or other executive officers of the insular possessions of the United States, and under such rules as the President shall designate and prescribe for and on behalf of the United States." The following rules are accordingly prescribed for the granting and issuing of passports in the United States:

2. BY WHOM ISSUED AND REFUSAL TO ISSUE—No one but the Secretary of State may grant and issue passports in the United States (Revised Statutes, sections 4075, 4078), and he is empowered to refuse them in his discretion.

Passports are not issued by American diplomatic and consular officers abroad, except in cases of emergency; and a citizen who is abroad and desires to procure a passport must apply therefor through the nearest diplomatic or consular officer to the Secretary of State.

Applications for passports by persons in Porto Rico or the Philippines should be made to the Chief Executives of those islands. The evidence required of such applicants is similar to that required of applicants in the United States.

3. FEE—By act of Congress approved March 23, 1888, a fee of one dollar is required to be collected for every citizen's passport. That amount in currency or postal money order should accompany each application made by a citizen of the United States. Orders should be made payable to the Disbursing Clerk of the Department of State. Drafts or checks will not be accepted.

4. APPLICATIONS—A person who is entitled to receive a passport, if within the United States, must submit a written application, in the form of an affidavit, to the Secretary of State. The application should be made by the person to whom the passport is to be issued, and signed by him, as it is not proper for one person to apply for another.

The affidavit must be made before a clerk of a Federal or State Court within the jurisdiction of which the applicant or his witness resides, and the seal of the court must be affixed.

If the applicant signs by mark, two attesting witnesses to his signature are required. The applicant is required to state the date and place of his birth, his occupation, the place of his permanent residence, and within what length of time he will return to the United States with the purpose of residing and performing the duties of citizenship. He is also required to state the names of the foreign countries which he expects to visit, and the objects of his visits thereto. The latter statement should be brief and general in form, thus: "Commercial business;" (*) "to attend to the settlement of an estate;" "to bring wife and children to this country."

The applicant must take the oath of allegiance to the United States.

The application must be accompanied by a description of the person applying, and should state the following particulars, viz.: Age, ——; stature, —— feet —— inches (English measure); forehead, ——; eyes, ——; nose, ——; mouth, ——; chin, ——; hair, ——; complexion, ——; face, ——; special identifying marks, if any (scars, birthmarks, etc.).

The application must also be accompanied by duplicate photographs of the applicant, on thin paper, unmounted, and not larger in size than three by three inches. One must be attached to the back of the application by the clerk of court before whom it is made, with an impression of the seal of the court so placed as to cover part of the photograph, but not the features, and the other sent loose, to be attached to the passport by the department (†). Photographs on cardboard or postcards will not be accepted.

The application must be supported by an affidavit from at least one credible witness that the applicant is the person he represents himself to be, and that the facts stated in the application are true to the best of the witness' knowledge and belief. This affidavit must be made before the clerk of court before whom the application is executed, and the witness must be an American citizen, who resides within the jurisdiction of the court. The applicant or his witness must be known to the clerk of court before whom the application is executed, or must be able to satisfy such officer as to his identity and the *bona fides* of the application.

5. NATIVE CITIZENS—An application containing the information indicated by rule 4 will be sufficient evidence in the case of native citizens; except that a person born in the United States in a place where births are recorded will be expected to submit a birth certificate with his application.

A person of the Chinese race, alleging birth in the United States, must obtain from the Commissioner of Immigration or Chinese inspector in charge at the port through which he proposes to leave the country a certificate upon his application, under the seal of such officer, showing that there has been granted to him by the latter a return certificate in accordance with rule 16 of the Chinese Regulations of the Department of Labor. For this purpose special blank forms of application for passports are provided.

Passports issued by the Department of State or its diplomatic or consular representatives are intended for identification and protection in foreign countries, and not to facilitate entry into the United States, immigration being under the supervision of the Department of Labor.

6. A PERSON BORN ABROAD WHOSE FATHER WAS A NATIVE CITIZEN OF THE UNITED STATES—In addition to the statements required by rule 4, his application must show that his father was born in the United States, resided therein, and was a citizen at the time of the applicant's birth. The department may require that this affidavit be supported by that of one other citizen acquainted with the facts.

7. NATURALIZED CITIZENS—In addition to the statements required by rule 4, a naturalized citizen must transmit his certificate of naturalization, or a duly certified copy of the court record thereof, with his application. It will be returned to him after inspection. He must state in his affidavit when and from what port he emigrated to this country, what ship he sailed on, where he has lived since his arrival in the United States, when and before what court he was naturalized, and that he is the identical person described in the certificate of naturalization. The signature to the application should conform in orthography to the applicant's name as written in his certificate of naturalization, or an explanation of the difference should be submitted.

8. WOMAN'S APPLICATION—If she is unmarried, in addition to the statements required by rule 4, she should state that she has never been married. If she is the wife or widow of a native citizen of the United States the fact should be made to appear in her application, which should be made according to the form prescribed for a native citizen, whether she was born in this country or abroad. If she is the wife or widow of a naturalized citizen, in addition to the statements required by rule 4, she must transmit for inspection her husband's certificate of naturalization, or a certified copy of the court record thereof, must state that she is the wife (or widow) of the person described therein, and must set forth the facts of his birth, emigration, naturalization, and residence, as required in the rules governing the application of a naturalized citizen. She should sign her own Christian name with the family name of her husband (thus: Mary Doe, not Mrs. John Doe). A married woman's citizenship follows that of her husband. It is essential, therefore, that a woman's marital relations be indicated in her application for a passport, and that in the case of a married woman her husband's citizenship be established.

9. THE CHILD OF A NATURALIZED CITIZEN CLAIMING CITIZENSHIP THROUGH THE NATURALIZATION OF THE PARENT—In addition to the statements required by rule 4, the applicant must state that he or she is the son or daughter, as the case may be, of the person described in the certificate of naturalization, which must be submitted for inspection, and must set forth the facts of emigration, naturalization, and residence, as required in the rules governing the application of a naturalized citizen.

10. A Resident of an Insular Possession of the United States Who Owes Allegiance to the United States—In addition to the statements required by rule 4, he must state that he owes allegiance to the United States and that he does not acknowledge allegiance to any other Government; and must submit affidavits from at least two credible witnesses having good means of knowledge in substantiation of his statements of birth, residence, and loyalty. No fee is required for the issuance by the department of an insular passport.

11. Expiration and Renewal of Passport—A passport expires six months from the date of its issuance. A new one will be issued upon a new application accompanied by the old passport, and if the applicant be a naturalized citizen, the old passport will be accepted in lieu of a certificate of naturalization, if the application upon which it was issued is found to contain sufficient information as to the naturalization of the applicant. Passports are not renewed by the department, but a person abroad holding a passport issued by the department may have it renewed for a period of six months upon presenting it to a diplomatic or principal consular officer of the United States when it is about to expire, with a sworn statement of the names of the countries which he expects to visit and the objects of his visits thereto. No passport shall be renewed more than twice.

12. Wife, Minor Children, and Servants—When the applicant is accompanied by his wife, minor children, and maid-servant, who is a citizen of the United States, it will be sufficient to state the fact, giving their names in full, the dates and places of their births, and the allegiance of the servant, when one passport will suffice for all. For a man-servant or any other person in the party a separate passport will be required. A woman's passport may include her minor children and maid-servant under the above-named conditions. (The term "maid-servant" does not include a governess, tutor, pupil, companion, or person holding like relation to the applicant for a passport.)

13. Titles—Professional and other titles will not be inserted in passports.

14. Blank Forms of Application—They will be furnished by the department free of charge to persons who desire to apply for passports. Supplies of blank applications are also furnished by the department to clerks of courts.

15. Address—Communications should be addressed to the Department of State, Bureau of Citizenship, and each communication should give post-office address of the person to whom the answer is to be directed.

16. Additional Regulations—The Secretary of State is authorized to make regulations on the subject of granting and issuing passports additional to these rules and not inconsistent with them.

* An applicant who states that he is going abroad on commercial business must submit with his application a letter from the head of the concern which he represents. † The loose photograph must be signed across its face by the applicant, and the signature thereon must correspond to the applicant's signature affixed to the application.

WOODROW WILSON.

The White House, February 1, 1915.

PASSPORTS FOR AMERICAN CITIZENS RESIDING IN FOREIGN COUNTRIES NOW AT WAR.

The department, since the outbreak of the European war, has received many inquiries from American citizens concerning the matter of obtaining passports for their wives and children residing in foreign countries now at war. An American citizen, temporarily abroad, should apply for a passport through an embassy, legation, or consulate of the United States, which will forward the application to the department. In cases of urgent necessity emergency passports, good for six months, may be obtained from embassies or legations, or from consulates situated in countries in which there are no American diplomatic representatives. A person claiming citizenship through naturalization in his own right, or through naturalization of husband or parent, should be provided with the certificate of naturalization to accompany the application. A person claiming citizenship through his own birth in this country, or through the birth in the United States of husband or parent, should submit a birth certificate with the application. If it is impossible to obtain a birth certificate, the department will consider affidavits of two or more reputable American citizens who have knowledge of the birth in this country of the applicant abroad or the person through whose American origin citizenship is claimed. In cases of urgent necessity, if the husband in this country so desires, and will forward to the department documentary evidence of his American citizenship, as indicated above, it will consider the matter of sending telegraphic instructions to the appropriate American diplomatic or consular officer abroad, informing him of the American citizenship of the husband and instructing him to advise the wife to apply through his office for a passport. The department should be informed of the names of any minor children with the wife abroad, and the dates and places of their births, and should be furnished with the birth certificates of such of them as may have been born in the United States. In the cases of foreign-born children of naturalized American citizens, the department should also be informed concerning the periods, if any, of their residence in the United States.

A telegram in a case of the kind mentioned above must be sent at the expense of the person making the request, who will be informed of the cost of the telegram after it has gone out. The department cannot undertake to say in advance what the cost of such a telegram will be.

It is understood that passports are ordinarily required of persons entering or leaving Russia, and that those who enter with Russian passports are required to use the same documents in leaving.

The department cannot, of course, give an assurance that diplomatic or consular officers will be able to reach, by mail, telegraph, or otherwise, persons who are residing in places at or near which military operations are now being carried on.

It is not customary for the department to accept funds for transmission abroad. Such funds should be sent by postal money order or through a bank or express company carrying on an international exchange business.

Department of State, August 9, 1915.

SPECIAL RESTRICTIONS UPON TRAVEL IN BELLIGERENT COUNTRIES.

American citizens going directly to France from the United States are required to bear passports visaed by French diplomatic or consular officers in the United States. An application for a visa should be made to the French consulate in this country within the jurisdiction of which the applicant resides. The application should be made at least three days before it is necessary to obtain the visa. An American citizen who does not go directly from this country to France, but sojourns in some other foreign country before visiting France, should inquire of the American or French diplomatic representative in such foreign country concerning the special formalities which it will be necessary for him to fulfil before entering French territory.

It is understood that German military authorities now require that each person, except a minor under 10 years of age accompanied by his parents, entering Germany be supplied with an individual passport, and that a wife or minor child over 10 years of age cannot enter upon a passport held by husband or parent. A servant, accompanying his employer, is also required to have a separate passport.

Under British regulations all persons over 14 years of age accompanying an alien into Great Britain, and included in his passport, must have their photographs attached thereto. This includes the wife and minor children of the bearer. All persons entering the United Kingdom are required to register with the appropriate local authorities within 28 days after arrival.

The department has also been informed that rigid restrictions have been placed upon all travel between England and the Continent of Europe.

PASSPORT REGULATIONS—*Continued.*

Admission to Belgium from Holland is understood to be practically forbidden to travellers from England.

The department is informed that the Italian authorities now require that each person entering Italy, who is over 16 years of age, be supplied with an individual passport. Thus a wife or a child over 16 years of age cannot enter Italy on the passport of the husband or parent.

For further and more authentic information concerning restrictions upon travel in foreign countries, it is necessary to apply to diplomatic or consular representatives of those countries.

The Department of State cannot undertake in general to advise Americans as to the routes which they should follow in travelling abroad.

DEPARTMENT OF STATE, Washington, August 12, 1915.

NOTE—The Department of State has been recently informed that passports are required of all persons entering Newfoundland, but are not required of persons entering Canada.

LIABILITY FOR MILITARY SERVICE IN FOREIGN COUNTRIES OF PERSONS RESIDING IN THE UNITED STATES.

THE Department of State has recently received numerous inquiries from foreign-born persons residing in this country as to whether they may be compelled to perform military service in their native lands and as to what penalties, by way of fines, confiscation of property, or imprisonment in case of return, they will incur if they fail to report to the authorities of their countries of origin for military service. Some of the inquiries refer to persons who have obtained naturalization as citizens of the United States, others to persons who have made declarations of intention to become American citizens, and still others to persons who have taken no steps toward acquiring American citizenship. Misconception and confusion concerning this matter appear to be current.

The United States is not a party to any treaties under which persons of foreign origin residing in this country may be compelled to return to their countries of origin for military service, nor is there any way in which persons may be forced into foreign armies against their will so long as they remain in the United States.

The department cannot undertake to give authentic, official information either, in general, as to the requirements of the military service laws of foreign countries and the penalties provided therein for evasion of military service, or, in particular, as to the status and present or future liabilities of individuals under such laws. Information of this kind must be obtained from officials of the foreign countries concerned.

The department issues printed circulars concerning the status in their native lands of naturalized citizens of the United States, natives of certain European countries, and these will be furnished to interested persons upon request. It is specifically stated in these circulars that the information contained in them is not to be considered as official so far as it relates to the laws and regulations of foreign countries.

The United States has concluded treaties of naturalization with the following European countries: Austria-Hungary, Belgium, Denmark, the German States, Great Britain, Norway and Sweden. Copies of these treaties are to be found in "Treaties, Conventions, etc., between the United States of America and Other Powers" (Government Printing Office, 1910), and separate copies may be furnished by the department upon request. Under these treaties the naturalization of persons concerned as citizens of the United States and the termination of their former allegiance are recognized, with the reservation, in most of them, that such persons remain liable to trial and punishment in their native lands for offences committed prior to emigration therefrom, including offences of evasion of military duty. The United States holds that no naturalized citizen of this country can rightfully be held to account for military liability to his native land accruing subsequent to emigration therefrom, but this principle may be contested by countries with which the United States has not entered into treaties of naturalization. The latter countries may hold that naturalization of their citizens or subjects as citizens of other countries has no effect upon their original military obligation, or may deny the right of their citizens or subjects to become naturalized as citizens of other countries, in the absence of express consent or without the fulfilment of military obligations. More specific information as to the department's understanding of the laws of these countries concerning nationality and military obligations may be found in the department's circulars mentioned above.

It is important to observe that an alien who declares his intention to become a citizen of the United States does not, at the time of making such declaration, renounce allegiance to his original sovereign, but merely declares that he intends to do so. Such person does not, by his declaration of intention, acquire the status of a citizen of the United States.

DEPARTMENT OF STATE, Washington, August 14, 1914.

AMERICAN SOCIETY FOR JUDICIAL SETTLEMENT OF INTERNATIONAL DISPUTES.

The American Society for Judicial Settlement of International Disputes was formed in 1910 for the purpose of promoting the establishment of a judicial tribunal which would perform for the nations of the civilized world a similar service to that which is given by ordinary courts to individuals, and of encouraging recourse to such a tribunal after its establishment.

During this period annual conferences have been held, the printed proceedings of which have been a valuable acquisition to libraries and to all interested in the development of judicial settlement and of international law; men of distinguished ability and unquestioned influence contributed the papers, some of which have been voluntarily translated into French, German, Italian, and Spanish.

Quarterly pamphlets, each containing an appropriate monograph by some acknowledged authority on subjects tending to advance the purpose of the society, have been issued, not only to members, but to a carefully selected list of 30,000 names, including the leading law schools and universities throughout the world.

A copy of all publications is sent to the foreign office of every nation and to the heads of foreign legations in Washington.

There is a widespread and growing interest in the work of the society; hardly a day passes without requests, not only from America but from many parts of the world for copies of the pamphlets, which are always sent free of charge. The officers and Executive Committee are much gratified at the interest awakened by their efforts, but are obliged to issue an earnest appeal for contributing members in order to continue the work on the present scale.

The object of the founders of the society was to give it a large following, and so there were three classes of membership established (life, sustaining, and annual), with equal privileges, leaving each member to determine what he would give, and in order that it might be beyond the reach of none, the subscription for annual membership was fixed at one dollar. At the same time, in order to obtain a more adequate income, a sustaining membership at ten dollars a year was established.

President—Theodore Marburg, Baltimore Md. *Vice-President*—Elihu Root, New York. *Secretary*—James B. Scott, Washington, D. C. *Assistant Secretary*—Tunstall Smith, Baltimore, Md. *Treasurer*—J. G. Schmidlapp, Cincinnati, Ohio.

Life membership, $100; sustaining membership, $10 a year; annual membership, $1 a year.

NATURALIZATION.

THE following paraphrase and condensation of the naturalization laws of the United States have been revised by the Commissioner of Naturalization of the Department of Labor, and includes such minor changes in the law as were provided by the amendments embodied in the acts of Congress, approved June 25, 1910, and June 30, 1914.

The following courts alone have the power to naturalize aliens: United States District Courts now existing, or which may hereafter be established by Congress in any State, United States District Courts for the Territories of Hawaii and Alaska, also all courts of record in any State or Territory now existing, or which may hereafter be created, having a seal, a clerk and jurisdiction in actions at law or equity, or law and equity, in which the amount in controversy is unlimited.

The power to naturalize, conferred upon the above mentioned courts, is limited to persons residing within the geographical limits over which their respective jurisdiction extends.

DECLARATION OF INTENTION.

Any alien who is a white person, or of African nativity or African descent, is required, if he desires to become naturalized, to file a declaration of intention in the clerk's office of any court having jurisdiction over the place in which he lives, and such declaration may not be filed until the alien has reached the age of eighteen years. This declaration must contain information as to the name, age, occupation, time and place of arrival in the United States, and must further show that it is the declarant's *bona fide* intention to become a citizen of the United States and to renounce forever all allegiance and fidelity to any foreign prince, potentate, state or sovereignty, and particularly to the one of which he may be at the time a citizen or subject.

Aliens of the age of twenty-one years and upward, who have been honorably discharged from service in the armies of the United States, either regular or volunteer, are not required to make a declaration of intention.

Any alien, of the age of twenty-one years and upward, who has served five consecutive years in the United States Navy or one enlistment in the United States Marine Corps, may be admitted to citizenship (under the act of July 26, 1894) without any previous declaration of intention.

Under the act approved June 30, 1914, any alien of the age of twenty-one years and upward, who may under existing law become a citizen, who has served one enlistment of not less than four years in the United States Navy or Marine Corps, or who has completed four years in the Revenue Cutter Service, and received an honorable discharge or an ordinary discharge with recommendation for re-enlistment, or has completed four years of honorable service in the naval auxiliary service, is admissible to citizenship, upon his petition, without a previous declaration of intention, and without proof of residence on shore.

The widow and children who are under age at the time that an alien who has made his declaration of intention has died, without having secured a certificate of naturalization, are also exempted from the necessity of filing a declaration of intention.

By act of June 25, 1910, any person who on May 1, 1905, was an inhabitant for five years and qualified to become a citizen of the United States and who for the five years preceding May 1, 1910, had resided in the United States continuously and who, because of misinformation in regard to his citizenship, had in good faith exercised the rights and duties of a citizen of the United States because of wrongful information and belief, may, upon proof of these facts satisfactory to a court having jurisdiction to naturalize aliens, petition for naturalization without filing the required declaration of intention upon compliance with the other requirements of the law.

PETITIONS FOR NATURALIZATION.

Not less than two years after an alien has filed his declaration of intention, and after not less than five years' continuous residence in the United States, he may file a petition for citizenship in any one of the courts above stated which has jurisdiction over the place in which he resides, provided he has lived at least one year continuously, immediately prior to the filing of such petition, in the State or Territory in which such place is located. This petition must be signed by the petitioner in his own handwriting and shall give his full name, place of residence, occupation, place of birth and the date thereof, the place from which he emigrated, and the date and place of his arrival in the United States. If such arrival occurred subsequent to the passage of the act of June 29, 1906, he must secure a certificate from the Department of Labor showing the fact of such arrival and the date and place thereof, for filing with the clerk of the court to be attached to his petition. If he is married he must state the name of his wife and, if possible, the country of her nativity and her place of residence at the time of the filing of his petition, and, if he has children, the name, date and place of birth and present place of residence of each living child. The petition must set forth that he is not a disbeliever in or opposed to organized government, or a member of or affiliated with any organization or body of persons teaching disbelief in or opposition to organized government; that he is not a polygamist or a believer in the practice of polygamy, and that he absolutely and forever renounces all allegiance and fidelity to any foreign country of which he may, at the time of filing such petition, be a citizen or subject. This petition must be verified at the time it is filed by the affidavit of two credible witnesses, who are citizens of the United States and who shall state that they have known the petitioner during his entire residence (not exceeding five years) in the State in which the petition is filed, which must be not less than one year, and that they have known him to be a resident of the United States continuously during the five years immediately preceding the filing of the petition; that during such time he acted as a man of good moral character, attached to the principles of the Constitution of the United States and well disposed to the good order and happiness of the same. If a portion of the five years has been passed by the petitioner in some other State than that in which he resides at the time of filing his petition the affidavit of the witnesses may verify so much of the petitioner's residence as has been passed in the State (not less than one year), and the portion of said five years' residence out of the State may be shown by depositions at the time of hearing on the petition.

No petition may be heard until the expiration of at least ninety days after it is filed nor within thirty days preceding a general election. At the hearing upon a petition, which shall be at a date fixed by order of the court, the witnesses are required to again attend and testify in open court so that the Judge or Judges thereof may be satisfied that the petitioner is qualified and that he has complied with all the requirements of the law.

Any alien who has borne an hereditary title or been a member of an order or nobility must renounce such title or position expressly before becoming naturalized. No alien may become naturalized, if physically capable, who does not speak the English language.

Aliens who are admitted to citizenship by order in open court will be required to take the oath of allegiance and thereafter will be entitled to a certificate of naturalization.

The law also provides as to those persons, who though not citizens owe permanent allegiance to the United States, and who may become residents of any State or organized Territory of the United States, that they may be naturalized upon compliance with all the requirements of the law, except that they will not be called upon to renounce allegiance to any foreign sovereignty.

At the time of filing his declaration of intention an alien is required to pay to the clerk of the court a fee of one dollar. At the time of filing a petition for naturalization a petitioner is required to pay to the clerk of the court a fee of four dollars. This latter fee is for the cost of recording the petition and hearing the case, as well as for the issuance, if the petition is granted, of the certificate of naturalization.

CHINESE.

The naturalization of Chinamen is expressly prohibited by sec. 14, chap. 126, Laws of 1882.

THE NATIONAL PURE FOOD LAW.

THE Pure Food act, approved June 30, 1906, is entitled "An act for preventing the manufacture, sale, or transportation of adulterated or misbranded or poisonous or deleterious foods, drugs, medicines and liquors, and for regulating traffic therein, and for other purposes." It took effect by its terms on January 1, 1907.

The first section of the act makes it unlawful for any person to manufacture within the District of Columbia or any Territory any article of food or drug which is adulterated or misbranded, under a penalty not to exceed $500, or one year's imprisonment, or both, at the discretion of the court, for the first offence, and not less than $1,000 or one year's imprisonment, or both, for each subsequent offence.

Sec. 2 of the act makes it applicable to food or drugs introduced into any State from any other State, and from or to any foreign country.

Sec. 3. That the Secretary of the Treasury, the Secretary of Agriculture, and the Secretary of Commerce and Labor shall make uniform rules and regulations for carrying out the provisions of this act, including the collection and examination of specimens of foods and drugs manufactured or offered for sale in the District of Columbia, or in any Territory of the United States, or which shall be offered for sale in unbroken packages in any State other than that in which they shall have been respectively manufactured or produced, or which shall be received from any foreign country, or intended for shipment to any foreign country, or which may be submitted for examination by the chief health, food, or drug officer of any State, Territory, or the District of Columbia, or at any domestic or foreign port through which such product is offered for interstate commerce, or for export or import between the United States and any foreign port or country.

Sec. 4. That the examinations of specimens of foods and drugs shall be made in the Bureau of Chemistry of the Department of Agriculture, or under the direction and supervision of such bureau, for the purpose of determining from such examinations whether such articles are adulterated or misbranded within the meaning of this act; and if it shall appear from any such examination that any of such specimens is adulterated or misbranded within the meaning of this act, the Secretary of Agriculture shall cause notice thereof to be given to the party from whom such sample was obtained. Any party so notified shall be given an opportunity to be heard, under such rules and regulations as may be prescribed as aforesaid, and if it appears that any of the provisions of this act have been violated by such party, then the Secretary of Agriculture shall at once certify the facts to the proper United States District-Attorney, with a copy of the results of the analysis or the examination of such article duly authenticated by the analyst or officer making such examination, under the oath of such officer. After judgment of the court, notice shall be given by publication in such manner as may be prescribed by the rules and regulations aforesaid.

Sec. 5. That it shall be the duty of each District-Attorney to whom the Secretary of Agriculture shall report any violation of this act, or to whom any health or food or drug officer or agent of any State, Territory, or the District of Columbia shall present satisfactory evidence of any such violation, to cause appropriate proceedings to be commenced and prosecuted in the proper courts of the United States, without delay, for the enforcement of the penalties as in such case herein provided.

The sections descriptive of the articles which come within the scope of the act are as follows:

"Sec. 6. That the term 'drug,' as used in this act, shall include all medicines and preparations recognized in the United States Pharmacopoeia or National Formulary for internal or external use, and any substance or mixture of substances intended to be used for the cure, mitigation or prevention of disease of either man or other animals. The term 'food,' as used herein, shall include all articles used for food, drink, confectionery or condiment by man or other animals, whether simple, mixed or compound.

"Sec. 7. That for the purposes of this act an article shall be deemed to be adulterated:"

In case of drugs:

"First. If, when a drug is sold under or by a name recognized in the United States Pharmacopoeia or National Formulary, it differs from the standard of strength, quality or purity, as determined by the test laid down in the United States Pharmacopoeia or National Formulary official at the time of investigation: Provided, That no drug defined in the United States Pharmacopoeia or National Formulary shall be deemed to be adulterated under this provision if the standard of strength, quality or purity be plainly stated upon the bottle, box or other container thereof, although the standard may differ from that determined by the test laid down in the United States Pharmacopoeia or National Formulary.

"Second. If its strength or purity fall below the professed standard or quality under which it is sold."

In the case of confectionery:

"If it contain terra alba, barytes, talc, chrome yellow, or other mineral substance or poisonous color or flavor, or other ingredient deleterious or detrimental to health, or any vinous, malt or spirituous liquor or compound or narcotic drug."

In the case of food:

"First. If any substance has been mixed and packed with it so as to reduce, or lower, or injuriously affect its quality or strength.

"Second. If any substance has been substituted wholly or in part for the article.

"Third. If any valuable constituent of the article has been wholly or in part extracted.

"Fourth. If it be mixed, colored, powdered, coated, or stained in a manner whereby damage or inferiority is concealed.

"Fifth. If it contain any added poisonous or other added deleterious ingredient which may render such article injurious to health: Provided, That when in the preparation of food products for shipment they are preserved by any external application applied in such manner that the preservative is necessarily removed mechanically, or by maceration in water, or otherwise, and directions for the removal of said preservatives shall be printed on the covering or the package, the provisions of this act shall be construed as applying only when said products are ready for consumption.

"Sixth. If it consists in whole or in part of a filthy, decomposed, or putrid animal or

vegetable substance, or any portion of an animal unfit for food, whether manufactured or not, or if it is the product of a diseased animal, or one that has died otherwise than by slaughter.

"Sec. 8. That the term 'misbranded,' as used herein, shall apply to all drugs, or articles of food, or articles which enter into the composition of food, the package or label of which shall bear any statement, design, or device regarding such article, or the ingredients or substances contained therein which shall be false or misleading in any particular, and to any food or drug product which is falsely branded as to the State, Territory, or country in which it is manufactured or produced.

"That for the purposes of this act an article shall also be deemed to be misbranded."

In case of drugs:

"First. If it be an imitation of or offered for sale under the name of another article.

"Second. If the contents of the package as originally put up shall have been removed, in whole or in part, and other contents shall have been placed in such package, or if the package fail to bear a statement on the label of the quantity or proportion of any alcohol, morphine, opium, cocaine, heroin, alpha or beta eucaine, chloroform, cannabis indica, chloral hydrate or acetanilide, or any derivative or preparation of any such substances contained therein.

"Third. If its package or label shall bear or contain any statement, design, or device regarding the curative or therapeutic effect of such article or any of the ingredients or substances contained therein, which is false and fraudulent."

In the case of food:

"First. If it be an imitation of or offered for sale under the distinctive name of another article.

"Second. If it be labelled or branded so as to deceive or mislead the purchaser, or purport to be a foreign product when not so, or if the contents of the package as originally put up shall have been removed in whole or in part and other contents shall have been placed in such package, or if it fail to bear a statement on the label of the quantity or proportion of any morphine, opium, cocaine, heroin, alpha or beta eucaine, chloroform, cannabis indica, chloral hydrate, or acetanilide, or any derivative or preparation of any such substance contained therein.

"Third. If in package form, the quantity of the contents be not plainly and conspicuously marked on the outside of the package in terms of weight, measure, or numerical count: Provided, however, That reasonable variations shall be permitted, and tolerances and also exemptions as to small packages shall be established by rules and regulations made in accordance with the provisions of Section 3 of this act. (The act of March 3, 1913, provides that no penalty of fine, imprisonment, or confiscation shall be enforced for any violation of its provisions as to domestic products prepared or foreign products imported prior to eighteen months after its passage.)

"Fourth. If the package containing it or its label shall bear any statement, design or device regarding the ingredients or the substances contained therein, which statement, design or device shall be false or misleading, in any particular: Provided, That an article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed to be adulterated or misbranded in the following cases:

"First. In the case of mixtures or compounds which may be now or from time to time hereafter known as articles of food, under their own distinctive names, and not an imitation of or offered for sale under the distinctive name of another article, if the name be accompanied on the same label or brand with a statement of the place where said article has been manufactured or produced.

"Second. In the case of articles labelled, branded or tagged so as to plainly indicate that they are compounds, imitations or blends, and the word 'compound,' 'imitation' or 'blend,' as the case may be, is plainly stated on the package in which it is offered for sale: Provided, That the term 'blend' as used herein shall be construed to mean a mixture of like substances, not excluding harmless coloring or flavoring ingredients used for the purpose of coloring and flavoring only: And provided further, That nothing in this act shall be construed as requiring or compelling proprietors or manufacturers of proprietary foods which contain no unwholesome added ingredients to disclose their trade formulas, except in so far as the provisions of this act may require to secure freedom from adulteration or misbranding.

"Sec. 9. That no dealer shall be prosecuted under the provisions of this act, when he can establish a guaranty signed by the wholesaler, jobber, manufacturer or other party residing in the United States, from whom he purchases such articles, to the effect that the same is not adulterated or misbranded within the meaning of this act, designating it."

The remaining provisions of the act provide the methods of prosecuting offenders and destroying goods imported or offered for import which are adulterated or falsely labelled.

SUMMARY OF RESULTS.

(Bureau of Chemistry, Carl L. Alsberg, Chief, Washington, D. C.)

During the fiscal year 1914, 11,911 samples of foods and drugs shipped in interstate commerce were collected and examined; 436 cases were transmitted to the Department of Justice for prosecution, in 87 of which criminal proceedings, and in 349 of which seizure proceedings were recommended; 407 criminal cases and 369 seizures, in all 776 cases, were terminated in the courts; 14,275 import shipments were examined at the Import Laboratories and 4,524 were denied entry.

ABOLISHING GUARANTY LEGEND AND SERIAL NUMBER ON FOOD AND DRUGS.

The legend "Guaranteed under the Food and Drugs act" is held to be misleading and deceptive, and the use of a serial number on food and drugs is prohibited after May 1, 1916, by a food inspection decision signed May 29, 1914, by the Secretaries of the Treasury, Agriculture and Commerce. The new regulation will take effect May 1, 1916, in order to give manufacturers an opportunity to use up their present stocks of labels. After that date guaranties of compliance with the law should be given by manufacturers directly to dealers, and should be incorporated in the invoice or bill of sale specifying the goods covered. **This guaranty should not appear on the label or package of the product.**

UNITED STATES INTERNAL REVENUE RECEIPTS.

SUMMARY OF INTERNAL REVENUE RECEIPTS FROM 1906 TO 1915, INCLUSIVE.

Fiscal Years.	Spirits.	Tobacco.	Fermented Liquors.	Income Tax.	Fiscal Years.	Spirits.	Tobacco.	Fermented Liquors.	Income Tax.
1906	$143,394,055	$48,422,997	$55,641,859	.....	1911	$155,279,858	$67,005,950	$64,367,777	.....
1907	156,336,902	51,811,070	59,567,818	.....	1912	156,391,487	70,590,151	63,268,770	.....
1908	140,158,807	49,862,754	59,807,617	.....	1913	163,879,342	76,789,424	66,266,989	.....
1909	134,868,034	51,887,178	57,456,411	.....	1914	159,098,177	79,986,639	67,081,512	$71,381,274
1910	148,029,311	58,118,457	60,572,288	.....	1915	144,619,699	a79,957,373	79,328,946	*80,190,694

Of the miscellaneous receipts received in 1915 (total $1,454,760), $673,847 was from playing cards, and $379,288 from penalties, etc. Receipts from oleomargarine $1,695,256. (a) Including $193,302 from sale of internal revenue stamps affixed to Philippine products, as provided for in the act of August 5, 1909.
* Income tax from corporations $39,144,529, from individuals $41,046,165.

INCOME TAX.

The receipts of income tax from individuals for year ending June 30, 1915 as classified to conform to provisions of the act, were as follows:

Income tax, normal	$16,577,089.33
Income tax, additional, from net incomes exceeding:	
$20,000 and not more than $50,000	4,098,073.45
$50,000 and not more than $75,000	2,496,496.77
$75,000 and not more than $100,000	2,099,634.48
$100,000 and not more than $250,000	$5,943,797.67
$250,000 and not more than $500,000	3,328,423.78
$500,000	6,439,004.54
Accepted offers in compromise	63,645.59
Total	$41,046,165.61

Supplemental statement showing the receipts under act of October 3, 1913, during the fiscal year ended June 30, 1915.

THE SOUTHERN COMMERCIAL CONGRESS.

President—Duncan U. Fletcher, Jacksonville, Fla. *First Vice-President*—Thomas S. Southgate, Norfolk, Va. *Second Vice-President*—Albert P. Bush, Mobile, Ala. *Managing Director*—Clarence J. Owens, Riverdale Park, Md. *Treasurer and Resident Director*—William H. Saunders, Washington, D. C.

The headquarters of the Congress is at the Southern Building, Fifteenth and H Streets, Washington, D. C.; Clarence J. Owens, Managing Director.

Among the purposes of the organization are the following:

(*a*) To promote and develop the interests of the following sixteen States of the United States known as the "Southern States," to wit: Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Missouri, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia.

(*b*) To collect and disseminate information regarding the resources and conditions of the said States and the opportunities and advantages offered in them for the safe and profitable investment of capital; the attractions offered in the South to the homeseeker, artisan and laborer, and the importance to the National Government of enacting proper legislation looking to the conservation of the natural resources of the South and the improvement of its rivers, harbors and transportation facilities.

(*c*) To encourage, promote and foster the development of the resources of the South with its own capital and by its own inhabitants.

(*d*) To encourage and obtain the establishment in the South of commercial, manufacturing, industrial and other enterprises, and to foster those already existing therein.

(*e*) To encourage, foster and promote the creation and establishment of institutions and organizations whose energies shall be principally directed toward the development of the material resources of the South.

(*f*) To promote and develop proper immigration to the South and to promote and foster the establishment of such organizations as may bring about the development of desirable immigration to the South.

(*g*) To encourage the movement for the construction of good roads and for the extension of railroad and trolley transportation.

(*h*) To encourage, foster and develop patriotic and National sentiments throughout the South and elsewhere in the nation, and particularly to promote, encourage and foster the feeling and desire for a greater nation through a greater South.

(*i*) To promote the improvement of educational and other conditions which tend to develop the material resources and happiness of the residents of the South.

INTERNATIONAL POLAR COMMISSION.

Organized at Brussels, Belgium, May 29, 1908. *President*—————. *Vice-President*—Dr. Otto Nordenskjold, Sweden. *Secretary*—Rear-Admiral Robert E. Peary (U. S. N.).

Members—Prof. E. Bruckner, Prof. G. Trabert, Prof. E. Oberhummer and Prof. A. Grund, Austria; Baron Roland Eötvös, Rear-Admiral A. Gratzl, Prof. R. de Kövesligethy, and Dr. J. Kepes, Hungary; Capt. A. de Gomery de Gerlache, Brussels, and Prof. Georges Lecointe, Uccle, Belgium; Rear-Admiral Louis A. Goui, Chile; Capt. Holm, Capt. Amdrup, and Dr. la Cour, Denmark; Rear-Admiral Robert E. Peary, U. S. N., and Herbert L. Bridgman, United States; Admiral Umberto Cagni, R. N.; Prof. G. Cora, Capt. Marquis Giovanni Roncagli, and Cavalier Petro Molinelli, Italy; Dr. Van der Stok, Capt. J. M. Pfaff, Dr. Van Everdingen, and J. L. H. Luymes, Netherlands; Prof. Mehedinti, Prof. Coculesco, and Prof. Stefan Popescu, Roumania; Prof. Rudmose Brown, Dr. William S. Bruce, Dr. Bartholomew, and Dr. Richardson, Great Britain; Gen. Lieut. Jules de Schokalsky and Dr. Knipovitch, Russia; Dr. Baron de Geer, Dr. Otto Nordenskjold, Dr. Hamberg and Dr. Andersson, Sweden; Prof. Erich Von Drygalski, Prof. Albrecht Penck, Dr. Supan and Dr. Wiechert, Germany; M. M. Maurice Zimmerman, and Ernest Gourdon, France.

PATENT OFFICE PROCEDURE.

THE following statement has been revised by the Patent Office for THE WORLD ALMANAC:

Patents are issued in the name of the United States, and under the seal of the Patent Office, to any person who has invented or discovered any new and useful art, machine, manufacture, or composition of matter or any new and useful improvement thereof, or any new, original and ornamental design for an article of manufacture, not known or used by others in this country before his invention or discovery thereof, and not patented or described in any printed publication in this or any foreign country, before his invention or discovery thereof or more than two years prior to his application, and not in public use or on sale in the United States for more than two years prior to his application, unless the same is proved to have been abandoned; upon payment of the fees required by law and other due proceedings had.

Every patent contains a grant to the patentee, his heirs or assigns, for the term of seventeen years, except in the case of design patents, of the exclusive right to make, use, and vend the invention or discovery throughout the United States and the Territories, referring to the specification for the particulars thereof.

If it appear that the inventor, at the time of making his application, believed himself to be the first inventor or discoverer, a patent will not be refused on account of the invention or discovery, or any part thereof, having been known or used in any foreign country before his invention or discovery thereof, if it had not been before patented or described in any printed publication.

Joint inventors are entitled to a joint patent; neither can claim one separately. Independent inventors of distinct and independent improvements in the same machine cannot obtain a joint patent for their separate inventions; nor does the fact that one furnishes the capital and another makes the invention entitle them to make application as joint inventors; but in such case they may become joint patentees by means of a deed of assignment.

No person otherwise entitled thereto will be debarred from receiving a patent for his invention or discovery, by reason of its having been first patented or caused to be patented by the inventor or his legal representatives or assigns in a foreign country, unless the application for said foreign patent was filed more than twelve months prior to the filing of the application in this country, and four months in cases of designs, in which case no patent shall be granted in this country.

APPLICATIONS.

If an inventor wishes to file an application for patent, a copy of the Rules of Practice, containing forms and instructions, will be sent upon request. It is advisable, however, in every case, that the services of a competent registered patent attorney be secured, as the value of patents depends largely upon the skilful preparation of the specification and claims. The Patent Office cannot recommend any particular attorney or firm, but advises applicants to avoid doing business with those who advertise the possession of unusual facilities for obtaining patents.

Applications for patents must be made in writing to the Commissioner of Patents. The applicant must file in the Patent Office a written description of the invention or discovery, and of the manner and process of making, constructing, compounding, and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art or science to which it appertains, or with which it is most nearly connected, to make, construct, compound, and use the same; and in case of a machine, he must explain the principle thereof, and the best mode in which he has contemplated applying that principle, so as to distinguish it from other inventions, and particularly point out and distinctly claim the part, improvement, or combination which he claims as his invention or discovery. The specification and claim must be signed by the inventor.

When the nature of the invention admits of drawings, the applicant must furnish a drawing of the required size, signed by the inventor or his attorney in fact. The applicant, if required by the Patent Office, shall furnish a model of convenient size to exhibit advantageously the several parts of his invention or discovery, but a model should not be sent unless first called for by the Patent Office.

The applicant shall make oath that he verily believes himself to be the original and first inventor or discoverer of the art, machine, manufacture, composition, or improvement for which he solicits a patent; that he does not know and does not believe that the same was ever before known or used, and shall state of what country he is a citizen and where he resides, and whether he is the sole or joint inventor of the invention claimed in his application. In every original application the applicant must distinctly state under oath that the invention has not been patented to himself or to others with his knowledge or consent in this or any foreign country for more than two years prior to his application, or on an application for a patent filed in any foreign country by himself or his legal representatives or assigns more than twelve months prior to his application in this country, or four months in cases of designs. If any application for patent has been filed in any foreign country by the applicant in this country or by his legal representatives or assigns, prior to his application in this country, he shall state the country or countries in which such application has been filed, giving the date of such application, and shall also state that no application has been filed in any other country or countries than those mentioned; that to the best of his knowledge and belief the invention has not been in public use or on sale in the United States nor described in any printed publication or patent in this or any foreign country for more than two years prior to his application in this country. Such oath may be made before any person within the United States authorized by law to administer oaths, or, when the applicant resides in a foreign country, before any Minister, Chargé d'Affaires, Consul, or commercial agent holding commission under the Government of the United States, or before any notary public, Judge or Magistrate having an official seal and authorized to administer oaths in that country whose authority shall be proved by a certificate of a diplomatic or consular officer of the United States, except that no acknowledgment may be taken by any attorney appearing in the case.

On the filing of such application and the payment of the fees required by law, if, on examination, it appears that the applicant is justly entitled to a patent under the law, and that the invention is sufficiently useful and important, the Commissioner will issue a patent therefor.

Every patent or any interest therein shall be assignable in law by an instrument in writing; and the patentee or his assigns or legal representatives may, in like manner, grant and convey an exclusive right under his patent to the whole or any specified part of the United States.

REISSUES.

A reissue is granted to the original patentee, his legal representatives, or the assignees of the entire interest when, by reason of a defective or insufficient specification, or by reason of the patentee claiming as his invention or discovery more than he had a right to claim as new, the original patent is inoperative or invalid, provided the error has arisen from inadvertence, accident, or mistake, and without

PATENT OFFICE PROCEDURE—*Continued.*

any fraudulent or deceptive intention. Reissue applications must be made and the specifications sworn to by the inventors, if they be living.

FEES.

Fees must be paid in advance, and are as follows: On filing each original application for a patent, $15. On issuing each original patent, $20. In design cases: For three years and six months, $10; for seven years, $15; for fourteen years, $30. On every application for the reissue of a patent, $30. On filing each disclaimer, $10. For certified copies of patents and other papers in manuscript, ten cents per hundred words and twenty-five cents for the certificate; for certified copies of printed patents, eighty cents. For uncertified printed copies of specifications and drawings of patents, five cents each. For recording every assignment, agreement, power of attorney, or other paper, of three hundred words or under, $1; of over three hundred and under one thousand words, $2; for each additional thousand words, or fraction thereof, $1. For copies of drawings, the reasonable cost of making them. The Patent Office is prepared to furnish positive photographic copies of the drawings of pending, patented or abandoned cases, in sizes and at rates as follows: Large size, 10x15 inches, twenty-five cents; medium size, 8x12½ inches, fifteen cents. Negative photographic copies of specifications and drawings of foreign patents, or of any page or part of page of any printed publication in the possession of the office, will be furnished on paper 7x11 inches, for fifteen cents per sheet. Stamps cannot be accepted by the Patent Office in payment of fees. Stamps and stamped envelopes should not be sent to the office for replies to letters, as stamps are not required on mail matter emanating from the Patent Office.

PATENT OFFICE STATISTICS.

The receipts of the Patent Office during the year ending December 31, 1914, were $2,251,892, and expenditures $2,000,770. Receipts over expenditures, $251,122. Total net surplus to December 31, 1914, $7,548,175.

The following is a statement of the business of the office for the year ending December 31, 1914:

Number of applications for patents	67,774
Number of applications for design patents	2,454
Number of applications for reissue patents	176
Total	70,404
Number of applications for registration of trade-marks	8,851
Number of applications for registration of labels	988
Number of applications for prints	434
Number of disclaimers filed	22
Number of appeals on the merits	1,840
Total	12,135
Number of patents issued, excluding designs	39,945
Design patents issued	1,715
Patents reissued	190
Total	41,850
Number of trade-marks registered	6,817
Number of labels registered	719
Number of prints registered	338
Total	7,874
Number of patents expired	22,098
Number of applications forfeited for non-payment of final fees	10,222
Number of applications allowed awaiting final fees	19,152
Number of trade-mark applications passed for publication	7,948

The total number of applications filed at the Patent Office in seventy-nine years, 1836-1914, was 2,066,780; number of patents granted, including designs and reissues, 1,123,211.

There is now no law permitting the filing of a caveat, the old law having been repealed July 1, 1910. Patent No. 1,000,000 was granted August 8, 1911, to F. H. Holton, of Akron, Ohio, for an automobile tire.

The following is a statement of patents and designs issued in 1914 according to residence of patentees: Alabama, 206; Alaska, 5; Arizona, 75; Arkansas, 134; California, 1,870; Canal Zone, 10; Colorado, 445; Connecticut, 1,176; Delaware, 63; District of Columbia, 340; Florida, 143; Georgia, 241; Hawaii, 30; Idaho, 84; Illinois, 3,954; Indiana, 820; Iowa, 759; Kansas, 430; Kentucky, 243; Louisiana, 198; Maine, 150; Maryland, 398; Massachusetts, 2,437; Michigan, 1,423; Minnesota, 664; Mississippi, 115; Missouri, 1,154; Montana, 149; Nebraska, 335; Nevada, 32; New Hampshire, 124; New Jersey, 1,893; New Mexico, 45; New York, 5,972; North Carolina, 189; North Dakota, 162; Ohio, 2,643; Oklahoma, 292; Oregon, 337; Pennsylvania, 3,469; Philippine Islands, 9; Porto Rico, 4; Rhode Island, 349; South Carolina, 92; South Dakota, 149; Tennessee, 254; Texas, 619; Utah, 131; Vermont, 80; Virginia, 299; Washington, 563; West Virginia, 238; Wisconsin, 947; Wyoming, 45; U. S. Army, 10; U. S. Navy, 11. Total, †37,009.

Foreign countries: Austria-Hungary, 152; Belgium, 56; Canada, 667; Cuba, 20; Denmark, 32; England, 1,033; France, 379; Germany, 1,475; Ireland, 25; Italy, 70; Japan, 13; Mexico, 26; Norway, 38; Russia, 37; Scotland, 93; Sweden, 82; Switzerland, 122; other countries, 275. Total foreign, 4,595.

GENERAL PATENT STATISTICS.

The following table is compiled from the report of the Commissioner of Patents for 1915. It exhibits the number of patents issued by foreign countries to December 31, 1913, and the United States from the earliest records to December 31, 1914:

Countries.	To 1870 Inclusive.	1871 to 1913.	Total.	Countries.	To 1870 Inclusive.	1871 to 1913.	Total.
Austria	.....	81,692	81,692	Russia	1,464	30,844	32,308
Austria-Hungary	15,350	67,583	82,933	Spain	.....	51,993	51,993
Belgium	35,044	236,000	271,044	Sweden	1,629	37,693	39,322
Canada	4,081	152,199	156,280	Switzerland	.....	63,944	63,944
France	103,934	384,620	488,554	All other foreign countries	8,363	197,995	206,358
Germany	9,996	275,974	285,970	Total foreign	238,437	2,222,088	2,460,525
Great Britain	53,408	425,063	478,471	United States	120,573	972,650	*1,093,223

* Including 9,957 patents issued prior to July 1, 1836, on which date the present series began. † Not including 190 reissues and 56 patents withdrawn.

THE ALLIANCE FRANCAISE.

THE Federation of French Alliances in the United States and Canada number 150 groups. The officers of the federation are: *Honorary President*—J. J. Jusserand, French Ambassador. *President*—J. Le Roy White, Baltimore. *Vice-Presidents*—M. Alexander, T. Mason, New York; H. Kirke White, Detroit; G. Desauniers, Montreal; A. Legallet, San Francisco, Cal.; B. E. Young, Nashville, Tenn. *Secretary*—M. Louis Delamarre. *Treasurer*—M. T. Tileston Wells. Office, 147 Fourth Avenue, New York City.

REGISTRATION OF TRADE-MARKS

IN THE UNITED STATES.

THE following are extracts from the new "Act to authorize the registration of trade-marks used in commerce with foreign nations, or among the several States or Indian tribes, and to protect the same," approved February 20, 1905, and later amendatory acts.

"The owner of a trade-mark used in commerce with foreign nations, or among the several States, or with Indian tribes, provided such owner shall be domiciled within the territory of the United States, or resides in or is located in any foreign country, which, by treaty, convention, or law, affords similar privileges to the citizens of the United States, may obtain registration for such trade-mark by complying with the following requirements: First, by filing in the Patent Office an application therefor, in writing, addressed to the Commissioner of Patents, signed by the applicant, specifying his name, domicile, location, and citizenship; the class of merchandise and the particular description of goods comprised in such class to which the trade-mark is appropriated; a statement of the mode in which the same is applied and affixed to goods, and the length of time during which the trade-mark has been used; a description of the trade-mark itself shall be included, if desired by the applicant or required by the Commissioner, provided such description is of a character to meet the approval of the Commissioner. With this statement shall be filed a drawing of the trade-mark, signed by the applicant, or his attorney, and such number of specimens of the trade-mark, as actually used, as may be required by the Commissioner of Patents. Second, by paying into the Treasury of the United States the sum of ten dollars, and otherwise complying with the requirements of this act and such regulations as may be prescribed by the Commissioner of Patents.

"A certificate of registration shall remain in force for twenty years, except that in the case of trade-marks previously registered in a foreign country such certificates shall cease to be in force on the day on which the trade-mark ceases to be protected in such foreign country, and shall in no case remain in force more than twenty years, unless renewed. Certificates of registration may be, from time to time, renewed for like periods on payments of the renewal fees required by this act, upon request by the registrant, his legal representatives, or transferees of record in the Patent Office, and such request may be made at any time not more than six months prior to the expiration of the period for which the certificates of registration were issued or renewed. Certificates of registration in force at the date at which this act takes effect shall remain in force for the period for which they were issued, but shall be renewable on the same conditions and for the same periods as certificates issued under the provisions of this act, and when so renewed shall have the same force and effect as certificates issued under this act.

"The registration of a trade-mark under the provisions of this act shall be prima facie evidence of ownership. Any person who shall, without the consent of the owner thereof, reproduce, counterfeit, copy, or colorably imitate any such trade-mark and affix the the same to merchandise of substantially the same descriptive properties as those set forth in the registration, or to labels, signs, prints, packages, wrappers, or receptacles intended to be used upon or in connection with the sale of merchandise of substantially the same descriptive properties as those set forth in such registration, and shall use, or shall have used, such reproduction, counterfeit, copy, or colorable imitation in commerce among the several States, or with a foreign nation, or with the Indian tribes, shall be liable to an action for damages therefor at the suit of the owner thereof; and whenever in any such action a verdict is rendered for the plaintiff, the court may enter judgment therein for any sum above the amount found by the verdict as the actual damages, according to the circumstances of the case, not exceeding three times the amount of such verdict, together with the costs."

No trade-mark will be registered which consists of or comprises immoral or scandalous matter, or which consists of or comprises the flag or coat of arms or other insignia of the United States, or any simulation thereof, or of any State or municipality, or of any foreign nation, or which consists of or comprises any design or picture that has been adopted by any fraternal society as its emblem, or of any name, distinguishing mark, character, emblem, colors, flag, or banner adopted by any institution, organization, club, or society which was incorporated in any State in the United States prior to the date of the adoption and use by the applicant; Provided, That said name, distinguishing mark, character, emblem, colors, flag, or banner was adopted and publicly used by said institution, organization, club, or society prior to the date of adoption and use by the applicant; unless it shall be shown to the satisfaction of the Commissioner of Patents that the mark was adopted and used as a trade-mark by the applicant or applicant's predecessors, from whom title is derived, at a date prior to the date of its adoption by such fraternal society as its emblem, or which trade-mark is identical with a registered or known trade-mark owned and in use by another, and appropriated to merchandise of the same descriptive properties, or which so nearly resembles a registered or known trade-mark owned and in use by another, and appropriated to merchandise of the same descriptive properties as to be likely to cause confusion or mistake in the minds of the public, or to deceive purchasers; or which consists merely in the name of an individual, firm, corporation, or association, not written, printed, impressed, or woven in some particular or distinctive manner or in association with a portrait of the individual, or merely in words or devices which are descriptive of the goods with which they are used, or of the character or quality of such goods, or merely a geographical name or term; no portrait of a living individual will be registered as a trade-mark, except by the consent of such individual evidenced by an instrument in writing; and no trade-mark will be registered which is used in unlawful business, or upon any article injurious in itself, or which has been used with the design of deceiving the public in the purchase of merchandise, or which has been abandoned.

Any mark, used in commerce with foreign nations or among the several States or with Indian tribes, may be registered if it has been in actual and exclusive use as a

REGISTRATION OF TRADE-MARKS—*Continued.*

trade-mark of the applicant, or his predecessors from whom he derived title, for ten years next preceding the passage of the act of February 20, 1905.

By act of Congress approved February 18, 1909, the second section of the trade-mark act was amended so as to read as follows:

"The application prescribed in the foregoing section, in order to create any right whatever in favor of the party filing it, must be accompanied by a written declaration verified by the applicant, or by a member of the firm or an officer of the corporation or association applying, to the effect that the applicant believes himself or the firm, corporation, or association in whose behalf he makes the application to be the owner of the trade-mark sought to be registered, and that no other person, firm, corporation, or association, to the best of the applicant's knowledge and belief, has the right to use such trade-mark in the United States, either in the identical form or in such near resemblance thereto as might be calculated to deceive; that such trade-mark is used in commerce among the several States, or with foreign nations, or with Indian tribes, and that the description and drawing presented truly represent the trade-mark sought to be registered. If the applicant resides or is located in a foreign country, the statement required shall, in addition to the foregoing, set forth that the trade-mark has been registered by the applicant, or that an application for the registration thereof has been filed by him in the foreign country in which he resides or is located, and shall give the date of such registration, or the application therefor, as the case may be, except that in the application in such cases it shall not be necessary to state that the mark has been used in commerce with the United States or among the States thereof. The verification required by this section may be made before any person within the United States authorized by law to administer oaths, or, when the applicant resides in a foreign country, before any Minister, Charge d'Affaires, Consul, or commercial agent holding commission under the Government of the United States, or before any notary public, Judge, or Magistrate having an official seal and authorized to administer oaths in the foreign country in which the applicant may be whose authority shall be proved by a certificate of a diplomatic or consular officer of the United States."

A fee of $10.00 is required by law to be paid with each application for the registration of a trade-mark, and this fee will include the certificate of registration, if the trade-mark be determined to be registrable.

TRADE-MARK TREATIES WITH FOREIGN NATIONS.

The following is a list of the Governments with which conventions for the reciprocal registration and protection of trade-marks have been entered into by the United States—Austria-Hungary, Belgium, Denmark, France, Germany, Great Britain (including colonies), Italy, Japan (including China and Korea), Luxemburg, Mexico, Roumania, Servia, Spain. The laws of Switzerland and the Netherlands being so framed as to afford reciprocal privileges to the citizens or subjects of any Government which affords similar privileges to the people of those countries, the mere exchange of diplomatic notes, giving notice of the fact, accomplishes all the purposes of a formal convention.

IRRIGATION, UNITED STATES GOVERNMENT PROJECTS.

Approved projects commenced, area to be reclaimed, with expenditure to and percentage of completion on December 31, 1914, listed by States. (Source: The Reclamation Service, Department of the Interior.)

a The amounts in this column include the total amounts paid out for construction and operation and maintenance without deducting amounts that have been collected for services rendered, operation and maintenance assessments, etc. *b* The percentages noted in this column represent the approximate ratio which costs of construction to date bear to present estimate of total construction cost. *c* 25,000 acres additional in Mexico. *d* Sunnyside unit, 110,828 acres; Tieton unit, 34,003 acres. *e* Storage unit, 30 per cent.; Sunnyside, 99 per cent.; Tieton, 99 per cent.

On December 31, 1914, there had been constructed numerous dams and over 9,000 miles of irrigation canals and ditches, involving excavation of over 122,000,000 cubic yards of material. The value of irrigated crops grown on the reclamation projects under operation in 1914 was about $16,500,000.

THE CHAMBER OF COMMERCE OF THE UNITED STATES OF AMERICA.

A FEDERATION OF COMMERCIAL ORGANIZATIONS. NATIONAL HEADQUARTERS, WASHINGTON, D. C.

ORGANIZED at the National Commercial Conference called by the President of the United States and held at Washington, D. C., April 22 and 23, 1912.

President—John H. Fahey, Boston, Mass. *Vice-Presidents*—Henry L. Corbett, Portland, Ore., for Western States; Robert F. Maddox, Atlanta, Ga., for Southern Central States; Samuel MacRoberts, New York, N. Y., for Eastern States, and Joseph H. Defrees, Chicago, Ill., for Northern Central States. *Treasurer*—John Joy Edson, Washington, D. C. *Chairman Executive Committee*—R. G. Rhett, Charleston, S. C. *General Secretary*—Elliot H. Goodwin, Washington, D. C. *Assistant Secretary*—D. A. Skinner, Washington, D. C.

PURPOSES—To encourage and promote the organization of associations of business in all parts of the country. To study the work of existing organizations and their value to their respective trades and communities, and to clear the information thus acquired for the benefit of all organizations desiring to increase their efficiency. To advocate the standardization of association methods and of association effort, and to urge the adoption of those standards which have been found most effective in so far as they may be applicable to local or trade conditions.

To study the work performed by all Government Bureaus in any way related to the commerce of the country, to encourage and support appropriation measures for their further development, and to utilize the data which they gather by directing it into the channels to which it is immediately applicable.

To carefully analyze all statistics with regard to the production and distribution of our manufactures at home and abroad; to be watchful of every influence calculated to retard our commercial development, and to become a source of information with respect to new opportunities for trade expansion, especially in foreign markets.

When debatable policies affecting our National commerce are advocated by the Federal authorities, there should be a recognized organization capable of expressing the business opinion of the entire country available for conference, alike to the executive and legislative branches of the Government. It is the purpose of the Chamber of Commerce of the United States of America to act in this capacity—not to originate legislation, nor to be unnecessarily critical of legislation proposed by others, but rather to assume that the National Government desires to act in harmony with the commercial interests of the country and will accept our co-operation in an endeavor to make all business legislation constructive.

There are three great wealth-producing factors in our National life—Commerce, labor, and agriculture. Labor, through its State and National organizations, strives for legislation in its own interest and presents its demands with the united voice of two million union workers. Agriculture likewise presents its demands through its National organization, and these are heeded in both State and National Legislatures. Commerce has been organized into local and trade groups, but not as an effective National unit, and it is to provide such a unit, as powerful as those enjoyed by labor and agriculture, that the Chamber of Commerce of the United States of America is now organized. These three great factors, through their National organizations, may find a means for co-operation on many subjects in which there is a vital joint interest.

ORGANIZATION MEMBERSHIP—Every commercial or manufacturers' association not organized for private purposes shall be eligible for membership in the chamber. Such associations shall be of two classes:

First—Local or State commercial or business organizations whose chief purpose is the development of the commercial and industrial interests of a single State, city or locality.

Second—Local, State, interstate or National organizations whose membership is confined to one trade or group of trades.

REPRESENTATION—Each member of the Chamber of Commerce of the United States of America shall be entitled to one delegate and one vote for the first twenty-five members, and one delegate and one vote for each additional two hundred members in excess of twenty-five, but no member shall be entitled to more than ten delegates and ten votes. Organizations having less than twenty-five members may be admitted to membership if in the judgment of the Board of Directors their importance would justify their admission, and these shall be entitled to one delegate and one vote.

The organization membership at the present time consists of over 650 commercial and trade organizations representing over 275,000 corporations, firms, and individuals, among which every State in the Union is represented, as well as Hawaii, Alaska, Porto Rico, the Philippines, and the American Chambers of Commerce in foreign countries.

INDIVIDUAL MEMBERSHIP—Persons, firms, and corporations who are members in good standing of any organization admitted to the chamber are eligible for election as individual members. Individual members receive the regular publications of the chamber and they may avail themselves of the facilities of the National headquarters; may attend all regular and special meetings of the chamber and, subject to the rules of such meetings, may have the privilege of the floor, but they are not entitled to vote except as duly accredited delegates of organization members. Individual membership is limited to 5,000, and at the present time consists of more than 2,700 individuals, firms, or corporations representing merchants, manufacturers, lawyers, bankers, engineers, railroad officials, and other business men in all parts of the country.

SERVICE—The Legislative Bulletin, issued weekly during the sessions of Congress, constitutes a thorough digest of current and National legislation published for business men.

The Business Bulletins give members prompt and accurate notice of all Government activities affecting the business of the country, announcements regarding the Federal Reserve Board, the income tax, the Interstate Commerce Commission, moratoria, contraband, embargo, etc.

The Federal Trade Commission bulletins contain accurate information in regard to the activities of the Federal Trade Commission.

The Nation's Business, published monthly, contains up-to-date facts in regard to National questions affecting commerce and industry.

The Division of Information is maintained under the direction of business and legal experts. Through this division members are furnished direct with advice or data from official or other first-hand sources available in the Government departments, the Library of Congress, or elsewhere in Washington.

NATIONAL ASSEMBLY OF CIVIL SERVICE COMMISSIONS.

President—F. E. Doty, Los Angeles, Cal. *Vice-Presidents*—J. E. Campbell, Pueblo, Col.; Henry Moskowitz, New York City; Joseph C. Mulholland, Minneapolis, Minn. *Secretary-Treasurer*—John T. Doyle, 1724 F Street N. W., Washington, D. C.

The assembly was organized in 1906. The objects are to enable all those charged with the administration of civil service laws to become acquainted and exchange ideas. To promote co-operation, uniformity and perfection of methods of the different commissions. To enable the commissions to profit by exchange of ideas with officers who are directing departments and to give such officers broader opportunity to inform themselves on the methods of the merit system.

UNITED STATES EXECUTIVE CIVIL SERVICE.

(Revised for this issue of THE WORLD ALMANAC by the Secretary of the Civil Service Commission.)

The purpose of the Civil Service act, as declared in its title, is "to regulate and improve the Civil Service of the United States." It provides for the appointment of three Commissioners, a chief Examiner, a Secretary, and other employés, and makes it the duty of the Commissioners to aid the President as he may request in preparing suitable rules for carrying the act into effect; to make regulations to govern all examinations held under the provisions of the act, and to make investigations and report upon all matters touching the enforcement and effect of the rules and regulations. The address of the commission is Washington, D. C.

PROVISIONS OF THE RULES.

The act requires the rules to provide, as nearly as the conditions of good administration will warrant, for open competitive practical examinations for testing the fitness of applicants for the classified service; for the filling of all vacancies by selections from among those graded highest; for the apportionment of appointments at Washington among the States upon the basis of population, for a period of probation before absolute appointment; that no person in the public service shall be obliged to contribute service or money for political purposes; that persons in the competitive service, while retaining the right to vote as they please or to express privately their political opinions, shall take no active part in political campaigns, and that no person in said service has any right to use his official authority or influence to coerce the political action of any person or body.

EXTENT OF THE SERVICE.

There were on June 30, 1914, 482,721 positions in the Executive Civil Service, 60 per cent. of which, or about 292,460, were subject to competitive examination. The expenditure for salaries in the Executive Civil Service is over $200,000,000 a year. The Civil Service act does not require the classification of persons appointed by the President and confirmed by the Senate or of persons employed merely as laborers or workmen. Many positions are excepted in part from the provisions of the rules for various reasons.

APPLICATIONS.

Persons seeking to be examined must file an application blank. The blank for the Departmental Service at Washington, Railway Mail Service, the Indian School Service, and the Government Printing Service should be requested directly of the Civil Service Commission at Washington. The blank for the Customs, Postal, or Internal Revenue Service should be requested of the Civil Service Board of Examiners at the office where service is sought.

Applicants for examination must be citizens of the United States and of the proper age. No person using intoxicating liquors to excess may be appointed. No discrimination is made on account of sex, color, or political or religious opinions. The limitations of age vary with the different services, but do not apply to any person honorably discharged from the military or naval service of the United States by reason of disability resulting from wounds or sickness incurred in the line of duty.

EXAMINATIONS.

The examinations are open to all persons qualified in respect to age, citizenship, legal residence, character, and health. During the fiscal year ended June 30, 1914, 41,206 persons were appointed. Of those appointed, 2,595 were rural letter-carriers, 7,030 were mechanics and workmen at navy yards appointed on registration tests of fitness given by a board of labor employment at each yard. Several hundred different kinds of examinations were held, each one of which involved different tests. Three hundred and sixty-four of these examinations contained educational tests, the others being for mechanical trades or skilled occupations and consisting of certificates of employers or fellow-workmen. Examinations are held twice a year in each State and Territory, the places and dates being publicly announced.

APPOINTMENTS.

In case of a vacancy not filled by promotion, reduction, transfer, or reinstatement, the highest three of the sex called for on the appropriate register are certified for appointment, the apportionment being considered in appointments at Washington. In the absence of eligibles, or when the work is of short duration, temporary appointments, without examination, are permitted. The number of women applying for ordinary clerical places is greatly in excess of the calls of appointing officers. The chances of appointment are good for teachers, matrons, seamstresses, and physicians in the Indian Service, for male stenographers and typewriters, draughtsmen, patent examiners, civil, mechanical, and electrical engineers, and for technical and scientific experts.

PREFERENCE CLAIMANTS.

Persons who served in the military or naval service of the United States, and were discharged by reason of disabilities resulting from wounds or sickness incurred in the line of duty, are, under the Civil Service rules, given certain preferences. They are released from all maximum age limitations, are eligible for appointment at a grade of 65, while all others are obliged to obtain a grade of 70, and are certified to appointing officers before all others. Subject to the other conditions of the rules, a veteran of the rebellion or of the war with Spain, or the widow of any such person, or any army nurse of either war, may be reinstated without regard to the length of time he or she has been separated from the service.

INSULAR POSSESSIONS.

Examinations are also held for positions in the Philippines, Porto Rico, and Hawaii, and also for the Isthmian Canal service.

THE UNCLASSIFIED SERVICE.

Under an executive order unclassified laborers are appointed after open, competitive examination upon their physical condition. This action is outside the Civil Service act.

PUBLICATIONS OF THE COMMISSION.

Among the publications of the commission for free distribution are the following:

Manual of Examinations, giving places and dates of examinations, rules by which papers are rated, descriptions of examinations, specimen questions, and general information.

The Civil Service act and rules.

The Annual Reports of the commission, showing its work. These annual reports may be consulted at public libraries.

NATIONAL ASSOCIATION OF LETTER CARRIERS.

THE objects of the association are: First, to unite fraternally all letter carriers in the United States for their mutual benefit. Second, to obtain and secure rights as Government employés and to strive at all times to promote the welfare of every member. Third, to create and establish the United States Letter Carriers' Mutual Benefit Association, as defined in the Constitution and General Laws governing said association. Fourth, in conjunction with the Post-Office Department, to strive for the constant improvement of the service. Fifth, to create and establish the United States Letter Carriers' National Sick Benefit Association. The association has a membership of 35,000. The dues are $1.50 per annum.

President—Edward J. Gainor, Muncie, Ind. *Vice-President*—Al. Tharp, New York, N. Y. *Secretary*—Edward J. Cantwell, Washington, D. C. *Treasurer*—Charles D. Duffy, Chicago, Ill. Headquarters, 945 Pennsylvania Avenue, Washington, D. C.

CIVIL SERVICE RULES IN THE CITY OF NEW YORK.

SYNOPSIS of regulations governing the admission of persons into the civil service of the city of New York. Information may also be had by applying to the Secretary of the Municipal Civil Service Commission, Municipal Building, 14th floor.

Under the White Civil Service law, Chapter 370, Laws of 1899, April 19, the rules apply to all positions in the service of the city of New York except officers elected by the people, all legislative officers and employés, heads of any department, or superintendents, principals, or teachers in a public school, academy, or college. This requires "examinations, wherever practicable, to ascertain the fitness of applicants for appointment to the civil service of said city." The Constitution requires that these examinations shall be competitive, "so far as practicable."

APPLICATIONS.

Applications are received only for such positions and during such dates as advertised in the "City Record."

Applications of competitors for positions must be addressed to the "Secretary of the Municipal Civil Service Commission, New York City," and must set forth:

First—The affidavit of the applicant showing his age, whether a citizen of the United States, giving his place of residence, with the street and number thereof, if any; the place, nature, and extent of his education, and of his business training and experience, and stating whether he has ever been in the civil service of the city of New York, or in the military or naval service of the United States, and if so, when and where.

Second—A statement whether such application is limited to any particular office in the service.

Third—The certificate of four reputable persons of the city of New York, that they have been personally acquainted with the applicant for at least one year, and believe him to be of good moral character, of temperate and industrious habits, and in all respects fit for the service he wishes to enter, and that each of them is willing that such certificate should be published for public information, and will upon request give such further information concerning the applicant as he may possess.

In examinations for positions requiring experience, applicants must file with their application an experience paper. In some examinations applicants receiving less than the minimum passing mark on this paper are barred from the remainder of the examination.

Applicants for the following positions must, before being admitted to examination, present satisfactory evidence as to the following facts:

First—If the position to be filled be that of physician, surgeon, medical officer, medical superintendent, or medical inspector, that the applicant is duly authorized by the laws of the State of New York to practise medicine and surgery.

In positions where the duties are professional, technical, or expert, the candidates will be required to present evidences of the preliminary training or technical education they have undergone to qualify them for such situations before they can be admitted to examination.

In all examinations for professional positions, or positions requiring technical knowledge, no person shall be placed on the eligible list who obtains a rating in technical knowledge of less than 75.

CONDUCT OF EXAMINATIONS.

Applicants shall be admitted to examination upon the production of the official notification to appear for that purpose.

All paper upon which examinations are to be written shall be furnished to the applicants by the examining board and shall bear some suitable official indorsement, stamp, or mark, for the purpose of identifying the same.

All examinations shall be in writing, except such as refer to expertness or physical qualities, and except as herein otherwise provided.

The sheets of questions shall be numbered and shall be given out in the order of their numbers, each, after the first, being given only when the competitor has returned to the examiners the last sheet given to him. In general, no examination shall extend beyond five hours without intermission; and no questions given out at any session, to any candidate, shall be allowed to be answered at another session.

Each examiner shall exercise all due diligence to secure fairness and prevent all collusion and fraud in the examinations.

The time allowed for completing the examination shall be announced before the first paper is given out.

The following municipal departments and offices come under jurisdiction of Civil Service rules:

Accounts, Com. of.
Armory, Board of.
Assessors, Board of.
Bellevue and Allied Hospitals.

Inspectors of Elections and Poll Clerks are not subject to competitive examination.

THE PHILIPPINE GOVERNMENT.

(Officers appointed by the President.)

*Governor-General**—Francis Burton Harrison, $13,500. *Vice-Governor**—Henderson S. Martin, $9,450. *Secretary Finance and Justice**—Victorino Mapa, $9,450. *Secretary Commerce and Police**—Clinton L. Riggs, $9,450. *Secretary of the Interior**—Winfred T. Denison, $9,450. *Members of Philippine Commission*—Rafael Palma, Jaime C. de Veyra, Vicente Ilustre, and Vicente Singson Encarnacion, $6,750 each.

SUPREME COURT OF THE PHILIPPINE ISLANDS.

Chief Justice—Cayetano S. Arellano. *Associate Justices*—E. Finley Johnson, Florentino Torres, Adam C. Carson, Sherman Moreland, Grant T. Trent, and Manuel Araullo, $10,000 each.

* Also member of Philippine Commission, with additional salary of $4,500.

SEAMEN'S ACT.

An act to promote the welfare of American seamen in the merchant marine of the United States; to abolish arrest and imprisonment as a penalty for desertion and to secure the abrogation of treaty provisions in relation thereto; and to promote safety at sea. (Approved March 4, 1915.)

Copies of the act and circulars concerning its several sections, with regulations, will be issued from time to time by Department of Commerce in Washington, D. C., and may be had on application.

NATIONAL STATUARY HALL.

WORKS of art in the Capitol Building, Washington, have been acquired by gift from private individuals interested in the preservation of the historical, biographical, or pictorial art of the nation; by the gift from States, as instanced by the statues of distinguished citizens forming the collection in Statuary Hall, and by purchase by the Government. A general supervision of the art works of the Capitol is exercised by the Joint Committee on the Library. This committee also has charge of accessions to the art works of the Capitol Building, except as otherwise provided by law.

Statuary Hall, formerly the hall of the House of Representatives, was established as Statuary Hall by act of Congress of July 2, 1864. By this legislation a National Hall of Statuary was created, and the President was authorized to invite each State to contribute to the collection to be formed; two statues, in either marble or bronze, of deceased citizens of the State whom "for historic renown or from civil or military services" the State should consider as worthy of commemoration in this National Hall of Statuary.

The following is a list of statues presented by the States and the dates of the works:

STATE.	Name.	Date.	STATE.	Name.	Date.
Alabama	J. L. M. Curry	1906	New Hampshire	John Stark	1894

REGENTS' EXAMINATIONS IN NEW YORK STATE IN 1916.

REGENTS' EXAMINATIONS under the control of the University of the State of New York (office, Albany, N. Y.) will be held in 1916 at the following times and places: Jan. 17-21, inclusive, at New York, and about 900 academies and high schools; June 19-23, inclusive, at New York, and about 900 academies and high schools. Examinations for teachers' certificates are held on the same dates as the Regents', and August 7-11, Sept. 11-13, inclusive, at New York, Albany, Syracuse, Buffalo; 33 subjects. September examinations are for professional and technical students only. Morning session begins 9.15 o'clock. Afternoon session begins 1.15 o'clock. For conditions governing examinations, see WORLD ALMANAC for 1913, page 161.

UNIVERSITY CREDENTIALS—Preliminary (preacademic) certificate—Reading, writing, spelling, elementary English, arithmetic, geography, and elementary United States history with civics. Students from countries where English is not the mother tongue must pass an examination in second year English for any one of the professional certificates.

LAW, MEDICINE, DENTISTRY, ETC.—Entry counts qualifying certificate. All candidates taking Regents' examinations for qualifying certificates in law, dentistry, veterinary science, for admission to examination for certified public accountant, and for certified shorthand reporter, must earn counts upon examination as follows:

English, three years, 10 counts; elementary algebra, 5 counts, plane geometry, 5 counts; physics and chemistry, 10 counts, or physics and biology, 10 counts, or chemistry and biology, 10 counts (for a medical student certificate, physics, chemistry and biology, 15 counts); any second year foreign language, 10 counts; American history with civics, 5 counts; electives, 15 counts (for a medical student certificate, 10 counts).

The electives shall be: English fourth year, 3 counts; Latin second year, or Greek second year, or French second year, or German second year, or Spanish second year, or Italian second year, or Hebrew second year, 10 counts; advanced algebra, 5 counts; advanced arithmetic, 2 counts; physical geography, 5 counts; ancient history, 5 counts; *history of Great Britain and Ireland, 5 counts; *modern history 1, 3 counts; *modern history 2, 3 counts; economics, 2 counts; elementary bookkeeping and business practice, 3 counts; advanced bookkeeping and office practice, 5 counts; shorthand 1, 5 counts; shorthand 2, 5 counts; †elementary representation, 2 counts; †advanced design, 2 counts; †advanced representation, 2 counts.

PROFESSIONAL CERTIFICATES WITHOUT EXAMINATION—Candidates having credentials which can be accepted in place of examinations should send them to the University of the State of New York.

MEDICAL EXAMINATIONS—Examinations for license to practise medicine in this State will be held as follows: Jan. 25-28, May 16-19, June 27-30, September 19-22, at New York, Albany, Syracuse, and Buffalo. (Each candidate is notified as to exact place.)

PHARMACY AND DRUGGIST EXAMINATIONS—Jan. 26-27, May 17-18, June 28-29, September 20-21.

CHIROPODY EXAMINATIONS—Dates and places of examinations same as Medical Examinations.

DENTAL EXAMINATIONS—Dates and places of examinations same as Medical Examinations shown above, except that no examination is given in May. The practical examination is held on the Saturday morning following the regular examinations.

VETERINARY EXAMINATIONS—Dates and places of examinations same as Medical Examinations shown above.

CERTIFIED PUBLIC ACCOUNTANTS—Dates of examinations: Jan. 25-27, June 27-29, at New York, Albany, Syracuse, and Buffalo.

CERTIFIED SHORTHAND REPORTERS—Examinations on the first two days of the other regular professional examinations, when there are applicants, in January and June of each year.

REGISTRATION OF NURSES—Two examinations will be held annually in January and June respectively. Applications should be made at least ten days in advance to the University of the State of New York, Examination Division, Albany, N. Y. Dates: Jan. 25-27, June 27-29, at New York, Albany, Syracuse, and Buffalo. (Each candidate is notified as to exact place.)

OPTOMETRY EXAMINATIONS—Examinations Jan. 25-27, June 27-29, Sept. 19-21. (Each candidate is notified as to exact place.) Application should be made at least one week in advance to the University of the State of New York, Examination Division, Albany, N. Y.

*Candidates who have credit in history of Great Britain and Ireland (3 or 5) may receiwe credit for modern history 2 but not for modern history 1. Candidates who have credit in European history may not have credit in modern history 1 or 2.

†Candidates who have credit in elementary drawing based on the 1905 syllabus will receive no additional counts for passing elementary representation, but will receive two counts for passing advanced design and two counts for passing advanced representation. Candidates who have credit for advanced drawing general based on the 1905 syllabus can obtain no additional counts in drawing.

PROSECUTION OF TRUSTS BY THE UNITED STATES.

THE following is the status on October 1, 1915, of the cases brought by the United States under the terms of the Sherman Anti-Trust act:

United States vs. Great Lakes Towing Company et al.—Petition filed June 19, 1910, in the Circuit Court, Northern District of Ohio, against an alleged combination of towing facilities on the Great Lakes. A decision in favor of the Government was handed down February 11, 1913. Final decree entered February 13, 1915, from which the Government has appealed to the Supreme Court.

United States vs. American Sugar Refining Company et al.—Petition filed November 28, 1910, in the Circuit Court, Southern District of New York, alleging a combination in restraint of trade and praying for its dissolution. Demurrer was overruled December 11, 1911. Taking of testimony formally closed April 3, 1915. After argument of motion to have case set for hearing, the Court fixed the first Monday in October, 1915.

United States vs. Hamburg-Amerikanische Packetfahrt Actien Gesellschaft and others—Petition filed January 4, 1911, in the Circuit Court for the Southern District of New York, to dissolve a combination of steamship lines regulating steerage traffic on the Atlantic Ocean. Demurrers were overruled December 20, 1911. The case was argued in April, 1914, and a decision adverse to the Government was handed down on October 13, 1914. The Government has appealed to the Supreme Court. Set for argument October 12, 1915.

United States vs. Edward E. Hartwick et al.—Petition filed August 31, 1911, in the Circuit Court, Eastern District of Michigan, alleging conspiracy and unlawful restraint of trade on the part of members of the Michigan Retail Lumber Dealers' Association, The Scout Publishing Company, and the Lumber Secretaries' Bureau of Information. Issues joined and taking of testimony completed. Trial deferred, awaiting decision in case against Hollis and others.

United States vs. The Colorado and Wyoming Lumber Dealers' Association and The Lumber Secretaries' Bureau of Information—Petition filed September 25, 1911, in the Circuit Court, District of Colorado, for injunction against defendants for conspiracy to restrain trade in lumber and its products. The taking of testimony has been completed. Trial deferred, awaiting decision in case against Hollis et al.

United States vs. Willard G. Hollis et al.—Petition in equity filed October, 1911, in the Circuit Court, District of Minnesota, against the Lumber Secretaries' Bureau of Information, the Lumberman Publishing Company and certain individuals, alleging conspiracy and combination in the lumber trade. The taking of testimony has been completed. Case argued in December, 1914, and decision of Supreme Court awaited.

United States vs. United States Steel Corporation and others—Petition filed October 27, 1911, in District Court for District of New Jersey, alleging a combination in restraint of interstate commerce in iron and steel and their products and an attempt to monopolize the same. Taking of testimony completed. Case argued before the Circuit Judges in October, 1914. Decision adverse to Government handed down June 3, 1915. Decree dismissing petition entered September 10, 1915, from which the Government will appeal to the Supreme Court.

United States vs. National Cash Register Company et al.—Petition filed December 4, 1911, in Circuit Court, Southern District of Ohio, alleging conspiracy and monopoly in the manufacture, sale and shipment of cash registers and other registering devices. Issue joined and taking of testimony pending. Delay due to prosecution of criminal case against Patterson et al.

United States vs. United Shoe Machinery Company et al.—Petition in equity filed December 12, 1911, in Circuit Court, District of Massachusetts, alleging combinations and conspiracies in restraint of interstate and foreign trade in shoe machinery, and praying for perpetual restraining order, dissolution of company and restoration of normal conditions. Taking of testimony completed. Case argued in June, 1914. Decision adverse to the Government and dismissing petition handed down March 18, 1915. Case appealed to Supreme Court.

United States vs. The Keystone Watch Case Company et al.—Petition filed December 20, 1911, in the Circuit Court, Eastern District of Pennsylvania, alleging unlawful contracts, combinations, and conspiracies to monopolize trade in filled watch cases and watches, and praying for a permanent decree ordering the dissolution of the company and enjoining defendants from further committing the unlawful acts complained of. Argued in June, 1914, and on January 2, 1915, a decision partly favorable and partly adverse to the contentions of the Government was handed down. Decree entered June 4, 1915, from which the Government will appeal to the Supreme Court.

United States vs. John H. Patterson et al.—Indictment returned February 22, 1912, in the Southern District of Ohio, against John H. Patterson, President, and 29 other officials and employés of the National Cash Register Company, alleging a conspiracy in restraint of interstate trade and commerce in cash registers, resulting in an unlawful monopoly of the industry. Demurrer overruled June 26, 1912. Trial resulted in a verdict of guilty as to 29 of the 30 defendants and fines aggregating $135,000 and jail sentences ranging from nine months to one year were imposed, from which the defendants appealed. In a decision handed down March 13, 1915, the Court of Appeals reversed the judgment of the lower court. The Government made application to the Supreme Court for a writ of certiorari, which was denied on June 14, 1915.

United States vs. American-Asiatic Steamship Company et al.—Petition in equity filed March 30, 1912, in Southern District of New York, charging defendants with combining and conspiring, entering into unlawful contracts and pooling agreements, and allowing rebates, for the purpose of securing a monopoly of the business of transporting freight between ports on the Atlantic Coast of the United States and ports in the Philippine Islands, Japan, China, and the Far East. Issue joined. Taking of testimony completed. A decision in the main adverse to the contentions of the Government was handed down on February 3, 1915. The Government has appealed to the Supreme Court.

United States vs. International Harvester Company et al.—Petition filed April 30, 1912, in the District Court, District of Minnesota, alleging the acquisition and maintenance of a monopoly in harvesting and agricultural machinery and implements and twine. Testimony taken, expediting certificate filed, and case argued before three Circuit Judges at St. Paul during November, 1913. Decision favorable to the Government filed August 12, 1914. The defendants appealed to the Supreme Court, where the case was argued during the early part of April, 1915. June 2, 1915, restored to docket for re-argument at Fall term of court, 1915.

United States vs. Prince Line (Limited) et al.—Petition filed June 5, 1912, in the District Court, Southern District of New York, charging defendants, as common carriers of freight and passengers, between ports of the United States and ports in the Republic of Brazil, with acquiring and maintaining a substantial monopoly by means of contracts, rebates, and other unlawful acts, and praying for an annulment of said contracts and agreements. Issue joined and taking of testimony completed. A decision in the main adverse to the contentions of the Government was handed down on February 3, 1915. The Government has appealed to the Supreme Court.

United States vs. Associated Billposters and Distributors of the United States and Canada et al.—Petition filed August 3, 1912, in the District Court, Northern District of Illinois, charging defendants with engaging in a combination and conspiracy to place unlawful restraints upon inter-

PROSECUTION OF TRUSTS BY THE UNITED STATES—*Continued.*

state and foreign trade and commerce in posters. Demurrer overruled. Trial completed in July, 1915, and the decision of the Court is awaited.

United States vs. Motion Picture Patents Company et al.—Petition filed August 15, 1912, in the District Court, Eastern District of Pennsylvania, to remove the restraints which defendants have imposed upon interstate and foreign trade and commerce in machines, appliances, and apparatus relating to the motion-picture art, and upon persons engaged in such trade and commerce. The taking of testimony completed. Case argued in December, 1914, and a decision is awaited.

United States vs. Kellogg Toasted Corn Flake Company et al.—Petition filed December 26, 1912, in the Eastern District of Michigan, alleging that the business policy of the defendant company in fixing and enforcing resale prices on Kellogg's Toasted Corn Flakes is unlawful and tends to restrain and monopolize interstate commerce in said product. The defendants filed a motion to strike out and dismiss, and the Government filed a motion to amend. The several motions were argued in July, 1914, and a decision favorable to the Government was handed down April 14, 1915. The department is not advised as to whether the defendants will appeal.

United States vs. United Shoe Machinery Company of New Jersey et al.—Petition filed February 8, 1913, in the District Court at Trenton, N. J., seeking to have annulled an alleged unlawful contract involving "inseam trimming machines." Pending.

United States vs. Board of Trade of the city of Chicago et al.—Petition filed February 11, 1913, in the District Court at Chicago, Ill., attacking rule 33 of the Chicago Board of Trade, by virtue of which it is alleged the price of all corn, oats, wheat, and rye arriving in Chicago at times when the Board of Trade is not in session is arbitrarily determined. Motion to strike out certain portions of defendants' answer has been granted. Argued in January, 1915. Decided in favor of the Government September 8, 1915, and the form of decree to be entered is now under consideration.

United States vs. The Cleveland Stone Company et al.—Petition filed February 12, 1913, in the District Court at Cleveland, Northern District of Ohio, charging defendants with establishing and maintaining a practical monopoly of the stone business. Case awaiting trial.

United States vs. The Delaware, Lackawanna and Western Railroad Company and The Delaware, Lackawanna and Western Coal Company—Petition filed February 13, 1913, in the District Court at Trenton, N. J., charging defendants with transporting coal in which it had an interest in violation of the commodities clause of the Interstate Commerce act, and with entering into an unlawful contract whereby the coal company acquired a monopoly of the sale of anthracite coal produced along the line of the railroad company, in violation of the Anti-Trust act. Taking of testimony completed. Argued in January, 1914, and a decision adverse to the Government was handed down April 7, 1914. The Government appealed to the Supreme Court and the case was argued in December, 1914. Decided in favor of Government June 21, 1915. Final decree entered August 11, 1915.

United States vs. Corn Products Refining Company et al.—Petition filed March 1, 1913, in the District Court at New York City, charging defendants with monopolizing interstate trade and commerce in corn products, and praying for the dissolution of the combination. Issue joined, and taking of testimony is in progress

PRESIDENT WILSON'S ADMINISTRATION, MARCH 4, 1913.

United States vs Eastman Kodak Company et al.—Petition filed June 9, 1913, in the District Court at Buffalo, Western District of New York, alleging that defendants have acquired a monopoly of the business of manufacturing, selling, and distributing photographic supplies. Issue joined Taking of testimony completed and case tried at Buffalo in May, 1915. Decision favorable to the Government handed down August 24, 1915.

United States vs The Quaker Oats Company et al.—Petition filed June 11, 1913, in the District Court at Chicago, Ill., alleging combination to restrain and monopolize interstate trade and commerce in oatmeal products and by-products. Issue joined. Taking of testimony is in progress.

United States vs. Reading Company et al. (anthracite coal combination)—Petition in equity filed September 2, 1913, in the District Court at Philadelphia, Pa., against a combination consisting of Reading Company and affiliated corporations, charging it with restraining and monopolizing trade in anthracite coal. Issue joined. Taking of testimony completed. Case argued in June, 1914. Decided adversely to the Government July 3, 1915.

United States vs. American Can Company et al.—Petition filed November 29, 1913, in the District Court at Baltimore, Md., alleging monopolization of the business of making tin cans. Taking of testimony completed and case awaiting trial.

United States vs. Southern Pacific Company, Central Pacific Railway Company et al.—Petition in equity filed February 11, 1914, in the District Court at Salt Lake City, Utah, to compel the Southern Pacific to relinquish its control of the Central Pacific. Taking of testimony completed. Case set for trial in December, 1915.

United States vs. Lehigh Valley Railroad Company et al.—Petition filed March 18, 1914, in the District Court at New York City, charging the defendants with having monopolized the production, transportation, and sale of anthracite coal from mines tributary to Lehigh Valley Railroad Company in violation of the Anti-Trust act, and charging the said railroad company with transporting in interstate commerce coal in which it has an interest, in violation of the commodity clause of the act to regulate commerce. Argued in November, 1914. Opinion adverse to Government and dismissing petition handed down December 21, 1914. The Government has appealed to the Supreme Court.

United States vs. Knauer et al.—Indictment returned June 4, 1914, at Des Moines, Southern District of Iowa, charging defendants with having entered into a combination in restraint of trade in plumbing supplies. Motion to quash and demurrer overruled November 25, 1914. Trial commenced February 10, 1915, and verdict of guilty returned February 24, 1915. Four defendants fined amounts aggregating $3,000, and writ of error granted as to them. Case to stand on motion for new trial as to thirty-one defendants pending decision on writ of error by Court of Appeals.

United States vs. Booth Fisheries Company et al.—Indictment returned July 20, 1914, in the District Court at Seattle, Wash., charging defendants with entering into a combination and conspiracy in restraint of interstate trade and commerce in fresh fish. Pending.

United States vs. Western Cantaloupe Exchange et al.—Indictment returned August 7, 1914, in the District Court at Chicago, Northern District of Illinois, charging defendants with having entered into a combination to restrain and monopolize interstate trade in cantaloupes. Pending.

United States vs. Collins et al.—Indictment returned September 4, 1914, in the Supreme Court of the District of Columbia, against thirty-one commission merchants, charging them with engaging in a combination to fix arbitrarily and without competition the prices at which country produce is dealt in in the District of Columbia. Argued on demurrer during December, 1914. Demurrer overruled and case awaiting trial

United States vs. McCoach et al.—Indictment returned October 5, 1914, in the District Court at Pittsburgh, Western District of Pennsylvania, against thirty-three individuals, each a master plumber and retail dealer in plumbing supplies, charging them with entering into a combination to secure monopoly of the business of selling and installing plumbing supplies. Awaiting trial.

PROSECUTION OF TRUSTS BY THE UNITED STATES —*Continued.*

United States vs. Irving et al.—Indictment returned October 31, 1914, in the District Court at Salt Lake City, District of Utah, against fourteen individuals, each a master plumber and retail dealer in plumbing supplies, charging them with entering into a combination to secure a monopoly of the business of selling and installing plumbing supplies. Argued on demurrer in January, 1915. Demurrer overruled and motion to quash denied January 25, 1915. Awaiting trial.

United States vs. William Rockefeller et al.—Indictment returned November 2, 1914, in the District Court at New York, Southern District of New York, against twenty-one individuals, each at some time a director or officer, or both, of the New York, New Haven and Hartford Railroad Company, charging them with conspiring to monopolize the transportation facilities of New England. Numerous demurrers and pleas in abatement argued. Superseding indictments returned February 26, 1915.

United States vs. Carl C. King et al.—Indictment returned March 4, 1915, in the District Court at Boston, Mass., charging defendants (Aroostook Potato Shippers' Association) with entering into a conspiracy in restraint of trade in potatoes. Pending on demurrer.

United States vs. Isaac E. Chapman, William L. Chapman, and Merritt & Chapman Derrick and Wrecking Company—Indictment returned January 27, 1915, in the District Court, Southern District of New York, charging a combination and conspiracy to monopolize interstate trade and commerce in the derrick, lighterage, and wrecking business in New York Harbor and its environs and along the Atlantic Coast of the United States. Demurrer sustained April 13, 1915.

NATIONAL SECURITY LEAGUE

CONVINCED that something should be done to arouse the public to a realization of our unpreparedness a group of prominent citizens of New York decided to call a public meeting for the purpose of devising the best means of placing before the people the facts concerning the condition of our defences.

The meeting was held in New York, December 1, 1914, in response to a call issued by S. Stanwood Menken, Herbert Barry, George Haven Putnam, Lawrence F. Abbott, J. Mayhew Wainwright, Charles E. Lydecker and Franklin Q. Brown. Ways and means of bringing home to the people the lessons of the European War and a realization of our own defencelessness were discussed, and it was decided to organize a new league on grounds broad enough to embrace all branches of our military establishment and on strictly non-political and non-partisan lines. Officers were elected and resolutions were adopted defining the purpose of the league as follows:

"*Whereas*, It has been the general policy of our Government to avoid entering into entangling alliances or international relations that would be likely to involve war responsibilities; and, with a natural reliance upon our geographical position and the well tested courage and public spirit of our citizens to rest the defence of the country upon a minimum of military and naval forces and upon the calculation that it should prove possible in an emergency to bring into organization with sufficient promptness a citizens' defensive force; and

"*Whereas*, It is the opinion of the citizens here assembled that, under the changed conditions of international relations, it may not be wise to continue to intrust our National defence to hurried emergency measures;

"*Now*, To the end that popular sentiment may be aroused and public opinion may be organized throughout the entire breadth of the land for the purpose of insuring the enactment by Congress and by other legislative bodies of the measures required for National security, and as the first step toward such general action, to procure a proper inquiry on the part of the Administration and of Congress, and to make preparations for whatever action the results of such inquiry may seem to render essential;

"*Resolved*. I. That we now constitute an association which shall be called "The National Security League."

"II. That a Committee of Fifty be appointed by the Chairman, with power to add to its members; to create an executive committee and such other committees as may be found advisable; to adopt suitable by-laws for the governance and for the extension of the league; to take steps to secure the creation of branch leagues or associated leagues throughout the United States, with a central body which shall have the general control of the business of the league; and to take all measures that may be found desirable for the purpose of maintaining the security of the Nation and for developing the opinion of our citizens in regard to the conditions on which National security must be based; and to secure such legislation as may be required for those patriotic purposes.

"III. To enroll in its membership, with such conditions as may be found advisable, all citizens who are in accord with the purposes and the work of this league."

The following principles were adopted: 1. There is no assurance that we will not again become involved in war. 2. That a peaceful policy, even when supported by treaties, is not a sufficient guarantee against war, and that the United States cannot safely intrust the maintenance of its institutions and nationality to them. 3. That until a workable plan for a world alliance has been evolved and agreed to by the principal nations with proper guarantees of good faith, the United States must maintain adequate military preparations for its defence. 4. That we are not adequately prepared to maintain our National policies. 5. That the present defenceless condition is due not only to the failure to follow the carefully considered plans of our naval and military advisers, but also to provide any reasonable measure for gradually putting such plans into practice.

In the first place, it is the purpose of the league to lay before the country the plans of defence which have been carefully and scientifically prepared by our military advisers—the General Staff of the Army and the General Board of the Navy—and which have been approved by the successive administrations of the War and Navy Departments; and then it is purposed to urge citizens to co-operate in insisting that Congress enact such legislation as may be necessary:

1. For correcting the present wasteful methods of military appropriations and disbursements.
2. For the adoption of a definite military policy.
3. For a stronger and better balanced navy.
4. For a larger standing army.
5. For a larger and better National Guard.
6. For the creation of an organized reserve for each branch of our military service.

Early in May, 1915, an open letter, signed by Messrs. Choate, Parker, Stimson, and Menken, was made public, calling upon the public to support the programme of the league. On June 14 and 15 a nation-wide congress was held, under the auspices of the league, in New York City. This congress was attended by delegates from more than twenty-five States, and speakers included the leading civilian experts of the country, and was attended by over 10,000 people.

The league has been incorporated under the laws of the State of New York, and the following officers chosen: *Honorary President*—Joseph H. Choate. *Honorary Vice-President*—Alton B. Parker. *President*—S. Stanwood Menken. *Secretary*—Herbert Barry. *Treasurer*—E. H. Clark. *Executive Secretary*—Henry L. West. Headquarters, 31 Pine Street, New York City.

THE SHERMAN LAW.

THE following is the text of the Sherman law concerning Trusts:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled:

SEC. 1. Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal. Every person who shall make any such contract, or engage in any such combination or conspiracy, shall be deemed guilty of a misdemeanor, and, on conviction thereof, shall be punished by a fine not exceeding $5,000, or by imprisonment not exceeding one year, or by both said punishments in the discretion of the Court.

SEC. 2. Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a misdemeanor, and on conviction thereof, shall be punished by fine not exceeding $5,000, or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the Court.

SEC. 3. Every contract, combination in form or trust or otherwise, or conspiracy, in restraint of trade or commerce in any Territory of the United States, or the District of Columbia, or in restraint of trade or commerce between any such Territory and another, or between any such Territory or Territories and State or States or the District of Columbia, or with foreign nations, or between the District of Columbia and any State or States or foreign nations, is hereby declared illegal. Every person who shall make any such contract, or engage in any such combination or conspiracy, shall be deemed guilty of a misdemeanor, and on conviction thereof, shall be punished by fine not exceeding $5,000, or by imprisonment not exceeding one year, or by both said punishments in the discretion of the Court.

SEC. 4. The several Circuit Courts of the United States are hereby invested with jurisdiction to prevent and restrain violations of this act; and it shall be the duty of the several District-Attorneys of the United States, in their respective districts, under the direction of the Attorney-General, to institute proceedings in equity to prevent and restrain such violations. Such proceedings may be by way of petition setting forth the case and praying that such violation shall be enjoined or otherwise prohibited. When the parties complained of shall have been duly notified of such petition the Court shall proceed, as soon as may be, to the hearing and determination of the case; and pending such petition and before final decree, the Court may at any time make such temporary restraining order or prohibition as shall be deemed just in the premises.

SEC. 5. Whenever it shall appear to the Court before which any proceeding under sec. 4 of this act may be pending, that the ends of justice require that other parties should be brought before the Court, the Court may cause them to be summoned, whether they reside in the district in which the Court is held or not; and subpoenas to that end may be served in any district by the marshal thereof.

SEC. 6. Any property owned under any contract or by any combination, or pursuant to any conspiracy (and being the subject thereof) mentioned in sec. 1 of this act, and being in the course of transportation from one State to another, or to a foreign country, shall be forfeited to the United States, and may be seized and condemned by like proceedings as those provided by law for the forfeiture, seizure and condemnation of property imported into the United States contrary to law.

SEC. 7. Any person who shall be injured in his business or property by any other person or corporation by reason of anything forbidden or declared to be unlawful by this act may sue therefor in any Circuit Court of the United States in the district in which the defendant resides or is found, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the costs of suit, including a reasonable attorney's fee.

SEC. 8. That the word "person" or "persons" wherever used in this act shall be deemed to include corporations and associations existing under or authorized by the laws of either the United States, the laws of any of the Territories, the laws of any State or the laws of any foreign country.

Approved July 2, 1890.

NOTE—Two or more sections of the Clayton Trust bill (of 1914) amend the Sherman law; the other sections of the bill, as well as sec. 5 of the Federal Trade Commission law, are supplemental to the Sherman act.

FEDERAL TRADE COMMISSION.

Chairman—Joseph E. Davies, Wisconsin. *Vice-Chairman*—Edward N. Hurley, Illinois; William J. Harris, Georgia; Will H. Parry, Washington; George Rublee, New Hampshire. *Secretary*——————.

THE Federal Trade Commission is composed of five Commissioners appointed by the President. Not more than three of the Commissioners can be members of the same political party. The first Commissioners appointed continue in office for terms of three, four, five, six, and seven years respectively, the term of each to be designated by the President, but their successors will be appointed for terms of seven years, except that any person chosen to fill a vacancy shall be appointed only for the unexpired term of the Commissioner whom he shall succeed, and no Commissioner shall engage in any other business, vocation, or employment. A vacancy in the commission does not impair the right of the remaining Commissioners to exercise all the powers of the commission. The Commissioners receive a salary of $10,000 a year, and the secretary $5,000.

SEC. 3 provides: That upon the organization of the commission and election of its Chairman, the Bureau of Corporations and the offices of Commissioner and Deputy Commissioner of Corporations cease to exist; and all pending investigations and proceedings of the Bureau of Corporations are continued by the commission.

The principal office of the commission is in Washington, but it may meet and exercise all its powers at any other place. The commission may, by one or more of its members, or by such examiners as it may designate, prosecute any inquiry necessary to its duties in any part of the United States.

SEC. 5 provides: That unfair methods of competition in commerce are declared unlawful. The commission is empowered and directed to prevent persons, partnerships, or corporations, except banks, and common carriers subject to the acts to regulate commerce, from using unfair methods of competition in commerce.

Whenever the commission shall have reason to believe that any such person, partnership, or corporation has been or is using any unfair method of competition in commerce, and if it shall appear to the commission that a proceeding by it in respect thereof would be to the interest of the public, it shall issue and serve upon such person, partnership, or corporation a complaint stating its charges in that respect, and containing a notice of a hearing upon a day and at a place therein fixed at least thirty days after the service of said complaint. The person, partnership, or corporation so complained of shall have the right to appear at the place and time so fixed and show cause why an order should not be entered by the commission requiring such person, partnership, or corporation to cease and desist from the violation of the law so charged in said complaint. Any person, partnership, or corporation may make application, and upon good cause shown may be allowed by the commission, to intervene and appear in said proceeding by counsel or in person. The testimony in any such

FEDERAL TRADE COMMISSION—*Continued.*

proceeding shall be reduced to writing and filed in the office of the commission. If upon such hearing the commission shall be of the opinion that the method of competition in question is prohibited by this act, it shall make a report in writing in which it shall state its findings as to the facts and shall issue and cause to be served on such person, partnership, or corporation an order requiring such person, partnership, or corporation to cease and desist from using such method of competition. Until a transcript of the record in such hearing shall have been filed in a Circuit Court of Appeals of the United States, as hereinafter provided, the commission may at any time, upon such notice and in such manner as it shall deem proper, modify or set aside, in whole or in part, any report or any order made or issued by it under this section.

If such person, partnership, or corporation fails or neglects to obey such order of the commission while the same is in effect, the commission may apply to the Circuit Court of Appeals of the United States, within any circuit where the method of competition in question was used or where such person, partnership, or corporation resides or carries on business, for the enforcement of its order, and shall certify and file with its application a transcript of the entire record in the proceeding, including all the testimony taken and the report and order of the commission. Upon such filing of the application and transcript the court shall cause notice thereof to be served upon such person, partnership, or corporation and thereupon shall have jurisdiction of the proceeding and of the question determined therein, and shall have power to make and enter upon the pleadings, testimony, and proceedings set forth in such transcript a decree affirming, modifying, or setting aside the order of the commission. The findings of the commission as to the facts, if supported by testimony, shall be conclusive.

SEC. 6 provides: To investigate, from time to time, trade conditions in and with foreign countries where associations, combinations, or practices of manufacturers, merchants, or traders, or other conditions, may affect the foreign trade of the United States, and to report to Congress thereon, with such recommendations as it deems advisable.

SEC. 10 Any person who shall neglect or refuse to attend and testify, or to answer any lawful inquiry or to produce documentary evidence, if in his power to do so, in obedience to the subpoena or lawful requirement of the commission, shall be guilty of an offence and upon conviction thereof by a court of competent jurisdiction shall be punished by a fine of not less than $1,000 nor more than $5,000, or by imprisonment for not more than one year, or by both such fine and imprisonment.

SEC. 11. Nothing in this act, approved September 26, 1914, shall be construed to prevent or interfere with the enforcement of the provisions of the Anti-Trust acts or the acts to regulate commerce, nor shall anything contained in the act be construed to alter, modify, or repeal the said Anti-Trust acts or the acts to regulate commerce or any part or parts thereof.

The commission is authorized to enforce compliance with sections 2, 3, 7, and 8 of the act approved October 15, 1914 (the Clayton act, as printed in vol. 1915 of THE WORLD ALMANAC), by persons and corporations respectively subject thereto, except common carriers, banks, banking associations, and trust companies.

THE PILGRIMS.

THE Pilgrims was organized in London during coronation year, 1902. It was born of a desire on the part of a few Anglo-Americans, who foregathered in London at that time, to have a society that would stand for the promotion of good fellowship and friendship between Britons and Americans as individuals.

The British Pilgrims has a membership of 400. The American Pilgrims was organized in 1903 and has a membership of 600, which is the limit specified in the rules. There is a long waiting list of applicants.

The society takes no part in politics or affairs of state or church, but simply and solely the cementing of friendship between citizens of the United States and its dependencies and the subjects of the British Empire. It exists for the one purpose of fostering by social means a friendly understanding between the people of the United States and those of Great Britain, and to bring distinguished visitors from Great Britain into contact with leading citizens of New York and the most eminent men of the country.

The citizens of the United States and its dependencies and subjects of the British Empire, and others prominent for their sympathy with the objects of the society, are eligible for membership, and membership in one society *ipso facto* constitutes membership in the other.

The officers and Executive Committee of the Pilgrims of Great Britain are as follows:

President——————.

Vice-Presidents—The Archbishop of Canterbury; Field-Marshal Lord Grenfell, G. C. B.; Admiral the Hon. Sir Hedworth Lambton Meux, K. C. V. O.

Honorary Treasurer—J. Wilson Taylor.

Honorary Secretary—Harry E. V. Brittain, M. A.

Executive Committee—Harry E. V. Brittain, M. A., Chairman.

Lord Alverstone, G. C., M. G.
J. Arthur Barratt.
Admiral Lord Charles Beresford, G. C. B., G. C. V. O.
Harry E. V. Brittain.
The Archbishop of Canterbury.
Robert M. Collins.
Viscount Deerhurst.
Rt. Hon. Sir Henry Mortimer Durand, G. C., M. G.
Lord Fairfax of Cameron.
Field-Marshal Lord Grenfell, G. C. B.
Col. Sir Thomas Holdich, K. C., M.G., K. C. I. E., C. B.
Hon. Kenneth Kinnaird.
Irwin Boyle Laughlin.
H. C. Levis.
James McDonald.
Admiral the Hon. Sir Hedworth Lambton Meux, K. C. V. O.
J. Wilson Taylor.
Joseph Temperley.

The officers and Executive Committee of the Pilgrims of the United States are as follows:

President—Joseph H. Choate.

Vice-Presidents—Chauncey M. Depew; Admiral Lord Charles Beresford, G. C. B., G. C. V. O.; Nicholas Murray Butler; F. Cunliffe-Owen; George T. Wilson.

Treasurer—Wm. Curtis Demorest, 60 Liberty Street, New York.

Secretary—George W. Burleigh, 52 Wall Street, New York.

Executive Committee—George T. Wilson, Chairman, 120 Broadway, New York.

Admiral Lord Charles Beresford, G. C. B., G. C. V. O.
George W. Burleigh.
Nicholas Murray Butler.
William Allen Butler.
Joseph H. Choate.
E. F. Darrell.
Wm. Curtis Demorest.
Chauncey M. Depew.
R. H. Ewart.
Samuel W. Fairchild.
Lawrence L. Gillespie.
Rt. Rev. David H. Greer, D. D.
John W. Griggs.
Louis C. Hay.
A. Barton Hepburn.
Rev. W. T. Manning, D. D.
Herbert Noble.
F. Cunliffe-Owen.
Alton B. Parker.

FUNNEL MARKS AND NIGHT SIGNALS OF TRANSATLANTIC LINES.

Lines.	Funnel Marks.	Night Signals.
American	Black, white band, black top	Blue light forward, red light amidships and blue light aft.
Cunard	Red, with black rings and black top	Blue light and two roman candles, each throwing out six blue balls.
French	Red, with black top	Blue light forward, white light amidships, and red light aft.
Hamburg-Amer.	Express service, buff; regular, black	Two red-white-blue lights, in quick succession, at stern.
Holland-Amer.	Green, white, green	Green light forward, white light centre, green light aft.
Nor. Ger. Lloyd	Buff	Two blue-red lights, one forward, one aft.
White Star	Buff, with black top	Two green lights simultaneously.

S O S, a signal used in case of accident at sea by vessels fitted with wireless equipment. Means suspend other service.

FASTEST ATLANTIC OCEAN PASSAGES.

Route	Steamer.	Line.	Date.	D.	H.	M.
Queenstown to New York	Mauretania	Cunard	Sept. 11-15, 1910	4	10	41
New York to Queenstown	Mauretania	Cunard	Sept. 15-20, 1909	4	13	41

New York to Southampton	Kaiser Wilh. d. Gr'se	No. Germ. Lloyd.	Nov. 23-29, 1897	5	17	8
New York to Havre	France	French	Aug. 22-28, 1912	5	17	..
New York to Cherbourg	Kaiser Wilh. d. Gr'se.	No. Germ. Lloyd.	Jan. 4-10, 1900	5	16	..
New York to Plymouth	Kronprinz. Cecilie	No. Germ. Lloyd.	Sept. 14-20, 1909	5	7	25
New York to Naples	Deutschland	Hamburg-Am.	Jan. 20-28, 1904	7	16	44

The fastest day's run was made by the Mauretania of the Cunard line, January, 1911—676 knots, or 27 04 knots per hour

United States battleship speed record made by the Wyoming, July 19, 1912. On the twenty-first standardization run she made a speed of 22.045 knots. The torpedo boat destroyer McDougal broke all mile speed records for her type in standardization trials off Rockland, Me., in May, 1914. She ploughed the water at the rate of 32.07 knots an hour on her fastest mile. The average of her five full speed runs was 31.516 knots.

1905 record.—Allen line's turbine Steamer Virginian passed Cape Race June 13, 11 A. M., inward bound, having left Moville on the afternoon of June 9, thus crossing in less than four days.

On March 19, 1914, the freighter Santa Cruz (oil burner) steamed into San Francisco from New York via the Straits of Magellan. The distance is approximately 13,000 miles and the time consumed was 47 days and 4 hours.

Steamship development as shown in the relative proportions, speed, etc., of the Great Eastern and Vaterland:

Great Eastern.		Vaterland.	
Length	692 ft.	Length	950 ft.
Breadth	80 ft.	Breadth	100 ft.
Displacement	27,000 tons.	Displacement	65,000 tons.
Paddle, Screw and Sail: Speed	13 to 14 knots.	Quadruple Screws	24 knots.

THE RECORD-BREAKERS BETWEEN NEW YORK AND QUEENSTOWN—EAST OR WEST.

SHIP REGISTRY.

AN act to provide for the admission of foreign-built ships to American registry for the foreign trade, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the words "not more than five years old at the time they apply for registry" in section 5 of the act entitled "An act to provide for the opening, maintenance, protection, and operation of the Panama Canal and the sanitation and government of the Canal Zone," are hereby repealed.

SEC. 2. That the President of the United States is hereby authorized, whenever in his discretion the needs of foreign commerce may require, to suspend by order, so far and for such length of time as he may deem desirable, the provisions of law prescribing that all the watch officers of vessels of the United States registered for foreign trade shall be citizens of the United States.

Under like conditions, in like manner, and to like extent the President of the United States is also hereby authorized to suspend the provisions of the law requiring survey, inspection, and measurement by officers of the United States of foreign-built vessels admitted to American registry under this act.

SEC. 3. This act shall take effect immediately.

Approved, August 18, 1914.

IMMIGRATION INTO THE UNITED STATES

FOR FISCAL YEARS ENDED JUNE 30.

Year.	Total Immigrants.	Year.	Total Immigrants.	Year.	Total Immigrants.	Year.	Total Immigrants.
1900	448,572	1904	812,870	1908	782,870	1912	838,172
1901	487,918	1905	1,027,421	1909	751,786	1913	1,197,892
1902	648,743	1906	1,100,735	1910	1,041,570	1914	1,218,480
1903	857,046	1907	1,285,349	1911	878,587	1915	326,700

Total from 1820 to 1915, inclusive, 32,354,124. (For yearly totals from 1824 to 1899 see 1913 Almanac, page 185.) From 1789 to 1822, estimated, 266,038.

Of the whole number of immigrants in the fiscal year ending June 30, 1915, 178,416 came through the customs district of New York, 3,017 through Baltimore, 15,983 through Boston, 7,114 through Philadelphia, 8,055 through San Francisco, 86,668 through Canadian ports or border, and the balance through other ports.

The reported occupations of immigrants arriving during the fiscal year 1915 were as follows: Laborers, 48,351; servants, 39,774; farm laborers, 24,723; tailors, 5,221; merchants and dealers, 8,562; carpenters and joiners, 5,474; shoemakers, 1,736; clerks and accountants, 8,318; mariners, 3,346; miners, 2,931. The number of professional immigrants (including 1,126 actors, 1,494 engineers, 752 musicians, and 2,070 teachers) was 12,279; of skilled laborers, 55,638; other miscellaneous (including unskilled), 10,790; no occupation (including women and children), 116,940.

UNITED STATES BOARD OF MEDIATION AND CONCILIATION.

Commissioner—William L. Chambers. *Assistant Commissioner*—G. Wallace W. Hanger. *Members of Board*—William L. Chambers and Martin A. Knapp.

(Created by act of Congress, Approved July 15, 1913.)

The purpose for which the board was established is to settle by mediation, conciliation and arbitration all controversies concerning wages, hours of labor, or conditions of employment that may arise between any common carrier or carriers engaged in the transportation of passengers or property wholly by railroad, or partly by railroad and partly by water, for a continuous carriage or shipment from one State or Territory of the United States or the District of Columbia, to any other State or Territory of the United States or the District of Columbia, or from any place in the United States to an adjacent foreign country, or from any place in the United States through a foreign country to any other place in the United States, and their employés, which includes all persons actually engaged in any capacity in train operation or train service of any description, whether the cars upon or in which they are employed are owned or held and operated by the carrier under lease or other contract.

The Commissioner is appointed by the President for a term of seven years, salary $7,500, and is the executive officer of the board, which consists of the Commissioner and not more than two other officials of the Government, who are designated by the President. The Assistant Commissioner is appointed by the President, salary $5,000 per annum.

Since the organization of the board and up to September 20, 1915, forty-seven controversies between railroads and their employés engaged in train operation have reached the stage where an appeal for the services of the Board of Mediation and Conciliation was made. In all of these cases an adjustment of the controversy was secured by the board, thirty-nine cases having been settled by mediation alone, while eight were settled by arbitration.

NATIONAL ASSOCIATION OF CREDIT MEN.

The National Association of Credit Men has for its object the improving and safeguarding of the conditions under which credit is extended through the co-operation of its 18,300 members. It aims to secure the enactment of laws beneficial to the honest debtor and creditor. It strives for better mercantile agency service, the prevention of commercial fraud, the bettering of credit department methods, the dissemination of literature of general interest to credit men and the education of his customers in the use of the financial statement, observance of discount terms, etc.

The work is done through a number of standing committees appointed by the national organization, which work with the co-operation of similar committees appointed by one hundred and twelve affiliated branches. A number of the local branches operate bureaus for the exchange of credit information between their members, and bureaus for the friendly adjustment of insolvent estates.

President—H. S. Moore, Peoria, Ill. *First Vice-President*—Charles D. Joyce, Philadelphia, Pa. *Second Vice-President*—F. B. McComas, Los Angeles, Cal. *Secretary-Treasurer*—J. H. Tregoe, 41 Park Row, New York City.

* Report of Bureau of Fisheries. † Does not include the value of 2,735 seal skins taken in 1914, none of which have been sold to date. ‡ Estimated. (a) United States figures are for 1908; Alaska for 1914.

UNITED STATES BUREAU OF FISHERIES—DEPARTMENT OF COMMERCE.

The work of the Bureau of Fisheries comprises (1) the propagation of useful food fishes, including lobsters, oysters, and other shellfish, and their distribution to suitable waters; (2) the inquiry into the causes of decrease of food fishes in the lakes, rivers and coast waters of the United States, the study of the waters of the coast and interior in the interest of fish culture, and the investigation of the fishing grounds of the Atlantic, Gulf, and Pacific Coasts, with the view of determining their food resources and the development of the commercial fisheries; (3) the collection and compilation of the statistics of the fisheries and the study of their methods and relations. The bureau also has jurisdiction over the fur-seal herds and the salmon fisheries of Alaska. Office, Sixth and B Streets, Washington, D. C. The official force of the bureau is as follows: *Commissioner*—Hugh M. Smith. *Deputy Commissioner*—Henry F. Moore. *Chief Clerk*—I. H. Dunlap. *Chief, Division of Alaska Fisheries*——————. *Assistants in Charge of Division: Inquiry Respecting Food Fishes*—Robert E. Coker; *Fish Culture*, Robert S. Johnson; *Statistics and Methods*, A. B. Alexander. *Architect and Engineer*—Hector von Bayer.

UNITED STATES COAST GUARD.

HEADQUARTERS, TREASURY DEPARTMENT, WASHINGTON, D. C.

THE United States Coast Guard was created by the act of January 28, 1915, which provided that "There is hereby established in lieu of the existing Revenue Cutter Service and the Life-Saving Service, to be composed of those two existing organizations, the Coast Guard, which shall constitute a part of the military forces of the United States and which shall operate under the Treasury Department in time of peace, and operate as a part of the Navy, subject to the orders of the Secretary of the Navy, in time of war or when the President shall so direct." The original Revenue Cutter Service was organized by act of Congress approved August 4, 1790. The Life-Saving Service was originally operated under the Revenue Cutter Service, but on June 20, 1874, Congress created it a separate service to operate under the Treasury Department. The officers of the Coast Guard are on the same footing in rank and pay as officers of the Army and Navy. Appointments to cadetships are made after competitive examinations conducted by boards of commissioned officers of the Coast Guard. The cadets are educated at the Coast Guard Academy at New London, Ct. The course covers three years and embraces professional and academic subjects. Candidates for cadetships must not be less than 18 nor more than 24 years old, citizens of the United States, and unmarried. A class of cadets is appointed each year. Appointments as Cadet Engineers are made after competitive examinations conducted by boards of engineer officers of the Coast Guard. Candidates for Cadet Engineers must not be less than 20½ years of age and serve a probationary term of not less than one year before being commissioned Third Lieutenants of Engineers. No person can be commissioned Third Lieutenant of Engineers who is less than 21 or more than 26 years of age.

This branch of the Government is under the charge of Captain Commandant E. P. Bertholf; Senior Captain D. P. Foley is the Chief Inspector; Senior Captain Howard Emery is the Superintendent of Construction and Repair; Charles A. McAllister is Engineer-in-Chief; G. H. Slaybaugh, Chief of Division of Material, and O. M. Maxam, Chief of Division of Operations.

Seneca	1,445	Tompkinsville, N. Y.	4	Ossipee	908	Portland, Me.	4

The authorized personnel is 255 commissioned officers and 3,886 warrant officers, petty officers, and enlisted men.

The Coast Guard stations are divided into thirteen districts, embracing the Atlantic, Gulf, Great Lakes, and Pacific Coasts, including Alaska. There are 279 Coast Guard stations and houses of refuge. One station is at the Falls of the Ohio, near Louisville, Ky.

OPERATIONS OF THE COAST GUARD FOR THE FISCAL YEAR ENDED JUNE 30, 1915.

The beneficial work performed by the Coast Guard in the interests of the public covers a wide and diversified scope. Its principal functions are the saving of life and property from destruction on the seas, but there are many other lines of endeavor where its potentiality and activities are exerted which benefit mankind and which cannot be expressed statistically. The following tabulated statement of appraisable work performed during the past year will, however, give an idea of the accomplishments of this humanitarian branch of the Federal service:

Lives saved or persons rescued from peril	1,507
Persons on board vessels assisted	10,952
Persons in distress cared for	813
Vessels boarded and documents examined	24,817
Regattas and marine parades patrolled in accordance with law	37
Vessels to which assistance was rendered	1,504
Instances of miscellaneous assistance	556
Value of vessels assisted (including cargoes)	$10,927,730
Derelicts and obstructions to navigation removed or destroyed	26
Value of derelicts recovered and delivered to owners	$161,000
Total expenditure for maintenance of Coast Guard	$5,027,752.71

THE UNITED STATES LIGHTHOUSE SERVICE.

BUREAU of Lighthouses. Commissioner, George R. Putnam; Deputy Commissioner, John S. Conway; Chief Constructing Engineer, Horatio B Bowerman; Superintendent of Naval Construction, Edward C. Gillette; Chief Clerk, T. S. Clark.

The Lighthouse Service is charged with the establishment and maintenance of lighthouses, light-vessels, buoys, and other aids to navigation on the coasts and rivers of the United States, as authorized by Congress, and with the direction of the offices, depots and tenders required in this work.

The field work of the service is divided into nineteen districts, each in charge of an inspector.

UNITED STATES STEAMBOAT INSPECTION SERVICE.

THE Steamboat Inspection Service, by act of Congress approved February 14, 1903, was transferred from the Treasury Department to the Department of Commerce. The transfer went into effect July 1, 1903. The Supervising Inspector-General of the Steamboat Inspection Service, George Uhler, reported to the Secretary of Commerce for the fiscal year ended June 30, 1915: Number of annual certificates of inspection issued to domestic steam, motor, sail vessels, and barges, 7,232; number of certificates issued to foreign steamers, 321; total number of annual certificates of inspection issued to domestic and foreign, 7,553. Decrease in number of certificates to domestic vessels from previous year, 153; decrease in number of certificates to foreign vessels from previous year, 224; decrease in number of certificates of all kinds of vessels from previous year, 377. Gross tonnage of domestic vessels, all kinds, inspected, 5,612,031; gross tonnage of foreign steamers inspected, 2,111,008. Decrease in gross tonnage of foreign steam vessels inspected from previous year, 2,262,998. Increase in tonnage of all kinds domestic vessels inspected over previous year, 15,527. Number of officers' licenses issued, 18,412. Decrease in number of officers' licenses issued from previous year, 459. Number of new life-preservers inspected, 161,335, of which number 217 were rejected. Decrease in number of new life-preservers inspected from previous year, 13,997. Decrease in number of life-preservers rejected from previous year, 993. Number of marine boiler plates inspected at the mills by assistant inspectors, 2,962.

CAUSES.	Lives Lost.	CAUSES.	Lives Lost.
Fire	1	Accidental drowning	94
Collision	33	Suicides	37
Explosions and escape of steam	7	Miscellaneous	22
Wrecks	33		
Foundering in storm	118	Total	368
Sinking	23		

Number of accidents resulting in loss of life, 190, a decrease of 42 from previous year. Decrease in number of lives lost from previous year, 214. (During the year 307,348,008 passengers were carried on vessels that are required by law to report the number of passengers carried. Dividing this number by 107, the total number of passengers lost, shows that 2,872,411 passengers were carried for each passenger lost.)

NATIONAL WOMEN'S LIFE-SAVING LEAGUE.

ORGANIZED for work among women and children. Its purposes are: To encourage swimming by women and children; to co-operate with other organizations, whenever advisable, in the dissemination of knowledge on life saving from drowning and "first aid" to the injured; to encourage interest and promote efficiency in swimming and life saving by the holding of annual competitions for medals, prizes and the like; to encourage and advocate simplicity and rationalism in bathing and swimming costumes; to establish an athletic branch for the supervision of athletics, for women by women, in order to raise the dignity of such branch of outdoor sports so that all women may participate in the healthful and instructive exercises of swimming and life saving; to advocate the general adoption of swimming and life saving—rescue and resuscitation—as a branch of elementary education.

It conducts free classes of instruction in swimming, free competitions for the entertainment and benefit of its members, and public exhibition drills for the purpose of public instruction. The dues of the league are 50 cents a year, to cover postage and incidentals, bringing membership in the organization within the reach of all working women.

President—Katherine F. Mehrtens Thorman. *Vice-President*—E. Womsper Burns. *Treasurer*—Sarah L. Marrin. *Secretary*—Ara Ryan Hague. Headquarters, 25 Clinton Street, Brooklyn, N. Y.

AMERICAN TARIFF REFORM LEAGUE.

President—Isaac Lawrence, 15 East Ninetieth Street, New York City. *Vice-Presidents*—Wm. A. Clark, Herman Ridder, Claus A. Spreckels, Augustus Van Wyck. *Secretary-Treasurer*—Charles C. Hughes, 30 Church Street, New York City. *National Headquarters*—15 East Ninetieth Street, New York City.

UNITED STATES BUREAU OF WAR RISK INSURANCE.

(William C. De Lanoy, Director (Salary $5,000); J. B. B. Parker, Assistant Director. Headquarters, Treasury Department, Washington, D. C.)

THE Bureau of War Risk Insurance was created by Act of Congress September 2, 1914, to cover American ships and their cargoes against the risks of war. During the first year of its operation it has covered war risk insurance on many vessels and cargoes where the market was small, and without the assistance which was granted by the Bureau, many of these vessels could not have sailed.

On September 2, 1915, there had been issued 1,245 policies, covering $82,709,689 amount insured, and $2,004,695 premiums received. The bureau has been run very economically, the total expenses (for which an appropriation of $100,000 was made) for organizing, printing, stationery, salaries, etc., amounting to but $17,711. The losses paid aggregate $720,653, being for the Evelyn, Carib, Greenbrier, and William P. Frye. Salvage of $25,232 has been received for "Evelyn" cotton.

Owing to the exceptional hazards involved, the bureau will consider these ports only when application is made: All United Kingdom ports. All ports on the Continent of Europe other than Spanish or Portuguese ports. All ports of Asia Minor. All African ports in the Mediterranean Sea. All colonial possessions of Germany and Turkey. (Subject to change without notice.)

SUBMARINE CABLES OF THE WORLD.

(From report issued by the Bureau International de l'Union Telegraphique.)

THE following table sets forth the entire system of submarine cables of the world, including those along the shores and in the bays, gulfs, and estuaries of rivers, but excepting those in lakes and the interior watercourses of continents. The list includes all cables operated by private companies, and in addition thereto under the name of each nation is given the list of cables operated by the government of that nation.

COMPANIES.	Number of Cables.	Length of Cables in Nautical Miles.
Commercial Cable Co.	15	16,595
Transatlantic System—Waterville (Ireland) to Canso (Nova Scotia).		
Canso, N. S., to New York.		
Canso, N. S., to Rockport, Mass.		
Commercial Pacific Cable Co.	6	10,010
San Francisco to Manila.		
Manila to Shanghai.		
De l'ile de Peel (Bonins) à Guam.		
Commercial Cable Co. of Cuba	1	1,285
New York to Havana, Cuba.		
Western Union Telegraph Co.	27	23,508
Transatlantic Systems as follows:		
Western Union—Penzance, England, to Bay Roberts, N. F., and Canso, N. S., thence to Coney Island, New York.		
Anglo-American Telegraph Co.—Valentia (Ireland) to Heart's Content, N. F.		
Direct United States Cable Co.—Ballinskellig's Bay (Ireland) to Halifax, N. S., thence to Rye Beach, N. H.		
Gulf of Mexico System.		
Compagnie Francaise des Cables Telegraphiques	24	11,657
Brest (France) to Cape Cod, Mass.		
Brest (France) to St. Pierre-Miq.		
St. Pierre to Cape Cod, Mass.		
Cape Cod, Mass., to New York.		
San Domingo to Mayaguez, P. R.		
African Direct Telegraph Co.	9	3,025
Western Telegraph Co.	30	23,836
Carcavellos, near Lisbon (Portugal), to Madeira, to St. Vincent (Cape Verde Island), to Pernambuco, Rio de Janeiro, Santos, Montevideo, Fayal (Azores) to St. Vincent (Cape Verde Island). Ascension Island to Buenos Ayres.		
Central and South American Telegraph Co.	25	11,898
Compania Telegrafico-Telefonica del Plata	1	28
Cuba Submarine Telegraph Co.	10	1,143
Direct Spanish Telegraph Co.	4	711
Direct West India Cable Co.	2	1,263
Bermuda-Turk's Island, and Turk's Island-Jamaica.		
Eastern and South African Telegraph Co.	17	10,490
Eastern Extension Australasia and China Telegraph Co.	37	26,421
Eastern Telegraph Co.	107	46,790
Systems as follows:		
Anglo-Spanish-Portuguese; Italo-Greek; Austro-Greek; Greek; Turko-Greek; Turkish; Black Sea; Egypto-European; Egyptian; Egypto-Indian; Cape Town to St. Helena; St. Helena to Ascension Island; Ascension Island to St. Vincent; Natal-Australia.		
System West of Malta.		
Europe and Azores Telegraph Co.	2	1,056

TELEGRAPH RATES FROM NEW YORK CITY.

WESTERN UNION TELEGRAPH COMPANY RATES. SEE ALSO POSTAL TELEGRAPH-CABLE COMPANY RATES ON FOLLOWING PAGE.

DAY TELEGRAMS of 10 words or less, address and signature free, are transmitted immediately upon reception.

NIGHT TELEGRAMS of 10 words or less, address and signature free, are sent during the night at the convenience of the company.

Words over 10 in Day Telegrams and Night Telegrams are 2 cents each where rate is 25, 30, or 35 cents; 3 cents each where rate is 40 or 50 cents; 4 cents where rate is 60 cents; 5 cents where rate is 75 cents; 7 cents where rate is $1.00, and 8 cents where rate is $1.25.

NIGHT LETTERS of 50 words or less, address and signature free, filed before midnight are transmitted during the night and delivered the next morning at the same rate as that shown for "Day Telegrams of 10 words."

DAY LETTERS of 50 words or less, address and signature free, filed at any hour during the day, are transmitted and delivered subject to the priority of Day Telegrams. Rates for Day Letters are one-half higher than rates for Night Letters.

Words above 50 in Night Letters or Day Letters are one-fifth the 50-word rate for each additional 10 or fraction of 10 words.

TELEGRAPH RATES—*Continued.*

On January 1st, 1912, a reduced rate on cable messages in plain language, taken on a delay basis, was inaugurated, and is now in effect between most countries. Deferred cable messages must be written in plain language of the country of origin or destination, must bear the declaration LCO (language country of origin), LCD (language country of destination), or LCF (language country French, as an international language), and are subordinated to full-rate messages in the order of transmission until an accumulated delay of 19 hours has occurred, when they take their turn with fully paid traffic. The tariff is generally one-half the regular rate, but on deferred messages between the United States or Canada and the United Kingdom of Great Britain and Ireland the tariff is 3 cents less than half rates.

In December, 1911, the Western Union Telegraph Company inaugurated two new forms of cable service. These new services, known as cable letters and week-end letters, are the cable equivalent of night letters in the domestic telegraph service, in that they are predicated on the use of facilities that otherwise would be idle at night, and on delivery the following day. Unlike all other forms of cable service, the tolls on which invariably are charged on a word basis, cable and week-end letters are charged on a message basis. The minimum charge on cable letters is, for 13 words (including a necessary prefix), and in week-end letters for 25 words (including a necessary prefix). The tariff varies according to distance, but between New York City and London is 75 cents and $1.15 for cable and week-end letters respectively.

THE WESTERN UNION TELEGRAPH COMPANY.

Newcomb Carlton, President; Executive Offices, 195 Broadway, New York.

Capital stock outstanding, $99,786,758.96. Funded debt, $32,602,000. Capital stock in subsidiary companies not owned by Western Union, $3,878,175. Total capital liabilities, $136,265,933.96.

Annual report for fiscal year ending December 31, 1914: Gross income, $46,264,776.61; operating expenses and taxes, $40,578,750.90; net profits, $5,686,025.71; interest on bonds, $1,337,242.50; dividend (4%), $3,988,886.00; balance to surplus, $5,371,394.51; number of offices, 25,784; miles of wire, 1,581,571; ocean cables, 26,768.

* Partly estimated. † Estimated where necessary.

The independent telephone companies of the United States, which are owned and operated entirely apart from the Bell organization, are represented in the National Independent Telephone Association, with headquarters in the Colorado Building, Washington, D. C., and the Independent Telephone Association of America, with headquarters in Chicago. According to the United States Census of 1912, there were 1,740 independent telephone companies with over $5,000 annual income, and 2,239,721 stations. Many of these companies connect with the Bell system. The capital invested is approximately $300,824,000 and the income is about $48,950,000 per annum. The independent companies, which are for the most part financed in the territories which they cover, are particularly strong throughout the middle and far West. They are established in nearly every large city in the United States except those on the Atlantic Coast.

ELECTRICAL PROGRESS.

A REVIEW of the industry specially prepared for THE WORLD ALMANAC by Theodore Dwight of the Engineering Department of the Society for Electrical Development, Inc.

IN GENERAL.

To appreciate the rate of progress in the electrical field one needs to have a perspective. Hence, a brief review of striking advances during the fifteen years of the new century.

In 1900 the largest dynamo was of 4,600-kilowatt capacity—to-day 35,000-kilowatt, a 760% increase in size. A single dynamo of this size has a capacity of 1,750,000 16-candle power incandescent lamps of modern type. The improvement in maximum efficiency of incandescent lamps has increased 1,000%.

Hydro-electric power developed in the United States in 1900 totalled 150,000 kilowatts (200,000 horse-power); to-day 1,350,000 kilowatts (1,800,000 horse-power), a 900% increase. A stupendous saving of our coal resources.

Maximum distance transmitted in 1900—85 miles at 40,000 volts; now 245 miles at 150,000 volts pressure, an increase of 375% in voltage and 350% in distance.

In the field of transportation the advance has been extraordinary. New York in 1900 had just done away with steam locomotives on the elevated. In 1914 the street cars, elevated, and subways in Greater New York carried by means of electric traction 2,150,000,000 passengers and with such a degree of safety that it is now the practice of the accident insurance companies to pay double benefit in case of injury or death while riding on these cars, and this practice is based on the degree of risk and not on sentiment.

To handle this traffic large power plants were needed. As an example of progress, the Interborough Rapid Transit Company has found it good economy to replace the 5,000-kilowatt electric generating units installed only a short time before by new steam turbo-generators of 30,000-kilowatt capacity, occupying the same space as the former ones of one-sixth the power. This station has recently excelled all records in economy of water consumption, using only 11¼ pounds of water per kilowatt hour at bus bars. In small plants up to three times this consumption is not unusual.

As evidence of the reliability of electric traction service to-day can be cited the record of the New York, Westchester and Boston Railroad, a multiple unit electric car system with overhead trolley. In the operation of all trains on the system in 1914, 99.2% were on time—a record excelling that of any steam road.

The Waterside Plant, one of the stations of the New York Edison Company, which furnishes light and power in Manhattan, is of 215,000 kilowatts (286,000 horse-power capacity), and is now the largest steam plant in the world.

In the home, electricity, used formerly only for lighting, and then only to a limited extent, is now a recognized household servant. A recent partial canvass of the manufacturers of electrical devices used in the home shows that over eight million appliances have been purchased by the public in the last few years. Of this figure, over 3,000,000 represents electric flatirons, the other large items being toasters, coffee percolators, vacuum cleaners, washing machines, and fans. In the West there is a very extensive use of the electric range, notably in the smaller communities. At a rate of 5 cents per kilowatt hour and less, these compare favorably in economy with coal ranges, with added advantage of better cooking and great saving of labor.

Electricity has greatly changed the methods of warfare. The telegraph and telephone, both wire and wireless, the searchlight, the range finder are controlling factors. All gasoline driven engines for aeroplanes, hydroplanes, autos, and tractors used for transportation are dependent upon electricity for the ignition.

The submarine could not run submerged without the storage battery. Large modern guns are fired by an electrically heated wire set in a bed of guncotton in place of the old percussion cap, and are aimed by signals electrically transmitted from the fire control points, sometimes miles away.

NEW DEVELOPMENTS OF 1915.

Much of the electrical apparatus of to-day has reached such a high state of efficiency that there is left little room for improvement, and marked advance can only be expected by radical invention. However, new applications are constantly being found for electric power, and many important lines of work have been successfully developed during 1915.

TRANSPORTATION; PENNSYLVANIA RAILROAD—A number of the locomotives operating under the North and East Rivers at New York have now run from 90,000 to 112,000 miles each without requiring the turning down of tires or any general repair work, and have operated on an average nearly 15,000 miles for every minute of detention. They are called upon to start and move trains of up to 850 tons on grades reaching 1.93%.

The Chicago, Milwaukee and St. Paul completed, October 1, the electrification of the first 113 miles of the Montana Division, from Three Forks to Deer Lodge, Mont., in addition to another 100 miles in operation January 1, 1916. A further 200 odd miles will be completed during 1916, and it is expected to ultimately operate the entire 850 miles from Harlowton to the Coast by electricity.

There have been provided 21 freight and passenger locomotives to operate with 3,000 volts direct current supplied by overhead ("Catenary") conductors. The electric engines will weigh 520,000 pounds each, have 16 drivers of 52 inches with a tractive effort of 85,000 pounds, and a horse-power equivalent for continuous service of 3,000. There are eight 375-H. P. motors connected to separate axles. Electric regenerative brakes will be used capable of holding the train without the use of air except in emergency. Electric power has been contracted for to .00536 cent per kilowatt hour on a 60% load factor. This cost is considerably less than is now expended for coal.

On the New York, New Haven and Hartford Railroad electric traction is being widely extended. Recent tests have proved very successful with steel reinforced mercury vapor rectifiers on the locomotive to change high tension alternating current from trolley to direct current for the motor.

A car having four 225-horse-power 600-volt motors has been operated for months by means of these rectifiers. This is an important development not only for this low tension work, but is available for rectifying high tension alternating current either on locomotives or in stationary sub-stations. This may determine in future the use of high tension direct current motors in railway practice, as they have many points of advantage over the alternating current motor.

The Norfolk and Western Railroad has equipped its lines during 1915 with 12 freight locomotives, with weight of 540,000 pounds, sixteen 62-inch drivers, tractive effort 90,000 pounds, continuous horse-power 3,000. They will operate with 11,000 volts single phase. These locomotives have greater capacity than the largest Mallet type of steam locomotive and twice the speed.

The Anaconda and Butte Railroad, which hauls ore from Anaconda to Butte and maintains the lowest freight rate in the country, is saving $20,000 a month since its electrification.

The New York Central Railroad, a pioneer in this country in electrification, has largely increased its service.

New heavy service electric railway from Grand Rapids to Kalamazoo and Battle Creek. This is the first 2,400-volt direct current overrunning third-rail line constructed in this country, where the lines leave the fenced-in right of way, the Catenary overhead system of distribution is used. The 50-mile run is made in from 70 to 85 minutes.

There has been electrified to date over 2,500 miles of single track of steam railroads in the United States.

The use of electrically operated (air) brakes on the separate units of a train has made much more rapid stopping possible, and will greatly increase safety and economy in railroading. Heretofore appreciable time was lost in communicating the impulse (the air pressure) from the engine to the different cars of a long train.

The most northerly railway in the world, starting at a point 87 miles north of the Arctic Circle, has just been electrified. It is a section of the Swedish State Railway and is used largely for carrying iron ore from mines to the Norwegian frontier. The power is trans-

ELECTRICAL PROGRESS—*Continued.*

mitted 155 miles at 80,000 volts. The system has increased train capacity 40% and the speed 50%.

In the railway field there is also a wonderful achievement in the use of 5,000 to 7,000 volts direct current on an interurban car line. For some months experiments have been conducted on the branch of the Michigan United Traction Company's line running from Grass Lake to Wolf Lake. The line is twelve miles long. While running in the town limits the motors, of which there are four, run on 600 volts. They are of a distinctively new type, each motor having two armatures one above the other, each wound for 2,400 volts. After leaving the town limits the current is supplied from an overhead line, delivered at a potential of 5,000 volts. In other words, in the city limits the motors are running parallel and outside in series. Direct current at this pressure is secured by use of mercury vapor rectifiers referred to in an earlier paragraph of this report. For over three months the car has run without a single interruption in service due to car equipment. Considering the considerable increase in voltage over anything previously undertaken and the small size of the motor, the result is remarkable.

At the Panama Canal electric towing engines are taking the vessels through the great locks. Four locomotives are used for each ship, two forward and two back. At Gatun the vessel enters a series of three locks and is raised 85 feet to the level of Gatun Lake. At the central lock of Pedro Miguel it is lowered three feet to the level of Miraflores Lake. At Miraflores it is again lowered 55 feet through two locks to the Pacific channel. Rack rails are used on the steep grades. There will be a normal pull of 25,000 pounds exerted on the tow line by the electric locomotive. The wheel base is 12 feet, over all length 32 feet. In addition to the running gear each locomotive has a winding engine to keep a uniform pull on the tow line; speed 2 miles an hour.

HYDRO-ELECTRIC POWER DEVELOPMENTS—The Canadian interests are planning to develop 600,000 horse-power on the northern side of the Niagara River below the Falls, and the American interests have even more ambitious projects for the American side.

The Federal Government is now working with the various States to establish rules and the enactment of laws covering the rights to water power in the Union.

Secretary Lane is quoted as saying that the granting of properly guarded permits would immediately bring about large developments of these unused resources to the extent of over $100,000,000, with the consequent saving of our coal resources. He refers to the fact that in Billings, Mont., there are hundreds of houses lighted and heated with electricity where a fire has never been built, over 600 electric ranges being installed.

In Utah the development of hydro-electric power has given an important impetus to farming. Of the 600,000 horse-power of hydro-electric development in California, 150,000, or one-quarter, is utilized for agriculture; 11,000,000 acres of land in the State are susceptible to intensive cultivation by the use of electricity for irrigation.

New England is now utilizing her water power to the extent of over 600,000 horse-power, thus saving annually the consumption of 3,000,000 tons of coal worth $15,000,000.

Electrical energy from the great Keokuk plant on the Mississippi is now being sold at St. Louis at $18.00 per H. P. per year.

It is predicted that within the next ten years in the "blackland belt" of Texas, of 37,000 square miles' extent, nearly every farm house and rural community will be served by electricity.

WIRELESS—Since the last issue of the ALMANAC almost uninterrupted communication has been carried on between Tuckerton, N. J., or Sayville, L. I., and stations in Germany, and messages transmitted between the Eiffel Tower in Paris and Washington. The Eiffel Tower, built for the Paris Exposition in 1890 and long considered useless, has now become the antennæ of France in her military operations.

The Hammond system of complete wireless control of a torpedo boat at a distance is now being considered by the Navy Department. Also the reported control of large aerial torpedoes discharged by aircraft by means of wireless current has provoked much interest in scientific circles.

Wireless signalling from aeroplanes has made scouting in the European war an effective means of locating enemy troops and batteries and has practically revolutionized warfare.

During 1915 telephone communication between the Atlantic Coast cities and San Francisco has been commercially established, and in railroading the wireless telephone has been successfully operated on moving trains of the Lackawanna road.

It is intended to use the system on not only limited trains for the convenience of the public but in signal work on freight trains to avoid the necessity of stopping for orders, each unnecessary stop of a long freight train representing a loss to the railroad of between $20.00 to $30.00.

On September 29, 1915, the human speaking voice was successfully transmitted between the Atlantic and Pacific Coasts, and regular telephone lines were used from New York to Arlington, Va., and relayed by wireless from there to the Mare Island Navy Yard, near San Francisco, Cal. This was the first successful transmission of the human speaking voice by wireless over a gap of 2,500 miles. The conversation took place between Theodore N. Vail and John J. Carty, who were able to recognize each other's voices.

On September 30, 1915, the human voice was transmitted from Arlington, Va. (Washington, D. C.), to Pearl Harbor, Hawaii, and was distinctly heard, the distance being over 4,600 miles.

The Great Lakes radio plant at Lake Bluff, near Chicago, one of the most powerful units in the United States Government, was formally opened on September 29, 1915.

X-RAY—Both in the European war and in the peaceful occupation of industry the X-ray has in the last twelve months established its economic value. In the field and in the hospital it is extensively used to locate bullets and bits of shrapnel, and in industry and commerce it is utilized to locate flaws in castings and forgings, also in searching for foreign matter or contraband by the Customs officials.

Many a large iron or steel casting or forging has received costly machining only to be found later that some radical hidden flaw made the work useless. Now the raw material can be pronounced sound before work is started. In the hospital service, bullets and pieces of shrapnel can be accurately located and removed by large electro-magnets without the use of surgical instruments. The improved Coolidge tube, which permits the directing of a concentrated ray to the affected part without danger of burning or affecting adjacent tissue or the operating surgeon, is the latest word in this department. Very recently the experiments of Dr. Stanley in his demonstration of a new ray of high power and without burning effect promises much in surgery and therapeutics.

The Stanley ray differs from the Röntgen ray (generally known as the X-ray) in that it is produced by a full cycle instead of by a half-cycle. The X-ray sets up disturbances in the blood streams which retard or prevent the generation of the phagocyte wave by which nature supplies food to the functioning of all cells of the human body. The waves are produced by the intersecting of the erythrocytes and senkocytes, the red and white corpuscles. This action can be compared to the waves thrown off by the intersection of electrons and ions. These artificial waves being more powerful than those of the body, exert a control over them.

The Stanley tube has three cathodes with no outside anode connection. By special apparatus two circuits of different potentials different phase and different cycle supply current to the tube. There are three wires leading to the tube. Two carry an alternating current of 60 cycles and from 60,000 to 250,000 volts. The other wire transmits a current at pressure as high as a million volts and a cycle of several millions. This effects a complete intersecting of ions and electrons, permitting the use of a far smaller current than with the X-ray and also providing a ray more penetrating, yet free from any burning effect. In other words, Stanley has attempted to secure rays of higher harmonics to correspond and tune with those produced in the human body.

Exposure of the body to these rays for many hours at a time shows them free from the harmful (i. e., burning) quality of the X-ray. It is hoped that this new ray will prove of great value in surgery and

ELECTRICAL PROGRESS—*Continued.*

therapeutics. In surgery the rays could be maintained throughout the complete operation, and in the treatment of cancer without the destruction of healthy tissues. An electrically operated saw is also being used by surgeons.

One of the intensely interesting developments of the year has been the phonopticon of Dr. F. C. Brown of the State University of Iowa by an apparatus using selenium crystals, making it possible for the totally blind to read print.

Light waves are practically transformed into sound waves. The image from a lens moving slowly across a printed page illuminated by a narrow ray of light acts upon from two to four parallel selenium crystals, creating an electrical response, which, acting on each crystal (as the arm of a Wheatstone bridge), operates on a telephone receiver in place of the usual galvanometer, double magnets being used in two telephone receivers where four crystals are used.

In series with the telephone receivers is an interrupting device giving a definite frequency, and a resonating arrangement gives a different pitch for each crystal. A change in intensity of these pitches occurs when different letters are brought into range of the illuminated band, permitting the letter to be "read" by sound.

ELECTRO-METALLURGY—Electrolytic iron has been produced on a commercial scale during 1915. At Grenoble, France, a current density of 1,000 amperes per square metre is used.

Taking a cast iron containing—

C 2.55	the deposited metal shows only	.....	0.004
Si 1.31		.....	0.007
S 0.07		.....	0.006
P 1.07		.....	0.008

while the metal so produced is very brittle, by annealing at 900° Centigrade a very soft, tough iron is secured, especially valuable for extra thin tubing and sheets, with extremely high magnetic values. The cost of production is estimated at from $40.00 to $45.00 per ton.

A successful electric furnace for smelting refractory zinc ores has been perfected by W. Mc. A. Johnson and a commercial unit is being constructed at Keokuk, Iowa, where cheap electric power is available.

Over 150,000,000 pounds of aluminum are produced annually by electricity. The Hall patents having expired, other plants with large capacity are being built, one in Whitney, N. C., of 10,000 tons (20,000,000 pounds) annual capacity. In Norway one of 4,000,000 pounds.

Foreign water-power plants are producing power at $7.00 to $15.00 per H. P. year as against $15.00 to $30.00 in the United States for power delivered at the manufacturing plant transformer. This is due largely to the lower cost in development of the water power and to their proximity to industries.

Commercial success in the production of steel in electric furnaces will depend on the proximity of cheap power to the raw material required.

On the Pacific Slope, for example, where electrical energy is available at cheap rates, the cost of scrap metal approximates $15.00 a ton, which, with cost of other materials, labor, and power, even at the low cost of 2 mils per kilowatt hour, would bring the cost price of the finished steel up to $30.00 a ton, or about the figure at which Eastern billet steel can be delivered.

A short ton of average coal has almost the same number of heat units as has an electrical horse-power year. As in even the most favored localities in the United States such electrical energy unit is valued at $16.00 and over, this form of heating energy could not compete generally with coal were it not for the fact that there is great waste in heat units in the combustion of coal in furnaces and a further serious injury to metals from the products of combustion.

The thermal efficiency of electric heat, however, often more than makes up for its greater theoretical cost for many metallurgical uses. This is notably true of its use in melting brass.

For mechanical purposes, however, in the production of not only iron and steel, but other metals, electricity already plays an important part. In steel mills in the United States it is stated that of the machine drive, 85% is already electrically operated.

NAVIGATION—Submarines, which of necessity must be operated by electricity when submerged, have been greatly improved during the year under review. Vessels of this type of 1,000 tons displacement have been put in commission during 1915, with surface speeds up to 20 knots and submerged speed of 14 knots. Their radius of action has been largely increased. At least one has made the trip from a German port without tender to the Dardanelles, and two fleets of five each have journeyed from Canada to England. In this connection it is interesting to note that in addition to its use for propulsion, electricity is utilized on submarines both for lighting, for fans, for wireless, to run the gyroscope, and to cook all meals for the crew.

The battleship California, the keel of which was recently laid in the New York Navy Yard, and which is to cost $16,000,000, will be the first electrically driven battleship built. At 21 knots the power plant is designed to provide 32,000 shaft horse-power. This will be done probably by the use of four motors on two propeller shafts, though this point has not yet been publicly announced. A big advantage claimed for the new power is that it permits great saving in both weight and space, amounting to 40% when compared to the old style of reciprocating engines.

The turbines of the California will run at a speed of 2,200 revolutions per minute. Great economy of power will be effected in running at cruising speed, with ability to quickly increase the speed and even to reverse the power. This economy in power is strikingly brought out by Mr. Emmett of the General Electric Company in his estimate that a vessel of the Mauretania type could be electrically propelled at an annual saving of $150,000 in fuel cost.

The installation on warships and vessels of the merchant marine of the gyro-compass, the invention of Elmer A. Sperry, has marked a great advance in navigation. Previous to this invention the magnetic type of compass had to be relied upon. This not only did not indicate the true North, but was sensitive to many magnetic influences. The shifting of iron masses on board ship affected it, and even to a greater extent by the operation of electric machinery on board.

The Sperry gyro-compass not only points to the true North at all times, but has 290 times the directive force of the old-fashioned needle. The gyroscopic stabilizer is even more wonderful in its operation. It has been possible with a hydro-aeroplane with 4 gyros of 2¼ pounds each running at 12,000 revolutions, to remain on an even keel in the air while the observer walked out one-third of the way on the plane. A Sperry motor-driven gyro-stabilizer, weighing only 1¼% of the tonnage of the vessel, has held a 1,000-ton torpedo boat destroyer on an even keel in a heavy sea not only when driving into waves, but also in running in the trough of the sea. One weighing 80 tons is now being placed on a 10,000-ton battleship. An electric sounding device has been successfully used on shipboard.

ELECTRO-CULTURE—Much progress has been made in electro-culture both by illumination by electric lights and by the passing of electric current through the soil. This latter may be done by either constituting the soil as electrolyte of a voltaic cell by burying two plates of dissimilar metal connected by a conductor, by conducting atmospheric electricity from an elevated collector to an electrode in the soil, or by the production of a glow discharge through the air from overhead antenna to the soil.

Rain-making by sending out electric waves from captive balloons is another interesting possibility.

Telephotographic apparatus perfected during the year by George Rignoux permits the sending of visible forms by electricity.

The investigation of the interior of the earth by means of electric waves and oscillations gives promise of interesting results.

The photographing of projectiles to permit the study of ballistics has been made possible by the invention of apparatus which uses the light of the

electric spark created by the passing of bullets through wires or wire nets electrically connected to the camera. Not only the trajectory has been shown, but the head waves and eddy currents of air are indicated in the photographs so produced.

Both the ultra-violet ray and ozone are now being utilized as germ destroyers in purifying water and milk. Much practical work has been done in this direction during 1915.

The purification or sterilization of milk electrically is new. A dairy company at Stamford is now operating a machine which purifies 1,000 quarts per hour. The milk is not allowed to exceed a temperature of 160° Fahrenheit, the thorough sterilization being accompanied by electrical energy (ultra-violet rays produced at a potential of 2,200 volts).

This treatment completely destroys disease carrying organisms without affecting the digestive and nutritive quality of the milk.

FARMING—In Kansas, near Wichita, farmers installed during 1914-1915 many electrically driven pumps for irrigating alfalfa fields. By two waterings for each of the five crops over five tons of alfalfa per acre were cut during the season. The first year's excess crop more than paid for the irrigating equipment.

Dr. F. C. Cottrell has added to the debt which the public owes him for his invention of the electrical precipitation of gas, smoke, and flue dust from chimneys and furnace stacks, by devising a method of separating water from oil as it comes from the oil wells. In the past many great producing oil wells were rendered almost valueless by the presence of water. By the use of a small current of high tension he has succeeded in eliminating water even up to 25%, at a cost of 1 to 3 cents per barrel of oil.

Electric heating coils have been used in deep oil wells with paraffin base to induce greater flow and melt out accumulations of heavy oils.

FINANCIAL—Extension of the use of electricity has been adversely influenced by the scarcity of money for new enterprises, but operating companies have generally more than held their own, and the securities of both manufacturing and public utility companies have increased in popularity with the investing public.

The banks of the United States have about 10½% of their investments in public utility bonds. Central station earnings from the supply of current for lighting and power equalled nearly $500,000,000 in 1915.

While commercial central stations represent 70% of the total, compared with 30% for the municipally owned plants, their income is over 92% of the total. The Commonwealth Edison Company of Chicago leads all others in size with a maximum load of over 300,000 kilowatts (400,000 horse-power). The aggregate of the ten leading stations totals over 1,350,000 kilowatts, with a yearly output of 6,502,965.328 kilowatt hours.

Much advance has been made during 1915 not only in lighting units but also in the knowledge of illumination. The study of eye-strain caused by exposure to the direct rays of illuminants of high intensity has demonstrated the value of indirect and semi-indirect methods, and this study has also developed a far greater knowledge of the reflecting value of various colors and textures.

The new non-vacuum incandescent lamp commonly known as the "gas-filled lamp" or "Mazda type C" has improved the efficiency of the incandescent electric about 100% during 1915.

INDUSTRIAL HEATING—One of the large central stations has recently organized an industrial heating department, and two of the applications of electric heat are novel and noteworthy.

The ovens for enamelling motor frames have heretofore been slow and unreliable, great difficulty having been found in maintaining the proper heat. An electric enamelling oven, with a connected load of approximately 7,500 horse-power with a demand of over 4,000, has recently been installed by a large manufacturing company. The lower part of the oven walls have been transformed into radiators, the radiant heat therefrom penetrating the air and the semi-liquid enamel, thus heating the solid portion of the product first and gradually conducting the heat to the enamel. The enamel closest to the steel being heated first and solidified from the inside out makes a much more lasting article as well as gives the product an exceptionally good finish. The output of the oven has also been practically doubled.

In another case a manufacturer of automobile starting devices found it necessary to quickly double the capacity of his armature-making equipment. Heretofore twelve hours were required to bake them in ovens. By introducing electric units the time was reduced to six hours. With the electric heating system it was possible to greatly increase the volume of heat without any increase in actual temperature which would have caused destruction of insulation or would have melted the solder. This is due to the fact that electric heat is essentially dry, and that by proper circulation this air absorbs and carries away the moisture in the armature. The heat can be regulated to a nicety, which was not possible with heat derived from fuel. This indicates the future possibilities of electricity for industrial heating.

The Panama-Pacific Exposition has brought out many novel applications of illumination, and the Tower of Jewels, with its 125,000 suspended cut glass gems of every hue flashing colors from the sunlight in the daytime, and even more beautifully by projected electric lights at night, is perhaps the most notable example of beautiful illumination the world has ever seen. Each crystal has a small mirror suspended at its apex, and when the light from fifty great searchlights is turned on the tower the blaze of light and color is wondrous.

As a closing comment or compliment to electricity in 1915 may be mentioned the fact that whereas every great exposition of recent years has had a notable electrical building, at the Panama-Pacific Exposition this was considered uncalled for, as each and every building, being electrically lighted and operated, was a tribute to this great industry.

BUREAU OF MUNICIPAL RESEARCH.

This bureau was organized for the purpose of "getting the business of the city (New York) done with the highest degree of efficiency."

Director, Frederick A. Cleveland; Assistant Directors, Fred. W. Lindars, Herbert R. Sands, W. B. Holton, Jr.; Secretary, Samuel McCune Lindsay. Headquarters, 261 Broadway, New York City.

EXPRESS RATES.

(Statement of Interstate Commerce Commission.)

The United States is divided into 950 blocks, each formed by one degree of latitude and longitude embracing approximately 3,500 square miles. Each block is designated by number. Rates are stated from one block to all others, and apply from all express stations within the initial block to all stations in the destination block. A directory of express stations shows the number of the block in which the station is located, also indicates those stations at which collection and delivery service is performed.

Express traffic is divided into three classes: First class includes all merchandise other than articles of food and drink, which, with few exceptions, fall within the second class, and certain printed matter, such as books, pamphlets and advertising matter, falling within the third class. Second-class rates are 75% of the first class, and third class are one-half cent per ounce; minimum charge, 15 cents.

When perishable shipments contain ice, an allowance of 25% from the gross weight is made, except during December, January and February, when 15% is allowed.

The express classification, containing rules with which the shipping public should be familiar, also the tariffs, are posted in express offices and depots and may be inspected at any time during business hours.

Express rates are based upon the carriers' risk to the limit of the stated value, one being applicable to property of a value not in excess of $50 and a higher rate applying when the value is in excess of $50.

A uniform express receipt is used by all express companies.

IMPORTANT TUNNELS OF THE WORLD.

Alberg—Under the Alps at the Arl Mountain, and extends from Langen to St. Anton, 6¾ miles; opened 1884.

Andes Mountains—See "Trans-Andine."

Big Bend—Drains the Feather River in California, 2 miles; opened 1886.

Bitter Root Mountains (Montana and Idaho)—10,100 feet long.

Blackwell—Under River Thames, England, 1½ miles; opened 1897.

Cascade Mountain—Through the Cascade Mountains in Washington, 3 miles.

Continental Divide, for the Denver and Salt Lake R. R., 6.4 miles long (under construction).

Cumberland—Under Cumberland Mountains, Tennessee, 8,000 feet long.

Detroit (Michigan Central Ry.)—Under Detroit River.

Gunnison—Southwestern Colorado, 6 miles; opened 1909.

Hoosac—Through Hoosac Mountains, Mass., 4¾ miles; opened 1873.

Khojak Pass—Inda, from Quetta to Kandahar, 2 miles.

Loetschberg—Through the Alps, in Oberland, Switzerland, 9¼ miles; opened June 20, 1913, costing nearly $10,000,000.

Mt. Roberts—From the shore of Gastineau Channel at Juneau, Alaska, into Silver Bow Basin, 1 1-3 miles.

Mont d'Or—Between France and Switzerland, was bored through October 2, 1913. The tunnel pierces the Jura Mountains from Fresne to Vallorbe, and is 3¾ miles long.

Mont Cenis—Italy to France, under the Col de Frejus, 8 miles; opened 1871.

New Croton—Supplies water to New York City, 33 1-8 miles; opened 1888.

Otira—In New Zealand, 5 1-3 miles.

Roger Pass—Under the Selkirk Mountains penetrating Mount Macdonald in British Columbia, 5 miles long; cost more than $10,000,000; now building, and to be opened in 1916.

Rothschonberg—Drains the Felberg mines, Saxony, 31½ miles; opened 1877.

St. Clair—Under St. Clair River from Sarnia, Ont., to Port Huron, Mich., 2 miles; opened 1891.

St. Gothard—Through the Alps, connects Goschenen with Airolo, in Switzerland, 9 1-3 miles; opened 1881.

Severn—From Monmouthshire to Gloucestershire, England, 4½ miles; opened 1886.

Simplon—Through the Alps, 12½ miles; opened 1905.

Strawberry—Through the Wasatch Mountains.

Sutro—Drains the Comstock Lode in Nevada, 4½ miles; opened 1879.

Trans-Andine Ry. tunnel—5 miles long, 12,000 feet above sea level and affords direct communication between Valparaiso and Buenos Ayres; opened April 5, 1910.

Wasserfluh—In the Alps, between Bunnadern and Lichtensteig, Switzerland, 2 miles; opened 1909.

Woodhead—Between Manchester and Sheffield, England, 3 miles.

TUNNELS IN AND ABOUT NEW YORK CITY.

(For Subways in and about New York City, see Index).

PENNSYLVANIA RAILROAD SYSTEM—Tunnels under Hudson River extend from Pennsylvania Railroad Station, New York, to Weehawken, N. J. There is no station at Weehawken, the electric trains from the Pennsylvania Station run to Manhattan Transfer, near Newark, N. J., without a stop. Work started April 1, 1904; completed in 1910. Two tubes of cast iron rings, 23 feet outside diameter and 21 feet 2 inches inside diameter; subaqueous portion 6,118 feet long.

Manhattan Cross-Town Tunnels from the Pennsylvania Railroad station, mentioned above, across New York under 32d and 33d Sts. to First Ave. Started July, 1905, completed in 1910. There are two tunnels, each with two tracks. The tunnels are built of concrete with the crown about 60 feet below the surface of the street.

East River Tunnels connect with the Cross-Town Tunnels and extend under the East River to Long Island City. Started September, 1904; completed in 1910. Four separate tubes with rings 23 feet outside diameter, each tube from the Manhattan shaft to the Long Island City shaft, 3,900 feet long

HUDSON AND MANHATTAN RAILROAD SYSTEM—North tunnels under the Hudson River from Jersey City to Morton St., New York. Started November, 1874; the first in New York, officially opened February 25, 1908. Two single track tubes, with a minimum inside diameter of 15 feet 3 inches, and approximately 5,700 feet long.

Up-town tunnels connect with north tunnels at Morton St. and extend to Christopher St. thence to Sixth Ave. and up Sixth Ave. to 33d St. Started March, 1904, completed in 1910. Section from Morton to 12th Sts. shield construction, remainder cut and cover.

South tunnels under Hudson River from Jersey City to the Church St. Terminal Buildings (Cortlandt, Church and Fulton Sts.), New York. Started May, 1905; opened for traffic July, 1909. Two tubes about 5,950 feet long with cast iron rings, 16 feet 7 inches outside diameter and 15 feet 3 inches inside diameter.

Tunnels (consisting of two single track tubes) extend from the Hoboken terminal of the Lackawanna Railroad to Washington St., Jersey City, with connections to the north tunnels and to the Erie Railroad station. At Washington St. a branch runs to the Pennsylvania Railroad station at Jersey City, where connections are made with the south tunnels. West from Washington St. to a point east of Summit Ave. is a double track concrete tunnel with a centre wall dividing the tracks. Work started March, 1906; completed in July, 1911.

BELMONT TUNNEL under the East River from 42d St., New York, to Long Island City. Subaqueous portion two single track tubes with cast-iron rings 16 feet 10 inches outside diameter, and a clear inside diameter of 15 feet 6 inches. Through rock a horseshoe shaped concrete section is used and in other places a rectangular double track cross section with reinforced concrete lining. Construction started by New York and Long Island Railroad, July 12, 1905; practically completed January 1, 1908. (Commonly known as the Steinway Tunnel).

RAPID TRANSIT TUNNEL under the East River from the Battery, New York, to Joralemon St., Brooklyn, connecting the New York and Brooklyn Subways. Started April, 1903; trains running January 9, 1908. Two tubes, 6,784 feet long, with a finished inside diameter of 15 feet 6 inches.

BERGEN CUT of Erie Railroad through Bergen Hill, Jersey City, parallel to the present tunnel, which is 4,700 feet long. The Bergen cut was started March, 1906, and completed July 1, 1910. It has five four-track tunnels, with open cuts between the tunnels, making a total length of 4,300 feet. Tunnel sections 58 feet wide at the bottom and 21 feet high.

LACKAWANNA RAILROAD TUNNEL through Bergen Hill, Jersey City. Started February 28, 1906; completed February 14, 1909. Parallel to and 24 feet away from old tunnel and of the same length, viz., 4,283 feet. New tunnel is double tracked, lined with concrete, having inside dimensions 23 feet high by 30 feet wide. Bush track construction used.

Tunnels from Whitehall St., Manhattan, to Montague St., Brooklyn, from Old Slip, Manhattan, to Clark St., Brooklyn, and from 14th St., Manhattan, to North 7th St., Brooklyn, are under construction, all of which are part of the new subway system in New York.

INTERSTATE COMMERCE LAW.

THE following is a synopsis of the provisions of the Interstate Commerce law and acts amendatory thereof, prepared for the Official Congressional Directory:

Under "An act to Regulate Commerce," approved February 4, 1887; as amended March 2, 1889; February 10, 1891; February 8, 1895; the "Elkins act" of February 19, 1903, and the amending act approved June 29, 1906, the Interstate Commerce Commission is composed of seven members, each receiving a salary of $10,000 per annum. The regulating statutes apply to all common carriers engaged in the interstate transportation of oil or other commodity, except water and except natural or artificial gas, by means of pipe lines, or partly by pipe line and partly by rail, or partly by pipe line and partly by water, and to common carriers engaged in interstate transportaion of passengers or property wholly by railroad (or partly by railroad and partly by water when both are used under a common control, management, or arrangement for a continuous carriage or shipment). Only traffic transported wholly within a single State is excepted.

The commission has jurisdiction on complaint, and, after full hearing, to determine and prescribe reasonable rates, regulations, and practices, and order reparation to injured shippers; to require any carriers to cease and desist from unjust discrimination, or undue or unreasonable preference, and to institute and carry on proceedings for enforcement of the law. The commission may also inquire into the management of the business of all common carriers subject to the provisions of the regulating statutes, and it may prescribe the accounts, records, and memoranda which shall be kept by the carriers, and has authority through its special agents and examiners to inspect the same. The carriers must file annual reports with the commission, and such other reports as may from time to time be required. Various other powers are conferred upon the commission. Carriers failing to file and publish all rates and charges, as required by law, are prohibited from engaging in interstate transportation, and penalties are provided for failure on the part of carriers or of shippers to observe the rates specified in the published tariffs.

The commission appoints a secretary, who is its chief administrative and executive officer; an assistant secretary, and such attorneys, examiners, special agents, and clerks as are necessary to the proper performance of its duties.

By amendment of June 18, 1910 ("Mann-Elkins law"), telegraph, telephone, and cable companies are made subject to the commission. The jurisdiction of the commission is increased as to through routes and joint rates, freight classification, switch connections, long and short hauls, filing or rejection of rate schedules, investigations on own motion, making reasonable rates, suspension of proposed rates, and other matters. An important section authorized the President to appoint a special commission to investigate issuance of railroad stocks and bonds.

The act of February 11, 1903, provides that suits in equity brought under the act to regulate commerce, wherein the United States is complainant, may be expedited and given precedence over other suits, and that appeals from the Circuit Court lie only to the Supreme Court The act of February 19, 1903, commonly called the Elkins law, penalizes the offering, soliciting, or receiving of rebates, allows proceedings in the courts by injunction to restrain departures from published rates, and makes the Expediting act of February 11, 1903, include cases prosecuted under the direction of the Attorney-General in the name of the commission.

Under the act of August 7, 1888, all railroad and telegraph companies to which the United States have granted any subsidy in lands or bonds or loan of credit for the construction of either railroad or telegraph lines are required to file annual reports with the commission and such other reports as the commission may call for. The act also directs every such company to file with the commission copies of all contracts and agreements of every description existing between it and every other person or corporation whatsoever in reference to the ownership, possession, or operation of any telegraph lines over or upon the right of way, and to decide questions relating to the interchange of business between such Government-aided telegraph company and any connecting telegraph company. The act provides penalties for failure to perform and carry out within a reasonable time the order or orders of the commission.

The act of March 2, 1893, known as the "Safety Appliance act," provides that railroad cars used in interstate commerce must be equipped with automatic couplers and standard height of drawbars for freight cars, and have grab irons or hand holds in the ends and sides of each car. A further provision is that locomotive engines used in moving interstate traffic shall be fitted with a power driving-wheel brake and appliances for operating the train-brake system, and a sufficient number of cars in the train shall be equipped with power or train brakes. The act directs the commission to lodge with the proper District-Attorneys information of such violations as may come to its knowledge. The commission is authorized upon full hearing and for good cause to extend the period within which any common carrier shall comply with the provisions of the statute. The act of March 2, 1903, amended this act so as to make its provisions apply to Territories and the District of Columbia, and to all locomotives, cars, and other equipment of any railroad engaged in interstate traffic, except logging cars and cars used upon street railways, and also to power or train brakes used in railway operation.

By act of April 14, 1910, the safety appliance acts were supplemented so as to require railroads to equip their cars with sill steps, hand brakes, ladders, running boards and grab irons, and the commission was authorized to designate the number, dimensions, location and manner of application of appliances.

The act of Congress approved July 15, 1913, provides for mediation, conciliation, and arbitration in controversies between railroads and their employés in the following sections of the act: Sec. 2. That whenever a controversy concerning wages, hours of labor, or conditions of employment shall arise between an employer or employers and employés subject to this act interrupting or threatening to interrupt the business of said employer or employers to the serious detriment of the public interest, either party to such controversy may apply to the Board of Mediation and Conciliation created by this act and invoke its services for the purpose of bringing about an amicable adjustment of the controversy; and upon the request of either party the said board shall with all practicable expedition put itself in communication with the parties to such controversy and shall use its best efforts, by mediation and conciliation, to bring them to an agreement; and if such efforts to bring about an amicable adjustment through mediation and conciliation shall be unsuccessful, the said board shall at once endeavor to induce the parties to submit their controversy to arbitration in accordance with the provisions of this act.

In any case in which an interruption of traffic is imminent and fraught with serious detriment to the public interest, the Board of Mediation and Conciliation may, if in its judgment such action seems desirable, proffer its services to the respective parties to the controversy.

In any case in which a controversy arises over the meaning or the application of any agreement reached through mediation under the provisions of this act either party to the said agreement may apply to the Board of Mediation and Conciliation for an expression of opinion from such board as to the meaning or application of such agreement, and the said board shall upon receipt of such request give its opinion as soon as may be practicable.

Sec. 3. That whenever a controversy shall arise between an employer or employers and employés subject to this act, which cannot be settled through mediation and conciliation in the manner provided in the preceding section, such controversy may be submitted to the arbitration of a board of six, or, if the parties to the controversy prefer so to stipulate, to a board of three persons, which board shall be chosen in the following manner: In the case of a board of three, the employer or employers and the employés, parties respectively to the agreement to arbitrate, shall each name one arbitrator; and the two arbitrators thus chosen shall select the third arbitrator; but in the event of their failure to name the third arbitrator within five days after their first meeting, such third arbitrator shall be named by the Board of Mediation and Conciliation. In the case of a board of six, the employer or employers and the employés, parties respectively

to the agreement to arbitrate, shall each name two arbitrators, and the four arbitrators thus chosen shall, by a majority vote, select the remaining two arbitrators; but in the event of their failure to name the two arbitrators within fifteen days after their first meeting the said two arbitrators, or as many of them as have not been named, shall be named by the Board of Mediation and Conciliation.

In the event that the employés engaged in any given controversy are not members of a labor organization, such employés may select a committee which shall have the right to name the arbitrator, or the arbitrators, who are to be named by the employés as provided above in this section.

* * *

The act of March 3, 1901, "requiring common carriers engaged in interstate commerce to make reports of all accidents to the Interstate Commerce Commission," makes it the duty of such carrier to monthly report, under oath, all collisions and derailments of its trains and accidents to its passengers and to its employés while on duty in its service, and to state the nature and causes thereof. The act prescribes that a fine shall be imposed against any such carrier failing to make the report so required.

By act of May 6, 1910, the prior Accident Reports law was repealed and a new statute passed giving more power to the commission as to investigating accidents, and is more comprehensive than the former law.

The act of March 4, 1907, makes it the duty of the Interstate Commerce Commission to enforce the provisions of the act wherein it is made unlawful to require or permit employés engaged in, or connected with, the movement of trains to be on duty more than a specified number of hours in any twenty-four.

The act of May 30, 1908, directs the Interstate Commerce Commission to make regulations for the safe transportation of explosives by common carriers engaged in interstate commerce. A penalty is provided for violations of such regulations.

By act of May 30, 1908, it is made the duty of the Interstate Commerce Commission to enforce the provisions of the act wherein it is provided that after a certain date no locomotive shall be used in moving interstate or foreign traffic, etc., not equipped with an ash pan which can be emptied without requiring a man to go under such locomotive. A penalty is provided for violation of this act.

Public resolution No. 46, approved June 30, 1906, and the Sundry Civil Appropriation act of May 27, 1908, direct the commission to investigate and report on the use and need of appliances intended to promote the safety of railway operation.

The act of February 17, 1911, confers jurisdiction upon the commission to enforce certain provisions, compelling railroad companies to equip their locomotives with safe and suitable boilers and appurtenances thereto.

The Panama Canal act of August 24, 1912, amends sections 5 and 6 of the act to regulate commerce by conferring upon the commission jurisdiction to enforce a provision prohibiting a railroad company subject to the act, after July 1, 1914, from owning, leasing, operating, controlling or having any interest in competing water carriers operating through the Panama Canal or elsewhere. Jurisdiction is conferred upon the commission to determine questions of fact as to competition, after full hearing, on the application of any railroad company or other carrier, and to extend beyond July 1, 1914, the time during which such ownership or operation of vessels plying elsewhere than through the Panama Canal may continue, when it is found to be in the interest of the public and is of advantage to the convenience and commerce of the people, and not in restraint of competition. This amendment gives the commission power to establish physical connection between the lines of a rail carrier and the dock of a water carrier; authorizes the commission to establish through routes and joint rates over rail and water lines, and to determine all the terms and conditions under which such rail and water routes shall be operated; authorizes the commission to establish maximum proportional rates by rail to and from ports to which traffic is brought by water carriers; authorizes the commission, where a rail carrier has entered into arrangements with a water carrier operating from a port in the United States to a foreign country, for the handling of through business, to require the railway company to enter into similar arrangements with other water lines.

The Post-Office Appropriation act of August 24, 1912, empowers the commission to co-operate with the Postmaster-General in reforming, from time to time, the classification, weight limit, rates, zones, or conditions, in order to promote the parcel post service created by the act, and requires the commission to furnish data to a Congressional committee appointed to investigate the subject of a general parcel post.

By the act approved March 1, 1913, amending the act to regulate commerce, the commission is directed to investigate, ascertain, and report the value of all the property owned or used by every common carrier subject to the provisions of the act.

Jurisdiction is conferred upon the commission to enforce certain provisions of the act approved October 15, 1914, to supplement existing laws against unlawful restraint and monopolies in so far as such provisions relate to carriers subject to the act to regulate commerce. The act prohibits, with certain exceptions, carriers from discriminating between purchasers in sales of commodities and from making leases or sales of commodities, and from acquiring stock or capital of other corporations engaged in commerce, tending to substantially lessen competition or create a monopoly; makes it a felony for a President or other specified officers to misappropriate a carrier's funds; and provides that after two years from the approval of the act no carrier shall have dealings in securities or supplies, or contract for construction or maintenance to the amount of more than $50,000 in the aggregate in any one year, with another corporation or organization when, by reason of common officers or otherwise, there exists a community of interest between the carrier and such other corporation or organization, except as a result of free competitive bidding under regulations to be prescribed by the commission. The commission is further authorized to investigate violations of the act by carriers and to require the guilty parties to cease therefrom, and its findings of fact in such investigations shall be conclusive when supported by testimony.

The act approved March 4, 1915, which became effective June 2, 1915, makes common carriers liable for all damage to property caused by them, and forbids, with certain exceptions, limitations of liability.

Under the act of October 22, 1913, the Commerce Court was abolished from and after December 31, 1913, and the jurisdiction vested in the Commerce Court transferred to the District Courts of the United States. This act also provides the procedure to enforce, suspend, or set aside, in whole or in part, any order of the Interstate Commerce Commission.

TRAVELERS' AID SOCIETY.

President—Gilbert Colgate. *Hon. Vice-Presidents*, Cardinal Farley, Bishop David H. Greer. *Vice-Presidents*—Rev. Dr. Francis Brown, Rev. Dr. Samuel Schulman, Rt. Rev. D. J. McMahon. *Treasurer*—James McAlpin Pyle. *Chairman of Executive Committee*—Rush Taggart. *General Secretary*—Orin C. Baker. *Headquarters*—465 Lexington Avenue, New York City.

The Travelers' Aid Society is non-sectarian in organization and work, has national and international co-operation. Object: Protects and assists all travellers, especially young women, girls and boys, without fee or gratuity. Safeguards in all the emergencies of travel from influences and dangers vicious, morally, financially, and physically. Prevents error, extortion and crime, relieves suffering, and combats vice of every form. Trained women agents, recognized by official badge, meet trains and boats. Supported by voluntary contributions.

RAILROAD COMMISSIONS.

INTERSTATE COMMERCE COMMISSION, WASHINGTON, D. C.

Charles C. McChord, of Kentucky, Chairman; Judson C. Clements, of Georgia; Henry C. Hall, of Colorado; Edgar E. Clark, of Iowa; James S. Harlan, of Illinois; Balthasar H. Meyer, of Wisconsin; Winthrop M. Daniels, of New Jersey; George B. McGinty, Secretary.

ALABAMA RAILROAD COMMISSION, Montgomery—S. P. Kennedy, President; B. H. Cooper, S. P. Gaillard; A. H. Mullin, Secretary.

ARIZONA CORPORATION COMMISSION, Phoenix—F. A. Jones, Chairman; A. W. Cole, W. P. Geary.

RAILROAD COMMISSION OF ARKANSAS, Little Rock—W. F. McKnight, Chairman; Thomas E. Wood, J. Sam Rowland; Ernest Tipton, Secretary.

RAILROAD COMMISSION OF CALIFORNIA, San Francisco—Max Thelen, President; H. D. Loveland, Alex. Gordon, E. O. Edgerton, Frank R. Devlin; Charles R. Detrick, Secretary.

PUBLIC UTILITIES COMMISSION OF COLORADO, Denver—Sheridan S. Kendall, Chairman; George T. Bradley, M. H. Aylesworth; John W. Flintham, Secretary.

CONNECTICUT PUBLIC UTILITIES COMMISSION, Hartford—Richard T. Higgins, Chairman, Winsted; C. C. Elwell; John H. Hale, South Glastonbury; Henry F. Billings, Secretary, Hartford.

PUBLIC UTILITIES COMMISSION OF THE DISTRICT OF COLUMBIA, Washington, D. C.—Major Charles W. Kutz, Chairman; Lewis Brownlow, Oliver P. Newman; Capt. Julian L. Schley, Executive Officer.

RAILROAD COMMISSIONERS OF FLORIDA, Tallahassee—R. Hudson Burr, Chairman; N. A. Blitch, Royal C. Dunn; J. Will Yon, Secretary.

RAILROAD COMMISSION OF GEORGIA, Atlanta—Charles M. Candler, Chairman; George Hillyer, Vice-Chairman; Joseph F. Gray, Paul B. Trammell, James A. Perry; Campbell Wallace, Secretary.

PUBLIC UTILITIES COMMISSION OF HAWAII, Honolulu—J. N. S. Williams, Acting Chairman; A. J. Gignou; Henry P. O'Sullivan, Secretary.

IDAHO PUBLIC UTILITIES COMMISSION, Boisé—Axel P. Ramstedt, President; John W. Graham, A. L. Freehafer; E. G. Gallet, Secretary.

PUBLIC UTILITIES COMMISSION OF ILLINOIS, Springfield—William L. O'Connell, Chairman; O. P. Thompson, Walter A. Shaw, Richard Yates, Frank H. Funk; R. V. Prather, Acting Secretary.

PUBLIC SERVICE COMMISSION OF INDIANA, Indianapolis—Thomas C. Duncan, Chairman; John F. McClure, Charles A. Edwards, Charles J. Murphy, James L. Clark; J. L. Reiley, Secretary.

IOWA BOARD OF RAILROAD COMMISSIONERS, Des Moines—Clifford Thorne, Chairman; J. H. Wilson, John A. Guiher; George L. McCaughan, Secretary.

KANSAS PUBLIC UTILITIES COMMISSION, Topeka—Joseph L. Bristow, Chairman; John M. Kinkel, C. F. Foley; Carl W. Moore, Secretary.

KENTUCKY RAILROAD COMMISSION, Frankfort—Laurence B. Finn, Chairman; William F. Klair, H. Green Garrett; Richard Tobin, Secretary.

RAILROAD COMMISSION OF LOUISIANA, Baton Rouge—Shelby Taylor, Chairman; Burk A. Bridges, John T. Michel; Henry Jastremski, Secretary.

PUBLIC UTILITIES COMMISSION OF MAINE, Augusta—Benjamin F. Cleaves, Chairman; William B. Skelton, Charles W. Mullen; George F. Giddings, Clerk.

MARYLAND PUBLIC SERVICE COMMISSION, Baltimore—Albert G. Towers, Chairman; E. Clay Timanus, W. Laird Henry; Benjamin T. Fendall, Secretary.

MASSACHUSETTS PUBLIC SERVICE COMMISSION, Boston—Frederick J. MacLeod, Chairman; Everett E. Stone, Clinton White, John F. Meaney; Andrew A. Highlands, Secretary.

MICHIGAN RAILROAD COMMISSION, Lansing—Lawton T. Hemans, Chairman; Cassius L. Glasgow, C. S. Cunningham; Willard N. Sweeney, Secretary.

MINNESOTA RAILROAD AND WAREHOUSE COMMISSIONERS, St. Paul—Ira B. Mills, Chairman; Charles E. Elmquist, O. P. B. Jacobson; A. C. Clausen, Secretary.

MISSISSIPPI RAILROAD COMMISSION, Jackson—F. M. Sheppard, President; George R. Edwards, W. B. Wilson; James Galceran, Secretary.

MISSOURI PUBLIC SERVICE COMMISSION, Jefferson City—John M. Atkinson, Chairman; Edwin J. Bean, John Kennish, Howard B. Shaw, Eugene McQuillin; T. M. Bradbury, Secretary.

RAILROAD COMMISSION OF MONTANA, Helena—J. E. McCormick, E. A. Morley, J. H. Hall; R. F. McLaren, Secretary.

NEBRASKA STATE RAILWAY COMMISSION, Lincoln—H. T. Clarke, Jr., Chairman; Thomas L. Hall, H. G. Taylor; A. B. Allen, Secretary.

NEVADA PUBLIC SERVICE COMMISSION, Carson City—H. F. Bartine, Chairman; J. F. Shaugnessy, W. H. Simmons; E. H. Walker, Secretary.

NEW HAMPSHIRE PUBLIC SERVICE COMMISSION, Concord—Edward C. Niles, Chairman; Thomas W. D. Worthen; John E. Benton, Clerk.

BOARD OF PUBLIC UTILITY COMMISSIONERS OF NEW JERSEY, Trenton—Ralph W. E. Donges, President; John J. Treacy, John W. Slocum; Alfred N. Barber, Secretary.

STATE CORPORATION COMMISSION OF NEW MEXICO, Santa Fé—M. S. Groves, Chairman; Hugh H. Williams, O. L. Owen; Edwin F. Coard, Clerk.

NEW YORK PUBLIC SERVICE COMMISSIONS, FIRST DISTRICT (Greater New York), New York City—Edward E. McCall, Chairman; J. Sergeant Cram, George V. S. Williams, Robert C. Wood, William Hayward; Travis H. Whitney, Secretary. SECOND DISTRICT (all of the State outside Greater New York), Albany—Seymour Van Santvoord, Chairman; Devoe P. Hodson, Wm. Temple Emmet, Frank Irvine, James O. Carr; Frank H. Mott, Secretary.

NORTH CAROLINA CORPORATION COMMISSION, Raleigh—Edward L. Travis, Chairman; William T. Lee, George P. Pell; A. J. Maxwell, Clerk.

NORTH DAKOTA COMMISSIONERS OF RAILROADS, Bismarck—W. H. Stutsman, President; O. P. N. Anderson, W. H. Mann; Walter F. Cushing, Secretary.

PUBLIC UTILITIES COMMISSION OF OHIO, Columbus—Beecher W. Waltermire, Chairman; O. H. Hughes, C. C. Marshall; D. M. Armstrong, Secretary.

CORPORATION COMMISSION OF OKLAHOMA, Oklahoma City—J. E. Love, Chairman; George A. Henshaw, W. D. Humphrey; J. H. Hyde, Secretary.

QUEBEC PUBLIC UTILITIES COMMISSION, Quebec, Can.—F. W. Hibbard, President; Sir George Garneau, F. C. Laberge; M. Joseph Ahern, Secretary.

RAILROAD STATISTICS.

(From Report of Interstate Commerce Commission for fiscal year ending June 30, 1914, and made from the annual reports of carriers having gross operating revenues of $100,000 or more for the year.)

On June 30, 1914, the roads covered by this report represented 247,397.59 miles (single track) of line operated, including 11,298.88 miles used under trackage rights. The aggregate mileage of railway tracks of all kinds covered by these roads was 377,102.45 miles, an increase of 7,522.65 miles over corresponding returns for 1913.

Of the total number (64,760) of locomotives, 14,612 were classified as passenger, 38,752 freight, 10,081 switching, and 1,315 unclassified.

The total number of cars of all classes was 2,503,822 (or 58,314 more than on June 30, 1913), as follows: Passenger service, 53,466; freight, 2,325,647; companies' service, 124,709.

Investment in road and equipment—The figures include returns for investment in road and equipment, shown by the operating roads, as well as by their subsidiary non-operating roads (leased, operated under contract, etc.).

Investment to June 30, 1913, $16,424,359,514; investment to June 30, 1914, $16,936,697,840; increase 1914 over 1913, $512,338,326.

Expenditures for additions and betterments and for new lines and extensions during fiscal year 1914, $637,766,968.

Credits—Property retired or converted, $88,104,245; adjustments, $8,524,764; difference between record value of grantor and purchase price of grantee in case of roads sold, merged, consolidated, etc., $29,650,641; total, $126,279,650; net increase during year, $512,338,326.

Passengers carried, 1,053,138,718; passenger mileage, 35,258,497,509; tons of freight moved, 1,976,138,155; ton mileage, 288,319,890,210.

Traffic earnings—Passengers, $700,403,353; freight, $2,114,697,629 and including revenue from miscellaneous sources, making total operating revenues $3,047,019,908.

Operating expenses—Maintenance of way and structures, $419,277,779; maintenance of equipment, $532,138,606; traffic expenses, $63,769,677; transportation expenses, $1,101,597,432; general expenses, $83,529,665; total operating expenses, $2,200,313,159.

CAPITALIZATION OF RAILWAY PROPERTY.

On June 30, 1914, according to the annual reports submitted to the Interstate Commerce Commission by roads having gross operating revenues of $100,000 or more, together with returns made in reports filed in behalf of their non-operating subsidiary lines, the par value of the amount of railway capital outstanding was $20,247,301,257. This amount includes capital held by the railway companies concerned, as well as by the public. Of the total amount of such capital outstanding there existed as stock $8,680,759,704, of which $7,304,479,846 was common and $1,376,279,858 was preferred; the remaining part, $11,566,541,553, representing funded debt, consisted of mortgage bonds, $8,496,370,538; collateral trust bonds, $1,182,683,530; plain bonds, debentures, and notes, $1,142,016,070; income bonds, $254,230,505; miscellaneous funded obligations, $72,700,640, and equipment trust obligations, $418,540,270.

Of the total capital stock outstanding for the roads under consideration, $3,019,020,981, or 34.78 per cent., paid no dividends. The amount of dividends declared during the year (by both operating and non-operating companies represented in this statement) was $451,263,197, being equivalent to 7.97 per cent. on dividend-paying stock. The average rate of dividends paid on all stocks outstanding pertaining to the roads under consideration was 5.20 per cent. No interest was paid on $1,331,581,452, or 11.94 per cent., of the total amount of funded debt outstanding (other than equipment trust obligations).

THE WORLD'S PRINCIPAL RAILROAD TERMINALS.

	Total Area, Acres.	Length Track, Miles.	No. of Tracks	No. of Platforms.		Total Area, Acres.	Length Track, Miles.	No. of Tracks	No. of Platforms.
New York Central, Grand Central Terminal, N. Y. City	79.0	33.6	67	36	Chicago & Northwestern, Chicago	8.0	2.7	16	8
Pennsylvania Station, N. Y. City.	28.0	16.0	21	11	London, Waterloo Station	8.75	....	18	..
Washington, Union Station	13.0	....	29	13	Paris, St. Lazare	11.2	3.5	31	14

PASSENGER RAILWAY RATES IN EUROPE.

The following are approximate passenger rates, reduced to cents per mile, in the various European countries.

OWNERSHIP.	Class I. Cents.	Class II. Cents.	Class III. Cents.	OWNERSHIP.	Class I. Cents.	Class II Cents.	Class III. Cents.
Germany, (state)	2.74	1.74	1.16	Netherlands, (state)	3.30	2.48	1.66
Belgium, (state)	2.92	1.98	1.17	" (private)	3.32	2.50	1.68
France, (state)	3.16	2.34	1.54	Italy, (state)	3.60	2.52	1.62
" (private)	3.48	2.36	1.54	United Kingdom, (priv.)	4.76	3.18	1.78

In Italy the rate per mile is higher than on any other state-owned road, though a differential tariff offers some advantages that tend to reduce the price and to make the long-distance journeys as cheap as in other countries.

UNITED STATES BUREAU OF MINES.

Director—Van H. Manning, Washington, D. C. ($6,000).

The general purpose of the Bureau of Mines of the Department of the Interior is to conduct, in behalf of the public welfare, fundamental inquiries and investigations into the mining industry. Two phases of the industry of greatest National concern are safety and efficiency—safeguarding the lives of our miners and insuring the most efficient and least wasteful development and use of our mineral resources.

These inquiries and investigations are National in scope; they do not contemplate the safeguarding of the life of the individual miner nor the promotion of the interests of the individual mine owner or operator, but seek the development of methods that will increase the safety of all miners and will promote the upbuilding and permanence of the whole mineral industry. Yet, although the advancement of the public welfare is the primary purpose of this work, it is obvious that broad fundamental inquiries and researches cannot fail to confer benefits on the individual miner and the individual mine owner. Hence, the function of the Bureau of Mines may be defined as the conducting of inquiries and investigations that have for their purpose the improvement of health conditions, and the increase of safety, efficiency, and economic development in the mining, quarrying, metallurgical and miscellaneous mineral industries of the country.

NUMBER OF MEN EMPLOYED AND NUMBER OF MEN KILLED AND INJURED IN THE MINERAL INDUSTRIES OF THE UNITED STATES DURING THE CALENDAR YEAR 1914 (EXCLUDING THE IRON BLAST FURNACES AND STEEL PLANTS).

Industry.	Number Employed.	Killed.		Seriously Injured.		Slightly Injured.	
		Total.	Per 1,000 Employed.	Total.	Per 1,000 Employed.	Total.	Per 1,000 Employed.
Coal mines.....	763,185	2,454	3.22	(a)	(a)	(a)	(a)
Metal mines.....	(c)	(c)	(c)	5,073	(c)	25,143	(c)
Quarries.....	87,936	180	2.05	1,289	14.66	6,547	74.45
Coke ovens.....	22,313	45	2.02	302	13.53	1,887	84.57
Smelting plants (b).....	26,960	33	1.22	1,015	37.65	4,658	172.77
Ore-dressing plants.....	14,501	23	1.59	223	15.38	1,211	83.51

In 1913 number employed in coal mines, 747,644; killed, 2,785; employed in metal mines, 193,088; killed, 683.

During the first six months of 1914 fatalities in and about coal mines were 1,295; for corresponding period in 1915, 1,035.

During the calendar year 1914 there were 2,454 men killed in and about the coal mines of the United States. Based on an output of 513,525,477 short tons of coal produced by 763,185 men, the number of men killed for every 1,000,000 tons of coal mined was 4.78, and the death rate per 1,000 employed was 3.22. In 1914 the number of men killed was 331 less than in 1913, representing a decrease of about 12 per cent. There were 209,261 tons of coal mined for each man killed in 1914, as compared with 204,685 in 1913.

During the year there were 11 mine disasters in which 5 or more men were killed, representing a total of 316 fatalities, as compared with 8 similar disasters in 1913, wherein 464 men were killed.

(a) Statistics concerning injuries in coal mines not collated since 1911. (b) Excluding iron blast furnaces. (c) Data not yet available.

NUMBER OF MEN KILLED IN AND ABOUT THE COAL MINES IN THE UNITED STATES IN THE CALENDAR YEARS 1909 TO 1914, INCLUSIVE, WITH DEATH RATES.

Years.	Number Killed.			Production per Death, Short Tons.	Years.	Number Killed.			Production per Death, Short Tons.
	Total.	Per 1,000 Employed.	Per 1,000,000 Short Tons Mined.			Total.	Per 1,000 Employed.	Per 1,000,000 Short Tons Mined.

The yearly tables show for the year ended June 30, 1914, the total number of casualties 202,964 (10,302 killed and 192,662 injured). Of this number, 409 killed and 113,274 injured were railroad employés, on railroad premises, by accidents in which the movement of cars or engines is not involved.

The number of passengers carried during the year ended June 30, 1914, was 1,053,138,718; 1913, 1,033,679,680; 1912, 994,158,591; 1911, 987,710,997. The passenger mileage or the number of passengers carried one mile in 1914 was 35,258,497,509; in 1913, 34,575,872,980; in 1912, 33,034,995,806.

RAILWAY MILEAGE IN THE UNITED STATES.*

(From Statistical Report of the Interstate Commerce Commission for year ended June 30, 1914.)

Total mileage in each State as follows: Alabama 5,406, Alaska (see foot note), Arizona 2,273, Arkansas 5,335, California 8,368, Colorado 5,739, Connecticut 999, Delaware 334, District of Columbia 36, Florida 5,119, Georgia 7,432, Hawaii (see foot note), Idaho 2,748, Illinois 12,139, Indiana 7,476, Iowa 9,994, Kansas 9,256, Kentucky 3,780, Louisiana 5,720, Maine 2,270, Maryland 1,429, Massachusetts 2,130, Michigan 8,933, Minnesota 9,039, Mississippi 4,441, Missouri 8,224, Montana 4,846, Nebraska 6,170, Nevada 2,418, New Hampshire 1,255, New Jersey 2,312, New Mexico 3,024, New York 8,530, North Carolina 5,418, North Dakota 5,160, Ohio 9,147, Oklahoma 6,397, Oregon 2,912, Pennsylvania 11,634, Rhode Island 205, South Carolina 3,686, South Dakota 4,238, Tennessee 4,105, Texas 15,758, Utah 2,098, Vermont 1,073, Virginia 4,611, Washington 5,246, West Virginia 3,915, Wisconsin 7,611, Wyoming 1,820.

Grand total mileage in U. S. in 1906, 224,363; in 1907, 229,951; in 1908, 233,467; in 1909, 236,834; in 1910, 240,293; in 1911, 243,979; in 1912, 246,776; in 1913, 249,776; in 1914, 252,230.

*Does not include mileage of switching and terminal companies. Mileage: in Alaska, 460 miles; in Hawaii, 245 miles.

RAILWAYS OF AMERICA "GROUPED" BY CAPITALISTS.

The great railroad systems of the United States have been reduced to a few "groups" by means of consolidation and reconsolidation. The following is a list of these groups, which comprise three-quarters of all the railroad lines of the country:

GROUPS.	Mileage.	Stocks.	Bonds.
Vanderbilt†	26,126	$628,924,000	$763,441,600
Pennsylvania	21,389	779,916,000	576,600,000
Harriman	22,716	756,600,000	1,098,775,410
Hill	14,183	417,527,000	432,812,000
Morgan	14,117	573,619,000	545,118,000
Gould	22,318	541,220,000	822,613,000
Moore-Reid	21,321	227,906,000	411,355,500
Rockefeller's	18,119	259,116,000	319,204,000
Walters's	11,914	150,116,000	204,119,000
Erb Syndicate	13,104	345,100,000	524,146,000
Independent	*41,921	798,108,000	564,966,500
Total	‡227,228	$5,478,152,000	$6,263,151,010

* In December, 1912, the U. S. Supreme Court held that ownership by the Oregon Short Line Railroad on behalf of the Union Pacific Railroad (controlled by the Harriman interests) of $126,650,000 of Southern Pacific Co. stock was in violation of the Sherman Antri-Trust law act, and Oregon Short Line has disposed of its interest in the Southern Pacific, which system is now an independent line.

† October 1, 1914, companies sold $40,000,000 one-year notes to a syndicate headed by J. P. Morgan & Co.

‡ October 1, 1915, eighty-two railways, operating 41,988 miles of line and with a total capitalization of $2,264,000,000, in hands of receivers. This is more than one-sixth of the railway mileage of the country.

OPERATIONS OF BRITISH RAILWAYS.

(Report of U. S. Vice-Consul-General, London.)

Government returns show that during 1913 the railways of the United Kingdom carried 1,228,316,000 passengers and 371,571,000 tons of freight. The passengers were divided into classes as follows: First, 26,025,000; second, 12,088,000; third, 933,498,000, and workmen, 256,705,000. The number of season-ticket holders is estimated to have been about 595,000.

The length of the lines, reduced to single track, was 55,438 miles. The gross receipts of the companies were $677,674,724, of which $277,044,978 was derived from passenger traffic, $324,191,630 from freight traffic, and $76,438,115 from other sources, mainly subsidiary businesses. The gross expenditure was $424,563,193, of which $383,494,799 was devoted to operating expenses, leaving a net income of $253,111,531.

The gross revenue and trading profit of the minor businesses are a matter of much interest and they are also shown:

ITEMS.	Gross Revenue.	Trading Profit.	ITEMS.	Gross Revenue.	Trading Profit.
Passenger road vehicles	$608,313	$14,599	Hotels and refreshment rooms and cars	$15,548,468	$2,705,774
Steamboats	12,550,703	705,642	Other businesses	554,781	379,587
Canals	5,358,016	1,708,142			
Docks, harbors and wharves	18,171,511	6,209,654	Total	$52,791,792	$11,723,398

Sir Edgar Speyer, presiding at a meeting September 19, 1914, of the underground electric railways in London, said 900,000,000 passengers had been carried without a single fatality since the opening of the tube and the electrification of the district railway.

NATIONAL RIVERS AND HARBORS CONGRESS.

THE objects of this congress shall be the collection and preparation of all obtainable data touching the scientific improvement, development and uses of the rivers and harbors of the nation; these data to include findings of the Board of United States Engineers and other scientific facts dealing with questions of waterway transportation and allied subjects.

To disseminate to as many of the people of the United States as possible the scientific knowledge collected and prepared, through the publications of this association, its news bureau and its field representatives—to the end that the people may be educated to the importance of waterway development, and that the greatest good to the greatest number may be had through the scientific improvement and maintenance of our lakes, rivers, harbors and canals for navigation and commerce.

The membership of this congress shall consist of commercial, manufacturing and kindred organizations, waterway improvement associations, corporations, companies, and individual citizens engaged or interested in commercial or industrial enterprises, who may subscribe to its Constitution and contribute to the support and prosecution of the objects of the congress. *President*—Hon. Joseph E. Ransdell, Lake Providence, La. *Secretary-Treasurer*—S. A. Thompson, Washington, D. C.

MANUFACTURES OF GREATER NEW YORK.

The Census Office in October, 1911, published the following tabular statement, giving aggregates regarding manufactures in Greater New York in 1909, compared with 1904:

	Boroughs of Manhattan and the Bronx.		Borough of Brooklyn.		Total, Greater New York.*	
	1909.	1904.	1909.	1904.	1909.	1904.
Number of establishments	19,769	15,975	5,218	4,182	25,938	20,839
Capital	$822,726,000	$620,526,000	$362,337,000	$313,452,000	$1,364,353,000	$1,042,946,000
Cost of materials used	$725,456,000	$507,030,000	$235,132,000	$230,809,000	$1,092,155,000	$818,029,000
Salaries and wages	$332,438,000	$238,839,000	$89,474,000	$68,056,000	$445,772,000	$321,155,000
Miscellaneous expenses	$206,789,000	$160,648,000	$46,855,000	$38,470,000	$266,034,000	$206,825,000
Value of products	$1,431,089,000	$1,043,252,000	$417,223,000	$373,463,000	$2,029,693,000	$1,526,523,000
Value added by manufacture (prod'cts less cost of materials)	$705,633,000	$536,222,000	$182,091,000	$142,654,000	$937,538,000	$708,494,000
Employés:						
Number of salaried officials and clerks	77,849	51,716	15,844	9,932	97,453	63,586
Average number wage earners employed during the year	399,792	339,221	123,883	104,995	554,002	464,716

* Including also the Boroughs of Queens and Richmond.

Only establishments conducted under the factory system were included in the census. Those distinguished as neighborhood, hand, and building industries, and small establishments having an annual product of less than $500 were excluded.

CORPORATION PENSIONS IN THE UNITED STATES.

THE following table shows the estimated number of employés on the following roads now having pension systems in force. In general all the roads here shown base their pensions on a percentage of the employé's wages, multiplied by the number of years that he has been in service. For example, the rate on the Pennsylvania is 1 per cent. A man having worked 40 years received a pension equal to 40 per cent. of his average salary for the 10 years preceding retirement. Most companies include in their rules a reservation of the right to vary the rate of pensions if the total requirements of any one year shall demand more than a predetermined gross amount. All of the companies in counting time include years of service under other companies bought by or consolidated with the present one. Short breaks in the service not due to any fault of the employé, or due to a minor fault involving suspensions, are generally overlooked.

COMPANY.	Total No. of Employés in Service of the Company.	No. of Employés on Pension Roll.	Amount Paid in Pensions in 1914.	No. of Years Employés Must Serve Before Receiving Pensions.	Age at Which Employé May Receive Pension.	Date Established.

* 25 for service, 15 for total disability. † When permanently disabled, any age. ‡ 65 for service, any age for disability. (a) 10, age limit; 20, disability. (b) When permanently incapacitated. (c) 61–70, 20 years; under 61, 25 years. (d) 65–69, if incapacitated. (e) 61–70, if incapacitated. (f) After 25 years' service, if incapacitated.

American Telephone and Telegraph Company (entire Bell system), with 155,978 employés, paid in 1914 to 184 pensioners the sum of $110,964.

The U. S. Steel Corporation dedicated $8,000,000 for a fund with which to pension superannuated and disabled employés. This fund has been consolidated with the $4,000,000 fund created by Andrew Carnegie after he sold out his holdings in the Carnegie Steel Company to the U. S. Steel Corporation. The fund is known as "The United States Steel and Carnegie Pension Fund."

The Western Union Telegraph Company, on January 1, 1913, established a Plan for Employés' Pensions, Disability Benefits and Insurance, setting aside a fund of $1,000,000 for the purpose. Pensions are classified according to age and length of service. The minimum pension is $20 per month, except when otherwise directed. In cases of disability from sickness, full pay and half pay are allowed for various periods, depending upon length of service; provision is also made for disability resulting from accidents and for life insurance benefits, the amount of insurance depending upon length of service.

ARMY LEAGUE OF THE UNITED STATES.

A committee decided to form an Army League of the United States, a non-partisan, patriotic society which shall represent no class or commercial interest and to which all citizens of the United States of good repute, both men and women, are eligible as members. Its purposes are, broadly speaking: (1) To collect and make public information respecting the condition, organization and equipment of the United States Army and the Organized Militia; (2) to make known the truth concerning them and the points wherein they require to be bettered, in order to constitute a military force such as the American Nation ought to possess; (3) to arouse public interest and to induce co-operation in all matters tending to aid, improve or develop the efficiency of the land forces of the United States, whether regular, militia, volunteer or reserve.

President—William C. Endicott. *Secretary*—Frederic L. Huidekoper. *Treasurer*—William B. Hibbs. *Office*—Wilkins Building, 1512 H Street, Washington, D. C.

The fastest time on record for a distance of over 440 miles was made by the Lake Shore and Michigan Southern R.R. from Buffalo to Chicago, in June, 1905, noted above. The fastest long-distance run less than 440 miles was on the New York Central R.R. September 11, 1895, from New York to Buffalo, 436 1-2 miles, in 407 minutes actual time. Average speed, 64 1-3 miles an hour, with two stops and 28 slow-ups, and on January 1, 1903, from Albany to Buffalo, 302 miles, in 295 minutes.

Among the fastest regular trains in the United States, for a shorter distance, are believed to be the New York Central "Empire State Express," between New York and Albany, 143 miles in 175 minutes, and the "Congressional Limited," on the Pennsylvania Railroad, which makes the run from Jersey City to Washington in 4 hours 46 minutes, a distance of 227 miles. The "Pennsylvania Special" over P. R. R., which runs from Jersey City to North Philadelphia, 84 miles in 83 minutes; from Jersey City to Harrisburg, Pa., 194 miles in 196 minutes. The "Royal Blue Line" from New York to Philadelphia (Reading Terminal) 91.1 miles in 1 hour 50 minutes. On November 25, 1913, a special train, consisting of a locomotive and two cars, ran from Washington, D. C., to Jersey City, 227 miles, in four hours, the fastest trip ever made between the two cities.

On August 15, 1898, on P. & R. and C. R. R. of N. J., "Royal Blue Line," between Elizabeth, N. J., and Jenkintown, a distance of 69 miles, in 61 minutes, including 2 slow-ups, some of the miles being traversed in 38 seconds.

Other notable long-distance fast runs: February 14-15, 1897—Pennsylvania Railroad and C., B. and Q., Jersey City to Denver, 1,937 miles, in 48 hours; average speed, 40.3 miles per hour. August 29-31, 1891—Canadian Pacific, Vancouver to Brockville, 2,802 miles, in 77 hours 9 minutes; average speed, 36.32 miles per hour.

The Jarrett and Palmer special theatrical train, Jersey City to Oakland (San Francisco), 3,311 miles, June, 1876, 83 hours 45 minutes; average speed, 39.53 miles per hour.

In October, 1905, the "Harriman Special" made the run from Oakland to Jersey City (3,239 miles) in 73 hours 12 minutes, or 44.30 miles per hour. In May, 1906, the "Harriman Special" made the run from Oakland, Cal., to New York City in 71 hours 27 minutes.

The "Scott Special" left Los Angeles, Cal., July 9, 1905, and arrived in Chicago (2,445.5 miles), July 11, having made the run in 44 hours 54 minutes, maintaining an average speed while in motion of 51 miles an hour.

On November 15, 1907, at Clayton, N. J., in a trial test on Pennsylvania R. R. between steam and electric locomotives, the steam engine made 93.6 miles an hour on a specially built seven mile curved track, while the electric locomotive made but 90 miles an hour.

A special train of an engine and two cars, which was run in January, 1911, to carry J. P. Morgan from Washington to New York over the Pennsylvania Railroad, made the trip of 226.8 miles in 3 hours 55 minutes and 30 seconds, or at the rate of 57.8 miles an hour. The speed over the New York division, West Philadelphia to New York, 90.5 miles, averaged 67 miles an hour.

In February, 1911, the "Gates Special," from Yuma, Ariz., to New York, 2,787 miles, made the run in 74 hours 19 minutes, or an average of 40.41 miles per hour, including stops. From Albany to New York the trip, 143 miles, was made in 143 minutes.

A remarkable record was made in the run of a silk train between Seattle and New York in October, 1911. The distance is 3,178 miles, and the time made 82¼ hours. The average speed all the way across the continent, including stops and a delay of more than two hours in switching at Chicago, was 38½ miles per hour.

SOME FOREIGN RAILWAY RUNS.

The Northern Railway runs a day express from Berlin to Paris, which covers the distance from Paris to St. Quentin (96¼ miles) in 93 minutes. The Eastern Railway Company has an afternoon express from Paris to Basel, which runs the first 104.37 miles in 107 minutes. The fastest train in Germany is the so-called "D-Zug 20" between Berlin and Hamburg, which maintains an average speed of 55.177 miles per hour. (U. S. Consular Report.)

RAILROAD EQUIPMENT.

*This is the largest and most powerful locomotive ever built and is the so-called Triplex Compound, which was built by the Baldwin Locomotive Works for the Erie Railroad and was completed in April, 1914. It is 105 feet long, weighs 853,050 pounds, and has actually hauled 251 fifty-ton fully loaded gondola cars, with a total train load weight of 35,824,000 pounds. It is capable of hauling a train of 640 freight cars of a total length of four and three-quarter miles and weighing 90,000,000 pounds. It is a new type of articulated locomotive and goes beyond the Mallet articulated type by the addition of another pair of cylinders and another group of driving wheels, making three complete engines in one locomotive unit. Each engine has four driving wheels on each side, the complete locomotive, therefore, having twelve driving wheels on each side, eight of which are under the locomotive itself and four under the tender. This Triplex locomotive has 89 per cent. of the total weight of the engine and tender on drivers. The large Mallet locomotives have but about 65 per cent. of the total weight on drivers. This locomotive is used for pusher service on the eight-mile grade of the Erie east of Susquehanna, Pa., which is a grade of 56 feet to a mile and the new locomotive handles the same weight of train up this grade that was formerly handled by two Consolidation and one Mallet engines.

†This is the heaviest non-articulated locomotive ever built.

‡ This is the most powerful class of Pacific type of locomotive built. They are in service on the Blue Ridge Mountains and haul trains of ten steel passenger cars, weighing a total of 674 tons, up a grade of 80-foot rise to the mile at a schedule speed of 25½ miles per hour.

§ These are now considered the standard locomotives for heavy freight and passenger service under ordinary conditions. The Mikado is replacing the old Consolidation locomotive in freight service. The Pacific type is for heavy fast passenger business.

¶ This is the largest passenger locomotive in Europe.

(c) Tractive Effort—This is the effort exerted by a locomotive in turning its wheels by the action of the steam against the pistons which, through the media of the crossheads, rods, etc., causes them to revolve and the locomotive to move along the rails. The drawbar pull which a locomotive actually exerts at any given time depends upon its speed upon grades and other things. The formula for a simple locomotive for the tractive effort is

$$T \frac{0.85\,P \times C^2 \times S}{D}$$

where T = tractive effort in pounds, P = boiler pressure in pounds per square inch, C = diameter of cylinders in inches, S = stroke of piston in inches, D = diameter of driving wheels in inches.

Grain embraces wheat flour reduced to equivalent in wheat, corn, rye, oats, barley, malt and peas. Receipts at New York, Portland, Boston, Philadelphia and Baltimore include shipments from the West to foreign countries through these ports on through bills of lading. Receipts at Portland via Montreal are duplications of receipts reported at Montreal. Receipts at Baltimore include flour ground by city millers, and therefore duplicate an equivalent quantity of wheat received in grain.

ALASKA RAILROAD.

On April 10, 1915, President Wilson announced the selection of the route for the Alaska railroad to be built by the Government.

The route adopted is known as the Susitna route, and extends from Seward, on Resurrection Bay, to Fairbanks, on the Tanana River, a distance of 471 miles. This route includes the existing Alaska Northern Railroad, which runs from Seward through the Kenai Peninsula for a distance of seventy-one miles to Turnagain Arm, and it is to be bought from its present owners by the Government for $1,150,000. The contract for the purchase of this road was signed by Secretary Lane of the Interior Department.

From Turnagain Arm the route is to be extended through the Susitna Valley and across Broad Pass to the Tanana River, and from there on to Fairbanks. It is to be a standard-gauge road. A side line is to run from Matanuska Junction into the Matanuska coal field, a distance of thirty-eight miles. The road is to be built with its present base at Ship Creek, on Cook's Inlet. The grade from the Matanuska field to Ship Creek is four-tenths of 1 per cent.

The Alaska Northern is to be put into operative condition and will be used as a base for extending the line along Turnagain Arm. Under the contract approved by the President the road is taken over free from all debt or obligation of any kind.

The estimated cost of construction of this line from Seward to Fairbanks, including the Matanuska Branch, is $26,800,000. The President has made an order directing that the work be carried on by the Alaskan Engineering Commission.

(*a*) Including Queensborough. (*b*) Including Birkenhead. (*c*) Including Runcorn. (*d*) Tyne ports comprise Newcastle, North Shields, and South Shields. (*e*) Exclusive of trade with other countries of the German Empire. (*f*) Years ending June 30; figures are for customs districts as of the fiscal year 1914. (*h*) Year ending March 31. (*i*) Direct foreign trade, exclusive of re-exports. (*j*) Inclusive of intercolonial trade, but not treasure. (*k*) Merchandise only, exclusive of Government stores.

KNOWLEDGE OF CONSULAR LAW NEEDED IN TRADE WITH FOREIGN COUNTRIES.

(Bureau of Foreign and Domestic Commerce Bulletin, September 23, 1915.)

AN understanding of the main principles of the customs and consular regulations of the United States affecting imports and exports will enable the American exporter to look at the question of the rules prevailing in other countries from the foreign point of view, and to avoid the tendency to consider every foreign consular regulation as mere red tape and imposition, in the view of the Bureau of Foreign and Domestic Commerce, Department of Commerce, which has made a close study of the problems to be solved by those engaged in selling American goods.

It has been found, for instance, that the exporter to Latin-American countries is apt to grumble considerably at having to fill out the many details on his consular invoice, but is often unaware that just as many, if not more details are required by the United States in American consular invoices.

It is pointed out that one of the main requisites for a good all-round export man is a thorough knowledge of such regulations, especially those affecting the Republics of Central and South America. In order thoroughly to grasp these regulations, the student should analyze the purpose for which they are promulgated. He will find that the main objects are two, in all countries. The fees exacted for consular certification are largely for the upkeep of the consulates in the various cities and for the remuneration of the consular officers. The bulk of the regulations, however, are made and enforced in order to comply with and carry out the import customs requirements of the countries of destination, each country naturally having its own customs laws and provisions.

In advocating a mastery of American requirements as preliminary to a proper understanding of those of foreign lands, the Bureau of Foreign and Domestic Commerce mentions a few of the details which have been found to be of importance. Any brief statement, however, must of necessity be a kind of bibliography to be studied by the commercial student at his leisure, and to be enlarged upon by him according to the particular subject that may really be of interest to him.

For all goods imported into the United States amounting to $100 or more, there must be taken out a consular invoice, which must be certified by the United States Consul at the point of sale, manufacture, or shipment of the merchandise. The fee for each certification is $2.50. Three copies of the consular invoice are usually made out. The original copy is retained by the Consul for his files, a duplicate is given to the exporter, stamped with the official seal of the Consul and bearing the revenue stamp of $2.50; a triplicate is forwarded by the Consul to the Collector of Customs at the port to which the goods are consigned, and sometimes a quadruplicate is given to the shipper as an extra file copy.

There are two forms of consular invoices—one a blue form for showing when goods have been purchased outright and are the property of the consignee, and a white form issued when the goods are sent to the United States on consignment and are still the property of the shipper.

On arrival in the American port, the shipment has to be entered within forty-eight hours of the official entry of the vessel at the Custom House. Goods not entered within forty-eight hours are sent to the general order warehouse as unclaimed, often entailing heavy storage and cartage expenses.

Several kinds of entries can be made. If goods are free of duty or if they are needed for immediate consumption, an import or consumption entry is made. If they are not needed immediately a warehouse entry is made and goods are stored in warehouse, to be withdrawn at a later date in one or more package lots. Parts of packages cannot be withdrawn from bond.

Another entry is an I. T. (immediate transportation) entry, which means that goods are shipped through to another city of the United States in bond (in sealed cars), and that the required entry will be made by the ultimate consumer or his agent in that city.

Forms or blanks approved by the Treasury Department must be used in clearing merchandise. When properly filled out by the importer or his representative, they are filed with the consular invoice and bill of lading in the Custom House, and duty is assessed at the appropriate rates, gauged from the invoice description. A portion of the consignment is designated by the Collector's representative for examination by the appraiser, and the balance of the shipment is delivered to the importer. If the appraiser finds that the goods are correct in value and invoice description, and there are no other facts known to the authorities which lead them to doubt the correctness of the invoice in general, the entire consignment is considered as released and the importer secures a delivery permit for the portion retained for examination.

Should the appraiser desire to examine any other cases than those preliminarily examined, he orders the additional cases to the appraiser's warehouse, under the conditions of a bond given by the importer at the time of entry.

In the matter of merchandise which the importer wishes placed in Government bonded warehouse, the same form as to examination is followed, the difference being that the duty is not paid until the importer desires to secure actual delivery, and he then files what is known as a "duty paid without entry." In the case of such a warehouse entry, a bond is given by the importer and his agents guaranteeing that the goods warehoused will be withdrawn from bond and duty paid on them or that they will be exported within three years from date of entry.

Duties paid at time of entry are considered a deposit only and the entire entry is subject to review and liquidation, which is made after the appraiser has taken action on the invoice. Appeals from the action of the appraiser are of two kinds—one an appeal from his valuation, the other from the duty suggested by him. These appeals are heard by a Board of General Appraisers, and in certain cases by the United States Court of Customs Appeals at Washington.

MANUFACTURES IN THE UNITED STATES.

(From Census Bureau's Summary for 1909, issued April, 1912.)

Statement of the general results of the Thirteenth United States Census of Manufactures.

SUMMARY FOR THE UNITED STATES FOR 1909.*

	Census.		Per Cent. of Increase, 1904 to 1909.
	1909.	1904.	
Number of establishments	268,491	216 180	24.2
Persons engaged in manufactures	7,678,578	6,213,612	23.6
Proprietors and firm members	273,265	225,673	21.1
Salaried employés	790,267	519,556	52.1
Wage-earners (average number)	6,615,046	5,468,383	21.0
Primary horse-power	18,680,776	13,487,707	38.5
Capital	$18,428,270,000	$12,675,581,000	45.4
Expenses	$18,453,080,000	$13,138,260,000	40.5
Services	$4,365,613,000	$3,184,884,000	37.1
Salaries	$938,575,000	$574,439,000	63.4
Wages	$3,427,038,000	$2,610,445,000	31.3
Materials	$12,141,791,000	$8,500,208,000	42.8
Miscellaneous	$1,945,676,000	$1,453,168,000	33.9
Value of products	$20,672,052,000	$14,793,903,000	39.7
Value added by manufacture (value of products less cost of materials)	$8,530,261,000	$6,293,695,000	35.5

*Not including Alaska, Hawaii or Porto Rico.

MANUFACTURES BY INDUSTRIES.*

Industries.	Average Number of Wage-Earners.	Value of Products.	Value Added by Manufacture.	Per Cent. Increase in Ten Years. (a)	(b)
Slaughtering and packing	89,728	$1,370,568,000	$168,740,000	29.5	73.8
Foundries and machine shops	531,011	1,228,475,000	688,464,000	24.4	53.9
Lumber and timber	695,019	1,156,129,000	648,011,000	36.6	51.9

Automobiles	75,721	249,202,000	117,556,000	3278.9	5148.6
Furniture	128,452	239,887,000	131,112,000	41.8	83.6
Petroleum refining	13,929	236,998,000	37,725,000	14.2	91.2
Electrical machinery	87,256	221,309,000	112,743,000	107.7	139.4
Liquors, distilled	6,430	204,699,000	168,722,000	72.8	111.5
Hosiery and knit goods	129,275	200,144,000	89,903,000	54.5	108.8
Copper, tin and sheet iron	73,615	199,824,000	87,242,000	92.1	155.0
Silk and silk goods	99,037	196,912,000	89,145,000	51.4	83.6
Lead, smelting and refining	7,424	167,406,000	15,443,000	†10.8	4.6
Gas, illuminating and heating	37,215	166,814,000	114,386,000	65.7	120.3
Carriages and wagons	69,928	159,893,000	77,942,000	†5.3	15.6
Canning and preserving	59,968	157,101,000	55,278,000	5.2	58.2
Brass and bronze	40,618	149,989,000	50,761,000	49.5	69.2
Oil, cottonseed	17,071	147,868,000	28,035,000	55.1	151.8
Agricultural implements	50,551	146,329,000	86,022,000	8.5	44.6
Patent medicines	22,895	141,942,000	91,566,000	20.3	59.9
Confectionery	44,638	134,796,000	53,645,000	66.2	122.3
Paint and varnish	14,240	124,889,000	45,873,000	46.8	79.5
Cars, steam railroad	43,086	123,730,000	44,977,000	28.8	36.7
Chemicals	23,714	117,689,000	53,567,000	24.7	87.6
Marble and stone work	65,603	113,093,000	75,696,000	57.4	77.6
Leather goods	34,907	104,719,000	44,692,000	19.2	73.3
All other industries	1,634,927	4,561,002,000	2,084,399,000	46.9	100.7
All industries, total	6,615,046	$20,672,052,000	$8,530,261,000	40.4	81.2

*In the year 1909. (a) Increase in average number of wage-earners, 1899-1909. (b) Increase in value of products, 1899-1909. † Decrease.

In the above table the industries are arranged in the order of their gross value of products. Some of the industries which hold a very high rank in gross value of products rank comparatively low in the average number of wage-earners employed and in the value added by manufacture. Where this is the case it indicates that the cost of materials represents a large proportion of the total value of products, and that therefore the value added by manufacture, of which wages constitute usually the largest item, is not commensurate with the total value of products.

STATISTICS OF MANUFACTURING IN THE UNITED STATES.*

State.	Number of Establishments.	Persons Engaged in Industry. Total.	Proprietors, Officials and Clerks.	Average Number of Wage-Earners.	Capital.	Salaries	Wages.	Cost of Materials.	Value of Products.	Value Added by Manufacture.†

For 1915, automobiles and parts of automobiles exported were $68,107,818; paraffin and paraffin wax, $10,589,843; manufactures of tobacco, $6,468,688; manufactures of wool, $27,327,451.

WORKERS IN THE UNITED STATES, BY AGE AND COLOR OR RACE.

(From a report of the Bureau of Census, July 9, 1914.)

MORE than eight in every ten (81.3 per cent.) males ten years of age and over in the United States in 1910 were engaged in gainful occupations, according to the figures presented in the Report on Occupations issued by the Director of the Census. In the tabulation of occupations for this report all gainful workers were distributed in the following five age periods: Ten to thirteen years, fourteen to fifteen, sixteen to twenty, twenty-one to forty-four (including age unknown), and forty-five years and over. In the lowest age period, ten to thirteen years, the proportion of males gainfully occupied was one in six (16.6 per cent.); in the next age period, fourteen to fifteen, the proportion more than doubled, being over two in each five (41.4 per cent.); and in the age period sixteen to twenty the proportion increased to almost four in five (79.2 per cent.). The proportion was highest for the age period twenty-one to forty-four years (including persons of unknown age). In this age period 96.7 per cent. of the males were gainfully occupied; or stated otherwise, only 3.3 men out of every 100 in this age group were without gainful occupation in 1910. In the highest age period, forty-five years and over, the proportion of males gainfully occupied was 85.9 per cent.

The proportion of all males ten years of age and over engaged in gainful occupations was slightly larger in 1910 than in 1900, but this increase was confined to two age periods, sixteen to twenty and twenty-one to forty-four. In each of the other age periods the proportion of gainful workers was smaller in 1910 than in 1900, the decrease being greatest for the age period fourteen to fifteen.

Of the females ten years of age and over, 23.4 per cent. were engaged in gainful occupations in 1910. The proportion was 8 per cent. in the age period ten to thirteen; 19.8 per cent. in the age period fourteen to fifteen; 39.9 per cent. in the age period sixteen to twenty; 26.3 per cent. in the age period twenty-one to forty-four; and 15.7 per cent. in the age period forty-five years and over. The large proportion of the females sixteen to twenty years of age engaged in gainful occupations is accounted for by the fact that in this age period all the females are old enough to work, and matrimony has had little effect in decreasing the number of workers.

There was a marked increase from 1900 to 1910 in the proportion of all females ten years of age and over engaged in gainful occupations, or from 18.8 to 23.4 per cent. In each age period also the proportion of the gainful workers was considerably larger in 1910 than in 1900.

COLOR OR RACE OF WORKERS.

Of the 30,091,564 gainfully occupied males in the United States in 1910, 14,855,825 were native whites of native parentage, 5,285,811 native whites of foreign or mixed parentage, 6,588,711 foreign-born whites, 3,178,554 negroes, and 182,663 Indians, Chinese, Japanese, and all other. The proportion which the gainfully occupied males formed of all males ten years of age and over in each principal class of the population was, for native whites of native parentage, 78.5 per cent.; native whites of foreign or mixed parentage, 76.5 per cent.; foreign-born whites, 90 per cent.; negroes, 87.4 per cent.; and Indians, Chinese, Japanese, and all other, 80.8 per cent.

Native white males of native parentage formed 49.4 per cent. of the male gainful workers, as compared with 51.1 per cent. of all males ten years of age and over; while the corresponding percentages for native white males of foreign or mixed parentage were 17.6, as compared with 18.7 per cent.; for foreign-born white males, 21.9, as compared with 19.8 per cent.; and for negro males, 10.6, as compared with 9.8 per cent.

Of the 8,075,772 gainfully occupied females, 3,098,639 were native whites of native parentage, 1,722,279 native whites of foreign or mixed parentage, 1,222,791 foreign-born whites, 2,013,981 negroes, and 18,082 Indians, Chinese, Japanese, and all other. The proportion which the gainfully occupied females formed of all females ten years of age and over in each principal class of the population was, for native whites of native parentage, 17.1 per cent.; native whites of foreign or mixed parentage, 24.6 per cent.; foreign-born whites, 21.7 per cent.; negroes, 54.7 per cent.; and Indians, Chinese, Japanese, and all other, 17.6 per cent.

Native white females of native parentage formed 38.4 per cent. of the female gainful workers, as compared with 52.5 per cent. of all females ten years of age and over; while the corresponding percentages for native white females of foreign or mixed parentage were 21.3, as compared with 20.3 per cent.; for foreign-born white females, 15.1, as compared with 16.3 per cent; and for negro females, 24.9, as compared with 10.7 per cent.

CHILD WORKERS.

There were 1,990,225 children of both sexes, ten to fifteen years of age, engaged in gainful occupations in 1910, or 18.4 per cent. of the total number of children of that age group. The males numbered 1,353,139, and the females 637,086. In 1900 1,750,178, or 18.2 per cent. of the children ten to fifteen years of age were engaged in gainful occupations; and in 1880 1,118,356, or 16.8 per cent., of them.

The increase from 1900 to 1910 in the number, and hence in the proportion, of all children ten to fifteen years of age engaged in gainful occupations was confined to children engaged in agricultural pursuits, where the increase was 369,283, or 34.8 per cent., for both sexes; 166,394, or 19.5 per cent., for the males; and 202,889, or 97.9 per cent., for the females. There was a marked decrease from 1900 to 1910 in the number of children ten to fifteen years of age engaged in non-agricultural pursuits. This decrease was 129,236, or 18.8 per cent., for both sexes; 77,666, or 19 per cent., for the males and 51,570, or 18.5 per cent., for the females.

OCCUPATIONS—NEW YORK CITY SUMMARY.

(Bureau of Census Report of September, 1914.)

According to the Report on Occupations issued by the Director of the Bureau of the Census there were 2,152,433 persons ten years of age and over in New York City engaged in gainful occupations in 1910. The gainful workers thus formed 45.2 per cent. of the total population of the city (4,766,883) and 56.3 per cent. of the population ten years of age and over (3,821,540). In 1900 the 1,469,908 gainful workers of the city formed 42.8 per cent. of the total population and 54.7 per cent. of the population ten years of age and over.

The male gainful workers in 1910 numbered 1,566,240, or 82.1 per cent. of all males ten years of age and over, as compared with 1,102,471, or 83 per cent., in 1900. The female gainful workers in 1910 numbered 586,193, or 30.6 per cent. of all females ten years of age and over, as compared with 367,437, or 27.1 per cent., in 1900.

DISTRIBUTION OF WORKERS.

The 2,152,433 gainful workers in 1910 were distributed among the main branches of occupations as follows: Agriculture, forestry, and animal husbandry, 9,950, or 0.5 per cent.; extraction of minerals, 886, or less than one-tenth of 1 per cent.; manufacturing and mechanical industries, 873,497, or 40.6 per cent.; transportation, 169,834, or 7.9 per cent.; trade, 361,053, or 16.8 per cent.; public service, 41,004, or 1.9 per cent.; professional service, 127,395, or 5.9 per cent.; domestic and personal service, 333,954, or 15.5 per cent.; and clerical occupations, 234,860, or 10.9 per cent.

SEX OF WORKERS.

Of the gainful workers in 1910, 1,566,240, or 72.8 per cent., were males and 586,193, or 27.2 per cent., females. In agriculture, forestry, and animal husbandry the males numbered 9,455, or 95 per cent., and the females 495, or 5 per cent. Nearly all—848, or 95.7 per cent.—of the persons engaged in the extraction of minerals were males. In manufacturing and mechanical industries 665,538, or 76.2 per cent., of the workers were males and 207,959, or 23.8 per cent., females. Males constituted 94.8 per cent. of the 169,834 persons engaged in transportation, 85.9 per cent. of the 361,053 persons engaged in trade, and 99.2 per cent. of the 41,004 persons engaged in public service. In professional service 78,972, or 62 per cent., of the workers were males and 48,423, or 38 per cent., females, a large proportion of the females being school teachers. Domestic and personal service was the only large field of occupations in which the females outnumber the males. Here females numbered 191,152, or 57.2 per cent., and males 142,802, or 42.8 per cent., of the workers. Of the persons pursuing clerical occupations, 156,836, or 66.8 per cent., were males and 78,024, or 33.2 per cent., females.

COLOR OR RACE OF WORKERS.

Of the 1,566,240 gainfully occupied males in 1910, 255,393 were native whites of native parentage, 415,926 native whites of foreign or mixed parentage, 856,650 foreign-born whites, 33,110 negroes, and 5,161 other colored. The proportion which the gainfully occupied males formed of all the males ten years of age and over in each principal class of the population was: For native whites of native parentage, 75.5 per cent.; for native whites of foreign or mixed parentage, 72.2 per cent.; for foreign-born whites, 90 per cent.; and for negroes, 90.7 per cent.

Of the 586,193 gainfully occupied females in 1910, 93,266 were native whites of native parentage, 189,739 native whites of foreign or mixed parentage, 276,648 foreign-born whites, 26,352 negroes, and 188 other colored. The proportion which the gainfully occupied females formed of all the females ten years of age and over in each principal class of the population was: For native whites of native parentage, 26.8 per cent.; for native whites of foreign or mixed parentage, 30.7 per cent.; for foreign-born whites, 30.6 per cent.; and for negroes, 60.7 per cent.

AGE OF WORKERS.

The gainfully occupied males in 1910 were distributed according to age periods as follows: Ten to thirteen years, 712; fourteen to fifteen years, 20,696; sixteen to twenty years, 189,497; twenty-one to forty-four years and age unknown, 1,012,631; and forty-five years and over, 342,704. The proportion which the gainfully occupied males formed of all males in each age period was: For those ten to thirteen years of age, 0.4 per cent.; for those fourteen to fifteen years of age, 25.9 per cent.; for those sixteen to twenty years of age, 84.2 per cent.; for those twenty-one to forty-four years of age, 97.3 per cent.—that is, all but three men in every 100 had gainful occupations—and for those forty-five years of age and over, 87.1 per cent.

The gainfully occupied females in 1910 were distributed according to age periods as follows: Ten to thirteen years, 622; fourteen to fifteen years, 16,539; sixteen to twenty years, 171,780; twenty-one to forty-four years and age unknown, 330,738; and forty-five years and over, 66,514. The proportion which the gainfully occupied females formed of all females in each age period was: For those ten to thirteen years of age, 0.4 per cent.; for those fourteen to fifteen years of age, 20.2 per cent.; for those sixteen to twenty years of age, 65.8 per cent.; for those twenty-one to forty-four years of age, 32.9 per cent.; and for those forty-five years of age and over, 16.8 per cent.

NUMBER OF CHILDREN AT WORK.

In New York City in 1910 there were 21,408 males and 17,161 females ten to fifteen years of age engaged in gainful occupations; or, stated otherwise, 8.6 per cent. of the males and 6.8 per cent. of the females ten to fifteen years of age were gainful workers. In 1900 there were 29,871 males and 22,868 females ten to fifteen years of age engaged in gainful occupations.

PRINCIPAL OCCUPATIONS IN NEW YORK CITY.

The principal occupations followed by the males and the females, respectively, in New York City in 1910 were as follows:

MALES.

Actors	4,207	Draymen, teamsters, and expressmen	39,776
Agents, canvassers, and collectors	8,099	Electricians and electrical engineers	15,512
Apprentices	7,045	Elevator tenders	7,554
Artists, sculptors, and teachers of art	4,016	Engineers (stationary)	14,898
Bakers	13,312	Firemen (except locomotive & Fire Dept.)	7,320
Barbers, hairdressers, and manicures	16,210	Firemen (Fire Department)	4,447
Bartenders	12,519	Foremen and overseers (manufacturing)	7,924
Blacksmiths	7,922	Guards, watchmen, and doorkeepers	8,522
Bookkeepers, cashiers, and accountants	33,795	Hostlers and stable hands	5,342
Brick and stone masons	15,804	Insurance agents and officials	8,004
Builders and building contractors	15,000	Janitors and sextons	9,039
Carpenters	41,442	Laborers:	
Chauffeurs	9,255	General and not specified	35,501
Clerks (except clerks in stores)	87,813	Helpers in building and hand trades	5,752
Clerks in stores	34,629	Road and street building and repairing	16,618
Commercial travellers	10,915	Public service	4,788
Compositors, linotypers, and typesetters	16,826	Steam railroad	7,453
Conductors (street railroad)	5,216	Laborers, porters, and helpers in stores	11,873
Deliverymen	22,127	Laundry operatives	4,143

OCCUPATIONS—NEW YORK CITY SUMMARY—*Continued.*

MALES—*Continued.*

Lawyers, Judges, and Justices	10,563	Sailors and deck hands	4,743
Longshoremen and stevedores	17,165	Salesmen (stores)	66,445
Machinists and millwrights	24,709	Saloonkeepers	4,204
Mail carriers	4,267	Semi-skilled operatives:	
Managers and superintendents (manufg.)	7,664	Cigar and tobacco factories	9,995
Manufacturers and officials	35,806	Furniture, piano, and organ factories	6,368
Messenger, bundle, and office boys	20,787	Printing and publishing	7,689
Motormen	6,118	Shoe factories	5,408
Musicians and teachers of music	9,342	Suit, coat, cloak, and overall factories	19,116
Painters, glaziers, and varnishers (buildg.)	27,133	Servants	26,578
Painters, glaziers, and varnishers (factory)	4,797	Sewers & sewing machine operators (fact'y)	38,003
Physicians and surgeons	8,241	Shoemakers and cobblers (not in factory)	8,108
Plasterers	6,388	Soldiers, sailors, and marines	4,573
Plumbers and gas and steam fitters	19,564	Stenographers and typewriters	6,342
Policemen	10,689	Tailors	49,276
Porters (except in stores)	13,834	Teachers (school)	5,641
Real estate agents and officials	12,811	Tinsmiths	5,388
Restaurant, café, and lunchroom keepers	5,583	Waiters	20,659
Retail dealers	107,329	Wholesale dealers, importers, & exporters	7,762

FEMALES.

Actresses	3,759	Musicians and teachers of music	5,804
Barbers, hairdressers, and manicurists	3,864	Retail dealers	7,799
Boarding and lodging house keepers	6,707	Saleswomen (stores)	27,761
Bookkeepers, cashiers, and accountants	21,613	Semi-skilled operatives:	
Charwomen and cleaners	4,692	Cigar and tobacco factories	8,751
Clerks (except clerks in stores)	19,409	Paper box factories	3,011
Clerks in stores	9,947	Printing and publishing	6,889
Dressmakers & seamstresses (not in fact'y)	38,850	Silk mills	3,303
Forewomen & overseers (manufacturing)	3,302	Servants	113,409
Housekeepers and stewardesses	7,522	Sewers & sewing machine operators (fact'y)	65,042
Janitors and sextons	10,454	Stenographers and typewriters	33,769
Laundresses (not in laundry)	17,823	Tailoresses	6,002
Laundry operatives	5,874	Teachers (school)	21,683
Messenger, bundle, and office girls	2,664	Telephone operators	7,362
Midwives and nurses (not trained)	9,709	Trained nurses	7,504
Milliners and millinery dealers	12,096	Waitresses	8,958

For table of Occupations in the United States see 1915 Almanac, pages 242-245.

UNITED STATES FOR FIRST TIME LEADS WORLD IN EXPORTS.

(Bureau of Foreign and Domestic Commerce Bulletin, August 27, 1915.)

For the first time in its history the United States leads the world as an exporter. Occasionally we have surpassed the United Kingdom in the exportation of domestic products, but it was only in the fiscal year ended June 30, 1915, that our total exports, domestic and foreign, exceeded those of the United Kingdom. Our total exports in the fiscal year 1915, according to an official statement of the Bureau of Foreign and Domestic Commerce, Department of Commerce, aggregated $2,768,600,000, as against $2,170,100,000 for the United Kingdom, the figures representing in the case of the United States an increase of 17 per cent. and in the case of the United Kingdom a decrease of 30 per cent. when compared with preceding year.

American exports in the fiscal year 1915 included domestic products to the value of $2,716,200,000, against $2,329,700,000 in 1914; and foreign products, $52,400,000, against $34,900,000 in the preceding year. British exports in the same periods included British and Irish produce, $1,744,100,000 in 1915, against $2,557,-200,000 in 1914; and foreign and colonial produce $426,000,000 in 1915, compared with $526,500,000 in 1914. The following table, from official reports on file in the Bureau of Foreign and Domestic Commerce, reviews the growth of exports from the United States and the United Kingdom at twenty-year intervals during the past century:

Years.	American Exports.	*British Exports.	Years.	American Exports.	*British Exports.
1815	$50,000,000	$285,300,000	1875	$513,400,000	$1,370,500,000
1835	115,000,000	443,600,000	1895	807,500,000	1,391,000,000
1855	218,900,000	567,900,000	1915	2,768,600,000	2,170,100,000

* Years ended December 31, except 1915, which relates to the year ended June 30.

The great industrial development of the United States during the century is illustrated by the increase in exports of manufactures. In 1821, the earliest year for which figures are available, exports of manufactures were valued at $8,000,000; in 1915 they aggregated $1,166,000,000 exclusive of foodstuffs.

WOMAN'S NATIONAL "MADE IN U. S. A." LEAGUE.

In enrolling, members sign the following:

"I pledge myself, for the welfare of my country, while the war lasts, to demand and buy, wherever possible, everything made in the United States and urge my friends to do likewise."

Among the Honorary Chairwomen and patrons are Mrs. John M. Slaton of Georgia, Mrs. Luther E. Hall of Louisiana Mrs. William C. Story, Mrs. Lindley M. Garrison, Mrs. Marcellus H. Thompson, Mrs. James R. Mann, Mrs. Victor Murdock of Kansas, Mrs. William C. Redfield, Mrs. David B. Houston, Mrs. William B. Wilson, Mrs. James H. Preston of Baltimore, Mrs. Daisy McLaurin Stevens, and Mrs. Thomas A. Edison. Headquarters, Washington, D. C.

THE DEPARTMENT STORE EDUCATION ASSOCIATION.

The aim of the Department Store Education Association is to put salesmanship on the basis of a skilled occupation, to set higher standards of service in the department store and to devise methods by which the saleswoman may gain a broader knowledge of her work and its relation to the store and to the community. The association has studied the special work of a large number of store departments and has conducted departmental classes in stock and materials, manufacture and principles of color and design, as well as science and art of salesmanship. Lectures in hygiene have been a part of the schedule and evening gymnasium classes have been organized. Physical examinations have been made and corrective exercises arranged.

President—Miss Anne Morgan. *First Vice-President*—Mrs. Henry Ollesheimer. *Secretary*—Mrs. Robert G. Mead. *Treasurer*—Mrs. Roswell Skeel. *Educational Director*—Miss Beulah E. Kennard. Headquarters, 105 West Fortieth Street, New York City.

WORKMEN'S COMPENSATION LAWS OF STATES AND TERRITORIES.

(Report of Bureau of Labor Statistics, U. S. Department of Labor.)

In order to facilitate the study and comparison of the Compensation laws of the various States, they are analyzed in the following pages according to a uniform outline designed to show clearly the most important features of the several plans.

ALASKA.

DATE OF ENACTMENT—April 29, 1915; in effect July 28, 1915.

INJURIES COMPENSATED—Personal injury causing disability for more than two weeks, or death, arising out of and in course of employment, not due to the employee's wilful intention to injure himself or another, or to his intoxication.

INDUSTRIES COVERED—Mining operations in which five or more persons are employed, unless election to the contrary is made (includes development and construction work, stamp and roller mills, reduction work and processes, coke ovens, etc.).

PERSONS COMPENSATED—Private employment: All employees in industries covered, contractors and sub-contractors excluded. Public employment: Not included.

BURDEN OF PAYMENT—All on employer.

COMPENSATION FOR DEATH:

(a) If married, $3,000 to widow, $600 additional to each child under sixteen years of age, and to dependent parent or parents if any; if no widow, $3,000 to any minor orphans, and $600 additional to any under sixteen; no total to exceed $6,000.

(b) If unmarried, and dependent parent or parents, $1,200 to each.

(c) If no dependents, funeral expenses not to exceed $150, and other expenses, if any, to same amount.

COMPENSATION FOR DISABILITY:

(a) Total permanent, $3,600 to workman alone; $1,200 additional if wife is living; $600 additional for each child under sixteen; total not to exceed $6,000. If no wife or children, $600 to each dependent parent.

(b) Total temporary disability, 50 per cent. of weekly wages for not over six months.

(c) Partial permanent disability, fixed sums for specified injuries, varying with conjugal condition and number of children.

REVISION OF BENEFITS—Readjustment must be made if within two years an injury develops or proves to be such as to warrant a different award from any previously made.

INSURANCE—No provision.

SECURITY OF PAYMENTS—Attachment may be had pending result of action, or employer may deposit cash or bond with court. Payments are exempt from execution.

SETTLEMENT OF DISPUTES—By courts, either with or without jury trial.

ARIZONA.

DATE OF ENACTMENT—June 8, 1912; in effect September 1, 1912; new act May 13, 1913; in effect October 1, 1913.

INJURIES COMPENSATED—All accidental injuries causing disability of at least two weeks, or death, arising out of and in the course of the employment, caused in whole, or in part, or contributed to, by a necessary risk or danger of, or inherent in the nature of the employment, or by failure of the employer or his agents to exercise due care or to comply with any law affecting the employment.

INDUSTRIES COVERED—All especially dangerous employments, including the construction, operation and maintenance of steam and street railroads, using or working near explosives, building work using iron or steel frames or hoists, derricks, or ladders or scaffolds twenty or more feet above ground; telegraph, telephone or other electrical work; work in mines, quarries, tunnels, subways, etc.; all mills, shops and factories using power machinery. Industries declared especially dangerous are specified in law. Elective as to other industries.

PERSONS COMPENSATED—Private employment: All employees in industries covered. Public employment: No provision.

BURDEN OF PAYMENT—Entire cost rests upon the employer.

COMPENSATION FOR DEATH:

(a) To persons wholly dependent, a lump sum equal to 2,400 times one-half the daily wages or earnings of the deceased employee, but not to exceed $4,000. Payments to children cease on reaching the age of eighteen years.

(b) If no dependents, the reasonable expenses of medical attendance and burial of deceased employee.

COMPENSATION FOR DISABILITY:

(a) For total disability, 50 per cent. of the employee's semi-monthly earnings during the time he is unable to work at any gainful occupation.

(b) For partial disability, a semi-monthly payment equal to one-half the wage decrease.

(c) The total amount of payments for total or partial disability caused by a single injury not to exceed $4,000.

REVISION OF BENEFITS—Examinations as to the nature of injury and degree of incapacity, etc., may be required by either party at intervals of not less than three months.

INSURANCE—The employer may insure provided the liability for compensation is not less than the compensation fixed by law.

SECURITY OF PAYMENTS—A judgment for compensation issued by a court is collectible without relief from valuation or appraisement laws and has the same preferential claim as is allowed by law for unpaid wages or personal services.

SETTLEMENT OF DISPUTES—Disputes may be settled by (a) written agreement between the parties, (b) arbitration, or (c) by reference to the Attorney-General of the State, in case of failure or refusal to agree by any of the modes above provided, then by a civil action at law.

CALIFORNIA.

DATE OF ENACTMENT—April 8, 1911; in effect September 1, 1911; new act May 26, 1913; in effect January 1, 1914; amended, chapters 541, 607, 662, acts of 1915.

INJURIES COMPENSATED—Injuries arising out of and in the course of employment causing disability for more than two weeks, or death, and not the result of the intoxication or wilful misconduct of the injured employee.

INDUSTRIES COVERED—All excepting agriculture and domestic service.

PERSONS COMPENSATED—Private employment: Every person in the service of an employer for hire, including aliens, apprentices and members of employer's family who perform labor, excepting casual laborers. Public employment: Persons employed by the State and its political subdivisions (except unsalaried deputies appointed for their own convenience), and by all public corporations.

BURDEN OF PAYMENT—Entire cost rests upon the employer.

COMPENSATION IN CASE OF DEATH:

(a) To persons wholly dependent, three times the annual earnings of the deceased employee; not less than $1,000 nor more than $5,000, payable at least monthly in instalments equal to 65 per cent. of the wages. Payments to children cease on reaching the age of eighteen years, unless mentally or physically incapacitated for earning a living.

(b) If only partial dependents survive, such proportion of the above as corresponds to the ratio between the earnings of the deceased and his contribution to their support.

(c) If no dependents, the reasonable expense of burial, not exceeding $100.

COMPENSATION FOR DISABILITY:
(a) Reasonable medical, surgical and hospital treatment required during the first ninety days after the injury, or longer if the commission directs.
(b) For temporary total disability, 65 per cent. of average weekly earnings during such disability.
(c) For temporary partial disability, 65 per cent. of weekly loss of wages during such disability.
(d) The aggregate amount of benefits for a single injury causing temporary disability is limited to three times the annual earnings of the injured person, with a maximum benefit period of 240 weeks.
(e) For permanent disability, 55 per cent. of average weekly earnings, for periods varying from forty to 240 weeks, according to the degree of disability. After the expiration of 240 weeks a further benefit varying from 10 to 40 per cent. of the weekly earnings is payable during the remainder of life, when the degree of disability reaches or exceeds 70 per cent.

In case of permanent incapacity or death, a lump sum may be substituted for benefits, such lump sum to equal the present value of the benefits computed at 6 per cent.

REVISION OF BENEFITS—Decisions and awards may be reviewed at any time during the first 245 weeks, after legal notice received.

INSURANCE—A State insurance fund is created under State control for the purpose of insuring employers against liability. Employers may effect insurance for liability for accident with any insurance company. Municipalities are required to insure in the State fund, unless the risk is refused.

SECURITY OF PAYMENTS—A claim for injury or death of an employee or any award shall have the same preference over other unsecured debts as is given by law to claims for wages, but not so as to impair a lien of a previous award.

SETTLEMENT OF DISPUTES—Disputes are settled by the State Industrial Accident Commission, subject to a limited review by the courts.

CANAL ZONE.

DATE OF ENACTMENT—August 24, 1912; executive order, February 26, 1913; in effect March 1, 1913. (Suspended.) New order, March 20, 1914; in effect April 1, 1914.

INJURIES COMPENSATED—Personal injuries causing disability of over seven days, or death, provided the injury is not intentionally brought about nor the result of intoxication.

INDUSTRIES COVERED—The construction, maintenance, operation, or sanitation of the canal, Panama Railroad, or auxiliary canals, locks, or other subsidiary enterprises.

PERSONS COMPENSATED—Private employment: Employees of the Panama Railroad Co. directly engaged in the work named above. Public employment: Employees of the United States employed in the Canal Zone in the work named above.

BURDEN OF PAYMENT—The entire cost rests upon the employer.

COMPENSATION FOR DEATH:
(a) Burial or transportation of body of deceased.
(b) To widow alone, 25 per cent. of the monthly wages of the deceased, with addition of 10 per cent. for each child, the total not to exceed 35 per cent., unless there be children by a former marriage, when it may be 50 per cent., for eight years.
(c) If no parent is left, to one child 25 per cent., and not more than 50 per cent. of the wages for two or more.
(d) To parents, brothers, sisters, grandchildren, and grandparents, such sums as the Governor may determine, the total not to exceed 50 per cent. of the wages, awards to other beneficiaries being reduced if necessary.

Payments cease on the death or remarriage of a beneficiary, or on his ceasing to be dependent, and are then to be redistributed, but may in no case extend beyond eight years.

COMPENSATION FOR DISABILITY:
(a) Reasonable medical, surgical, and hospital services and supplies.
(b) For permanent total disability, a monthly payment beginning with the fifth day equal to 75 per cent. of pay for three months, then 50 per cent. until eight years are completed.
(c) For temporary disability, 75 per cent. of monthly pay for three months, then 50 per cent. until the completion of special periods for designated injuries (fractures); proportionate awards for other injuries.
(d) For permanent partial disability, a monthly payment equal to 75 per cent. of monthly wages for three months, then 50 per cent. of wages until completion of fixed periods for specified injuries; others proportionate. If employee is able to work during such period, 75 per cent. of wage loss.

Conversion to lump sum payments is provided for.

REVISION OF BENEFITS—The Governor of the Panama Canal Zone may at any time review the compensation previously fixed.

INSURANCE—No provision.

SECURITY OF PAYMENTS—Under Government control.

SETTLEMENT OF DISPUTES—The Governor of the Canal Zone decides all questions arising under this order or in regard to the interpretation thereof.

COLORADO.

DATE OF ENACTMENT—April 10, 1915; in effect August 1, 1915.

INJURIES COMPENSATED—Injuries caused by accident arising out of and in course of employment, not intentionally self-inflicted or intentionally inflicted by another, and causing death within two years or disability for more than three weeks.

INDUSTRIES COVERED—All except interstate commerce and domestic and agricultural labor in which four or more persons are employed in which employers elect to come under the act; others may elect, but lose no defenses if they do not. Public service under State, municipalities, school or irrigation districts, etc.

PERSONS COMPENSATED—Private employment: Every person in the service of another under any contract of hire, express or implied, casual employees excepted. Public employees: All under any appointment or contract of hire; elective officials excluded.

BURDEN OF PAYMENT—All on employer.

COMPENSATION FOR DEATH:
(a) To persons wholly dependent, 50 per cent. of the weekly wages for six years, $8 maximum, total not to exceed $2,500 nor to be less than $1,000. If death occurs from any cause during receipt of disability benefits, any unaccrued and unpaid remainder goes to dependents.
(b) If only partial dependents survive, 50 per cent. of the weekly wages, $8 maximum, for such part of six years as the commission may determine, total not to exceed $2,500. If death occurs from any cause during the receipt of disability benefits, partial dependents shall receive not more than four times the amount contributed by the deceased during his last year of employment, the aggregate of disability and death benefits not to exceed $2,500.
(c) If no dependents, $100 funeral expenses.
(d) Payments to widow or dependent widower cease on death or remarriage; to children, on reaching the age of eighteen; unless physically incapacitated from earning.

COMPENSATION FOR DISABILITY:
(a) Medical and surgical assistance for first thirty days, not more than $100 in value.
(b) For total disability, 50 per cent. of weekly

wages during continuance, $5 minimum, $8 maximum; full wages if less than $5.

(c) For partial disability, 50 per cent. of the weekly wage decrease, $8 maximum; total not to exceed $2,080.

(d) Special schedule for specified injuries, 50 per cent. of weekly wages for periods ranging from four to 208 weeks.

Payments may be commuted to a lump sum after six months.

REVISION OF BENEFITS—Awards may be changed within fifteen days after making on discovery of mistake, and may be appealed from within sixty days.

INSURANCE—Insurance in State fund, stock or mutual company, or proof of financial ability to make payments is required.

SECURITY OF PAYMENTS—Insurers are primarily liable to a workman or his beneficiaries entitled to benefits; notice to employer is notice to insurer; insolvency of employer does not release insurer. Claims are not assignable, and payments are exempt from attachment or execution.

SETTLEMENT OF DISPUTES—Disputes are determined by the Industrial Commission, with limited appeal to courts.

CONNECTICUT.

DATE OF ENACTMENT—May 29, 1913; in effect January 1, 1914; amended, chapter 288, Acts of 1915.

INJURIES COMPENSATED—All injuries arising out of and in the course of employment, disability of more than ten days, or death, except when injury is caused by wilful and serious misconduct of the injured employee, or by his intoxication.

INDUSTRIES COVERED—All industries in which five or more persons are employed, in absence of contrary election by employer.

PERSONS COMPENSATED—Private employment: All employees of employers accepting the act, in absence of contrary election, outworkers and casual employees excepted. Public employment: Employees of the State and any public corporation within the State using the services of another for pay.

BURDEN OF PAYMENT—Entire cost rests upon the employer.

COMPENSATION FOR DEATH:

(a) $100 for burial expenses.

(b) To persons wholly dependent, a weekly compensation equal to one-half the earnings of the deceased employee.

(c) If only partial dependents survive, a weekly compensation, determined according to the measure of dependence, not exceeding one-half the earnings of the deceased employee.

(d) Compensation shall in no case be more than $10 or less than $5 weekly, and shall not continue longer than 312 weeks.

A widow's or widower's dependence ceases with remarriage, and a child's upon reaching eighteen years of age, unless physically or mentally incapacitated.

If a widow or dependent widower remarries or dies during the term of benefit payments, subsequent payments go to other dependents, if any.

COMPENSATION FOR DISABILITY:

(a) Medical and surgical aid and hospital service during such time as needed.

(b) For total disability, a weekly compensation equal to one-half the employee's earnings, not more than $10 or less than $5 weekly, or for longer than 520 weeks.

(c) For partial disability, a weekly compensation equal to one-half the wage loss, but not more than $10 per week, or for longer than 312 weeks. For specified injuries causing permanent partial disability, one-half the average weekly earnings for fixed periods in lieu of all other payments.

Lump sum payments may be approved by the commissioner, provided they equal the value of the compensations.

REVISION OF BENEFITS—Review may be had upon request of either party, whenever it shall appear to the compensation commissioner that the incapacity or the measure of dependence has changed.

INSURANCE—Approved schemes may be substituted provided the benefits are equivalent to those provided by law. Insurance may be taken in approved stock or mutual companies or associations.

SECURITY OF PAYMENTS—Employer must furnish the insurance commissioner satisfactory proof of his solvency and financial ability to pay awards, file satisfactory security with the insurance commissioner, or insure in approved stock or mutual companies or associations.

SETTLEMENT OF DISPUTES—Disputes are to be settled by the compensation commissioners. Appeals from findings and awards of any commissioner may be made to the Superior Court of the county without cost to either party.

HAWAII.

DATE OF ENACTMENT—April 28, 1915; in effect July 1, 1915.

INJURIES COMPENSATED—Personal injury by accident arising out of and in course of employment, causing disability for more than fourteen days or death within two years, and not due to the employee's intention to injure himself or another or to his intoxication.

INDUSTRIES COVERED—All public and all industrial employment.

PERSONS COMPENSATED—Private employment: All persons under contract of employment or apprenticeship, other than casual employees, whose pay does not exceed $36 per week. Public employment: All except elective officials and employees who receive salaries in excess of $1,800 per year.

BURDEN OF PAYMENT—All on employer.

COMPENSATION FOR DEATH:

(a) $100 funeral expenses if death occurs within six months after the injury.

(b) 40 per cent. of average weekly wages to widow or dependent widower alone, 50 per cent. if one or two dependent children, 60 per cent. if three or more; 30 per cent. to one or two orphans, 10 per cent. additional for each child in excess of two, total not to exceed 50 per cent. If no consort or child, but other dependents, 25 to 40 per cent.

(c) Payments to widow cease on death or remarriage, and to widower on termination of disability or remarriage; to child on reaching age of sixteen, unless incapable of self-support, when they may continue to eighteen; to other beneficiaries, on termination of disability; no payments except to children to continue longer than 312 weeks. Basic wages not less than $5 nor more than $36 weekly.

COMPENSATION FOR DISABILITY:

(a) Reasonable surgical, medical and hospital services for first fourteen days, not exceeding $50 in amount.

(b) For total disability, 60 per cent. of weekly wages, $3 minimum, $18 maximum, for not longer than 312 weeks; total not to exceed $5,000. If wages are less than $3, full wages will be paid unless disability is permanent, when $3 will be paid.

(c) For partial disability, 50 per cent. of wage decrease, $12 maximum, not over 312 weeks, total not to exceed $5,000; fixed awards for specified injuries.

Payments may be commuted to one or more lump sums in any case.

REVISION OF BENEFITS—Agreements and awards may be reviewed at any time, not oftener than once in six months.

INSURANCE—Private employers must carry insurance, secure guarantee insurance, deposit security, or furnish proof of financial ability to make payments.

SECURITY OF PAYMENTS—Payments are preferred claims, the same as wage debts. Em-

ployees have direct recourse to insuring company; insolvency of employer does not release insurer.

SETTLEMENT OF DISPUTES—Industrial accident boards for each county; appeals to courts.

ILLINOIS.

DATE OF ENACTMENT—June 10, 1911; in effect May 1, 1912. New act, June 28, 1913; in effect July 1, 1913; amended June 28 (p. 400), 1915.

INJURIES COMPENSATED—Accidental injuries arising out of and in the course of employment causing permanent disfigurement, disability of over six working days, or death.

INDUSTRIES COVERED—The building trades; construction, excavating and electrical work; transportation; mining and quarrying; work with or about explosives, molten metals, injurious gases or vapors, or corrosive acids, and all enterprises in which the law requires protective devices, provided the employer elects. Other employers may elect, but forfeit no defences if they do not. Compulsory as to State and its municipalities.

PERSONS COMPENSATED—Private employment: All employees. Public employment: All persons employed by the State, county, municipality, etc., except officials.

BURDEN OF PAYMENT—Entire cost rests on the employer.

COMPENSATION FOR DEATH:

(a) To persons wholly dependent or to lineal heirs to whose support the employee had contributed within four years, a sum equal to four years' earnings, not less than $1,650 nor more than $3,500.

(b) If only dependent collateral heirs survive, such a percentage of the above sum as the support rendered during the last two years was of the earnings of the deceased.

(c) If no dependents, a burial benefit not exceeding $150.

COMPENSATION FOR DISABILITY:

(a) Medical and surgical aid for not over eight weeks, not over $200 in value.

(b) For total disability, beginning with eighth day (second day of permanent), a weekly sum equal to one-half the employee's earnings, $6 minimum, $12 maximum, during disability or until payments equal a death benefit; thereafter, if the disability is permanent, a sum annually equal to 8 per cent. of a death benefit, but not less than $10 per month.

(c) For permanent partial disability, one-half the loss of earning capacity, not more than $12 per week.

(d) For certain specific injuries (mutilations, etc.), a benefit of 50 per cent. of weekly wages for fixed periods.

(e) For serious and permanent disfigurement, not causing incapacity and not otherwise compensated, a sum not exceeding one-fourth the death benefits.

No payments are to extend beyond eight years, except in case of permanent total incapacity.

Lump sum payments for either death or disability may be substituted by the Industrial Board for periodic payments.

REVISION OF BENEFITS—Medical examination may be had not oftener than every four weeks. The Industrial Board may, on request, review instalment payments within eighteen months after the award or agreement thereon.

INSURANCE—The employer may insure or maintain a benefit system, but may not reduce his liability under the act.

SECURITY OF PAYMENTS—In case of insolvency, awards constitute liens upon all property of the employer within the county, paramount to all other claims, except wages, taxes, mortgages, or trust deeds.

Employers must furnish proof of ability to pay, or give security, insure, or make other provision for security of payment. The rights of an insolvent employer to insurance indemnities are subrogated to injured employees.

SETTLEMENT OF DISPUTES—Disputes are determined by the industrial board through an arbitrator or arbitration committee, subject to review by the board. Questions of law may be reviewed by the courts.

INDIANA.

DATE OF ENACTMENT—March 8, 1915; in effect September 1, 1915.

INJURIES COMPENSATED—Personal injury causing disability for more than two weeks, or death by accident arising out of and in course of employment, not due to wilful misconduct, intention to injure self, intoxication, or wilful failure or refusal to use safety appliance or perform duty required by statute.

INDUSTRIES COVERED—All except interstate and foreign commerce, for which Federal laws make provision, and domestic and agricultural labor, unless employer make contrary election; compulsory as to State and its municipalities.

PERSONS COMPENSATED—Private employment: All employees and contractors' employees engaged upon the subject matter of the contract; casual employees are excepted. Public employment: All employees.

BURDEN OF PAYMENT—All on employer.

COMPENSATION FOR DEATH:

(a) $100 for funeral expenses, if death from the injury occurs within 300 weeks.

(b) 50 per cent. of weekly wages to persons wholly dependent; to those partially dependent, amounts proportionate to decedent's contributions to their support. The term of payment is limited to 300 weeks from the receipt of the injury.

(c) Payments cease on remarriage of widow or dependent widower, or on children attaining the age of eighteen years, unless mentally or physically disabled for earning. Wages are to be considered as not above $24 nor less than $10 weekly, no total to exceed $5,000.

COMPENSATION FOR DISABILITY:

(a) Medical and hospital services for first thirty days, and longer at option of employer; employee must accept unless otherwise ordered by Industrial Board.

(b) For total disability, 55 per cent. of wages for not more than 500 weeks.

(c) For partial disability, 50 per cent. of wage loss for not more than 300 weeks.

(d) For certain specified injuries, 55 per cent. of wages for designated periods ranging from 15 to 200 weeks.

Wage basis and total amounts are limited as for death benefits.

Any payments may be commuted to a lump sum after twenty-six weeks.

REVISION OF BENEFITS—Awards may be viewed at any time by Industrial Board on its own motion or the request of either party, but without retroactive effect.

INSURANCE—Required unless satisfactory proof of financial ability to meet payments.

SECURITY OF PAYMENTS—Contracts of insurance must inure directly to the benefit of the person entitled to payments under an award. Payments have same preference and priority as unpaid wages, and are exempt from claims of creditors.

SETTLEMENT OF DISPUTES—Disputes are determined by the industrial board, with appeal to courts on questions of law.

IOWA.

DATE OF ENACTMENT—April 18, 1913; in effect (a) establishing industrial commission and providing for insurance of employees, July 4, 1913; (b) compensation features, July 1, 1914.

INJURIES COMPENSATED—All personal injuries arising out of and in the course of the employment causing disability of more than two weeks, or death; except when caused by the injured employee's wilful intention to injure himself or another, or by the intoxication of the employee.

INDUSTRIES COVERED—All industries except agriculture, in absence of contrary election by employer. Compulsory as to State and its municipalities.

PERSONS COMPENSATED—Private employment: All employees in industries covered in absence of contrary election, except clerks not subjected to the hazards of the industry and casual employees. Public employment: All employees of the State and its subdivisions.

BURDEN OF PAYMENT—Entire burden is on employer.

COMPENSATION FOR DEATH:

(a) Reasonable expenses of the employee's last sickness and burial, not to exceed $100.

(b) To persons wholly dependent, a weekly payment equal to 50 per cent. of the wages of the deceased employee, but not more than $10 nor less than $5 per week, for 300 weeks.

(c) If only partial dependents survive, such a proportion of the above as the amounts contributed by the employee to such partial dependents bear to his annual earnings.

(d) If the employee was a minor whose earnings were received by the parent, a sum to the parent equal to two-thirds of the amount provided for persons wholly dependent.

COMPENSATION FOR DISABILITY:

(a) Reasonable surgical, medical and hospital services and supplies for first two weeks, not exceeding $100.

(b) For total temporary disability 50 per cent. of wages, not more than $10 nor less than $5 (unless wages are less than $5, then full wages), for not more than 300 weeks.

(c) For total permanent disability, the same compensation as for temporary disability, to be paid for a period of not more than 400 weeks.

(d) For partial permanent disability (specified maimings), 50 per cent. of average weekly wages for fixed periods.

Lump sum payments may be substituted on approval of the court.

REVISION OF BENEFITS—Payments may be reviewed by the Industrial Commissioner at the request of either party.

INSURANCE—Employers may insure in approved companies or mutual associations, or contract with employees to maintain approved scheme in lieu of the compensation provided by law, provided there is no diminution of benefits.

SECURITY OF PAYMENTS—Employers must insure in approved companies or mutual associations, or furnish satisfactory proof of financial ability to make payments, or deposit security with the State Insurance Department. In case of insolvency of the insurer, a claim for compensation becomes a first lien, and in case of legal incapacity of insured to receive the amount due, the insurer must settle directly with the beneficiary.

SETTLEMENT OF DISPUTES—Disputes may be settled by arbitration.

KANSAS.

DATE OF ENACTMENT—March 14, 1911; in effect January 1, 1912; amended March 10, 1913.

INJURIES COMPENSATED—Injuries by accident arising out of and in the course of employment not due to intoxication or deliberate intention of injured employee, or caused by his wilful failure to use safeguards provided by statute or furnished by employer, causing incapacity to earn full wages for at least two weeks, or death.

INDUSTRIES COVERED—Railways, factories, quarries, electrical, building or engineering work, laundries, natural gas plants, county and municipal work, employments requiring the use of dangerous, explosive or inflammable materials, if employing five or more persons; and mines without reference to the number of employees, in absence of contrary election; employers of less than five persons may also elect.

PERSONS COMPENSATED—Private employment: All employees, including apprentices, but excluding casual employees. Public employment: Workmen on county and municipal work.

BURDEN OF PAYMENT—Entire cost rests upon the employer.

COMPENSATION FOR DEATH:

(a) To persons wholly dependent, a sum equal to three years' earnings of the deceased employee, not less than $1,200 nor more than $3,600. For non-resident alien beneficiaries (except in Canada) the maximum is $750.

(b) If only partial dependents survive, a sum proportionate to the injury to such dependents.

(c) If no dependents are left, a reasonable expense for medical attendance and burial, not exceeding $100. Compensation ceases upon the marriage of any dependent, or when a minor, not physically or mentally incapable of wage earning, shall become eighteen years of age.

COMPENSATION FOR DISABILITY:

(a) For total incapacity, payments during incapacity after the second week, equal to 50 per cent. of earnings, but not less than $6 nor more than $15 per week.

(b) For partial incapacity, payments during incapacity, after the second week, not less than 25 nor more than 50 per cent. of earnings, not less than $3 nor more than $12 per week, except in case of minors earning less than $10 per week, in which case the compensation shall not be less than 75 per cent. of the earnings. No payments for total or partial disability shall extend over more than eight years. After six months, lump sum payments may be substituted, as agreed upon or determined by the court.

REVISION OF BENEFITS—Any award may be modified at any time by agreement. After one year either party may demand a revision. Employees must submit to medical examination at reasonable periods to determine their physical condition.

INSURANCE—The employer may insure in any approved insurance scheme which provides compensation not less favorable than is provided in this act.

SECURITY OF PAYMENT—Lump sums awarded by the court may be secured by order of the court by a good and sufficient bond when there is doubt of security of payment. If the employer was insured, the insurer shall be subrogated to the rights and duties of the employer.

SETTLEMENT OF DISPUTES—Disputes not settled by agreement may be referred to arbitrators, subject to an appeal to courts.

LOUISIANA.

DATE OF ENACTMENT—June 18, 1914; in effect January 1, 1915.

INJURIES COMPENSATED—Personal injury by accident arising out of and in course of employment causing disability for more than two weeks, or death within one year, and not due to wilful intention to injure, to intoxication, to deliberate failure to use safeguards, or to deliberate breach of safety laws.

INDUSTRIES COVERED—Hazardous trades, businesses or occupations in absence of contrary election; extensive list, and others may be so adjudged or brought within the act by voluntary agreement. Compulsory as to employees of the State and its municipalities and public boards.

PERSONS COMPENSATED—Private employment: Every person performing services arising out of and incidental to his employer's trade, business or occupation, if the same is within the act. Public employment: Every person in the service of the State, etc., except officials.

BURDEN OF PAYMENT—All on employer.

COMPENSATION FOR DEATH:

(a) $100 expenses of last sickness and burial.

(b) To widow or dependent widower alone, 25 per cent. of weekly wages, 40 per cent. if one child, and 50 per cent. if two or more. If one child alone, 25 per cent., 40 per cent. for two, and 50 per cent. for three or more.

For one dependent parent, 25 per cent.; for two, 50 per cent.; if one brother or sister, 25 per cent., and 10 per cent. additional for each other. The total in no case may exceed 50 per cent. of the weekly wages, $3 minimum payment, $10 maximum, for not over 300 weeks. Payment to any beneficiary ceases on death or marriage, to children on reaching the age of eighteen, unless mentally or physically incapacitated.

COMPENSATION FOR DISABILITY:

(a) Reasonable medical, surgical and hospital service, not to exceed $100 in value.

(b) For total disability, 50 per cent. of the weekly wages, $3 minimum, $10 maximum, for not more than 400 weeks.

(c) For partial disability, 50 per cent. of the wage loss, not over $10, for not more than 400 weeks.

(d) Fixed schedule for specified injuries, for periods from 10 to 150 weeks. Payments in any case may be commuted to a lump sum on agreement of the parties and approved by the courts.

REVISION OF BENEFITS—Judgments may be modified at any time by agreement of the parties and approval by the courts; or after one year, they may be reviewed by the court on application of either party.

INSURANCE—Not required.

SECURITY OF PAYMENTS—Policy of insurance must give claimants right to direct payment regardless of the default or bankruptcy of the employer. Compensation payments have the same preference as wage debts.

SETTLEMENT OF DISPUTES—Disputes are settled by Judges of the courts in simple, summary procedure.

MAINE.

DATE OF ENACTMENT—April 1, 1915; in effect January 1, 1916.

INJURIES COMPENSATED—Injury sustained in course of employment, causing disability for more than two weeks, or death, not due to wilful intention to injure himself or another, and not due to intoxication unless fact or habit of intoxication was known or cognizable to employer.

INDUSTRIES COVERED—All except agricultural and domestic labor, and seamen in interstate or foreign commerce, in which more than five persons are employed, if employer elects. Abrogation of defences does not affect cutting, hauling, driving or rafting of logs.

PERSONS COMPENSATED—Private employment: All persons in industries covered, casual employees excepted. Public employment: Employees of State, cities and counties, and of towns accepting the provisions of the act, other than official.

BURDEN OF PAYMENT—All on employer. If employees contribute to substitute scheme, additional proportionate benefits must be paid.

COMPENSATION FOR DEATH:

(a) To persons wholly dependent, 50 per cent. of weekly wages for 300 weeks, $4 minimum, $10 maximum.

(b) If only partial dependents survive, amounts proportionate to their degree of dependency, for 300 weeks.

(c) If only one wholly dependent and more than one partly dependent person survives, payments are to be divided according to the relative extent of dependency.

(d) If no dependents, not above $200 expenses of last sickness and burial. Payments to children cease at age of eighteen unless mentally or physically incapacitated for earning a living.

COMPENSATION FOR DISABILITY:

(a) Reasonable medical and hospital services during first two weeks, not over $30 in value, unless by agreement or order of commission a larger amount is provided for.

(b) For total disability, 50 per cent. of the wages for not more than 500 weeks, $4 minimum, $10 maximum, total not to exceed $3,000.

(c) For partial disability, 50 per cent. of the weekly wage loss, not over $10, for not more than 300 weeks. For specified injuries causing permanent partial disability, 50 per cent. of the wages for various fixed periods, then compensation on basis of wage loss, if any, for not more than 300 weeks in all.

Lump sum payments may be approved by the commission after weekly payments for not less than six months.

REVISION OF BENEFITS—Agreements or awards may be reviewed at the instance of either party at any time within two years.

INSURANCE—Insurance in approved companies is required unless the employer gives satisfactory proof of solvency and makes deposit or bond to secure payments.

SECURITY OF PAYMENTS—Insurance as above. Claims have same preference over unsecured debts as do wages for labor.

SETTLEMENT OF DISPUTES—Disputes are to be settled by the Industrial Accident Commission, with appeals to courts on questions of law.

MARYLAND.

DATE OF ENACTMENT—April 16, 1914; in effect November 1, 1914.

INJURIES COMPENSATED—Accidental personal injury arising out of and in course of employment, not due to wilful intention or intoxication, and causing disability for more than two weeks or death within two years.

INDUSTRIES COVERED—Extra hazardous (enumerated list); others by joint election of employers and employees. Farm and domestic labor, country blacksmiths and wheelwrights are excluded.

PERSONS COMPENSATED—Private employment: All in industries covered, except casual employees and those receiving more than $2,000 annually. Public employment: Workmen employed for wages in extra-hazardous work, unless the municipality makes other equal or better provision.

BURDEN OF PAYMENT—All on employer.

COMPENSATION FOR DEATH:

(a) Funeral expenses not over $75.

(b) To persons wholly dependent, 50 per cent. of the weekly wages for eight years; not more than $4,250 nor less than $1,000.

(c) To persons partly dependent, 50 per cent. of the weekly wages for such portion of eight years as the commission may fix, the amount not to exceed $3,000.

(d) If no dependents, funeral expenses only.

(e) Payments to widow close on remarriage, and to children on reaching the age of sixteen years, unless mentally or physically incapacitated.

COMPENSATION FOR DISABILITY:

(a) Medical, surgical, etc., expenses, not above $150 in value.

(b) For total disability, 50 per cent. of weekly wages, $5 minimum, $12 maximum, for not over eight years; total not to exceed $5,000. If wages are less than $5, full wages will be paid.

(c) For partial disability, 50 per cent. of weekly wage loss, $12 maximum, total not over $3,000; specific periods for specified maimings.

Where the injured employee is a learner, with prospect of increase of wages, this fact may be considered in fixing awards.

Payments may, in the discretion of the commission, be made in part or in whole in lump sums.

REVISION OF BENEFITS—The commission may modify its findings and orders at any time for justifiable cause.

INSURANCE—Insurance in State fund, stock or mutual company, or proof of financial ability, is required.

SECURITY OF PAYMENTS—Policies must permit action by commission to secure payments to any person entitled. Payments may not be assigned, nor are they subject to execution or attachment.

SETTLEMENT OF DISPUTES—Disputes are to be settled by the Industrial Accident Commission, with appeal to courts.

MASSACHUSETTS.

DATE OF ENACTMENT—July 28, 1911; in effect July 1, 1912; amended chapters 571, 1912; 48, 448, 563, 696, 746, 1913; 338, 708, 1914; 123, 275, 314, 1915.

INJURIES COMPENSATED—Injuries arising out of and in the course of employment causing incapacity for two weeks, or death, unless the injury is due to the serious and wilful misconduct of the injured employee.

INDUSTRIES COVERED—All industries if the employer so elects.

PERSONS COMPENSATED—Private employment: All employees, except masters of vessels and seamen engaged in interstate or foreign commerce and casual employees. Public employment: The State shall, and any county, city, town or district having power of taxation and accepting the act may compensate its laborers, workmen, and mechanics.

BURDEN OF PAYMENT—Entire cost rests upon the employer.

COMPENSATION FOR DEATH:

(a) To persons wholly dependent, a weekly payment equal to two-thirds the average weekly wages of the deceased employee, but not less than $4 nor more than $10, for a period of 500 weeks, the total not to exceed $4,000.

(b) If only partial dependents survive, a sum proportionate to the portion of earnings contributed to their support by the deceased employee.

(c) If no dependents the reasonable expense of last sickness and burial, not to exceed $200.

Children cease to be dependents at eighteen, unless mentally or physically incapacitated from earning a living.

COMPENSATION FOR DISABILITY:

(a) Reasonable medical and hospital services, and medicines as needed, for the first two weeks after injury.

(b) For total disability, a sum equal to two-thirds the average weekly wages, but not less than $4 nor more than $10 per week, not exceeding 500 weeks nor $4,000 in amount.

(c) For partial disability, two-thirds the wage loss, but not to exceed $10 per week, and for not longer than 500 weeks.

(d) In specified injuries (mutilations, etc.), two-thirds the weekly wages, not exceeding $10 nor less than $4 per week, for fixed periods, in addition to other compensation.

Lump-sum payments may be substituted in whole or part, after payments for injury or death have been made for not less than six months.

REVISION OF BENEFITS—Either party may demand a revision of payment at any time. Employees must submit to medical examination to determine their physical condition when requested by the employer.

INSURANCE—Employer must become a subscriber of the State Employees' Insurance Association or insure in some authorized liability insurance company.

SECURITY OF PAYMENTS—The State controls the State Employees' Insurance Association, and other companies must be authorized by the State to do business.

SETTLEMENT OF DISPUTE—On request of either party, the Industrial Accident Board calls for a committee of arbitration, whose decision is subject to review by the Industrial Accident Board.

MICHIGAN.

DATE OF ENACTMENT—March 20, 1912; in effect September 1, 1912; amended chapters 50, 79, 156, 259, 1913; 104, 153, 170, 171, 1915.

INJURIES COMPENSATED—Injuries causing incapacity to earn full wages for a period of two weeks, or death, arising out of and in the course of employment, unless such injuries resulted from intentional and wilful misconduct of the injured person.

INDUSTRIES COVERED—Compulsory as to the State and its municipalities, and each incorporated public board and commission authorized to hold property and to sue and be sued. All industries having one or more persons in service under contract of hire if the employer elects.

PERSONS COMPENSATED—Private employment: All employees, including aliens and minors, except casual employees. Public employment: All employees except officials of the State or of a municipality.

BURDEN OF PAYMENT—Entire cost rests upon the employer.

COMPENSATION FOR DEATH:

(a) To persons wholly dependent, a weekly payment equal to one-half the deceased workman's earnings, but not less than $4 nor more than $10 per week for a period of 300 weeks.

(b) If only partial dependents survive, such proportion of the above as the amount of previous contributions bears to such earnings.

(c) If no dependents, the reasonable expense of the last sickness and burial, not exceeding $200.

COMPENSATION FOR DISABILITY:

(a) Reasonable medical and hospital services for the first three weeks.

(b) For total incapacity, a weekly payment equal to one-half the earnings, but not less than $4 nor more than $10 per week, nor for a period longer than 500 weeks from the date of the injury, and not exceeding $4,000.

(c) For partial incapacity, a weekly payment equal to one-half the wage loss, but not more than $10 per week, and for not longer than 300 weeks.

(d) For certain specified injuries (mutilation, etc.) 50 per cent, of average weekly earnings for fixed periods.

(e) Payments begin with the fifteenth day after the injury, but if the disability continues for eight weeks or longer compensation is computed from the date of injury.

After six months lump sums may be substituted for weekly payments.

REVISION OF BENEFITS—Weekly payments may be reviewed by the Industrial Accident Board at the request of either party. An injured employee must submit to medical examination when requested.

INSURANCE—Employer must furnish proof of financial ability to pay the required compensation, or insure in an authorized employers' liability company, or in an employers' insurance association organized under State laws, or become a member of a State insurance fund administered by the State Commissioner of Insurance.

SECURITY OF PAYMENTS—In case of insolvency, claims constitute a first lien upon all property of the employer. Employers must furnish proof of financial ability to pay compensation, or insure in approved companies or with the State.

SETTLEMENT OF DISPUTES—Either party may request the Industrial Accident Board to appoint a committee of arbitration, whose decisions are subject to review by the board. The Supreme Court may review questions of law.

MINNESOTA.

DATE OF ENACTMENT—April 24, 1913; in effect October 1, 1913; amended, chapters 193, 209, 1915.

INJURIES COMPENSATED—Injury by accident arising out of and in the course of employment causing disability for more than two weeks, or death, unless intentionally caused, or due to the intoxication of the injured person.

INDUSTRIES COVERED—All excepting common carriers by steam railroad and farm and

domestic service, in the absence of contrary election by employers.

PERSONS COMPENSATED—Private employment: All employees, including aliens and minors, in the absence of contrary election, casual employees excepted. Public employment: All persons in the service of a county, city, town, village, or school district, excluding public officials elected or appointed for regular terms.

BURDEN OF PAYMENT—Cost rests upon the employer.

COMPENSATION FOR DEATH:

(a) $100 funeral expenses.

(b) To a widow alone, 35 per cent. of monthly wages of deceased, increasing to 60 per cent. if four or more children; to a dependent husband alone, 25 per cent.; to a dependent orphan, 40 per cent., with 10 per cent. additional for each additional orphan, with a maximum of 60 per cent.; to the dependent parent or parents, if no dependent widow, widower, or children, 30 per cent. if one parent and 40 per cent. if both survive; if none of the foregoing, but a brother, sister, grandparent, mother-in-law, or father-in-law is wholly dependent, if but one such relative, 25 per cent., or if more than one, 30 per cent., divided equally.

(c) If only partial dependents survive, that proportion of benefits provided for actual dependents which contributions bore to wages earned.

(d) When no dependents are left, expense of last sickness and burial not exceeding $100, in addition to medical and hospital services provided in case of disability.

Payments continue for not more than 300 weeks, and cease when a minor child reaches the age of eighteen, unless physically or mentally incapacitated from earning, and upon the death or marriage of other dependents, unless otherwise specified.

COMPENSATION FOR DISABILITY:

(a) Reasonable medical and surgical treatment, not exceeding 90 days nor $100 in value, unless ordered in exceptional cases, when $200 is the limit.

(b) For total disability, 50 per cent. of wages.

(c) For temporary partial disability, 50 per cent. of the wage loss.

(d) For specified permanent partial disability (mutilations, etc.), 50 per cent. of the earnings for fixed periods.

Payment for death or disability may not be less than $6.50 nor more than $11 per week, unless the wages were less than $6.50, when the amount of wages is paid. Payments may not extend beyond 300 weeks, except for permanent total disability, when the maximum is 400 weeks, with payments of not more than $6.50 per week thereafter for 150 weeks, the total not to exceed $5,000.

Lump sums may be substituted for periodical payments, but in case of compensation for death, permanent total disability, or certain maimings the consent of the court must be obtained.

REVISION OF BENEFITS—After six months from the date of an award either party may apply to the court for revision. The employee must submit to medical examination when requested.

INSURANCE—Employers may insure in any authorized company, stock or mutual, or maintain co-operative schemes, assuming other and greater risks, and other classes of industrial insurance.

SECURITY OF PAYMENTS—Insured workmen have an equitable lien upon any policy becoming due, and in case of the employer's incapacity the insurer shall make payment directly to them. Claims to compensation have the same preference against the assets of the employer as unpaid wages.

SETTLEMENT OF DISPUTES—Either party may submit a claim to the Judge of the District Court, who shall determine such dispute in a summary manner, subject to review by the Supreme Court as to questions of law.

MONTANA.

DATE OF ENACTMENT—March 8, 1915; in effect July 1, 1915.

INJURIES COMPENSATED—Injuries arising out of and in course of employment, resulting from some fortuitous event, causing death or disability of more than two weeks' duration.

INDUSTRIES COVERED—"All inherently hazardous works and occupations," including manufactures, construction work, transportation and repair of the means thereof, and any hazardous occupation or work not enumerated, in which employers elect, but not including agricultural, domestic or casual labor.

PERSONS COMPENSATED—Private employment: All persons other than independent contractors, employed in the industries covered, whether as manual laborers or otherwise, except casual employees. Public employment: All employees in the industries covered.

BURDEN OF PAYMENT—All on employer, except that contributions may be arranged for hospital fund.

COMPENSATION FOR DEATH:

(a) $75 for funeral expenses, if death occurs within six months of injury.

(b) To beneficiaries (widow, widower, child or children under 16, or invalid child above 16) 50 per cent. of wages of the deceased if residents of the United States, if not, 25 per cent., unless otherwise required by treaty. To major dependents (father or mother) in case there are no beneficiaries, 40 per cent. To minor dependents (brothers or sisters actually dependent), if no beneficiary or major dependent, 30 per cent. Non-resident alien dependents receive nothing unless required by treaty, nor do beneficiaries if citizens of a Government excluding citizens of the United States from equal benefits under compensation laws. Term of payments may not exceed 400 weeks, $10 maximum, $6 minimum; if wages less than $6, then full wages. Payments cease on remarriage of widow or widower, or when child, brother or sister reaches the age of sixteen, unless an invalid.

COMPENSATION FOR DISABILITY:

(a) Medical and hospital services during first two weeks after happening of injury, not over $50 in value, unless there is a hospital contract.

(b) For total temporary disability, 50 per cent. of wages during disability, $10 maximum, $6 minimum, unless wages are less than $6, when full wages will be paid, for not more than 300 weeks.

(c) For total permanent disability, same scale as above for 400 weeks, then $5 per week, while disability continues.

(d) For partial disability, 50 per cent. of the wage loss, wages and benefits not to exceed $10 nor fall below $6 in amount, unless wages at time of injury were less than $6; payments to continue not more than 150 weeks for permanent cases, and 50 weeks where disability is temporary.

(e) For maimings, compensation of same scale and limits as in (b) for terms ranging from 3 to 200 weeks.

Periodical payments may in any case be converted in whole or part to lump sums.

REVISION OF BENEFITS—Decisions and awards may be rescinded or amended at any time by the Industrial Accident Board for good cause.

INSURANCE—The employer may carry his own risk on a showing of financial ability; security may be required for probable liabilities and must be given when a continuing payment is ascertained. Insurance may be carried in any company authorized to do business in the State, or the employer may contribute to a State fund.

SECURITY OF PAYMENTS—In case of bankruptcy, etc., liabilities under this act are a first lien upon any deposit made by an employer, and if this is not sufficient, then on any property of the employer or insurer within the State, and shall be prorated with other lienable claims.

SETTLEMENT OF DISPUTES—Proceedings to determine disputes under the act must be instituted before the board and not elsewhere; limited appeal to courts.

NEBRASKA.

DATE OF ENACTMENT—April 21, 1913; in effect July 17, 1913.

INJURIES COMPENSATED—Injury causing disability for more than fourteen days, or death, caused by accident arising out of and in the course of employment, except accident caused by or resulting in any degree from wilful negligence or intoxication.

INDUSTRIES COVERED—All industries where five or more persons are employed by the employer in the regular trade, business or occupation of the employer, except domestic service, agriculture and interstate or foreign commerce, in the absence of contrary election. Exempt employees may make an affirmative election.

PERSONS COMPENSATED—Private employment: All employees, including aliens and minors, but excluding casual employees and home workers. Public employment: All persons employed by the State, or any Government agency created by the State, not having been elected or appointed for a regular term.

BURDEN OF PAYMENT—The entire cost rests upon the employer.

COMPENSATION FOR DEATH:

(a) In addition to any other benefits, a reasonable amount not exceeding $100 to cover expenses of last sickness and burial.

(b) To persons wholly dependent, 50 per cent. of the employee's wages, but not less than $5 nor more than $10 per week, during dependency, but not exceeding 350 weeks; if the wages of the deceased were less than $5 per week, then full wages are to be paid as compensation.

(c) If only partial dependents survive, a proportion of the above corresponding to the relation the contribution of the deceased to their support bore to his wages. Compensation to children ceases when they reach the age of sixteen years, unless they are physically or mentally incapacitated from earning.

COMPENSATION FOR DISABILITY:

(a) Medical and hospital services during the first twenty-one days, not exceeding $200 in value.

(b) For total disability, one-half of the weekly wages, but not less than $5 or more than $10 per week for 300 weeks; thereafter while disability lasts 40 per cent. of such wages, but not less than $4 or more than $8 per week: Provided, however, if weekly wages are less than the minimum, compensation to amount of full wages is to be paid.

(c) For partial disability, 50 per cent. of loss of earning capacity, but not exceeding $10 per week, nor exceeding 300 weeks.

(d) For certain specified injuries (mutilations, etc.), 50 per cent. of wages for fixed periods with the same limits as to amounts as above. Payments begin with the twenty-second day, but if disability continues eight weeks or longer, compensation is computed from the date of injury.

Lump sums may be substituted for periodic payments, but if for death or permanent disability, the approval of the court must be obtained.

REVISION OF BENEFITS—Benefits running for a period of six months or longer may be revised at any time by agreement of the parties, or after six months by application to a court.

INSURANCE—An employer may insure his liability for compensation in any authorized stock or mutual insurance company.

SECURITY OF PAYMENTS—In case of the insolvency of an insured employer, claimants are subrogated to the rights as against the company which the employer would have had if he had paid the claim. Compensation rights and awards have the same preference against the assets of the employer as unpaid wages for labor.

SETTLEMENT OF DISPUTES—Questions may be submitted to arbitration by mutual consent, or either party may submit a claim to the District Court of county to be heard and determined as a cause in equity, with the right of appeal to the Supreme Court.

NEVADA.

DATE OF ENACTMENT—March 15, 1913; in effect July 1, 1913; amended, chapter 190, 1915.

INJURIES COMPENSATED—Injuries arising out of and in course of employment, causing incapacity to earn full wages for more than seven days, or death, except when caused by the employee's wilful intention to injure himself or another or the injury is sustained while intoxicated.

INDUSTRIES COVERED—All except domestic and farm labor in the absence of contrary election, compulsory as to the State and its municipalities.

PERSONS COMPENSATED—Private employment: All employees in the industries covered. Public employment: All employees.

BURDEN OF PAYMENT—The entire cost rests on the employer, except that he may deduct $1 per month from each employee's wages for medical, etc., expenses.

COMPENSATION FOR DEATH:

(a) Burial expenses not to exceed $125.

(b) To dependent widow or widower alone, 40 per cent. of the average monthly wages, total not to exceed $4,000; if one or two children, 50 per cent., $5,000 maximum; if three or more children, 60 per cent, $6,000 maximum. Payments may not be less than $20 nor more than $60 monthly nor continue more than 100 months. Orphans under sixteen receive sums fixed by the commission, $10 minimum, $35 maximum, for periods also fixed by the commission. Partial dependents receive in proportion to the contributions of the deceased to their support at the time of his death for periods not exceeding 100 months.

COMPENSATION FOR DISABILITY:

(a) Reasonable medical, surgical and hospital aid for not more than four months.

(b) For total disability, an amount equal to one-half the average monthly wages, but not less than $20 nor more than $60 for 100 months, the total not to exceed $5,000.

(c) For partial disability, one-half the loss of earning capacity, but not more than $40 per month for not more than 60 months.

(d) For certain specific injuries (mutilations, etc.) a monthly payment equal to one-half the monthly wages for fixed periods.

No compensation is payable for the first week of disability, but if it continues three weeks or longer compensation is paid from the date of the injury.

The Industrial Commission may permit the substitution of lump sums for monthly payments in an amount not exceeding $5,000.

REVISION OF BENEFITS—Readjustment of compensation may be made by the commission on application therefor.

INSURANCE—Employers coming under this act must insure in the State insurance fund.

SECURITY OF PAYMENTS—State management of the insurance fund and collection of premiums by the State. Payments are not assignable and are exempt from attachment, etc.

SETTLEMENT OF DISPUTES—All matters relating to the amount of compensation to be paid are determined by the Industrial Commission.

NEW HAMPSHIRE.

DATE OF ENACTMENT—April 15, 1911; in effect January 1, 1912.

INJURIES COMPENSATED—Any injury to an employee arising out of and in the course of employment causing disability of over two weeks, or death, unless due to wilful misconduct, intoxication or violation of law.

INDUSTRIES COVERED—Industries dangerous to life or limb, including the operation and maintenance of steam and electric railroads, work in shops, mills, factories, etc., employing five or more persons; work about lines or cables charged with electricity; operations dangerously near explosives used in the industry, or to a steam boiler owned and operated by the employer, and work in or about any quarry, mine or foundry; provided the employer elects.

PERSONS COMPENSATED—Private employment: All workmen engaged in any of the employments covered by this law. Public employment: Government employees are not mentioned.

BURDEN OF PAYMENT—Entire cost rests upon the employer.

COMPENSATION FOR DEATH:

(a) To persons wholly dependent, a sum equal to 150 times the average weekly earnings of the deceased, not to exceed $3,000.

(b) If only partial dependents survive, such proportion of the above compensation as corresponds to the portion of wages contributed to their support.

(c) If no dependents are left, expenses of medical care and burial to a reasonable amount, not in excess of $100.

COMPENSATION FOR DISABILITY:

(a) For total disability, a sum beginning with the fifteenth day, not exceeding 50 per cent. of average weekly earnings.

(b) For partial disability, a sum not in excess of 50 per cent. of the loss of earning capacity. In no case is compensation to exceed $10 a week nor run for a longer period than 300 weeks. The court may determine the amount of lump sums payable as a substitute for weekly payments.

REVISION OF BENEFITS—The injured person, when requested by the employer, must submit to medical examination not oftener than once a week.

INSURANCE—No provision.

SECURITY OF PAYMENTS—The employer must satisfy the Commissioner of Labor of his ability to pay the required compensation or file a bond conditioned on the discharge of all liability incurred under this act. Weekly payments have the same preferential claim against the assets of the employer as is allowed for unpaid wages or personal services.

SETTLEMENT OF DISPUTES—All questions not settled by agreement are determined by an action in equity.

NEW JERSEY.

DATE OF ENACTMENT—April 4, 1911; in effect July 1, 1911; amended May 2, 1911; April 1, 1912; March 27, 1913; April 9, 1913; April 17, 1914; March 17, 1915; April 6, 1915.

INJURIES COMPENSATED—Injury by accident arising out of and in the course of employment causing disability of over two weeks, any permanent injury, or death, unless intentionally self-inflicted or due to intoxication.

INDUSTRIES COVERED—All employments in the absence of contrary election.

PERSONS COMPENSATED—Private employment: All employees except casual. Non-resident aliens receive no benefits. Public employment: Every employee of the State, county, municipality, board or commission, or other governing body, including boards of education, except persons receiving a salary greater than $1,200 per year, and those holding an elective office.

BURDEN OF PAYMENT—The entire cost rests upon the employer.

COMPENSATION FOR DEATH:

(a) To one dependent, 35 per cent. of the wages of the deceased person, and for each additional dependent, 5 per cent. additional, the total not to exceed 60 per cent., payable for not more than 300 weeks. Compensation not to be less than $5 nor more than $10 per week, unless the earnings were less than $5, when full wages are paid.

(b) If no dependents, the expense of the last sickness and of burial, the burial not exceeding $100. Payments to widows cease on remarriage, and to orphans on reaching the age of eighteen, unless physically or mentally deficient. A discounted lump sum payment may be substituted at the discretion of the Court of Common Pleas.

COMPENSATION FOR DISABILITY:

(a) Reasonable medical and hospital services for the first two weeks of incapacity, not exceeding $50 in value.

(b) For temporary total disability, 50 per cent. of wages, payable during disability, but not beyond 300 weeks.

(c) For permanent total disability, 50 per cent. of wages during such liability, not beyond 400 weeks.

(d) For certain specific injuries (mutilations, etc.) producing partial but permanent disabilities, 50 per cent. of wages during fixed periods. All weekly payments are subject to the same rule as to minimum and maximum, as for death benefits.

A discounted lump sum payment may be substituted at the discretion of Court of Common Pleas.

REVISION OF BENEFITS—At any time after one year after an award has been made, either party may demand a revision of benefits.

INSURANCE—No provision.

SECURITY OF PAYMENTS—The right of compensation has the same preference against the assets of the employer as are now or may hereafter be allowed by law for a claim for unpaid wages.

SETTLEMENT OF DISPUTES—Either party may submit a claim to the Judge of the Court of Common Pleas, who shall hear and determine such disputes in a summary manner, subject to review of questions of law by the Supreme Court.

NEW YORK.

DATE OF ENACTMENT—December 16, 1913; in effect July 1, 1914; amended, chapters 41, 316, 1914; 167, 168, 615, 674, 1915.

INJURIES COMPENSATED—Accidental injuries arising out of and in course of employment, and disease or infection naturally and unavoidably resulting therefrom, causing disability for more than two weeks, or death, unless caused by the wilful intention of the injured employee to bring about the injury or death of himself or another, or by his intoxication while on duty.

INDUSTRIES COVERED—"Hazardous employments," including construction, maintenance and operation of steam and street railroads; telegraph, telephone and other electrical construction, installation or operation; foundries, machine shops and power plants; stone cutting or dressing; manufactures, tanneries, laundries, printing and bookbinding; shipbuilding and repair, and the use of vessels in intrastate commerce; work in mines, quarries, tunnels, subways, shaft sinking, etc.; engineering work, and the construction, repair and demolition of buildings and bridges; lumbering, draying, loading and unloading.

PERSONS COMPENSATED—Private employment: All employees in industries covered, farm laborers and domestic servants not included. Public employment: Employees of the State and a municipal corporation or political sub-division thereof, engaged in industries covered are included.

BURDEN OF PAYMENT—Entire cost rests on employer.

COMPENSATION FOR DEATH:

(a) $100 for funeral expenses.

(b) To a widow or dependent widower alone, 30 per cent. of wages of deceased, 10 per cent. additional for each child under eighteen; dependent orphans under eighteen re-

ceive 15 per cent. each, and dependent parents, brothers or sisters receive 15 per cent. each; aggregate payments in no case to exceed 66 2-3 per cent.

(c) Payments to widow or widower cease on death, or remarriage, or when dependent of widower ceases, with two years' compensation on remarriage, payments to children, brothers and sisters cease at eighteen, and to parents when dependence ceases. In computing the above benefits no wages in excess of $100 monthly are considered.

COMPENSATION FOR DISABILITY:

(a) Medical and surgical treatment and hospital services for sixty days, costs to be approved by the commission.

(b) For total disability, 66 2-3 per cent. of wages during continuance.

(c) For partial disability, 66 2-3 per cent. of wage loss; for specified permanent partial disabilities (mutilations, etc.), 66 2-3 per cent. of wages for fixed periods. The foregoing payments may not be less than $5 nor more than $15 per week, except for certain maimings the maximum may be $20.

REVISION OF BENEFITS—Awards may be reviewed at any time, and ended or increased or decreased within the limits fixed.

NOTICE OF INJURY—Notice of an injury for which compensation is payable must be given in writing to the employer and to the commission within ten days after the injury; and in case of death resulting from such injury, within thirty days after death. This notice shall contain the name and address of the employee; shall state in ordinary language the time, place, nature and cause of the injury, and shall be signed by the injured employee or by a person on his behalf, or in case of death by a dependent or a person on his behalf. The failure to give such notice may be excused by the commission either on the ground that for some sufficient reason notice could not have been given or on the ground that the State fund, insurance company, or employer, as the case may be, has not been prejudiced thereby; otherwise the failure to give such notice shall constitute a bar to any claim for compensation.

MEDICAL EXAMINATION—An injured employee claiming or entitled to compensation shall, if requested by the commission, submit to medical examination at such times and at a place reasonably convenient for him, as may be provided by the commission. If the employee or the insurance carrier so desires, he may have a physician or physicians of his own selection, to be paid by him, present to participate in such examination. Refusal to submit to such examination suspends the right to compensation for the period of such refusal.

WAIVER, ASSIGNMENTS—No employee may waive his right to compensation. No employee may agree to assign his right of compensation to another.

INSURANCE—Employer must give proof of financial ability to make payments (deposit of securities may be required), or must insure in State fund or mutual or stock company.

RELEASE FROM LIABILITY—An employer who insures in the State fund is released from all liability for compensation to his injured employees. He shall not otherwise be relieved from such liability except by the payment of compensation by himself or by his insurance carrier.

SECURITY OF PAYMENTS—Insurance may be made to inure directly to the benefit of claimants; insolvency of employer does not release insurance company. Payments have same preference as unpaid wages for labor.

SETTLEMENT OF DISPUTES—Disputes are settled by the State Industrial Commission, with limited appeals to courts.

The Bureau of Claims for the commission in New York City is at No. 1 Madison Avenue.

The Legislature of 1915 made the following additions and amendments to the Compensation law of 1914: The provision was made that after the expiration of the first fourteen days of disability on the part of an injured employee, or at any time after his death, "a claim for compensation may be presented to the employer, and if rejected, or if within ten days after presentation a report containing an agreement for compensation be not made and filed" with the Industrial Commission, "the claim may be presented to the commission." The amendment also provides that the commission shall have full power and authority to determine all questions in relation to the payment of claims presented to it for compensation, and authorizes the commission to make or cause to be made such investigations as it deems necessary, "and upon the application of either party shall order a hearing, and within thirty days after a claim for compensation is submitted" or such hearing closed shall make or deny an award, determining such claim for compensation and file the same in the office of the commission, together with a statement of its conclusions of fact and rulings of law. The commission may also before making an award require the claimant to appear before an arbitration committee appointed by it and consisting of one representative of employees, one representative of employers and either a member of the commission or a person specially deputized by the commission to act as chairman, before which the evidence in regard to the claim shall be adduced, and by which it shall be considered and reported upon. Upon a hearing either party may present evidence and be represented by counsel. The decision of the commission is to be final as to all questions of fact, and, except as provided for in section 23 of the Compensation law, as to all questions of law.

When a claim is presented to an employer and the employer and employee, or in case of death his principal dependent, enter into an agreement for the payment of compensation therefor, a joint report of such claim containing such agreement is to be made to the commission upon a form prepared by it and signed by the employer and employee, or in case of death his principal dependent. The commission is to examine the report and approve the same when the terms are strictly in accordance with the amended Compensation law, and such approval is to constitute an award. Nevertheless, the commission may make an award in the manner provided in the section in any case, and if the terms of the award vary from the joint report "the employer shall comply with the award." The new law further says that "in case of unfair dealing or of bad faith on the part of the employer under this section, the commission may impose a penalty of not more than 10 percentum of the award."

The new law provides that compensation shall be payable periodically by the employer in accordance with the method of payment of the wages of the employee at the time of his injury or death. The State fund or insurance corporation in which the employer is insured "shall within 10 days after demand by such employer and on the presentation of evidence of payment of compensation in accordance with this chapter, reimburse the employer therefor." It is additionally provided that "the commission, whenever it shall so deem advisable, may commute such periodical payments to one or more lump sum payments to the injured employee, or in case of death, his dependents, provided the same shall be in the interest of justice."

Provisions are made for the enforcement of payment of compensation.

Chapter 168 of the Laws of 1915 provides for the payment of moneys in advance of an award by the Industrial Commission—that an employer shall upon making an agreement advance to any injured employee, or to the principal dependent of a deceased employee, the payment or payments provided for in the agreement, and shall receive a receipt. The new law also says that prior to the making of an agreement, or in the event of no agreement, any employer may at his option, advance to any injured employee, or the principal dependent of a deceased employee, any sum of money. The receipts for these payments are to be sent to the Industrial Commission.

Chapter 615 (of 1915) says that the fact that an

employee has suffered previous disability or received compensation therefor shall not preclude him from compensation for a later injury nor preclude compensation for death resulting therefrom, "but in determining compensation for the later injury or death his average weekly wages shall be such sum as will reasonably represent his earning capacity at the time of the later injury, provided, however, that an employee who is suffering from a previous disability shall not receive compensation for a later injury in excess of the compensation allowed for such injury when considered by itself and not in conjunction with the previous disability."

Chapter 506 (of 1915) amends the Insurance law in relation to mutual companies to insure employers against loss, damage or compensation resulting from injuries suffered by employees or other persons for which the person insured is liable. No corporation of this kind "shall transact any business of insurance unless the annual premium cost on the insurance applied for shall be not less than $25,000 at the minimum annual rates approved by the Superintendent of Insurance and until at least 40 employers employing not less than 2,500 employees, or 30 employers employing not less than 5,000 employees, or 20 employers employing not less than 7,500 employees, or 10 employers employing not less than 10,000 employees have become members of such corporation and applied for and agreed to take insurance therein covering the liability of such employers to their employees for accidents to or injuries suffered by such employees, nor until the facts specified in this section have been certified under oath by at least three of the persons signing the original certificate, to the Superintendent of Insurance, and the Superintendent of Insurance has issued a license to such corporation authorizing such corporation to begin writing the insurance specified in this article."

OHIO.

DATE OF ENACTMENT—June 15, 1911; in effect January 1, 1912; ammended pp. 72, 396, 1913; 193, 194 (first extra session); p. 3, 1914 (second extra session); p. 512, 1915.

INJURIES COMPENSATED—All injuries not self-inflicted received in the course of employment causing disability beyond one week, or death.

INDUSTRIES COVERED—All industries employing five or more persons regularly in the same business; also establishments with less than five workmen if the employer elects to pay the premiums provided by this act.

PERSONS COMPENSATED—Private employment: All employees, excluding casual workers, but including aliens and minors lawfully employed. Public employment: Persons in the service of the State, or its political subdivisions, excepting the officials of the State or municipal governments, and policemen and firemen in cities where pension funds are established and maintained by municipal authority.

BURDEN OF PAYMENT—Entire cost rests upon the employer.

COMPENSATION FOR DEATH:

(a) Burial expenses not to exceed $150.

(b) To persons wholly dependent, 66⅔ per cent. of the average weekly earnings of the deceased workman for six years after the date of the injury, not less than $1,500 nor more than $3,750.

(c) If only partial dependents survive, a proportionate sum to continue for all or such portion of the period of six years as the State Industrial Commission may determine in each case, not exceeding a maximum of $3,750.

(d) If no dependents, medical and hospital services not exceeding $200 in value, and burial expenses as above.

COMPENSATION FOR DISABILITY:

(a) Medical, hospital, etc., services, not to exceed $200.

(b) For total temporary disability, a weekly payment of 66⅔ per cent. of average weekly wages, during disability, not less than $5 nor more than $12 per week, but not for longer than six years, nor exceeding $3,750.

(c) For total permanent disability, a weekly payment as above continuing until death.

(d) For partial disability, 66⅔ per cent. of loss of earning capacity during the continuance thereof, but not exceeding $12 per week or a total of $3,750.

(e) In certain specified injuries (mutilations, etc.), compensation of 66⅔ per cent. of wages for fixed periods, with the same maximum and minimum limitations noted above. In all cases if wages are less than prescribed minimum, then total wages are paid as compensation; an expected increase in wages may be given consideration.

REVISION OF BENEFITS—The State Industrial Commission may from time to time make such modification or change in its former findings of fact as it deems necessary.

INSURANCE—The law creates a State insurance fund, under control of a State Industrial Commission. Other schemes are permitted, provided benefits equal to those provided by the State insurance fund are guaranteed employees at the employer's cost.

SECURITY OF PAYMENTS—Insurance is under State control. Claims for compensation under this law have the same preference against the assets of the employer as are or may be allowed by law on judgments rendered for claims for taxes.

SETTLEMENT OF DISPUTES—The commission hears and determines all cases within its jurisdiction, limited right of appeal to the civil courts being reserved to the claimant.

OKLAHOMA.

DATE OF ENACTMENT—March 22, 1915; in effect September 1, 1915.

INJURIES COMPENSATED—Personal injuries causing disability for more than two weeks arising out of and in course of employment not due to the wilful intention of the injured employee to injure himself or another, intoxication, or wilful failure to use statutory safeguard. Fatal injuries not covered.

INDUSTRIES COVERED—"Hazardous" (enumerated list and general clause), in which more than two persons are employed, including work by State or municipalities; agriculture, stock raising, retail stores, and interstate railways not included.

PERSONS COMPENSATED—Private employments: Persons engaged in manual or mechanical work or labor in industries covered. Public employment: Workmen employed for wages in any hazardous work within meaning of this act.

BURDEN OF PAYMENT—All on employer.

COMPENSATION FOR DEATH—Fatal injuries not covered.

COMPENSATION FOR DISABILITY:

(a) Necessary medical, surgical, or other treatment for first fifteen days.

(b) For temporary total disability, 50 per cent. of average weekly wages for not more than 300 weeks.

(c) For permanent total disability, 50 per cent. of average weekly wages for not more than 500 weeks.

(d) For permanent partial disability, 50 per cent. of wage loss for not more than 300 weeks; for specified injuries, 50 per cent. of weekly wages for fixed periods in lieu of other compensation.

Payments may not exceed $10 per week nor be less than $6 unless wages were less than $6, when full wages will be paid. Periodical payments may be commuted to lump sums, and aliens who are non-residents may have payments commuted to lump sums equal to one-half of the value of the present worth.

REVISION OF BENEFITS—Awards may be reviewed at any time on application of any party in interest.

INSURANCE—Insurance, the maintenance of a benefit fund, or proof of ability to make compensation payments is required.

SECURITY OF PAYMENTS—Insurance companies or fund systems must be approved by the commission. Claims can not be assigned, and payments are exempt from levy, execution, etc. Deposits with the commission to secure payments may be required of employers or insurers.

SETTLEMENT OF DISPUTES—Disputes may be settled by the Industrial Commission, subject to appeals to the Supreme Court.

OREGON.

DATE OF ENACTMENT—February 25, 1913; in effect ninety days after adjournment of the Legislature (July 1, 1913); amended, chapter 271, 1915.

INJURIES COMPENSATED—Injuries by accidents arising out of and in the course of employment, except those brought about intentionally.

INDUSTRIES COVERED—All hazardous occupations, including factories, mills and workshops employing machinery; mines, quarries, wharves and docks, dredges, engineering works; building trades; telegraph, telephone, electric light and power plants or lines, steamboats, tugs and ferries; all in absence of contrary election. Other employers may accept the law by affirmative election.

PERSONS COMPENSATED—Private employment: Any workman employed as above in absence of contrary election. Non-resident alien beneficiaries other than parent, spouse or child are not included unless otherwise provided by treaty. Public employment: Not included.

BURDEN OF PAYMENT—The employer deducts from employee's earnings one cent for each day or part of day worked, and himself contributes according to rates fixed by the commission for the various industries. The State gives a subsidy.

COMPENSATION FOR DEATH:

(a) Burial expenses not to exceed $100.

(b) To widow or invalid widower, a monthly payment of $30, and to each child under sixteen (daughters eighteen), $6 a month; the total monthly not to exceed $50.

(c) To orphans under sixteen years of age (daughters eighteen), a monthly payment of $15 each; the total not to exceed $50.

(d) To other dependents, there being none of the foregoing, a monthly payment to each of 50 per cent. of the average support received during the preceding year, but not to exceed $30 a month in all.

(e) To parents of an unmarried minor, a monthly payment of $25, until such time as he would have been 21, after which time compensation shall be paid according to (d) above. Payments to widow or widower continue until death or remarriage. On remarriage of widow she receives a lump sum of $300. (Payments to a male child cease at sixteen and to a female at eighteen, unless the child is an invalid.

COMPENSATION FOR DISABILITY:

(a) Transportation, medical, surgical and hospital expenses not exceeding $250 in value.

(b) For permanent total disability, monthly payments as follows: (1) If unmarried at the time of the injury, $30; (2) if with wife or invalid husband, but no child under sixteen years, $35; if the husband is not an invalid, the sum is $30; (3) if married or a widow or widower with a child or children under sixteen years, $6 additional to the provision under (2) above, for each child until sixteen years of age, the total monthly payments not to exceed $50.

(c) For temporary total disability, the above payments apply during disability, increased 50 per cent. for first six months, but in no case to exceed 60 per cent. of monthly wages.

(d) For partial temporary disability, a proportionate amount, corresponding to loss of earning power for not exceeding two years.

(e) For certain specified injuries (mutilations, etc.) monthly payment of $25 per month payable for fixed periods.

A lump sum at the option of the injured person is provided in some cases. Partial lump sum payments to any beneficiary may be substituted at the discretion of the commission.

REVISION OF BENEFITS—The rate of compensation may be readjusted either upon the application of the beneficiary or by the State Industrial Accident Commission upon its own initiative.

INSURANCE—Insurance is effected through the State Industrial Accident Fund, under supervision of the State Industrial Accident Commission.

SECURITY OF PAYMENTS—Insurance under State control.

SETTLEMENT OF DISPUTES—Any decision of the commission is subject to review by the Circuit Court, and appeals lie from the Circuit Court as in other civil cases.

PENNSYLVANIA.

DATE OF ENACTMENT—June 2, 1915; in effect January 1, 1916.

INJURIES COMPENSATED—Personal injury by accident in the course of employment, causing disability for more than fourteen days or death within 300 weeks, not intentionally self-inflicted or due to the intentional act of a third person for reasons not connected with the employment.

INDUSTRIES COVERED—All, unless employer makes election to the contrary. (Agricultural and domestic employees are excluded by a separate act.)

PERSONS COMPENSATED—Private employment: All persons rendering service to another for a valuable consideration, casual employees and those working on material given out to be made up, repaired, etc., on premises not under the control of the employer excepted. Public employment: All employees.

BURDEN OF PAYMENT—All on employer.

COMPENSATION FOR DISABILITY:

(a) $100 funeral expenses.

(b) 40 per cent. of weekly wages to widow or dependent widower, 5 per cent. additional for each child, total not to exceed 60 per cent.; if no parent, 25 per cent. if one or two children, 10 per cent. additional for each child in excess of two, total not to exceed 60 per cent.; if no consort or child under sixteen, but dependent parent, brothers, or sisters, 15 to 25 per cent. of wages.

(c) Payments cease on death, remarriage of widow or widower, cessation of dependence of widower, or child, brother, or sister attaining the age of sixteen, not to continue beyond 300 weeks, unless for children under sixteen, when 15 per cent. will be paid for one and 10 per cent. additional for each additional child, total not to exceed 50 per cent. Basic wages are not less than $10 nor more than $20 weekly.

COMPENSATION FOR DISABILITY:

(a) Reasonable medical, surgical, and hospital expenses for first fourteen days after disability begins, cost not to exceed $25, unless major surgical operation is necessary, when $75 is the maximum.

(b) For total disability, 50 per cent. of weekly wages for 500 weeks, $5 minimum, $10 maximum, total not to exceed $4,000; if wages less than $5, full wages will be paid.

(c) For partial disability, 50 per cent. of weekly wage loss, $10 maximum, for not over 300 weeks; fixed periods for specified injuries, $5 minimum, $10 maximum, full wages if less than $5.

Payments may be commuted to lump sum.

REVISION OF BENEFITS—Agreements and awards may be reviewed by the board at any time for proper cause.

INSURANCE—Employers must insure in the State fund, a stock or mutual company, or give proof of financial ability.

SECURITY OF PAYMENTS—Agreements or claims may be filed with a prothonotary, who enters them as a judgment, and if approved by the board they become a lien on the property of the employer. A separate act provides for direct

payments from insurance companies to the beneficiaries, in case of the employer's failure to make payment of benefits.

SETTLEMENT OF DISPUTES—Disputes are settled by a workmen's compensation board, with appeal to courts.

RHODE ISLAND.

DATE OF ENACTMENT—April 29, 1912; in effect October 1, 1912; amended, chapters 937, 1913; 1268, 1915.

INJURIES COMPENSATED—Personal injuries by accidents arising out of and in the course of employment causing incapacity for earning full wages for a period of more than two weeks, or death, except where the injury resulted from the wilful intention of the injured person to injure himself or another, or from intoxication.

INDUSTRIES COVERED—All industries except domestic service and agriculture if the employee elects. Defences in suits for damages are not abrogated unless more than five persons are employed.

PERSONS COMPENSATED—Private employment: All employees in establishments covered by this act in absence of contrary election, casual employees and those earning above $1,800 a year excepted. Public employment: Not mentioned.

BURDEN OF PAYMENT—Entire cost rests upon the employer.

COMPENSATION FOR DEATH:

(a) To persons wholly dependent, a weekly payment equal to one-half the average weekly earnings of the deceased employee, but not less than $4 nor more than $10 per week, for a period of 300 weeks.

(b) If only partial dependents survive, a sum proportionate to the amount which the annual contributions bore to the annual earnings of the deceased, for not exceeding 300 weeks.

(c) If no dependents, the expense of the last sickness and burial of the deceased employee, not exceeding $200. Payments to children cease on their reaching the age of eighteen years unless they are physically or mentally incapacitated.

COMPENSATION FOR DISABILITY:

(a) The necessary medical and surgical care and hospital services for the first two weeks after the injury.

(b) For total incapacity, a weekly payment equal to one-half the wages, but not less than $4 nor more than $10 per week, during such incapacity, but not for a longer period than 500 weeks.

(c) For partial incapacity, a weekly payment equal to one-half the loss of earning power, but not exceeding $10 per week, during such incapacity, and not for a longer period than 300 weeks.

(d) For certain specified injuries (mutilations, etc.), in addition to the above, one-half the wages, weekly payments to be not less than $4 nor more than $10 per week, for fixed periods.

Lump sum payments may be substituted by order of the Superior Court after compensation has been paid for six months for either death or injury.

REVISION OF BENEFITS—Amount payable may be reviewed and modified by the Superior Court at any time within two years, if the time for payments has not expired.

INSURANCE—The employer must insure, give proof of financial ability to make direct payments, or furnish security or bond. If employees contribute to any approved scheme or insurance plan, added benefits must be provided corresponding to such contributions.

SECURITY OF PAYMENTS—Claims for compensation under this act, and under any substitute scheme, shall be entitled to a preference over the unsecured debts of the employer hereafter contracted to the same amount as the wages of labor are now preferred. Insurers are directly liable to claimants; beneficiaries have a first lien on any sum due from insurer to the employer on any policy.

SETTLEMENT OF DISPUTES—Disputes are settled by the Superior Court on a petition in the nature of a petition in equity, filed by any party in interest. Appeals may be carried to the Supreme Court by any aggrieved person.

TEXAS.

DATE OF ENACTMENT—April 16, 1913; in effect September 1, 1913.

INJURIES COMPENSATED—Personal injury sustained in the course of employment causing incapacity to earn full wages for at least one week, or death.

INDUSTRIES COVERED—Excluded from the act are domestic and farm labor, railways operated as common carriers, and cotton ginning; also establishments in which not more than five persons are employed. Applies to other industries if the employer subscribes to the State insurance fund.

PERSONS COMPENSATED—Private employment: All employees in industries included, except casual. Public employment: No provision.

BURDEN OF PAYMENT—The entire cost rests upon the employer.

COMPENSATION FOR DEATH:

(a) To the legal beneficiary of the deceased employee, a weekly payment equal to 60 per cent. of his wages, not less than $5 nor more than $15 for a period of 360 weeks, distributed according to law governing property distribution.

(b) If no beneficiaries or creditors are left, the expenses of the last sickness and in addition a funeral benefit not to exceed $100.

(c) If the deceased leaves no beneficiaries but leaves creditors, the insurance association is liable to the creditors for such debts in an amount not exceeding that which would be due beneficiaries.

COMPENSATION FOR DISABILITY:

(a) Medical and hospital care for the first week.

(b) For total incapacity, a compensation equal to 60 per cent. of the average weekly wages of the injured person, but not less than $5 nor more than $15 per week during such disability, but not exceeding a period of 400 weeks.

(c) For partial incapacity, a compensation equal to 60 per cent. of the loss of earning power during such disability, but not exceeding 300 weeks, in no case to exceed $15 per week.

(d) For certain specified injuries (mutilations, etc.) an additional compensation equal to 60 per cent. of the average weekly wages of the injured person for fixed periods, not less than $5 nor more than $15 per week.

A lump sum payment may be substituted for weekly payments in cases of death or total permanent disability, subject to the approval of the Industrial Accident Board.

REVISION OF BENEFITS—The Industrial Accident Board may call for medical examination as often as may be reasonably ordered.

INSURANCE—Insurance may be effected through the Texas Employers' Insurance Association, under State control, or in any company admitted to do business in the State.

SECURITY OF PAYMENTS—Association is under State control.

SETTLEMENT OF DISPUTES—Disputes are referable to the Industrial Accident Board, whose decisions are subject to appeal to any court of competent jurisdiction.

VERMONT.

DATE OF ENACTMENT—April 1, 1915; in effect July 1, 1915.

INJURIES COMPENSATED—Personal injury causing disability for more than fourteen days or death within two years, arising out of and in course of employment, not due to the employee's wilful intention to injure himself or another, his

intoxication, or failure to use a safety appliance.

INDUSTRIES COVERED—All industrial establishments in which more than ten persons are employed, and commerce as far as permissible under Federal laws, domestic and casual labor excepted, unless election to the contrary is made. Public service under municipalities which elect compensation system.

PERSONS COMPENSATED—Private employment: All under contract with or in service of an employer, domestic and casual employees and those receiving more than $1,500 excepted. Public employees: All except those elected by popular vote or receiving in excess of $1,500 annually.

BURDEN OF PAYMENT—All on employer.

COMPENSATION FOR DEATH:

(a) $75 for funeral expenses if death occurs within two years.

(b) 33 1-3 per cent. of weekly wages to dependent widow or widower, 40 per cent. if there be one or two children, and 45 per cent. if more than two; if no parent; 25 per cent. to one or two children, 10 per cent. additional for each child in excess of two, total not to exceed 40 per cent.; if no consort or child under eighteen, and dependent parent, grandparent, or grandchild, 15 to 25 per cent. of wages.

(c) Payments to widow cease on death or remarriage; to widower on remarriage or cessation of dependency; to children on reaching age of eighteen unless incapable of self-support, in no case to exceed 260 weeks or $3,500 in amount; payments to other classes of beneficiaries end in 208 weeks at most. Basic wages are not less than $5 nor more than $25 weekly.

COMPENSATION FOR DISABILITY:

(a) Medical and hospital services for first fourteen days, not to exceed $75.

(b) For total disability 50 per cent. of weekly wages for twenty-six weeks if temporary, 260 if permanent, subject to extension for fifty-two weeks, $3 minimum, $12.50 maximum, total not to exceed $4,000. If wages are less than $3, full wages will be paid unless disability is permanent, when $3 will be paid.

(c) For partial disability, 50 per cent. of wage decrease, maximum $10, for not more than five years.

(d) For certain specified injuries, 50 per cent. of weekly wages, but not more than $10, for designated periods ranging from eight to 170 weeks.

Payments may be commuted to one or more lump sums in any case.

REVISION OF BENEFITS—Awards may be reviewed on application at any time, but not oftener than once in six months.

INSURANCE—Required unless deposit of security is made, or satisfactory proof of financial responsibility.

SECURITY OF PAYMENTS—Employees may have direct recourse to insuring company; insolvency of employer does not release insurer; compensation rights are preferred claims.

SETTLEMENT OF DISPUTES—Disputes are determined by an Industrial Accident Board, with appeal to courts.

WASHINGTON.

DATE OF ENACTMENT—March 14, 1911; in effect October 1, 1911; amended, chapters 138, 1913; 188, 1915.

INJURIES COMPENSATED—Injuries causing disability of 5 per cent., or death, to a person, whether received upon the premises or at the plant or in the course of employment while away from the establishment, except injuries brought about intentionally.

INDUSTRIES COVERED—All extra-hazardous employment, including mills, factories and workshops where machinery is used; blast furnaces, mines, quarries and wharves; engineering work; logging, lumbering and shipbuilding; building trades; telegraph, telephone, electric light or power plants or lines; steamboats, tugs and ferries; railroads, except as governed by Federal statute; State, county and municipal undertakings involving extra hazardous work in which persons are employed for wages.

PERSONS COMPENSATED—Private employment: All employees in industries covered by the act; any working employer or salaried employee on the payroll at a rate not greater than the average named in such payroll. Public employment: All employees in industries covered by the act.

BURDEN OF PAYMENT—The entire burden rests upon the employer.

COMPENSATION FOR DEATH:

(a) Expenses of burial not exceeding $75.

(b) To widow or invalid widower, a monthly payment of $20; to each child under sixteen, $5 per month, the total not to exceed $35.

(c) If no parent survives, a monthly payment of $10 to each child under sixteen years of age, the total not to exceed $35.

(d) To other dependents, if none of the above survive, a monthly payment to each equal to 50 per cent. of the average amount previously contributed to the dependent, the total not to exceed $20.

(e) To the parent or parents of an unmarried minor a monthly payment of $20 until the time he would have been twenty-one. In case of dependence, payments to parents of minors are governed by (d). Payments to a widow or widower continue until death or remarriage, and to a child until reaching the age of sixteen years. If a widow remarries she receives a lump sum of $240.

COMPENSATION FOR DISABILITY:

(a) For permanent total disability, payments as follows: (1) If unmarried at time of the accident, $20 per month; (2) if with a wife or invalid husband, but no child under sixteen years of age, $25 a month; if the husband is not an invalid, $15 per month; (3) if married, or a widow or widower with a child or children under sixteen years, $5 a month additional for each child, the total not to exceed $35.

(b) For total temporary disability, payments as for permanent total disability during disability, increased by 50 per cent. for first six months, but in no case to exceed 60 per cent. of monthly wages.

(c) For temporary partial disability, the payment as for total disability continues in proportion to the loss of earning power, provided this shall exceed 5 per cent.

(d) For permanent partial disability, a lump sum not to exceed $1,500; if the injured person is a minor the parents receive an additional sum equal to 10 per cent. of the award to the injured peprson. Monthly payments may be converted into lump sum payments in case of death or permanent total disability.

REVISION OF BENEFITS—Revision may be had upon appplication of the beneficiary or upon the motion of the department.

INSURANCE—Insurance is required in a State accident fund.

SECURITY OF PAYMENTS—Accident fund under State control.

SETTLEMENT OF DISPUTES—By Industrial Insurance Department, whose decisions are subject to review by the Superior Court, from which appeal lies as in other civil cases.

WEST VIRGINIA.

DATE OF ENACTMENT—February 22, 1913; in effect October 1, 1913; amended February 20 and May 21, 1915.

INJURIES COMPENSATED—All personal injuries not the result of wilful misconduct or intoxication of the injured employee, or self-inflicted, causing incapacity for more than one week or death.

INDUSTRIES COVERED—All except domestic or agricultural labor, if the employer becomes a member of the State insurance fund.

PERSONS COMPENSATED—Private employment: All employees in industries covered, in-

cluding aliens, except persons casually employed, and the officers of corporations. Public employment: No provision.

BURDEN OF PAYMENT—Employer, 90 per cent.; employees, 10 per cent.

COMPENSATION FOR DEATH:

(a) Reasonable funeral expenses not to exceed $75.

(b) To the widow or invalid widower, $20 per month and $5 per month additional for each child under the age of legal employment, the total not to exceed $35 per month.

(c) To orphan child or children, $10 each per month until the age of fifteen, total not to exceed $30 per month.

(d) To other persons wholly dependent, if no widow, invalid widower, or child under the age of legal employment is left, 50 per cent. of the average monthly support received from the deceased during the preceding year, not exceeding $20 per month, for six years.

(e) If the deceased was a single minor, to a dependent parent, 50 per cent. of the earnings, not to exceed $6 per week, until the time when he would have become twenty-one.

(f) If only partial dependents survive, a compensation computed as in (d), with the same maximum.

Payments to a widow or widower cease on remarriage, and to children on reaching the age of fifteen years. If widow or invalid widower remarry within two years of death of employee, to be paid 20 per cent. of balance of ten years' benefits.

COMPENSATION FOR DISABILITY:

(a) Medical, nurse, and hospital services, not exceeding $150 ($300 in special cases).

(b) For temporary partial disability, during such disability, 50 per cent. of loss of his earning capacity, not more than $10 per week nor exceeding twenty-six weeks, except that for certain ununited fractures, etc., the period may be fifty-two weeks.

(c) For permanent partial disability, 50 per cent. of wages for periods varying with degree of disability (from 10 to 70 per cent.), periods ranging from thirty to 210 weeks; from 70 to 85 per cent. disability, 40 per cent. of wages for life.

(d) For permanent total disability (85 per cent. or abbve), 50 per cent. of the average weekly wages, during life.

Lump-sum payments may be substituted for periodic payments in case of either injury or death. Payments under (c) and (d), $4 minimum, $8 maximum.

REVISION OF BENEFITS—Awards may be modified at any time.

INSURANCE—Insurance is effected through a State fund under the control of the compensation commissioner, or employers of approved ability may carry own risks, giving bond for performance of requirements not less than those of the law, without contributions from their employees.

SECURITY OF PAYMENTS—Payments may be made only to beneficiaries, and are exempt from claims of creditors or attachment or execution.

SETTLEMENT OF DISPUTES—Disputes are settled by the commissioner; limited appeal to the Supreme Court.

WISCONSIN.

DATE OF ENACTMENT—May 3, 1911; in effect same date; amended, chapters 599, 707, 1913; 121, 241, 316, 369, 378, 462, 1915.

INJURIES COMPENSATED—Personal injury by accident causing disability of at least one week, or death, while performing service growing out of and incidental to the employment, not intentionally self-inflicted.

INDUSTRIES COVERED—All, if the employer elects. Compulsory as to State and its municipalities.

PERSONS COMPENSATED—Private employment: All employees except casual, including aliens, in the absence of contrary election. Public employment: All employees of the State or its political subdivisions.

BURDEN OF PAYMENT—Entire cost rests upon the employer.

COMPENSATION FOR DEATH:

(a) To persons wholly dependent, a sum equal to four years' earnings, but which when added to any prior compensation for permanent total disability shall not exceed six years' earnings.

(b) If only partial dependents survive, a sum not to exceed four times the amount provided for their support during the preceding year.

(c) If no dependents, the reasonable expense of burial, not exceeding $100. All payments are to be made in weekly instalments equal to 65 per cent. of the average weekly earnings. Dependence of children ceases at eighteen, unless physically or mentally incapacitated.

COMPENSATION FOR DISABILITY:

(a) Medical, surgical, and hospital treatment for not exceeding ninety days, or the reasonable expenses therefor.

(b) For total disability, 65 per cent. of average weekly earnings during such disability, but if the injured person requires the assistance of a nurse, then 100 per cent. of earnings for first ninety days of disability.

(c) For partial disability, 65 per cent. of loss of earning power.

(d) For certain specific injuries (mutilations, etc.), a sum equal to 65 per cent. of average weekly earnings for fixed periods.

(e) For serious permanent disfigurement, a lump sum may be allowed, not exceeding $750. In case of temporary or partial disability the aggregate compensation for a single injury shall not exceed four years' earnings, and for permanent disability six years' earnings, nor may the disability period exceed fifteen years from the date of the accident. Lump sum payments may be substituted at any time after six months from the date of injury.

REVISION OF BENEFITS—The commission may modify or change its order or award within ten days if a mistake is discovered; or a review by the court may be had on appeal within twenty days. The commission may call for a medical examination at any time it deems necessary.

INSURANCE—Insurance in approved companies is permitted, but the liability of the employer may not be reduced.

SECURITY OF PAYMENTS—The employer must give proof of financial ability or insure risks. Claims for compensation are preferred above other unsecured debts thereafter contracted.

SETTLEMENT OF DISPUTES—Disputes are settled by the Industrial Commission, subject to a limited review by the courts.

WYOMING.

DATE OF ENACTMENT—February 27, 1915; in effect April 1, 1915.

INJURIES COMPENSATED—Personal injury causing disability for more than ten days or death, as a result of employment and not due to the culpable negligence of the injured employee or to the wilful act of a third person due to reasons personal to such employee or because of his employment.

INDUSTRIES COVERED — Extra hazardous (enumerated list), in which five or more workmen are employed, interstate railroads excepted; public employments and use of explosives and work ten or more feet above ground included, without reference to number of employees.

PERSONS COMPENSATED—Private employment: All employees in industries covered. Public employment: All employees in classes of employments designated.

BURDEN OF PAYMENT—All on employer.

COMPENSATION FOR DEATH:

(a) $50 for funeral expenses, unless other arrangements exist under agreement.

(b) Lump-sum payments of $1,000 to widow

COMPENSATION LAWS OF THE VARIOUS STATES—*Continued.*

or invalid widower, and additional sum, equal to $60 per year, until the age of sixteen is reached for each child under the age of sixteen, the total for children not to exceed $1,000. If there are dependent parents and no spouse or child under sixteen, a sum equal to 50 per cent. of one year's contribution, not exceeding $500.

COMPENSATION FOR DISABILITY:

(a) For total permanent disability, lump sum of $1,000 if single, $1,200 if wife or invalid husband, and a sum equal to $60 per year for each child under sixteen until age of sixteen is reached, the total for children not to exceed $1,800. If disability is temporary, $15 per month if single, $20 if married, and $5 monthly for each child under sixteen, the total monthly payment not to exceed $35 and the aggregate not to exceed the amount payable if the disability were permanent.

(b) For permanent partial disability, fixed lump sums for specified injuries, others in proportion.

No provision is made for medical or surgical aid; all payments are lump sums, except for total temporary disability.

REVISION OF BENEFITS—No provision.

INSURANCE—Insurance in State fund required.

SECURITY OF PAYMENTS—Insurance under State control; payments not assignable or subject to execution, attachment, etc.

SETTLEMENT OF DISPUTES—Disputes are settled by the district courts of the counties, with appeal to the Supreme Court of the State.

UNITED STATES.

DATE OF ENACTMENT—May 30, 1908; in effect August 1, 1908; amended February 24, 1909; March 4, 1911; March 11, 1912; July 27, 1912, and August 24, 1912.

INJURIES COMPENSATED—Injuries in the course of employment resulting in incapacity for work lasting more than fifteen days, or death, unless injury is due to the negligence or misconduct of the employee injured.

INDUSTRIES COVERED—Manufacturing establishments of the United States, arsenals, Navy Yards, construction of river and harbor or fortification work or work in the reclamation of arid lands; work under the Bureau of Mines, under the Forestry Service and under the Lighthouse Service.

PERSONS COMPENSATED—Private employment: Not included. Public employment: Artisans or laborers employed by the United States (a) in any of its manufacturing establishments, arsenals, Navy Yards or in the construction of river and harbor or fortification work or (b) in hazardous employment on construction work in the reclamation of arid lands or the management and control of the same; (c) any person in hazardous employment under the Bureau of Mines, the Forestry Service or the Lighthouse Service.

BURDEN OF PAYMENT—Cost is on the branch of the service in which the injured person was employed.

COMPENSATION FOR DEATH—To the widow, children, or dependent parents, a sum equal to the wages the deceased person would have received for one year had he continued to be employed. Payments to children cease on their reaching the age of sixteen.

COMPENSATION FOR DISABILITY—A sum equal to the same pay the injured employee would have received if he continued to be employed during the period of disability, not to exceed one year.

REVISION OF BENEFITS—Payments are made in such portions and under such regulations as the Secretary of Labor may prescribe.

INSURANCE—No provision.

SECURITY OF PAYMENTS—Compensation is paid from annual appropriation for the support of the service.

SETTLEMENT OF DISPUTES—All questions as to right of compensation are decided by the Secretary of Labor.

THE NATIONAL FIRST AID ASSOCIATION.

The association was organized by the late Miss Clara Barton, chartered under the laws of the District of Columbia, April 18, 1905, and has distributed its vital knowledge throughout many sections of almost every State in the Union. It is a practical philanthropy and is paying tribute to its founder by holding the presidency in her name. *Acting President*—Mrs. J. Sewall Reed, Dorchester, Mass. *Vice-President and Treasurer*—Roscoe G. Wells. *Secretary*—Mrs. Mary Kensel Wells. Executive office, Arlington, Mass.

AMERICAN INSTITUTE OF SOCIAL SERVICE.

ORGANIZED 1898. *President*—Dr. Josiah Strong. *Vice-President*—Mornay Williams. *General Secretary*—William B. Patterson. *Lecturer*—Dr. Jas. H. Ecob. *Acting Treasurer*—M. J. Whitty. Object: The gathering and disseminating of information on all branches of social thought and service. Supplies information and advice as to methods by correspondence, by its publications, by lectures, and by its special reference library, open to the public. Publishes *The Gospel of the Kingdom*, a monthly magazine (75 cents per year) devoted to studies in social reform from the Christian standpoint, used by classes in churches, Sunday schools, church brotherhoods, colleges, Y. M. C. A.'s and Y. W. C. A.'s in all parts of the United States and Canada. The 1916 series will be devoted to welfare and industrial subjects. The headquarters of the institute is at Bible House, Astor Place, New York City.

SOCIALIST LABOR PARTY.

ARNOLD PETERSEN, National Secretary, 45 Rose Street, New York City. Representative on International Socialist Bureau, Arthur Elmer Reimer. National Executive Committee—California, Sidney Armer; Connecticut, J. P. Johnson; Illinois, Jacob Bobinsky; Indiana, Ernst Viewegh; Massachusetts, Arthur E. Reimer; Michigan, Max Eisenberg; Minnesota, Samual Johnson; Missouri, H. J. Poelling; New Jersey, J. C. Butterworth; New York, Patrick E. De Lee; Ohio, John D. Goerke; Pennsylvania, G. G. Anton; Virginia, Godfrey Kinder; Washington, John C. Shafer; Wisconsin, Albert Schnabel.

The party is organized in local organizations known as "sections," such sections existing in thirty States. Seven persons, five of whom must be actual wage-workers, may form a section, providing they acknowledge the platform, Constitution and resolutions of the Socialist Labor party and do not belong to any other political party. But if more than seven propose to organize a section then at least three-fourths must be actual wage-workers. In places where no section exists, or where none can be formed, any person complying with the aforesaid provisions may become a member-at-large upon application to the National Executive Committee. Sections are not permitted to charge initiation fees. All questions of importance arising within the party are decided by general vote. At each meeting of the section a Chairman is elected, and the same rule holds good with all standing committees.

THE COTTON SUPPLY.

CROP OF THE UNITED STATES FOR TWENTY YEARS.

THE following statements are furnished by the New York "Financial Chronicle":

YEAR.	Bales.	YEAR.	Bales.	YEAR.	Bales.	YEAR.	Bales.
1896	7,162,473	1901	10,425,141	1906	11,319,860	1911	12,132,332

COTTON MARKETED BY STATES IN 1914-1915.

The figures of the Financial Chronicle are those of the commercial crop, namely the crop which has come forward to be counted, that is, has reached the Southern outports, or Southern mills, or been shipped overland North. The crop in this way amounted to 15,067,247 bales. On the other hand, the census in its crop statement undertakes to show the actual production, and this it gives as 16,678,110 bales.

AGRICULTURAL RANK OF STATES.

(Report of Bureau of Census, February 13, 1914.)

The general report on the census on agriculture of the Thirteenth Census discloses some interesting facts regarding the crops of the country and the relative rank of the States in regard to the value of all farm crops according to farm values.

Eleven of the leading crops in 1909 showed a total aggregate value of $4,813,281,000, or approximately 90 per cent. of the total value of all the crops of the United States, which amounted to $5,487,161,000. Of these eleven leading crops corn was the most valuable, followed by hay and forage, cotton, wheat, oats, vegetables (of all kinds), forest products on farms (timber, lumber, etc.), potatoes, tobacco, barley and apples, in the order named. The value of the corn crop alone was $1,438,554,000; that of cotton, $703,619,000; that of wheat, $657,657,000; that of vegetables, $216,257,000; that of tobacco, $104,304,000.

The relative rank of the first nine States in regard to value of crops showed that Illinois led with a total valuation for all farm crops of $372,000,000; Iowa was second with $315,000,000; Texas third with $298,000,000, followed by Ohio with $230,000,000; Georgia, $227,000,000; Missouri, $221,000,000; Kansas, $215,000,000; New York, $209,000,000, and Indiana, $204,000,000.

The State of Illinois ranked first in its production of corn, followed by Iowa and Missouri in the order named. New York ranked first in the production of hay and forage, followed by Iowa and Wisconsin. Texas ranked first in the production of cotton, followed by Georgia and Mississippi. North Dakota was first in the production of wheat, followed by Kansas and Minnesota. Illinois was first in the production of oats, followed by Iowa and Minnesota. New York led in the production of vegetables and Ohio was second. North Carolina ranked first in the production of forest products on farms (timber, lumber, etc.), followed by New York and Virginia. New York was first in the production of potatoes, with Pennsylvania second and Maine third. Kentucky ranked first in the production of tobacco; North Carolina second and Virginia third. Minnesota ranked first in the production of barley, followed by California and Wisconsin. New York also ranked first in the production of apples, with Michigan second and Pennsylvania third.

A summary of the relative rank of the States in these eleven leading farm crops shows that New York ranked first in four; Illinois first in two, with Texas, North Dakota, North Carolina, Kentucky and Minnesota ranking first in one each. Iowa ranked second in three of these above-mentioned crops, with Georgia, Kansas, Ohio, New York, Pennsylvania, North Carolina, California and Michigan ranking second in one each. Minnesota, Wisconsin and Virginia each ranked third in two of these crops, with Missouri, Mississippi, Pennsylvania and Maine third in one each.

RANK OF COUNTIES BY VALUE OF CROPS.

(Report of Bureau of Census, March 25, 1914.)

Los Angeles County, Cal., took the first rank as regards value of crops of all the 2,950 counties of the United States, according to the final report on the census of agriculture, 1910. Lancaster County, Pa., ranked second as regards value of the production of crops; McLean County, Ill., was third; Whitman County, Wash., fourth; Livingston County, Ill., fifth; Iroquois County, Ill., sixth; La Salle County, Ill., seventh, and Aroostook County, Me., eighth.

The valuation (at the farm) of the crops raised in Los Angeles County, Cal., according to the census, was $14,720,900; Lancaster County, Pa., $13,059,600; McLean County, Ill., $12,811,500; Whitman County, Wash., $12,540,700; Livingston County, Ill., $11,377,300; Iroquois County, Ill., $10,607,800; La Salle County, Ill., $10,222,200, and Aroostook County, Me., $10,151,000. The total valuation of the crops raised in these eight counties was $95,491,000, or about 2 per cent. of the total valuation of all crops raised in the United States, which was $5,487,161,000.

The principal crops raised in Los Angeles County in the order of their value were fruits, etc., hay and forage, live stock, dairy products, etc., and vegetables; of Lancaster County Pa., corn, wheat and oats, and live stock and dairy products; of McLean County Ill.; Whitman County, Wash.; Livingston County, Ill., and La Salle County, Ill., corn, wheat, oats and cereals, and of Aroostook County, Me., potatoes and vegetables. The principal crops of the United States, in the order of their value, were the cereals, corn, wheat, oats, etc., hay and forage, and cotton.

Some interesting data are presented by the figures for the value per acre and per capita of the crops raised in these eight banner counties of the United States. The figures for Los Angeles County show that the total value of the crops raised there averaged $35 per acre and $29 per capita (the city of Los Angeles with a population of 320,000, being within Los Angeles County, is the chief reason for the low rate per capita); for Lancaster County, Pa., $28 per acre and $78 per capita; for McLean County, Ill., $18 per acre and $188 per capita; Whitman County, Wash., $14 per acre and $377 per capita; Livingston County, Ill., $18 per acre and $281 per capita; Iroquois County, Ill., $16 per acre and $298 per capita; La Salle County, Ill., $17 per acre and $113 per capita, and Aroostook County, Me., $23 per acre and $136 per capita. The corresponding crop value figures (at the farm) for the United States for the same year were $16 per acre and $60 per capita.

WOOL IN THE UNITED STATES.

Wool of Classes I. and II. are used for the manufacture of cloths, dress goods, and similar fabrics. Domestic wools are of these two classes. Class III. wools are used principally in the carpet manufacture, and are practically not grown in the United States. The domestic wool shown in the above table is the quantity in its greasy state as shorn from the sheep. Fleece wool is wool shorn from living sheep. Pulled wool is wool removed from the skin of slaughtered animals.

Reduced to the scoured condition fit for use in manufacture, the annual production and total value based on the price in Boston in October of each year for the years 1903-1914, inclusive, are as follows:

Year.	Fleece and Pulled. Scoured.	Total Value.	Value per Pound. Fleece.	Value per Pound. Pulled.	Year.	Fleece and Pulled. Scoured.	Total Value.	Value per Pound. Fleece.	Value per Pound. Pulled.

Spain	116,089,000	112,401,000	Totals	3,362,299,000	3,774,129,000

The rye crop of principal countries in 1914 was (in bushels): United States, 42,779,000; Germany, 410,478,000; Austria-Hungary, 145,203,000; Russia (73 governments), 909,982,000; France, 50,000,000; Spain, 23,950,000.

The barley crop of the world in 1914 (in bushels) was 1,388,000,000; oat crop, 4,192,000,000

WORLD'S CROPS

In September, 1915, the International Institute of Agriculture at Rome, Italy, announced its estimates of world-crop production as follows.

Wheat, 4,062,567,000 bushels, total production in twenty-five countries.

Rye, 1,896,594,000 bushels, total production in twenty countries.

Barley, 1,582,434,000 bushels, total production in twenty-four countries.

Oats, 4,858,663,000 bushels, total production in twenty-three countries.

Corn, 3,803,577,000 bushels, total production in sixteen countries, comprising the following ten countries given in relative order of importance in production: United States, 2,984,950,000 bushels; Hungary, 196,674,000 bushels; Italy, 118,104,000 bushels; Mexico, 115,407,000 bushels; Roumania, 110,230,000 bushels; Russia in Europe (53 governments), 74,803,000 bushels; Egypt, 70,921,000 bushels; Bulgaria, 32,754,000 bushels; Spain, 27,325,000 bushels, and France, 21,330,000 bushels.

Rice (rough), 2,338,446,000 pounds, total production of the United States and Italy. The crop of Italy is estimated at 1,168,438,000 pounds.

The September issue of the institute's "Bulletin of Agricultural and Commercial Statistics" estimates the total beet-sugar production in thirteen countries for 1913-1914 as 9,389,000 short tons, or 99 per cent. of the preceding year (1912-1913). This production is expressed in terms of "raw" sugar.

Data for 1914-1915 not available when ALMANAC was printed.

WHEAT HARVEST CALENDAR.

January—Australia, New Zealand, Chile, Argentina.

February and March—Upper Egypt, India.

April—Lower Egypt, India, Syria, Cyprus, Persia, Asia Minor, Mexico, Cuba.

May—Texas, Algeria, Central Asia, China, Japan, Morocco.

June—California, Oregon, Mississippi, Alabama, Georgia, North Carolina, South Carolina, Tennessee, Virginia, Kentucky, Kansas, Arkansas, Utah, Colorado, Missouri, Turkey, Greece, Italy, Spain, Portugal, South of France.

July—New England, New York, Pennsylvania, Ohio, Indiana, Michigan, Illinois, Iowa, Wisconsin, Southern Minnesota, Nebraska, Upper Canada, Roumania, Bulgaria, Austria, Hungary, South of Russia, Germany, Switzerland, South of England.

August—Central and Northern Minnesota, Dakotas, Manitoba, Lower Canada, British Columbia, Belgium, Holland, Great Britain, Denmark, Poland, Central Russia.

September and October—Scotland, Sweden, Norway, North of Russia.

November—Peru, South Africa.

December—Burmah, New South Wales.

BIRD CENSUS.

During the Summer of 1914 the Biological Survey of the United States Department of Agriculture took initial steps toward a census of the birds of the United States for the purpose of ascertaining approximately the number and relative abundance of the different species. In view of the recognized value of birds to agriculture, such information cannot fail to be of great value.

One of the most abundant birds in the United States, possibly the most abundant bird, is the robin. It is also one of the most sociable, and in the Northeastern part, where it is most abundant, it commonly nests close to farm buildings, but almost never in extensive woods.

No other bird is anywhere near as abundant as either the robin or the English sparrow, but several others are common enough to make their total numbers run well into the millions For every 100 robins reported in the 1914 census there were 49 catbirds, 37 brown thrashers, 28 house wrens, 27 kingbirds, and 26 bluebirds. This last number is particularly gratifying because only a few years ago nearly the whole bluebird population of the Eastern States was destroyed by an unusually severe Winter. Since then the birds have been gradually recovering from the catastrophe, and this season's census shows that there are now several million bluebirds in Northeastern United States.

This preliminary census shows that the most abundant bird on farms of the Northeastern States is the robin; that the next is the English sparrow, and that following these are the catbird, the brown thrasher, the house wren, the kingbird, and the bluebird, in the order named.

PRINCIPAL CEREAL CROPS IN THE UNITED STATES.

* The word "Census" in this table refers in all cases to Census of 1910. *a* Not including rice. *b* Included in orchard products. *c* Including wax. *d* $656,301,246 was the aggregate value of milk, butter, and cheese by the Census of 1910. *e* Not including peanuts. *f* Based on the export value of refined for year ended June 30, 1915. *g* Louisiana only. *h* Made in factories. The product on farms and plantations in 1909 was 4,153 gallons, valued at $1,710. *j* Farm price November 15, 1914. *k* Farm price December 1, 1914. *m* Farm price August 15, 1914. *n* Farm price June 15, 1914.

The Census of 1910 gives the following farm statistics for the United States: Farms, total number, 6,361,502; total acres in farms, 878,798,325; improved acres in farms, 478,451,750; value of land in farms, $28,475,674,169; value of buildings on farms, $6,325,451,528; value of implements and machinery on farms, $1,265,149,783; value per acre of land and buildings, $39.60; value per acre of land alone, $32.40. Value of wealth produced on farms in 1914, estimated by Secretary of Agriculture, $9,872,936,000.

DOMESTIC ANIMALS IN THE UNITED STATES.

(From a Report of the Department of Agriculture.)

DOMESTIC ANIMALS.	ON FARMS (1915). Number.	ON FARMS (1915). Value.	DOMESTIC ANIMALS.	ON FARMS (1915). Number.	ON FARMS (1915). Value.
All domestic animals	198,577,000	$5,969,253,000	Mules	4,479,000	$503,271,000
Milch cows and other cattle	58,329,000	$2,413,714,000	Sheep	49,956,000	224,687,000
Horses	21,195,000	2,190,102,000	Swine	64,618,000	637,479,000

By Census of 1910 there were on farms and ranges in United States 61,803,866 neat cattle, cows, bulls, etc., valued at $1,499,523,607; horses and colts, 19,833,113, valued at $2,083,588,195; mules, 4,209,769, valued at $525,391,806; asses and burros, 105,698, valued at $13,200,112; sheep and lambs, 52,447,861, valued at $232,841,585; swine, 58,185,676, valued at $399,338,308; goats, 2,915,125, valued at $6,176,423.

Wisconsin	70	31,554	12,290,882				
Minnesota	65	16,629	7,176,472	Total	6,616	3,103,935	$1,357,707,900

The following was the statement of receipts and expenditures by local associations in 1914:

Receipts: Cash on hand January 1, 1914, $36,401,232; weekly dues, $293,035,872; paid-up stock, $39,391,664; deposits, $77,327,808; loans repaid, $249,244,568; interest, $78,935,496; premium, $4,214,392; fines, $1,171,032; pass books and initiation $787,304; borrowed money, $106,087,560; real estate sold, $6,185,960; miscellaneous receipts, $30,274,816; total receipts, $923,057,704.

Disbursements: Pass book loans, $31,187,824; mortgage loans, $341,637,008; stock withdrawals, $251,626,328; paid-up stock withdrawals, $36,004,272; deposit withdrawals, $72,742,920; expenses, $8,263,384; borrowed money repaid, $101,152,024; interest, $2,917,656; real estate purchased, $8,541,256; miscellaneous disbursements, $31,955,280; cash on hand, January 1, 1915, $37,029,752; total disbursements, $923,057,704.

The officers of the league: *President*—Herbert W. Pinkham, Quincy, Mass. *First Vice-President*—George F. Gilmore, Omaha, Neb. *Second Vice-President*—L. L. Rankin, Columbus, Ohio. *Third Vice-President*—E. L. Keesler, Charlotte, N. C. *Treasurer*—Joseph K. Gamble, Philadelphia, Pa. *Secretary*—H. F. Cellarius, Cincinnati, Ohio; *Assistant Secretary*—Mark D. Rider, Chicago, Ill.

TEA, COFFEE AND COCOA.

(Compiled by the Bureau of Foreign and Domestic Commerce, Department of Commerce.)

Coffee—Sources of supply in 1913. Exports from coffee-growing countries in pounds (from the Year Book of the Department of Agriculture):

Brazil	1,754,973,000	United States	52,905,000
Central America	195,388,000	British India	22,073,000
Venezuela	142,016,000	Jamaica	10,034,000
Colombia	123,442,000	Other countries	62,686,000
Dutch East Indies	75,179,000		
Hayti	57,594,000	Total	2,550,049,000
Mexico	53,759,000		

Consumption of leading countries, in pounds:

United States (1915)	1,055,089,000	Sweden (1913)	75,455,000
Germany (1913)	362,084,000	Italy (1914)	61,839,000
France (1914)	254,955,000	Denmark (1914)	31,967,000
Austria-Hungary (1913)	130,952,000	United Kingdom (1914)	28,846,000
Netherlands (1913)	120,029,000	Russia (1913)	27,862,000
Belgium (1913)	93,250,000	British South Africa (1914)	25,820,000

Imports of coffee into the United States, year ended June 30, 1915, were: From Brazil, 773,400,315 pounds, value $65,492,280; Colombia and Venezuela, 183,540,589 pounds, value $21,455,432; Central America, 75,350,258 pounds, value $8,631,967; Mexico, 52,706,120 pounds, value $6,898,161. The remainder came in smaller quantities from other countries, with 3,191,274 pounds of domestic coffee from Hawaii and 4,159,893 pounds from Porto Rico.

Tea—Sources of supply: Production of the principal tea-growing countries in pounds (figures for China, Ceylon, and Java show exports only):

British India (1913)	307,250,000	Java (1914)	71,449,000
China (1914)	199,440,000	Japan (1913)	71,036,000
Ceylon (1913)	191,509,000	Formosa (1912)	29,838,000

Consumption of leading countries, in pounds:

United Kingdom (1914)	317,664,000	Netherlands (1913)	12,044,000
Russia (1913)	166,064,000	Germany (1913)	9,414,000
United States (1915)	92,174,000	New Zealand (1913)	7,069,000
Canada (1915)	40,831,000	France (1914)	4,188,000
Australia (1913)	35,951,000	Austria-Hungary (1913)	3,571,000

Imports of tea into the United States during the year ended June 30, 1915, were 96,987,942 pounds, valued at $17,512,619. Of this 43,869,012 pounds were imported from Japan and 23,100,548 pounds from China.

Cocoa—World's production of cocoa, 1914, in pounds: Gold Coast, 119,367,000; Ecuador, 93,328,000; Brazil, 88,879,000; St. Thomas (Portuguese), 69,179,000; Trinidad, 65,074,000; Santo Domingo, 50,052,000; Venezuela, 28,881,000; Grenada, 13,239,000; all other countries, 81,359,000. Total production, 609,358,000.

Consumption of leading countries, in pounds: United States, 163,978,000; Germany, 109,585,000; Netherlands, 70,757,000; United Kingdom, 64,018,000; France, 62,038,000; Switzerland, 22,218,000; Austria-Hungary, 16,863,000; Spain, 15,238,000; Belgium, 13,589,000; all other countries, 41,311,000. Total consumption, 579,595,000. (Data from the "Gordian.")

Imports of crude cocoa into the United States in the fiscal year 1914-15 amounted to 192,306,634 pounds, valued at $22,893,241. Santo Domingo furnished 46,620,464 pounds and the British West Indies 40,728,851 pounds of the imports.

THE MORRIS PLAN.

THE Morris Plan of industrial loans and investments—named for its originator, Arthur J. Morris—has been in operation in Norfolk, Va., since March, 1910, and to-day is operated in about thirty other cities throughout the country. Loans are usually made in the amount of $50 or multiples thereof. They are based on character and earning capacity, and are secured only by the borrower's note indorsed by two co-makers. If a loan is granted a small fee is charged toward the cost of investigation, and the note is discounted at the legal rate of interest. At the same time the borrower subscribes for one or more of the lending company's certificates of investment for an amount equal to his loan, and in purchase thereof pays $1.00 a week for fifty weeks on each $50 borrowed. At the end of the year he can cash in his certificate and with the money thus obtained redeem his note. To encourage the habit of saving, Morris Plan companies sell certificates of investment, either for cash or on the instalment plan, to others than borrowers. These certificates begin to bear interest at 4 per cent. when twenty-five payments have been made, and at 5 per cent. when they are full paid. Holders of interest-bearing certificates can borrow on them, without indorsements or other securities, an amount equal to the total payments they have made in purchase of the certificates.

At the close of the year 1915 over $12,500,000 had been lent to more than 100,000 borrowers on the Morris Plan in sums averaging less than $125. The subscribed capital of Morris Plan companies exceeds $3,000,000. The largest auxiliary institution is the Morris Plan Company of New York (Equitable Building, 120 Broadway), of which Henry R. Towne is President.

These companies are organized throughout the United States by the Industrial Finance Corporation (52 William Street, New York), which has a subscribed capital of $1,500,000. Officers—Clark Williams, President; Arthur J. Morris, Vice-President; Charles H. Sabin, Treasurer; Joseph B. Gilder, Secretary.

FINANCIAL REPORTS OF THE PRINCIPAL EXPRESS COMPANIES.

1902	4,079,742	6,913,504	10,993,346	1908	6,917,663	7,002,474	13,920,137	1914	9,865,016	8,908,470	18,773,486

The production of sugar in 1913-14 by sugar-growing countries, in tons of 2,240 pounds, as reported by Willett & Gray, was:

COUNTRIES.	Cane Sugar	COUNTRIES.	Cane Sugar	COUNTRIES.	Beet Sugar
Louisiana (State)	261,337	Java	1,345,230	United States	655,298
Porto Rico	325,000	Hawaii	550,925	Germany	2,719,759
Cuba	2,597,732	Queensland	235,000	Austria	1,685,443
British West Indies	119,251	Mauritius	241,990	France	781,020
Hayti and S. Domingo	105,778	Demerara	101,725	Russia	1,740,000
Peru	176,671	Argentina	280,319	Belgium	226,200
Brazil	203,394	Philippines	225,000	Holland	229,257

Beet sugar production in the United States in 1913-14, by States, in tons of 2,240 pounds: Michigan, 109,297; Wisconsin, 16,964; Colorado, 203,910; Utah, 51,097; Idaho, 26,446; California, 151,203; Nebraska, 25,845; Ohio, 25,000; all others, 45,536. Total, 655,298 tons.

CONSUMPTION OF SUGAR.

Licht's estimate of consumption of sugar of all kinds in various countries in 1913-14 per capita in pounds was: Germany, 45.13; Austria, 29.17; France, 43.85; Spain, 14.19; England, 93.37; Switzerland, 73.55; United States (W. & G.), 84.29; Russia, 25.43; Netherlands, 50.09; Denmark, 95.57; Italy, 11.68; Belgium, 36.08; Turkey, 21.93; Sweden, 57.73; Norway, 46.64.

The consumption of sugar in the United States in the calendar year 1914, estimated by Willett & Gray, of New York, was:

Imported (including 510,385 tons Hawaiian, 274,149 Porto Rican, and 120,887 Philippine sugar)	2,972,333	Domestic beet	624,298
Domestic, manufactured from imported molasses, U. S. maple, etc	20,200	Domestic total	788,494
Domestic cane	143,996	Total product consumed in the U. S. or 84.29 pounds per capita.	3,760,827

1911	6,533,436	1912	3,500,000	1909 (estimate)	6,000,000

COAL PRODUCTION.

AREA of coal fields in the United States, 450,839 square miles, including 89,482 square miles supposed, but not definitely known, to contain usable coal, and 28,470 square miles in which the coal lies under cover 3,000 or more feet in thickness. Estimated available supply at close of 1913 (short tons), 3,538,506,328,300. Later official report not published.

In regard to the coal supplies of the countries outside of the United States, the Geological Survey does not know of any official estimates, with the exception of those of Great Britain, which have been placed by the Royal Commission of Coal Supplies at approximately 180,000,000,000 short tons. A statement by the Secretary of the Bituminous Coal Trade Association places the German supply at 164,344,000,000 short tons; Canada's known supplies at 100,000,000,000 short tons; Japan at 50,000,000,000 short tons. Estimates in short tons for the other countries of Europe are as follows: France, 25,000,000,000; Austria-Hungary, 30,000,000,000; Belgium, 20,000,000,000; Spain, 4,000,000,000.

The same authority places the contents of the Chinese fields at 1,500,000,000,000 short tons. His estimates of the areas in square miles of the countries outside of the United States are as follows: China, 232,500; Canada, 65,000; India, 35,000; New South Wales, 24,000; Russia, 20,000; Great Britain, 12,000; Spain, 5,500; Japan, 5,500; France, 2,500; Austria-Hungary, 1,800; Germany, 1,700; Belgium, 500; Siberia, Central Asia, and Africa, 180,000.

A monograph of the Coal Resources of the World was compiled by the Executive Committee of the Twelfth International Congress of Geology, which met at Toronto, Canada, August 7 to 14, 1913. The total resources are estimated at 7,397,533 million tons, of which 4,000,000 million tons are bituminous, 3,000,000 million tons brown coal, and the remainder anthracite.

The world's annual production of coal in short tons in countries approximating 1,000,000 tons or more are as follows, with the year in parentheses: United States (1914) 513,525,477, Great Britain (1914) 297,698,617, Germany (1914) 276,594,952, Austria-Hungary (1913) 59,647,957, France (1913) 45,108,544, Russia (1913) 35,500,674, Belgium (1913) 25,196,869, Japan (1914) 21,700,572, China (1913) 15,432,200, India (1913) 18,163,856, Canada (1914) 13,597,982, New South Wales (1914) 11,644,476, Spain (1913) 4,731,647, Transvaal (1913) 5,225,036, Natal (1913) 2,898,726, New Zealand (1913) 2,115,834, Holland (1913) 2,064,608, Asiatic Russia (1910) 1,371,261, Chile (1913) 1,362,334, Queensland (1914) 1,180,805, Mexico (1912) 982,396. The total world's production in 1911 was approximately 1,310,000,000 short tons, in 1912 approximately 1,374,550,000 tons, in 1913 approximately 1,477,755,000 tons, and it is estimated that in 1914 the total decreased to about 1,345,322,000 short tons. The United States in 1914 contributed 38 per cent., Great Britain 22 per cent., and Germany 20 per cent. In 1914 the United States decreased its production approximately by 56,000,000 tons, or 10 per cent., Great Britain by 24,000,000 tons, or 7 per cent., and Germany by 11,000,000 tons, or 4 per cent. Great Britain exceeded Germany's production in 1914 by 27,000,000 tons.

COAL PRODUCTION OF THE UNITED STATES, 1914 (TONS OF 2,000 POUNDS).

* Production is for calendar year preceding the fiscal year. † Export statistics for the fiscal years ending June 30. ‡ Residuum—tar, pitch, and all other from which the light bodies have been distilled. In 1905 this amounted to 48,349,362 gallons, in 1906 to 75,031,824 gallons, in 1907 to 65,228,009 gallons, in 1908 to 70,581,822 gallons, in 1909 to 103,188,033 gallons, in 1910 to 124,055,263 gallons, in 1911 to 123,398,188 gallons, in 1912 to 168,339,478 gallons, in 1913 to 348,043,493 gallons, in 1914, 588,513,450 gallons, and in 1915, 382,884,848 gallons.

Figures of production furnished by the United States Geological Survey, exports compiled from the Report of Bureau of Foreign and Domestic Commerce, Department of Commerce.

384,667,550 barrels (of 42 gallons) of petroleum, according to the United States Geological Survey, were produced in the world in 1913. Of this amount, 248,446,230 barrels were produced in the United States, 62,834,356 in Russia, and the remainder was distributed as follows: Galicia, 7,818,130; Dutch East Indies, 11,966,857; Roumania, 13,554,768; India, 7,930,149; Mexico, 25,902,439; Japan, 1,942,009; Peru, 2,133,261; Germany, 995,764; Canada, 228,080; Italy, 47,256; other countries, 868,251.

WORLD'S PRODUCTION OF PETROLEUM.

(In 1913 and 1914 and total production 1857-1914, with percentage of production by countries, in barrels of 42 gallons.)

PRODUCTION OF COPPER, TIN, AND ZINC.

The production of copper in the world in 1913, stated in pounds, was as follows: United States, 1,224,484,098 (for 1914 figures see below); Germany, 55,776,380; England, 661,380; Italy, 3,527,360; Norway, 19,400,480; Austria, 8,377,480; Russia, 74,735,940; Sweden, 2,204,600; Spain and Portugal, 120,591,620; Turkey, 1,102,300; Hungary, 661,380; Servia, 14,109,440; Canada, 76,975,832; Mexico, 116,402,880; Argentina, 220,460; Bolivia, 8,157,020; Chile, 88,184,000; Peru, 56,658,220; Venezuela, 2,865,980; Cuba, 7,495,640; Cape Colony, 7,275,180; Namaqualand, 5,511, 500; other Africa, 37,698,660; Japan, 161,376,720; Australia, 104,277,580 Grand total, 2,198,732,130. (Later foreign figures not available.)

The copper production of the United States in 1914 was distributed as follows (figures are in pounds): Alaska, 24,985,847; Arizona, 382,449,922; California, 29,784,173; Colorado, 7,316,066; Idaho, 5,875,205; Maryland, 12,248; Michigan, 158,009,748; Missouri, 53,519; Montana, 236,805,845; Nevada, 60,122,904; New Mexico, 64,204,703; North Carolina, 19,712; Oregon, 5,599; Pennsylvania, 422,741; Tennessee, 18,661,112; Texas, 34,272; Utah, 160,589,660; Virginia, 17,753; Washington, 683,602; Wisconsin, 10,098; Wyoming, 17,082; undistributed, 55,381. Total, 1,150,137,192.

The world's tin deliveries for 1914, which approximate both consumption and production, as compiled by the New York Metal Exchange, were as follows (figures are short tons): London, 23,335; Continent of Europe, 22,747; Cornwall (production), 6,720; Bolivia (shipments), 21,000; South Africa (shipments), 5,600; China (shipments), 2,128; United States (receipts), 48,505 Total, 130,035. Deducting 9,632 tons of Straits, etc., tin from Continent, English, etc., from United Kingdom arrived in the United States, makes the total marketed product approximately 120,403 short tons.

The production of zinc (spelter) in the world in 1913, in short tons, was as follows: Australia, 4,105; Austria and Italy, 23,928; Belgium, 217,928; France and Spain, 78,289; Germany, 312,075; Great Britain, 65,197; Holland, 26,811; Norway, 10,237; Poland, 8,389; United States, 346,676. Total, 1,093,635. (Later foreign reports not available because of war.) United States for 1914, 353,049 short tons.

Figures for Copper, Tin, and Zinc were furnished by the United States Geological Survey.

EXPLOSIVES IN THE UNITED STATES.

(Report of United States Bureau of Mines.)
